The Danish software market : strategic partners for Canada

Ottawa : External Affairs and International Trade Canada, 1992. 37 p. *On cover: 1992, Canada, Europe*
MICROLOG 93-01804 1 fiche

In 1991, External Affairs and International Trade Canada published a report titled 'The Software Market in Denmark.' It provided practical guidelines on how to conduct business in Denmark and the EEC, case studies on 13 prominent Danish software publishers to identify the potential for trade, strategic partnering and joint venture arrangements between those Danish companies and Canadian software firms. This report is a follow-up report to the first report. It is a systematic follow-up with the Danish software companies profiled in the first report. It also contains profiles of several Danish software vendors which were not included in the first report.

Darlington N12 investigation : OHRD one-inch diameter model header acoustics and piping fixes

by J.T. Urbanowicz and S.L. Barreca Toronto : Ontario Hydro, Research Division, 1992. iii, 130 p. : ill. (Report ; no. 92-241-K)
MICROLOG 93-04390 2 fiche

A small scale model of Darlington pressure heat transport (PHT) system was built at Ontario Hydro Research, using piping of one-inch nominal diameter, to simulate acoustic behaviour of the station. Large amplification of the source signal was demonstrated and the standing wave structure was described for both 150 Hz and 210 Hz forcing frequency. Several proposed fixes were tested to assess their effectiveness and to fine tune computer models.

Darlington N12 investigation full-scale acoustic tests of PHT piping design solutions

by S.L. Barreca and J.T. Urbanowicz. Toronto : Ontario Hydro, Research Division, 1992. iii, 49 p. : ill. Bibliogr. (Report ; no. 92-218-K)
MICROLOG 93-04374 1 fiche

In support of the Darlington N12 investigation, a program was begun to address Pressurized Heat Transport (PHT) piping design solutions. This report describes the computer modelling and laboratory testing of a piping change that should reduce pump vane passing pressure pulsations to an acceptable level. Computer modelling was performed on a full-scale loop, the Darlington PHT system, and a one inch PHT model test loop. Laboratory testing was conducted on the one inch PHT model, the full-scale test loop, and an air model loop at the University of Toronto. This report deals only with the full-scale tests that were conducted between 22 April and 10 June 1992. Four piping fixes were initially presented and after investigating aspects such as ease and cost of installation, effectiveness, and safety concerns, two designs were chosen for full-scale testing. The existing loop was used as is for baseline tests. A quarter wavelength branch was then installed on each pump discharge and resonators replaced the quarter wavelength branches. A seven-van pump impeller was used for all tests.

DART Manager Graphics enhancements : Vancouver computerized scheduling/brokerage demonstration project

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by Bruce Chown. Vancouver, B.C. : BC Transit, 1992. ix, 16 p.
MICROLOG 93-03569 1 fiche

In March 1987, the Transportation Development Centre of Transport Canada and British Columbia Transit completed a jointly-sponsored demonstration of two computerized scheduling systems for transit services for persons with disabilities. One of the systems, called DART Manager Graphics, operated on a local area network and used low-cost graphical display technology to improve the scheduling/dispatching function but needed more work to make it more user-friendly. In October 1987, Transport Canada and BC Transit agreed to undertake an extension of the original project to improve and enhance the software. This

Data collection, child care program in the Province of New Brunswick : report

for the Office of Childhood Services. Fredericton : Applied Management Consultants, 1992. vi, 276 p. Bibliogr. *CSI 46173.201.*
MICROLOG 93-03950 3 fiche

The study had two phases. Phase one was to develop a listing of all the material to be gathered in the survey, design the questionnaires to gather the data, the report formats and methods of information transfer and analysis, identify all the child care locations across the province and carry out a limited data collections exercise on an experimental basis to ensure the success of the next phase. Phase two was to carry out the full scale data collection exercise designed in the first phase and present the data into the previously determined formats. This report contains the results of the phases of the project.

Data from the commercial fisheries of Dauphin Lake, Manitoba, 1982-92

by J.A. Babaluk, L.K. Gould and J.F. Craig. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1992. iv, 28 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 882) *This is the 76th data report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6465
MICROLOG 93-03474 1 fiche

In 1982, a cooperative fisheries rehabilitation research program was initiated on Dauphin Lake, Manitoba to develop and test new biological and hydrological techniques for the rehabilitation of fisheries in the freshwaters of Canada. The program concentrated on the rehabilitation of the walleye, one of the most economically important freshwater fish species in Canada. As part of the rehabilitation research program, a study was initiated in 1982 to monitor the Dauphin Lake commercial fisheries. This report presents catch and biological data of fish collected from 1982-92.

Data from the commercial fishery for lake whitefish *Coregonus clupeaformis* (Mitchill), on Great Slave Lake, Northwest Territories, 1988, 1989 and 1990

by G. Low and C.J. Read. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1993. v, 54 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 898) *This is the 80th data report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6465
MICROLOG 93-08660 1 fiche

In 1971, the Dept. of Fisheries and Oceans began a long term stock assessment and monitoring program designed to collect information considered essential for the sound management of the Great Slave Lake commercial fishery. In order to meet these objectives, a three-component field study was implemented including fish plant sampling, fishery observations and experimental gillnetting. Two components, fish plant sampling and fishery observations, were carried out during these three years. This report summarizes, in tabular form the data gathered from each of these two components.

Data selection for fast projection techniques : a comparative study of direction finding performance (U)

by M. Toulgoat and R.M. Turner. Ottawa : Defence Research Establishment Ottawa, 1992. vii, 26 p. : ill. Bibliogr. (Report ; no. 1135)
MICROLOG 93-02843 1 fiche

This report describes simulation studies of fast projection techniques for direction finding of jammer signals. These techniques are based on a data selection criterion applied directly to the data vectors obtained at the output of an antenna array. The selected data vectors are used in fast projection algorithms to estimate the jamming signal subspace and then to calculate the directional spectrum. Three such algorithms are described ranging from the fastest but least effective to the most computationally demanding but most effective. Relative performance is compared with that of the MUSIC technique for test cases that evaluate the minimum resolution threshold achievable and the effect of the jammer strength relative to the receiver noise.

aquatic sciences ; no. 2149) ISSN 0706-6473
MICROLOG 93-00542 1 fiche

This report describes LOBDATA, a database designed for the efficient storage and retrieval of data related to the Scotia-Fundy lobster fishery, that uses ORACLE, a commercially available relational database management system. LOBDATA consists of a series of tables for data storage with closely related tables linked in forms for interactive data input. The forms allow input and update of catch and effort data from volunteer logbooks, and length frequency data from samples of the fishing catches. To retrieve data summaries or data subsets, a set of structured query language command files was developed that can be customized or new ones created. Data can be summarized and grouped by port, Lobster Fishing Area, or specified time period. This document emphasizes user features, although it also includes aspects of interest to database programmers.

Decrease in chemical contamination of American eels *Anguilla rostrata* captured in the Estuary of the St. Lawrence River

by P.V. Hodson...et al. Mont-Joli, Que. : Dept. of Fisheries and Oceans, Physical and Chemical Sciences Branch, Maurice Lamontagne Institute, 1992. ix, 57 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1876) *French ed. (Baisse de la pollution chimique des anguilles...) : 93-04253/1.* ISSN 0706-6457
MICROLOG 93-04234 1 fiche

American eels are catadromous, and grow to maturity in Lake Ontario and in tributaries to the St. Lawrence River. Concern for mass mortalities of adult eels, high levels of chemical contamination, and a recent decline of recruitment prompted a study of the role of contaminants in the health of eels, the role of eels as vectors of contaminants to Beluga whales, and the changes in contamination since an earlier large scale survey in 1982. Mercury, PCBs, mirex, and pesticide levels were measured in migratory adult eels purchased weekly between September and November 1990 from a fisherman in Kamouraska, Quebec. Similar analyses were conducted on two eel samples from fishermen in Cacouna and Saint-Irenee, and on a control eel sample from a small tributary of the north shore of St. Lawrence Estuary. Dioxins, furans, and PAH concentrations were also determined on a small number of fish.

Définition du domaine : mathématiques 3032

Fredericton : Ministère de l'éducation, Direction des programmes d'études, 1992. 28 p.
ISBN 1-55048-880-5
MICROLOG 93-06759 1 fiche

Cette définition du domaine sert à décrire et à organiser les éléments essentiels et représentatifs du programme de Mathématiques 3032. Elle correspond à une lecture du programme dans une perspective globale et synthétisée qui permet de répondre à la question: qu'est- il important d'évaluer chez l'élève qui a complété le programme de Mathématiques 3032? Elle a été préparée dans le but d'assurer la congruence entre ce programme d'études et l'instrument de mesure qui servira à l'évaluation sommative dans le cadre de la sanction des études. Le document est structuré de la façon suivante: énumération des principes à respecter lors de l'évaluation, lesquels découlent des orientations et des priorités du programme; identification et description des éléments de programme sur lesquels on compte juger de la compétence des élèves; et regroupement des éléments retenus dans le tableau des dimensions.

Degradation of normal Portland and slag cement concrete under load, due to reinforcement corrosion

by K.E. Philipose, J.J. Beaudoin and R.F. Feldman. Chalk River, Ont. : Atomic Energy of Canada Limited, Chalk River Laboratories, 1992. 16 p. : ill. Bibliogr. *At head of title: AECL research. Presented at the 4th CANMET International Conference.* ISSN 0067-0367 ISBN 0-662-20040-3
MICROLOG 93-03864 1 fiche

The majority of studies published on concrete-steel corrosion have been conducted on unstressed specimens, although structural concrete is subjected to substantial strain near the steel reinforcing bars that resist tensile loads, resulting in a series of microcracks. This report presents the initial results of an investigation to determine the effect of applied load and microcracking on the rate of ingress of chloride ion and corrosion of steel in concrete. Simple-supported concrete beam specimens were loaded to give maximum strain of about 600 ue on the tension face. Chloride ion ingress on cores taken from loaded specimens was monitored using energy-dispersive X-ray analysis techniques. Corrosion current and rate measurements using linear polarization electrochemical techniques were also obtained on the same loaded specimens. Variables investigated included two concrete types, two steel cover-depths, three applied load levels, bonded and unbonded rebars, and the exposure of tension and compression beam faces to chloride solution. One concrete mixture was made with type 10 Portland cement, the other with 75% blast-furnace slag, 22% type 50 cement, and 3% silica fume.

Delivery of six combustion venting training workshops and the design and production of an acrylic model home : final report

by W.D. Geddes. Ottawa : Canada Mortgage and Housing Corporation, 1992. 110 p.
MICROLOG 93-08695 2 fiche

In 1990 CMHC funded the development of a Combustion Spillage Training Module. The module was developed for field managers and service persons employed either by oil or gas utilities or independent heating system service contractors. Since the release of the training module, a number of other gas and oil utilities and other interest groups have expressed interest in the training module. The objectives of the project were to one, raise awareness among the utilities of the growing concern by researchers, builders and codes and standards officials regarding combustion spillage and the role utilities can play in addressing this concern; two, transfer lessons learned from almost a decade of CMHC research and field

Copies of these documents are available from:

Demand controlled ventilation : final report

prepared by Sheltair Scientific Ltd. and SAR Engineering Ltd. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1991. ix, 138 p. : ill.
MICROLOG 93-03116 2 fiche

Demand controlled ventilation (DCV) systems use computer control and electronic and biological sensors to minimize the air flow required by ventilating when and where needed to maintain indoor air quality. This report describes how DCV systems may reduce the environmental impact of housing, lower heating and cooling costs, and improve occupant comfort and health. The project was completed in five separate phases, including a literature survey, the preparation of a primer for home builders and system designers, extensive field research on five houses, computer simulations, and economic analysis. The results of the first two phases are presented in a separate report.

The Demand for money and the monetary policy process in Canada

by F. Caramazza, D. Hostland and S. Poloz. Ottawa : Bank of Canada, 1990. 58 p. Bibliogr. (Working paper ; 90-5) *Paper prepared for the conference, Understanding Velocity : new approaches and their policy relevance.*
MICROLOG 93-00886 1 fiche

This document addresses a number of issues associated with interpreting the dynamics of standard demand-for-money regressions, and provides some illustrative empirical estimates using data for Canada. This leads to a discussion of the potential roles that monetary aggregates generally, and the demand-for-money equation more specifically, might play in the process of monetary policy formulation. This paper may be seen as part of a larger, continuing effort at the Bank of Canada to determine whether there is a useful role for monetary aggregates in policy formulation.

par A. Blais et E. Gidengil. Toronto : Dundurn Press ; Montréal : Wilson & Lafleur, 1991. xxi, 277 p. Bibliogr. (Collection d'études ; vol. 17) *L'éd. anglaise (Making representative democracy work...) : 93-04455/3.* *CSI 22497.209F.* ISSN 1188-2751 ISBN 1-55002-136-2
MICROLOG 93-04454 4 fiche

Dans ce volume, on analyse et interprète en détail les résultats du sondage. On dissèque l'opinion publique sur une série de questions fondamentales liées au processus démocratique, comparant les résultats aux données d'enquêtes antérieures. On interprète également les résultats à la lumière de la théorie démocratique. L'étude s'attarde aux opinions exprimées à l'égard des valeurs fondamentales ayant une certaine incidence sur le système électoral, ainsi qu'à celles sur les politiciens, les partis et le rôle de l'argent en politique. Elle se penche de même sur les craintes populaires quant au risque de manipulation des dirigeants politiques et sur le degré de confiance des électeurs et électrices envers les politiciens et les partis politiques. L'étude analyse en particulier les points de vue de la population sur le financement des élections, les communications électorales (publicité, débats télévisés des chefs et couverture journalistique), ainsi que sur le processus de représentation.

Democratizing southern Africa : challenges for Canadian policy

by H. Adam and K. Moodley. Ottawa : Canadian Institute for International Peace and Security, 1992. ii, 392 p. Bibliogr. (Occasional papers ; no. 9) ISBN 0-662-19775-5
MICROLOG 93-01914 5 fiche

This analysis sketches the historical record of Canadian policy toward South Africa. It outlines some of the controversies and speculates about the functions and background of a surprisingly activist policy by a conservative government. It probes the competing political forces in the ongoing South African transition, assesses the prospect of democratic success or failure and describes the ambiguous impact of Canadian efforts on the recipients in the white and black communities. It also reflects on possible changes, new foci, or even withdrawal of Canadian involvement from the Southern Africa region of the post-apartheid era.

Le Déracinement des écoles normales : le transfert de la formation des maîtres à l'université

par T. Hamel. Québec : Institut québécois de recherche sur la culture, 1991. 231 p Bibliogr. (Documents de recherche ; no 31) ISSN 0823-0447 ISBN 2-89224-159-6
MICROLOG 93-03803 3 fiche

Le transfert de la formation des maîtres à l'université et son corollaire, l'abolition des écoles normales, représentent l'une des transformations fondamentales qu'a connue notre système de formation des enseignants depuis ses origines. La formation des maîtres, considérée à juste titre comme la clé de voûte de toute réforme éducative, est en effet au coeur des débats sur la crise de l'école. Ce document de recherche examine précisément cette question et se penche sur les titres suivants: une révolution pas très tranquille; le bouleversement et l'improvisation; le profil des formateurs de maîtres touchés par la réforme; le souvenir de la réforme, la trajectoire professionnelle; et, un second regard sur la réforme.

A Descent dual approach for linear bilevel programs

by Y. Chen, M. Florian and S. Wu Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. ii, 24 p. Bibliogr. (Publication ; no. 866) (Publication ; no. 843)
MICROLOG 93-05456 1 fiche

This paper focuses on an optimality criterion for the linear BLPP and a related solution procedure based on the exploitation of the dual structure of the linear bilevel programming problem (BLPP). A special bilinear program is constructed in the dual space and the characterization of an optimal solution of the linear BLPP is derived from properties of the optimal value of the bilinear program. A descent method is designed to solve the linear BLPP by solving a sequence of linear programs that implicitly searches the vertices of the dual polyhedron. The algorithm is shown to be finitely convergent.

Description of a data acquisition system for the measurements of EMP transient fields

by M. Dion. Ottawa : Defence Research Establishment Ottawa, 1992. viii, 38 p. Bibliogr. (Technical note ; no. 92-7)
MICROLOG 93-01771 1 fiche

This technical note describes a data acquisition system developed for the measurement of very fast transient electromagnetic fields generated during electromagnetic pulse (EMP) testing. The system consists of several high speed transient digitizers, all connected to a personal computer, that have the capability to simultaneously record on several channels the response of single-shot events. The overall system is controlled by a master program developed at DREO. The program, called DAQ, runs in an interactive environment, allowing easy manipulation of data and creation of new routines.

A Description of the social assistance system in Hamilton-Wentworth -- Update

originally prepared by Jane Opie ; in collaboration with Gloria DeSantis ; update by Caroline Ball. Hamilton, Ont. : Social Planning and Research Council of Hamilton and District, 1992 vi, 104 p. : ill. Bibliogr. *CSI 99250.003*
MICROLOG 93-04671 2 fiche (Available on fiche only)

This document discusses the basic goals of an effective social assistance system including adequacy, accessibility, and equity. It looks at current impediments to achieving these goals and new initiatives in Ontario to help reduce these impediments. It examines the social assistance system. It focuses on general welfare assistance, family benefits assistance, and the guaranteed annual income supplement for the aged. It also discusses poverty as a long term condition, the working poor, and the need for support programs.

Design and development of an expert advisory system for terminal weather forecasts, phase II

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by Frances de Verteuil...et al. Montreal : Centre de recherche informatique de Montréal, 1991. xiii, 257 p. : ill.
MICROLOG 93-06211 3 fiche

The goal of the STRATUS project is to design a prototype expert advisory system to assist meteorologists in the production of the low cloud portion of airport terminal weather forecasts. The system prototype is highly interactive and integrates numerical, physical, and heuristic methods to forecast low clouds. In addition to a flexible database that handles different types of meteorological data, it includes a number of data visualization and data transfer tools. This report summarizes the results of Phase 2, including the implementation and validations of the low cloud diagnostic module, the forecast terminal decoder/encoder module, the database module, the user interface, and the forecasting module. The report gives a summary of the work conducted, the areas investigated in detail, and any areas that warrant further investigation. It also includes the resources used and an evaluation of the results.

and Operating Conference
MICROLOG 93-06045 1 fiche

A network of remote hydrometeorological data gathering stations is being installed in the Himalayan and Karakoram ranges of northern Pakistan. This is part of a five year, four and a half million dollar project funded through the IDRC. The objective of the project is to improve the water management capability of the Water and Power Development Authority of Pakistan. This paper first describes the forecasting needs of WAPDA and studies carried out to locate test stations to obtain data for future design. It then describes the design for the remote stations, the selection of sensors and the selection of the transmission mode. Some of the unique design problems and proposed solutions are presented. Finally, the field problems encountered during the initial installations and the data received from the three stations presently in operation are discussed.

Design and testing of impressed current cathodic protection anodes for use on icebreaker hulls

by D.P.G. Peters. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1991. ix, 71 p. : ill.
MICROLOG 93-03104 1 fiche

This report outlines the design development, manufacture and testing of a new type of impressed current cathodic protection anode and anode attachment system specifically targeted for use in the extremely harsh environment found on the external hulls of icebreaking ships. The anodes, made from mixed oxide coated 2 mm thick titanium alloy, were installed and tested on three Beaufort Sea icebreaking ships. The anodes were monitored daily during operations and regular monthly reports were provided. At the end of the test period, the anodes on one of the ships was visually inspected by underwater video.

Design of a 165 MWe reheat coal-fired CFB boiler

by S. Fraser, B. Schaller and J. Darguzas. Montreal : Canadian Electrical Association, 1992 10 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06247 1 fiche

In October 1989 a contract was awarded for the design, supply and erection of a 165 megawatt reheat coal fired circulating fluidized bed boiler for the Point Aconi site in Nova Scotia, Canada. This order represented the largest capacity circulating fluidized bed (CFB) boiler sold at that time. The boiler design parameters, design arrangement and specific, unique design features such as the reheat system and reheat temperature control are presented A particular concern with the boiler design was the relative high chlorine content in the coal fuel. A test burn conducted on the coal and its results are discussed.

Detection of genetic polymorphism of cattle proteins : final report

by H. Tabel and G.J. Kraay. Regina : Saskatchewan Agriculture Development Fund, 1990. 8 p. Bibliogr. ISSN 0829-9455
MICROLOG 93-06774 1 fiche

Cattle differ in their natural resistance to disease. It would be desirable to identify genetic markers that would allow the prediction of resistance or susceptibility to infectious diseases. One important natural defence mechanism against infection is termed the alternative complement pathway, and consists of a number of proteins of the plasma bovine blood and on the surface of white blood cells. A study was carried out to develop techniques to detect genetic differences of these proteins that are associated with natural resistance to infectious diseases. A technique was developed for detecting genetic differences of bovine factor H. Methods for demonstrating genetic differences of conglutinin, a plasma protein, and a cell membrane protein were studied.

Determinants of the demand for home mortgage debt in Canada and the United States

by L.D. Jones. Ottawa : Canada Mortgage and Housing Corporation, 1991. 152 p. Bibliogr.
MICROLOG 93-02372 2 fiche

This study analyzes the determinants of the demand for home mortgage debt in Canada and the United States. It does so by formulating a model which allows debt demand to be decomposed into that portion derived from the demand for owner-occupied housing and a residual component interpretable as deriving from the demand for nonhousing assets. From this model the incidence and magnitude of households' demand for home mortgage debt to finance nonhousing assets is determinable.

Determination of mercury in fish tissue, part I : performance criteria

by D.E. King. Toronto : Environment Ontario, 1992. 38 p. : ill.
MICROLOG 93-03236 1 fiche

This review was initiated to determine whether performance criteria could be set for contract laboratory analysis of mercury in fish. In the early 1970s, a series of round-robin studies using samples of canned fish prepared for the purpose was initiated. These studies continued on a regular 4-month basis for the past 20 years, with 20-30 participants in the last few years. Each analyst is requested to provide triplicate measurements on two different days for each of four different samples. Laboratories participate on a voluntary basis and are not identified by name in the study reports. This review summarizes the performance of only those laboratories which provided results for each of 32 samples, submitted in eight sets of four samples each, between July 1987 and June 1991, to examine the possibility for setting performance criteria.

Determination of residential woodburning impacts in Ontario communities, phase I : source profile measurements

Concord Environmental Corporation. Toronto : Environment Ontario, Research and Technology Branch, Environmental Research, 1992. 214 p. : ill. Bibliogr
MICROLOG 93-08532 3 fiche

The increased use of residential wood combustion in Ontario and several other areas of North America has resulted in adverse air quality impacts in some areas. A recent literature review of such impacts and the legislative approaches directed at minimizing air quality impacts pointed to the need for the characterization of the organic and inorganic components in residential wood stove emissions from typical firewoods and stoves used in Ontario, and the conduct of an air monitoring study in selected wood burning communities in Ontario. The primary objectives of the testing is to obtain source profiles for three typical fire woods and wood stoves used in Ontario. This report describes the results of the source testing of emissions

Determination of the effect of slag on the heat development in large concrete pours using a computer interactive maturity system (CIMS) : a preliminary evaluation

by M.D.A. Thomas. Toronto : Ontario Hydro, Research Division, 1992 i, 27 p : ill. Bibliogr. (Report ; no. 91-318-K)
MICROLOG 93-02976 1 fiche

This study used a recently acquired computer interactive maturity system (CIMS) to determine the heat development characteristics of concretes with a range of slag replacement levels. The same system was then used to predict the temperature rise and distribution in a simulated pour using these concretes. To evaluate CIMS, the data were compared with measurements made using conduction calorimetry and a simulation carried out using the calorimetry data in conjunction with a software program that had previously been shown to accurately predict field situations.

Developing community housing policies : a guide for local government

Victoria : Ministry of Municipal Affairs, Recreation and Housing, 1992. 58 p Bibliogr. *On cover: Affordable housing builds strong communities.*
MICROLOG 93-09017 1 fiche

This guide has been prepared to assist local governments as they undertake the task of developing community housing policies and strategies. Its audience is people involved in setting community housing policy and defining steps for implementation: local elected representatives, local government staff, advisory commissions and committees with mandates in community housing issues. Sections of the guide cover why it is important for local governments to become involved in developing community housing policies, how they can do so in accordance with the requirements of Bill 20, what implementation actions they can take for affordable, rental and special needs housing policies, and where they can get assistance.

Development and testing of a prototype rock washer for cleaning oiled beach cobble

S.L. Ross Environmental Research Ltd. Ottawa : Environmental Studies Research Funds, 1991. v, 62 p. : ill. (Environmental Studies Research Funds report ; no. 120) ISBN 0-921652-21-6
MICROLOG 93-04920 1 fiche

While mechanical cleaning systems for contaminated sand beaches have been developed, it is more likely that an oil spill along Canada's shoreline will result in the contamination of rocky beaches. This study researched, designed, constructed, and tested a prototype moderate-capacity, stationary gravel/cobble washer system that could be used where the oil loading was too low for incineration or was inappropriate for placement in an incinerator. The prototype was to be built of easily-accessible materials as cheaply as possible, meeting set criteria of feed material size, simplicity, mechanical reliability, heli-portability, safety, throughput, manual loading, power requirements, washwater/solvent requirements, and recycling and oil separation.

The Development of a flowmeter for measuring ash recirculation rates in fluidized bed combustors

by M.F. Couturier. Ottawa : Energy, Mines an Resources Canada, CANMET, Energy Research Laboratories, 1991. 51 p. : ill. Bibliogr. *Contractor: University of New Brunswick. CANMET contract: 23440-09036-01-SS*
MICROLOG 93-00497 1 fiche

The ash recirculation rate is a key variable in the operation of fluidized bed combustors, although it is difficult to control because operators must rely on crude techniques such as measuring the pressure drop near the top of the combustor. This report describes the development of a flowmeter for measuring the ash recirculation rate in bubbling fluidized bed combustors. The operating principle of the flowmeter is based on estimating the solids flow from a heat balance around a heat exchanger located in the ash return line. The concept was tested by building a proto-type for the No 2 fluidized bed boiler at Canadian Forces Base Summerside in Prince Edward Island.

Development of a method for the determination of mono-, di-, and polyaromatics in middle distillates by supercritical fluid chromatography : final report

by B.J. Fuhr, L.R. Holloway and L.L. Klein. Edmonton : Alberta Research Council, Oil Sands and Hydrocarbon Recovery, 1991. v, 79 p. : ill. Bibliogr. *CANMET contract: 23440-8-9157-01-SQ*
MICROLOG 93-03437 1 fiche

In response to the oil industry's needs, a simple and fast method for the determination of total aromatics in heating oils and diesel fuels was developed using supercritical chromatography (SFC) with carbon dioxide, a single silica column, and a flame ionization detector (FID). While the total aromatic content of a fuel is generally considered the parameter responsible for soot production in combustion, studies have shown that certain types of aromatic molecules exhibit more dominant effects than others. This report describes the use of a switching valve to transfer the aromatics to an amino-modified silica column for aromatic ring separation after initial separation from the saturates on a silica column. The report describes the use of macrobore columns with switching and microbore columns with switching and pressure programming

Development of a red cotyledon lentil for Saskatchewan : final report

by A.E. Slinkard. Regina : Saskatchewan Agriculture Development Fund, 1989. 7 p. Bibliogr.
MICROLOG 93-05569 1 fiche

Canada is the second largest lentil producer in the world after Turkey, but it produces only yellow cotyledon cultivars. These are not saleable in the Near East market, a major market, because the people demand red split lentils, produced by Turkey. This project was conducted to develop a red cotyledon lentil similar in yield and performance to the yellow cotyledon lentil cultivar Eston. Seed of Eston was treated with the chemical mutagen sodium azide in 1980 and 40 red cotyledon seeds were found in several million seeds in the second and third generation after the treatment. These were increased over two years to produce enough seed for preliminary yield trials that were conducted for two years. Data were collected on seed yield, plant height, maturity, and 1000-seed weight in replicated tests at 34 station-years. This report provides the results of the station-yield tests.

The Development of bilingual proficiency from home to school : a longitudinal study of Portuguese-speaking children

by J. Cummins, J. Ramos and J. Lopes. Toronto : Ontario Institute for Studies in Education, 1989. 85 p. Bibliogr. *ONTERIS: ON05805.*
MICROLOG 93-01253 1 fiche

Describes the development of conversational and literacy-related skills in both English and Portuguese. It describes how Portuguese-background children in the early years of school develop proficiency in English and Portuguese conversational and academic skills and investigates the relationship between the development of proficiency in English and the proficiency levels that children have attained in Portuguese. It describes patterns of interaction in children's homes to their influence on the development of proficiency in each language. The findings are based on one-and-a-half hours of children's home interaction, recorded when children were in junior Kindergarten (JK) and tests designed to assess pre-literacy and reading skills. They showed a pattern of language from Portuguese to English beginning at JK and progressing to the point where most children were judged more proficient in English than in Portuguese by the end of grade one. This shift occurred even though Portuguese was still the primary language being spoken at home. A close relationship was observed between the development of Portuguese and English skills, both conversational and literacy-related.

Development of conversion efficient processes for plus 525C pitch to low boiling distillates : final report

by R.N. Pandey. Guelph, Ont. : Guelph Chemical Laboratories Ltd., 1992. vi, 307 p. : ill. Bibliogr. *CANMET contract: 23440-9-909101-SQ*
MICROLOG 93-04285 4 fiche

Hydroprocessing of Esso pitch (plus 525C fraction) was investigated using a continuous reactor system at various operating conditions. The catalysts studied included $ZnCl_2$, $SnCl_4$, SiO_2, Ni/W, Co/Mo, Zn/Cr, and H_3PO_4/SiO_2. The catalysts were characterized by surface area and acidity measurements. The gas and liquid products were collected and analyzed.

Development of correlational reasoning

by J.A. Ross and J.B. Cousins. Toronto : Ontario Institute for Studies in Education, 1990. 225 p. : ill., maps. *ONTERIS: ON06061.*
MICROLOG 93-02041 3 fiche

Summarizes one year's activities of a multi-year project to improve student acquisition of correlational reasoning skills. A substantial proportion of information presented to students is based on correlational inquiry, but students are rarely given instruction in solving correlational problems on their own. Developmental profiles of growth in student reasoning were constructed, under conditions of existing instruction. These were based on the analysis of responses to open-ended tasks by students from grade 5 to university. They provided convincing evidence that Ministry expectations regarding mastery of these skills were not being met. An instructional intervention involving grade 7 students was designed and pilot tested. Includes a full set of materials and tests used in the research.

Development of criteria and methods for the bottom culture of blue mussels

prepared for the Aquaculture Association of Nova Scotia ; by Heath H. Stone, Geoffrey V. Hurley and S. Scott Coffen. S.l. : Canada/Nova Scotia Economic Regional Development Agreement, Fisheries Subagreement, 1987. 84 p : ill. Bibliogr. (ERDA report ; no. 3) ISBN 0-88871-170-0
MICROLOG 93-04404 2 fiche

This report discusses the feasibility of bottom culture of blue mussels in Nova Scotia, including the criteria and methods used in the Netherlands, Great Britain, Ireland, and Maine, and relevant aspects of mussel biology and ecology. Site specific information was obtained from interviews with fishermen, mussel aquaculturists, fishery officers, and government biologists. Economic considerations are also discussed, including capital costs and assumptions, cost structure comparisons, and financial analyses.

Development of design procedures and guidelines for reducing electric demand by air leakage control in high-rise residential buildings : final report

prepared for Residential/Commercial Technologies and Products, Ontario Hydro and Project Implementation Division, Canada Mortgage and Housing Corporation ; by Scanada Consultants Limited and CanAm Building Envelope Specialists Inc. Ottawa : Canadian Mortgage and Housing Corporation, 1991. xi, 237 p. : ill.
MICROLOG 93-06557 4 fiche

A survey of four electrically heated high-rise residential buildings in Ontario showed that the peak heating demand varies from 35-70 W/sq m of floor space. During the peak winter conditions, the air infiltration component contributes 25-40% of peak heating demand. This project was conducted to develop practical design procedures for estimating potential reductions in peak power demand and energy consumption through air-sealing of existing high-rise residential buildings; to develop from that an air-sealing assessment procedure and practical guidelines for air sealing practitioners; to test airtightness of two buildings before and after air-sealing to verify the assessment procedure and show the reductions in electric demand; and to calculate the potential benefits to Ontario Hydro of demand reductions and energy conservation.

Development of direct contact superheated steam drying process for biomass : final report

by Wardrop ; for Bioenergy Development Program, Energy, Mines and Resources Canada. Winnipeg : The Company, 1990. xi, 34 p. : ill. Bibliogr. *CANMET contract: 23283-7-6040*
MICROLOG 93-04287 1 fiche

Superheated steam drying (SSD) employs steam instead of hot air to dry a product. A pilot unit was designed and operated to test the applications of superheated steam drying to the removal of moisture from biomass fuels prior to combustion. Wood chips and hog fuel were dried under continuous, plug flow conditions and the data was used to calculate energy balances, and to estimate heat transfer coefficients and drying rates for industrial scale. The economics of fuel scale dryer operation were examined.

The Development of financial derivatives markets : the Canadian experience

by S.M. O'Connor. Ottawa . Bank of Canada, 1993 vii, 69 p. Bibliogr. (Technical report ; no. 62) ISSN 0713-7931 ISBN 0-662-20689-4
MICROLOG 93-07808 1 fiche

In response to an intense demand for risk management services since the early 1980s, the over-the-counter (OTC) markets for financial derivatives in Canada have developed more vigorously than those for exchange-traded (EXT) derivative securities. This is particularly evident for interest rate derivatives. The objectives of this paper are to examine why Canadian interest rate derivatives have developed more robustly in OTC markets than in EXT markets and why markets for some EXT derivatives have developed more successfully than for others.

Development of measures to accommodate courier operations

Toronto : Metropolitan Toronto Transportation Dept., 1991. 62 p.
MICROLOG 93-01653 1 fiche

One of the most pressing and difficult issues that Metropolitan Toronto has to deal with is transportation congestion. In response to this situation, the Metropolitan Toronto Transportation Department developed a study of courier operations with the objective of minimizing the impact of courier operations on vehicular and pedestrian traffic, and accommodating the needs of couriers concerning their goods pick ups and deliveries. This document presents information on the current courier industry, the licensing of Metro couriers, and the opportunities offered by congestion. It also provides an analysis of potential alternative measures.

Development of methane gas detection/measurement suitable for use in drilling within underground coal mines

G.P. Isenor Company Limited. Bedford, N.S. : The Company, 1992. 166 p. : ill. Bibliogr. *CANMET contract: 23440-1-9108.*
MICROLOG 93-06881 2 fiche

The data obtained from the measurement of methane gas contained in drilling fluid returns of coal drilling operations provide excellent information of the methane gas characteristics of the coal and the coal bearing formation being drilled. This operation is standard procedure in surface oil and gas drilling operations. A project was initiated to determine the potential of this procedure in an underground coal mine environment. A literature search was conducted to review valid/appropriate methodologies and techniques being applied. Available equipment and techniques were identified. Recommendations are provided on a system design.

Development of national emission guidelines for stationary combustion turbines

by M. Klein. Montreal : Canadian Electrical Association, 1993. 21 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality*
MICROLOG 93-05193 1 fiche

As part of the effort to reduce emissions of oxides of nitrogen from stationary sources, the Canadian Council of Ministers of the Environment requested that Environment Canada lead a multi-stakeholder working group to establish a national emission guideline for land-based combustion turbines. This paper describes the rationale behind the guideline, completed in late 1992. Nitrogen oxides emission targets are based upon the facility's overall thermal efficiency for shaft and electrical power production, as well as an allowance for exhaust thermal energy utilization in a cogeneration plant.

Micromedia Ltd., 240 Catherine St., Suite 305, Ottawa ONT K2P 2G8
(613) 237-4250 FAX (613) 237-4251

In residential construction, recent changes in consumer tastes have increased the demand for circular stairways, archways, and circular, oval, and curved-top windows. To date, this demand has been met by using casing and frames made up of small, curved segments of wood, arranged in an arch-shape. A much superior method is lamination of thin wood strips into complex shapes, but such manufacture is limited because it is time-consuming, labour- intensive, and expensive. This project was conducted to develop and evaluate cost-effective new machines for manufacturing high- quality laminated, curvilinear (two-dimensional) and helical (three-dimensional) arches for use in residential construction. Four machines were developed, built, and tested to an installation- ready stage to overcome the limitations of existing laminating, arch-making, milling, and profiling equipment.

Development of software for three dimensional mine blast analysis : final report

Acres International Limited Niagara Falls, Ont. : Acres International Ltd., 1992. vii, 63 p. : ill. Bibliogr. *CANMET contract: 23440-1-9165/01-SQ*
MICROLOG 93-04983 1 fiche

This report describes further development of a computational model for simulating ground motion due to blasting in underground mines. The new developments include the capability for modelling single shot blasts in three dimensions and algorithms for synthesizing ground motion due to multiple delay blasts by superposition of the ground motion due to a single shot blast. A three dimensional finite element program was also developed to model ground motions in the region of a blast where rock behaviour can be assumed elastic to the point of tensile failure. An example of the use of the program is given and a program of field measurements is proposed that would enable verification of the finite element program as a means of predicting ground motion and damage due to excessive tensile failure of rock in mines.

Development of the native legume *Glycyrrhiza lepidota* as a potential soil reclamation and forage crop : final report

by A. Walther. Regina : Saskatchewan Agriculture Development Fund, 1989. 21 p. : ill. Bibliogr.
MICROLOG 93-02215 1 fiche

Study of wild licorice, a deep-rooted perennial herbaceous legume sometimes occurring in stands of salt-tolerant native grasses. The green leafy tops of the plant are eaten by wild herbivores and domestic livestock while the protein-rich seeds are winter food for wildlife. Mature field-ripened seeds were collected from 14 different areas in southern Saskatchewan, five of which represented two crop years. To ascertain salt tolerance, seeds were germinated in sodium chloride or sodium sulfate solutions of increasing strength. Growth response to continuous salinity stress under a controlled light and temperature regime was monitored. Selected seed sources were also tested in a sulfate-rich soil extract and in saline soil mixtures.

Le Développement durable et le logement

Toronto : Ministère du logement, 1991. iii, 31 p. Bibliogr. *L'éd. anglaise (Sustainable development and housing) : 93-03373/1*
MICROLOG 93-03813 1 fiche

On prévoit que la population du Canada, et par voie de conséquence, ses besoins en logements, continueront d'augmenter pendant une grande partie du siècle prochain. Afin de faciliter la croissance future, il nous faut commencer à appliquer aux politiques sur le logement et à l'expansion urbaine le concept du développement durable. Le développement durable est celui qui permet de répondre aux besoins du présent sans compromettre la capacité des générations futures de subvenir aux leurs. Ce document examine donc le développement durable dans le contexte du logement; le lien entre le développement durable et l'expansion urbaine, et, les stratégies relatives au logement dans le cadre du développement durable.

Dew-point temperature tables for fire weather stations with ventilated psychrometers

by K.G. Hirsch, M.E. Alexander and K.R. Anderson. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1993. 16 p. Bibliogr. (Forest management note ; no. 56) ISSN 0714-1181 ISBN 0-662-20718-1
MICROLOG 93-08717 1 fiche

A useful fire weather measurement is the dew point (DP) or dew-point temperature. The DP is the temperature to which a given parcel of air must be cooled at constant saturation and constant water-vapor content in order for saturation to occur. The tables presented in this note allow the calculation of the DP from observations of dry-bulb temperature and wet-bulb temperature measured using a ventilated psychrometer. The tables have been designed in a format that is consistent with other fire weather observation tables used in Canada making them readily usable at manually operated fire weather stations. The DP tables should simplify the calculation of dew-point temperature, which is used extensively by fire weather forecasters, especially for RH forecasting.

Dieback of container-grown Douglas-fir seedlings

by L.D. Husted and S. Barnes. Victoria : Forest Resource Development Agreement, 1989. iii, 36 p. : ill. Bibliogr. (FRDA report ; 142) ISSN 0835-0752 ISBN 0-662-18216-2
MICROLOG 93-02265 1 fiche

For the past five years, nursery growers have observed a growth problem, called needle dieback, in container Douglas-fir seedlings that affects up to 25 percent of seedlings and results in losses to the nursery. This report summarizes the second year of a two-year study to determine the pathogenicity and to identify the Pythium isolated from dieback seedlings in the first study year, investigates alternative explanations to the pathogen hypothesis for the sterilization effect of steam; and examines the effects of cultural practices and the growing environment on the incidence of dieback.

Dielectric breakdown threshold of CF3H and CF3H/CF3T mixtures for pulsed infrared radiation

by E. Alonso, J.A. O'Neill and L. Pateopol. Toronto : Ontario Hydro, Research Division, 1992. 6 p. Bibliogr. (Report ; no. 92-146-K)
MICROLOG 93-02911 1 fiche

Measurements of the threshold fluence for dielectric breakdown in pure CF3H and in mixtures of CF3H/CF3T are reported. The values obtained for pure CF3H and in a mixture of CF3H/CF3T are well above the working fluences required for laser isotope separation of fluoroform. Therefore, tight focused geometries can be used in the infrared multiple-photon dissociation of CF3H without producing nonselective processes due to the gas breakdown.

A Digital algorithm for detecting internal faults in synchronous generators

by T.S. Sidhu, B.R. Sunga and M.S. Sachdev. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Power System Protection Subsection, 1993. 16 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05233 1 fiche

This paper describes a digital algorithm for detecting internal faults in synchronous generators. The algorithm is based on the positive and negative-sequence models of the synchronous machine. Voltage and current samples, taken at the generator terminals, are used by the algorithm to detect faults internal to the machine. The performance of the algorithm was tested using data recorded from a laboratory generator subjected to a variety of internal and external faults. Some of the test results are included in the paper.

A Digital multifunction relay for intertie and generator protection

by M.V.V.S. Yalla and D.L. Hornak. Montreal

Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Power System Reliability Subsection, 1992. 16 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06085 1 fiche

Operation of customer-owned generation in parallel with a utility system introduces the potential for hazards and problems in both the utility and the customer system and protection schemes for intertie protection can represent a major portion of the overall installation cost. Advances in digital technology, signal-processing algorithms, advanced displays and user interface designs make it possible to integrate protective functions into a single digital relay, providing an economically viable alternative for the protection of the intertie and generator. In addition, digital technology provides other advantages.

Digital protection system for Advanced Series Compensators (ASC)

by M. Pereira, K. Renz and F. Unterlass. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, SVC and HVDC Controls Committee, 1993. 17 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05184 1 fiche

Fixed series compensators (FSC) are widely used in long transmission lines as they can increase the power flow and stability of the network, although they cannot adapt their characteristics to changed network conditions. Controlled advanced series compensators (ASC), as flexible AC transmission system devices, can control power flow in the line, dampen power oscillations, and influence network conditions similarly to static var compensators. This paper describes digital ASC protection, the coordination of ASC control and protection and field tests; and discusses the impact on line protection.

Digital teleprotection : an outline of field test results

by G. Grignon. Montreal : Canadian Electrical Association, 1992. 10 p. Bibliogr. *Bilingual (Téléprotection numérique : un aperçu...) Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06113 1 fiche

During the last decades teleprotection transmission of information has almost exclusively been done by FSK type transmission in a standard telephone voice channel. Hydro-Quebec is pursuing a program to improve the electrical network which involves the construction of new power stations and implementation of series compensation. This paper studies characterization of EM environment in a power station during electrical faults and immunity assessment of the combined analog and digital telecommunications chain, used for these digital protection units, with the protection units in normal operation. A goal of the study was to better define future electromagnetic compatibility requirements when specifying and purchasing telecommunications systems and also to define or revise standard installation and commission practices. This paper describes tests and studies and gives some results and conclusions.

Direct estimation of deformable motion parameters from a range image sequence

by M. Yamamoto. .et al. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1990. 29 p. : ill. Bibliogr.
MICROLOG 93-07944 1 fiche (Available on fiche only)

Rigidity assumption has played a central role in motion analysis. Strictly speaking, there is no rigid body in the real world. Rigidity is merely a first-order approximation to represent object motion. To analyze the real object motion more precisely, one must take into account the nonrigidity of objects. This paper describes a method which is capable of estimating deformable motion parameters on nonrigid objects, such as paper, cloth, skin and rubber, as well as rigid objects from a sequence of range images.

Canada. Medical Devices Review Committee. Ottawa : The Committee, 1992. vii, 94, vii, 105 p. Bibliogr. *Bilingual (A l'heure du changement : rapport).* ISBN 0-662-59334-0
MICROLOG 93-04857 3 fiche

The committee was established in February 1991 to formulate recommendations on the regulation of medical devices and associated activities. It heard presentations from government, non-government, and the private sector and it also met with representatives of the major federal government departments and organizations involved, the United States Food and Drug Administration, and the major companies in Canada's medical devices industry. A wide range of studies was commissioned and two surveys were conducted, the first a telephone survey in October 1991 of 1,500 randomly selected people across Canada and the second a telephone survey of 75 health care facilities. The report describes the major players in the medical devices field, including the public, health care professionals, the industry, and the federal government; the legislative basis for the federal regulation of the sale and advertising of medical devices; and concerns about the present system of regulation and review.

Discussion paper on Maritime cooperation in education at the post-secondary level

submitted in collaboration by the Nova Scotia Dept. of Advanced Education and Job Training ..et al. Halifax . Forum of Maritime Cabinets, 1992. iv, 60 p. : ill. *French ed (Document de travail sur la coopération ..) on the same fiche Cover title: Post-secondary education.*
MICROLOG 93-01512 1 fiche

This paper provides a description of the educational systems in the Maritimes, to help understand their structure, composition, and similarities as a base for cooperative efforts. It discusses the role of post-secondary education in improving the competitiveness of the economy. It also highlights many examples of existing cooperation in the Maritime provinces which are worth continuing or expanding and discusses several potential areas for developing more cooperation. It outlines that cooperative efforts could help to achieve more systematic and efficient arrangements for professional development of instructors and administrators.

Discussion paper on school boards' role in human resource development in Canada

by T. Palmer. Ottawa . Canadian School Boards Association, 1991. 30 p. Bibliogr.
ISBN 0-920632-45-9
MICROLOG 93-03287 1 fiche

Charged with providing an education that will prepare all Canadian children for the labour market, school boards, like business, governments and labour organizations, are taking a new look at the link between education and the economy. This paper focuses on that part of the school's mandate to produce young people who will have entry-level job skills. On the basis of demographic and labour force trends, the paper also suggests that an increasingly important role for school boards is adult education: lifelong learning. Many of the program examples cited in this paper are from central Canada because not all provinces have developed an adult education mandate for their school boards

Discussion paper on the energy plan : draft guidelines and proposed focus areas

Vancouver, B.C. : British Columbia Energy Council, 1993. 32 p.
MICROLOG 93-08127 1 fiche

As the B.C. Energy Council begins to develop its first Energy Plan, it has set forth draft guidelines and six possible focus areas for discussion. The Council seeks to establish general principles and recommendations on energy policy in a General Plan and it will develop public processes and make recommendations for specific Focus Areas of energy policy. Based on the comments received from this draft report, the Council will revise the guidelines and also select the focus areas to develop.

Discussion paper on the Statute of Frauds, 1677

by J.T. Robertson. St. John's : Newfoundland Law Reform Commission, 1991. viii, 103 p. Bibliogr ISBN 0-920769-90-X
MICROLOG 93-00165 2 fiche

The Statute of Frauds, 1677 forms part of the law of Newfoundland not by virtue of express enactment of the legislature but rather by operation of the doctrine of reception. This gives rise to a number of difficulties associated with not having the statute easily accessible on the statue books of the Province. This discussion provides a relatively detailed description of the operation of the Statute as seen through the case law and periodical literature it has generated. It also evaluates its operation.

Discussion paper on Way to Go, New Brunswick! Trails, scenic roads and highway signing

presented by the New Brunswick Dept. of Tourism, Recreation and Heritage and the New Brunswick Dept. of Transportation. Fredericton : The Depts., 1989. 36, 36 p . ill. *Bilingual (Document de travail...).*
MICROLOG 93-05651 1 fiche

Current studies reveal that pleasure driving to view and experience historic, natural, and pastoral areas is the most popular style of vacation travel. The program furthers several key elements of the New Brunswick Government's economic development strategy, Toward 2000: improved infrastructure, increased resident and non-resident travel within the province, and enhanced self-image. This document contains a variety of information on the general approach to trails and scenic roads and on matters concerning highway signing. It also identifies benefits of the program

Disease elimination by tissue culture testing of potato breeding clones : final report

by D.R. Lynch. Regina : Saskatchewan Agriculture Development Fund, 1991. 40 p. : ill. Bibliogr.
MICROLOG 93-05571 1 fiche

A breeding project was initiated in 1979 using material selected out of crosses made at Lethbridge, early generation selections from the Canadian National Breeding Program, and advanced introductions from programs in the United States. The products of the breeding program were tested in a series of trials for stability and to complete registration requirements. To ensure that disease factors do not confound the evaluation of material included in the regional trials, a comprehensive program to control disease using tissue culture and serological and chemical testing was an essential and integral part of the breeding project. This report gives the results of the tissue culture testing.

Disease gradients and horizontal spread of ascochyta blight of lentil : final report

by R.A.A. Morrall. Regina : Saskatchewan Agriculture Develoment Fund, 1991. 22 p : ill. ISSN 0829-9455
MICROLOG 93-08365 1 fiche

Gradients of ascochyta blight occur in commercial lentil crops that are planted adjacent to a field with residues of the previous year's lentil crop, that serve as a source of infection. This study involved experiments in farmers' fields in which control of infection sources was limited; plot experimentation, using long, narrow strip plots in which infection sources and treatments could be more carefully controlled; and preliminary growth chamber studies on processes of plant infection. The plant experiments were set up in early May 1990 at Floral under dryland conditions and at Saskatoon under irrigation using Laird seed completely free of infection. During the growing season, measurements of levels of ascochyta blight were made on a regular basis in the plots at different distances from the infection source. At the end of the season, seed was harvested at each distance, graded according to the Canada grade standards, and tested for infection by agar plating

Dissolved organic carbon and total organic carbon in reagent water and effluent : report

by S. Cussion. Toronto : Environment Ontario, 1992. 43 p. : ill. Bibliogr. (Interlaboratory study ; 91-5) ISBN 0-7729-9955-4
MICROLOG 93-01806 1 fiche

Interlaboratory study 91-5 was initiated as part of an on-going program of laboratory performance management studies conducted by the Quality Management Office of Environment Ontario. It assessed the performance of 29 participating government, industry and commercial laboratories for the analysis of dissolved organic carbon (DOC) and total organic carbon (TOC) in spiked reagent water and in effluents. Participants received two spiked and one unspiked sample in reagent water and in a sewage treatment plan effluent. Results were received from 24 participants for DOC and from 25 participants for TOC. This report gives the results of the tests.

Dissolved organic carbon cycling in forested watersheds : a carbon isotope approach

by S.L. Schiff...et al. Toronto : Ministry of the Environment, 1990. 9 p. Bibliogr. *In* Water Resources Research : *Vol. 20, no. 12, 1990*
MICROLOG 93-03880 1 fiche

Dissolved organic carbon (DOC) is important in the acid-base chemistry of acid-sensitive freshwater systems; in the complexation, mobility, persistence, and toxicity of metals and other pollutants; and in lake carbon metabolism. Carbon isotopes are used to study the origin, transport, and fate of DOC in a softwater catchment in central Ontario. Precipitation, soil percolates, groundwaters, stream, beaver pond, lake waters, and lake sediment pore water were characterized chemically and isotopically. In addition to total DOC, isotopic measurements were made on the humic and fulvic DOC fractions

Distribution and behaviour of platinum in soils of the Tulameen ultramafic complex, southern British Columbia

by S.J. Cook and W.K. Fletcher. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1993. viii, 94 p. : ill., maps. Bibliogr. (Paper ; 1992-6) ISSN 0226-9430 ISBN 0-7718-9284-5
MICROLOG 93-03829 2 fiche

Geochemical exploration for chromitite-associated platinum deposits is hampered by a poor understanding of the distribution and behaviour of platinum in the surficial environment. This study investigates platinum content, residence sites, and mineralogy of soils developed on till and colluvium above the Tulameen Ultramafic Complex in southern British Columbia. Samples were taken of 76 soil profiles, sediments, bogs, and water above the dunite core of the Tulameen Complex. Platinum content of the -70-mesh fraction of soils and sediments was determined by fire assay-inductively coupled plasma spectrometry. Samples from 14 selected profiles were then examined in detail to determine platinum mineralogy and its distribution between different size, density, and magnetic fractions.

The Distribution and fate of mexacarbate in a forest aquatic ecosystem

by K.M.S. Sundaram...et al. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1986. v, 23 p. : ill. Bibliogr. (Information report ; FPM-X-73) *French ed. (Distribution et devenir du...) on the same fiche.* ISSN 0704-772X ISBN 0-662-14778-2
MICROLOG 93-02789 1 fiche

Mexacarbate was introduced in 1961 under the trade name Zectran. Numerous field tests conducted against the eastern spruce budworm have shown the chemical is quick acting and toxic to the insect pest, has an acceptable acute oral toxicity for rats, mice, guinea-pigs and dogs, is nonpersistent and is degraded rapidly by sunlight and biological systems. This paper describes the distribution and dissipation of mexacarbate residues in natural waters and in various aquatic flora and fauna after a double application of Zectran formulation.

Distribution, damage, monitoring and factors which influence the pest status of the Russian wheat aphid in Saskatchewan : final report

by O. Olfert. Regina : Saskatchewan Agriculture Developing Fund, 1991. vi, 43 p. : ill. Bibliogr.
MICROLOG 93-08350 1 fiche

Infestations of Russian wheat aphid were first discovered in southwestern Saskatchewan in August 1988. Because of the damage potential of this pest in Canada, research for its control was begun in Saskatchewan and Alberta. In 1989 and 1990, weekly sampling (net sweep and plant samples) of spring wheat fields and field borders in southern Saskatchewan was conducted to collect cereal aphids. A network of suction traps was established in 1989 with the installation of four traps. Two more traps were erected in 1990 in the extreme southwest and catches were examined weekly.

Distribution, dissipation and persistence of aminocarb in aquatic components of the forest environment after aerial application of two Matacil 180F formulations

by K.M.S. Sundaram. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1987. i, 19 p. Bibliogr. (Information report , FPM-X-78) *French ed. (Distribution, dissémination et persistance ..) on the same fiche.* ISSN 0704-772X ISBN 0-662-15422-3
MICROLOG 93-02781 1 fiche

Aminocarb (trade name Matacil) has been used for spruce budworm control in eastern Canada since 1970. It is usually applied by aircraft as a homogeneous oil formulation. Because nonylphenol, the major adjuvant in the formulation, was found to be toxic to juvenile Atlantic salmon, the marketers of Matacil introduced a flowable suspension, Matacil 180F, containing air-milled particles of aminocarb suspended in oil that can be used for aerial application either as a water-based emulsion or an oil-based formulation. A field research program was undertaken during the 1982 spray season in New Brunswick to evaluate the environmental impact, distribution, persistence and dissipation of aminocarb present in Matacil 180F in a forest stream ecosystem under semi-operational spray conditions. The Matacil 180F was sprayed separately over two blocks twice in two different formulations, one containing a petroleum distillate and the other containing Atlox 3409F emulsifier and water. This report presents the chemical aspects of the study.

Docee River counting fence : 1992 operations

by I. Winther, S.K. Bachen and R.D. Goruk. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1992. iv, 13 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 895)
CSI 21105 050. ISSN 0706-6465
MICROLOG 93-07655 1 fiche

The Docee River counting fence has been in operation on the Docee River, B.C., since 1972. Salmon escapement data collected at the fence provides in season estimates of escapement by managers operating the Smith Inlet sockeye fishery. Sockeye age, length and sex statistics are collected as part of the enumeration program. General repairs required to the fence to maintain fence performance and for personnel safety are also identified.

Doctoral research in educational administration at the University of Alberta, 1958-91

by E. Miklos. Edmonton : University of Alberta, Dept. of Educational Administration, 1992. vi, 204 p. Bibliogr. ISBN 0-88864-773-5
MICROLOG 93-01201 3 fiche

The purpose of this project was to develop an overview and a synthesis of the doctoral theses completed in the Department of Educational Administration at the University of Alberta from 1958 to 1991. This document describes the general characteristics of the research methodologies used in the studies; identifies trends in the use of research methodologies; identifies the major research areas and substantive themes in the studies; summarizes the outcomes of the studies in relation to major research areas and themes; and uses the results of the review as the basis for commenting on possible future emphases in doctoral studies.

Document de consultation sur les installations scolaires communautaires à usages multiples

Toronto : Ministère de l'éducation, 1992. i, 22, i, 22 p. *Bilingue (Consultation paper on community-based). ONTERIS: ON06005F*
MICROLOG 93-01241 1 fiche

Ce document de consultation se concentre sur les critères de sélection des projets des installations scolaires communautaires, à usages multiples, et sur la présentation des propositions de projets. Les projets choisis devraient comporter un volet scolaire qui sera financé à 50 millions de dollars. Les partenaires devraient se partager les coûts des secteurs communs des projets pilotes. Les projets seront évalués par le comité interministériel, et devraient répondre au plus grand nombre de critères possibles, comme par exemple: avoir l'appui financier ou l'approbation de principe des conseils scolaires, de la municipalité et des groupes et organismes communautaires; ils devraient répondre à un besoin communautaire tangible et avoir l'appui de la collectivité; ils doivent être répartis, de façon équitable dans la province, en tenant compte des besoins des communautés urbaines, rurales, autochtones et francophones. Les personnes-ressources des ministères complètent le document.

Document de travail public sur la garde d'enfants et le droit d'accès

Ottawa : Ministère de la justice, 1993 iii, 63, iii, 61 p. Bibliogr. *Bilingue (Custody and access : public discussion paper).*
MICROLOG 93-04338 2 fiche

Le comité fédéral-provincial-territorial sur le droit de la famille a entrepris un projet visant à examiner le régime juridique actuel qui s'applique à la garde d'enfants et au droit d'accès. Le ministère de la Justice fédéral a préparé ce document de travail dans le cadre de ce projet, afin d'encourager le public à participer à l'examen. La première partie de ce document renferme une description du régime juridique actuel concernant la garde d'enfants et le droit d'accès. Dans la partie II, on fait état des principaux problèmes et questions qui se posent, tandis que dans la partie III on examine certaines possibilités quant à une réforme.

The Documentary management of a strategy for skills training in Ontario : end-of-project report

by D.E. Smith. Toronto : Ontario Institute for Studies in Education, 1987. 10 p *ONTERIS. ON05988*
MICROLOG 93-00611 1 fiche

Focuses on the relationship between the Ontario Skills Development Offices' (OSDO) training strategy and personnel practices of firms in the plastics industry 2nd of 3 studies investigating documentary management of the job-training nexus. As a study of a textually-mediated social organization, the role documents play in the organization of managerial relations was of particular interest. The research design was an institutional ethnography with data collection in the form of interviews and documents at OSDO and industrial sites. Significant additions were made to the project's data base, especially related to the management of plastics plants, and there was an opportunity to become familiar with the technologies and managerial strategies used in the industry.

Documentation and assessment flood damage potential, Southwest and Northwest Miramichi rivers

prepared for Canada-New Brunswick Flood Damage Reduction Program ; by Nolan, Davis and Associates (NB) Limited ; in association with Cumming Cockburn Ltd. and Key Surveys Ltd. Fredericton : Nolan, Davis and Associates (NB) Ltd., 1991. vii, 75 p. : maps. Bibliogr.
MICROLOG 93-08834 1 fiche

Flooding is a natural process. The impact of flooding on populated areas can be very serious resulting in both loss of life and property. The development of many cities, towns and villages in the Province of New Brunswick has been closely associated with rivers. As utilization of the flood plain became more pronounced, the consequences of flooding became more serious economically, both in terms of actual damages and through disruption of transportation systems and agriculture. This report examines the frequency, nature and extent of flooding within the flood-prone developed areas of the Miramichi River Basin upstream of the confluence of the Southwest and Northwest Miramichi rivers at Beaubears Point

The Dorchester hostage-taking : communications in the wake of an unexpected event

by J. Scanlon, B. Taylor and W.A Blum. Ottawa Emergency Preparedness Canada, 1977. 15 p. (ECRU field report ; 77/4)
MICROLOG 93-05054 1 fiche

On October 27, 1976, an inmate taking exercise in the yard of the maximum security institution at Dorchester, New Brunswick was called back into the prison. As one of the guards began to search him, the inmate produced a sharpened spoon, grabbed the guard who was searching him, and held the weapon to his throat. He took the keys belonging to his hostage so he could release other inmates being held there. This report is an account of that hostage-taking, and some of the things that happened in the wake of it.

Draft new or amended permissible concentrations for selected substances

Workers' Compensation Board of British Columbia. Secretariat for Regulation Review.
Victoria : The Secretariat, 1993. 24 p.
Bibliogr.
MICROLOG 93-07043 1 fiche

In January 1992, the Governors of the British Columbia Workers' Compensation Board initiated a comprehensive review of the occupational health and safety regulations within the Board's jurisdiction. A Regulation Advisory Committee was established to make recommendations to the Board on the overall format and content of regulations. In August 1992, an Occupational Hygiene Subcommittee was established to develop regulatory proposals on occupational health and hygiene matters. The three phases of the subcommittee's work were to be completed by August 1993. Phase I was the development of a list of permissable concentrations for airborne contaminant substances. This document provides a summary of the proposed permissable concentrations and a rationale for each selected substance. Each rationale provides a comparison between the current and proposed limits, the exposure limits from the referenced jurisdiction or agencies, a brief discussion of the toxicological basis of proposed limits, and other information regarding designation of the substance as a carcinogen and/or skin notation. Appendices provide strategies for assessing proposed eight hour and 15-minute exposure limits, and additional information on the use of the WHMIS criteria for the designation of carcinogens.

The DREO Elint Browser Utility (DEBU) reference manual

by B. Ford and D. Jones. Ottawa : Defence Research Establishment Ottawa, 1992. xi, 68 p. (Report ; no. 1130)
MICROLOG 93-01672 1 fiche

The Defence Research Establishment Ottawa (DREO) developed an Elint database browsing tool called DEBU (DREO Elint Browser Utility) that allows Elint and EW databases such as EPL, Kilting, EWIR and AFEWC to be easily reviewed and analyzed from a user-friendly environment on a personal computer. This report describes how to install and run DEBU and how to load and access the Elint or EW databases. The full functionality and operation of DEBU is described on a pane-by-pane basis for menu items that can be selected in each pane. In addition to the general Smalltalk background area and the DEBU window label bar are panes for database list, database subsets, emitters list, parameters-subfiles list, report-information and parameters-subfile switch.

MICROLOG 93-07435 1 fiche

Au cours des dernières années, le vocabulaire des droits de la personne est entré dans le langage courant du droit et de la politique. Cela est non seulement vrai au niveau national, mais aussi dans le domaine des relations internationales, où les droits de la personne et les liens qu'ils ont avec les processus démocratiques dans les pays ainsi qu'avec le développement économique et politique à l'échelle mondiale sont devenus un sujet important. L'objet du présent document est de faire un analyse des moyens qu'a employés et que peut employer le Commonwealth pour sauvegarder et promouvoir la démocratie et les droits de la personne, tant au sein des Etats qui en font partie que dans les autres pays.

Dual-ascent procedures for multicommodity location/allocation problems with balancing requirements -- Rev.

by T.G. Crainic and L. Delorme. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. 27 p. Bibliogr. (Publication ; no. 759)
MICROLOG 93-01755 1 fiche

The multicommodity location-allocation problem with balancing requirements is related to one of the major logistics issues faced by distribution and transportation companies, that of the management of a fleet of vehicles over a medium to long-term planning horizon. This paper presents a dual-ascent approach for this formulation that may be used either to obtain a good heuristic solution or to compute share bounds in a branch-and-bound scheme. The paper presents and compares two variants of the approach and analyzes their performances both on a large number of randomly generated problems and on a large-scale application to the strategic or tactical planning of the land operations of an international maritime container shipping company.

A Durable all-season marker float and mooring buoy for limnological field studies

by P. Campbell and A.G. Salki. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1992. iv, 5 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1852) *This is the 45th technical report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6457
MICROLOG 93-03707 1 fiche

Most limnological studies require that samples be taken repeatedly from one or more fixed locations on a lake marked with an anchored buoy that may also provide mooring while sampling. The conventional styrofoam sandwich or round styrofoam floats left in place are subject to high losses. As a solution to float loss from ice-entrapment, Davies (1984) developed a sealed aluminium pipe float that melts free of spring ice and retains its location in the lake following ice-out. This report describes a modification of the Davies float that is fabricated of more readily available ABS material, is less expensive, is less prone to collision damage, and is more visible than the original model.

Dynamic and stochastic models for the allocation of empty containers

by T.G. Crainic, M. Gendreau and P. Dejax. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. 55 p Bibliogr. (Publication ; no. 835)
MICROLOG 93-01830 1 fiche

The empty container allocation problem occurs in the management of the land distribution and transportation operations of international marine shipping companies and involves dispatching empty containers of various types in response to requests by export customers and repositioning other containers to storage depots or ports in anticipation of future demand. This paper describes the problem and identifies its basic structure and main characteristics. Two dynamic deterministic formulations for the single and multicommodity cases are introduced which offer a general modelling framework for this class of problems, accounting for its specific characteristics A mathematical formulation for handling, in the single commodity case, the uncertainty of supply and demand data, characteristics of container allocation and distribution problems are presented. Various modelling choices, data requirements, and algorithmic considerations related to the implementation of the models are also discussed

Dynamic corona modelling in the EMTP with simple constant parameter circuit components

by F. Castellanos and J.R. Marti. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operating Section, Analytical Techniques of Insulation Coordination Subsection, 1993 10 p. : ill. Bibliogr *Presented at Electricity '93 : distribution power quality*
MICROLOG 93-05230 1 fiche

The corona effect is an important factor in the attenuation and distortion of overvoltages in transmission lines. Conventional corona models have been developed to represent its behaviour, but the power engine still lacks a simple and practical model that can be used in computer models such as the EMTP. A constant parameter circuit is presented here to simulate the corona effect. The corona model is based in the topology of the circuit and the physical characteristics of the corona effect. The model's performance is evaluated by its simulation in the EMTP, and different cases of q v curves and travelling surges are presented.

Dynamic modulus test for asphaltic concrete computer program

by R. Raciborski, K.K. Tam and D.F. Lynch. Downsview, Ont. : Ministry of Transportation, Engineering Materials Office, 1992. 28 p. (Materials information report ; MI-157) *Contents: Part 1 : Documentation -- part 2 : User's guide.* ISSN 0843-7246 ISBN 0-7778-0283-X
MICROLOG 93-00811 1 fiche

A computer application program was developed for testing the dynamic modulus of bituminous mixtures in the laboratory, using the MTS BASIC language. The program was written for the specific environment of the materials testing system which includes a 468 test processor, a Digital PDP-11/23 plus microcomputer and other equipment. The test is based on the ASTM D3497 standard method. The report documents the most essential design elements of the program, with appendices containing the listing of the application and other information enabling programmers to make changes to the program. A user's guide is also included, providing information required by a technician to operate the program and complete a dynamic modulus test.

The Dynamic predicate stashing copy problem -- Rev.

by B. Sansó and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 21 p. Bibliogr. (Publication ; no. 774)
MICROLOG 93-05429 1 fiche

One important issue being addressed in the design of distributed computer networks is how to increase the availability of time-changing information even in the event of failures. Recently, a technique called stashing was proposed in which a copy of a file was placed in several nodes of the network. In addition, a predicate was defined as a consistency requirement for a particular file copy with respect to the original. This paper addresses the problem of minimizing the propagation cost of stashed copies subject to time predicate restrictions imposed by the user, where the user may receive a copy with a predicate better than requested. This problem is called the dynamic predicate stashing copy problem and a formulation is proposed to solve it. Resolution approaches, numerical results, and properties of the problem are also discussed.

Dynamic simulation of Darlington FGS fuel

by E. Nadeau. Toronto : Ontario Hydro, Research Division, 1992. i, 150 p. : ill. Bibliogr. (Report ; no. 92-53-K)
MICROLOG 93-02975 2 fiche

Following the recent fuel bundle vibration/damage problems encountered by Darlington Nuclear Generating Station, analytical simulations of fuel bundle and fuel string behaviour were carried out. In the first phase of the study, a detailed model of the fuel bundle was developed and a modal analysis was performed to yield the natural frequencies of the fuel bundle. In a dynamic analysis, the bundle was subjected to a pulsating load on one of its endplates. In the second phase, a one-dimensional multi-degree of freedom model was developed to study the overall behaviour of the fuel string. This model was used to evaluate both the modal characteristics and transient response due to travelling and standing waves.

The Early years consultation paper : restructuring of education

Toronto : Ministry of Education, 1991. 43 p. Bibliogr. *Response guide (23 p.) laid in ONTERIS ON05874*
MICROLOG 93-00318 1 fiche

Focuses on the educational needs of 4- and 5-year-old children within the context of families, communities, and society. Greater continuity and stability in education during the early years will help children achieve success in their later, more formal schooling. Identifies topics for discussion that the ministry hopes will lead to new policy directions for junior kindergarten and kindergarten in Ontario. Groups and individuals are asked to respond to 16 issues, organized under 4 headings: the child's world, how children learn, program delivery, and teacher education. Discussions include the role of play, the role of language, the role of adults, and growth related to self, others, ideas, and things. Respondents are asked to submit comments, additional issues, and proposals in the accompanying response guide.

East central Saskatchewan soil conservation project : final report, 1986-90

by G.P. Lafond, G. McCallum and D. Struthers. Regina : Saskatchewan Agriculture Development Fund, 1990. 55 p.
MICROLOG 93-02362 1 fiche

Report on a four-year project to study cropping practices to alleviate problems with soil erosion and degradation associated with excessive tillage and summerfallow practices through the use of research and demonstration trials. The research component studied the profitability of extended crop rotations to reduce the need for summerfallow and the value of reduced or conservation tillage. The demonstration component involved the development of eight projects in each of the agricultural extension districts that make up East Central Saskatchewan. The eight projects addressed some aspect of soil conservation, including chemical fallow, straw and chaff management, minimum tillage seeding practices, comparison of different conservation tillage seeding implements, different seeding systems and minimum till fallow. This report highlights the results obtained with the project and provides some general conclusions.

East Springbank joint general municipal plan, phase 1 : background report

Calgary, Alta. : Calgary Planning and Building Dept., 1992. iv, 78 p. : maps.
MICROLOG 93-05509 1 fiche

The East Springbank Joint General Municipal Plan study was initiated as a direct result of recommendations made by the Alberta Local Authorities Board at the time of the City of Calgary's 1989 comprehensive annexation to investigate the potential for development in the area. This background report provides relevant information on existing land use policies, existing land uses, and other factors that may affect the form of future development in the study area. It also gives an overview of public opinion and public expectations about the study as determined through the Phase I public involvement program. The report deals with the existing policy framework, natural features, transportation, servicing and utilities, community services, and Phase I public involvement.

CSI 89467.200
MICROLOG 93-01002 3 fiche

The purpose of this project was to construct a base of information to be used by the Task Force on Housing in the Downtown. The information would then be used to formulate a plan for the redevelopment of the East Village community that is compatible with the continued accommodation of the existing residents of the area. The residents of East Village were surveyed as to their service and housing needs, in addition to their attitudes, concerns and opinions about the proposed redevelopment of their community. A demographic profile of the community was developed and four sub-groups of the population identified: the homeless, the seniors, businesses and community organizations, and the service providers. This document contains the study findings.

Eastcoast offshore oil and gas development -- Rev.

by S. Dakers. Ottawa : Library of Parliament, Research Branch, 1992. 20 p. Bibliogr.
(Current issue review ; 83-5E) *Revised 9 April, 1992. French ed. (L'Exploitation des réserves...) on the same fiche.* ISBN 0-660-14599-5
MICROLOG 93-01843 1 fiche

The discovery of important accumulations of oil and natural gas in the eastcoast offshore region promises major economic and strategic benefits to Canada. Two important finds in particular, the Venture natural gas field and the Hibernia oil field, have spurred unprecedented oil and gas activity in Atlantic Canada in recent years. This document presents an historical perspective on the exploration; its environmental impact; icebergs, storms, and safety; and jurisdictional disputes. It also looks at development issues such as the impact of oil and gas development, the Venture gas development, and Hibernia development plans.

Ecological reflections on the wading birds of the Dominican Republic : report of a survey conducted in the summer of 1987

by J.-L. DesGranges and R. Benoit. Sainte-Foy, Que : Canadian Wildlife Service, Quebec Region, 1990 v, 23 p. Bibliogr. (Technical report series ; no. 100) ISSN 0831-6481
ISBN 0-662-18135-1
MICROLOG 93-00176 1 fiche

A survey conducted in the Dominican Republic forms an integral part of a more extensive research project to determine the levels and sources of contaminants present in Great Blue Herons that nest along the St. Lawrence corridor in the summer. The ultimate objective is to develop a biomonitoring technique for evaluating the success of the various measures taken to clean up the St. Lawrence River. Thirteen sites were surveyed, divided into five distinct ecosystems, two of which were artificial. Three main groups of wading birds were sighted; those which prefer saltwater habitat, those which prefer freshwater habitat, and those which use both fresh and saltwater habitats.

An Economic analysis of insurance fraud

by G. Dionne, A. Gibbens and P. St-Michel. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 45 p. Bibliogr. (Publication ; no. 908) (Cahier ; 9310)
MICROLOG 93-06339 1 fiche

This paper emphasizes that a clear definition of insurance fraud has to be provided by the industry so as to be able to measure its extent before any major preventive and correction measures are undertaken. It shows that intermediaries are important in insurance fraud. It discusses classic insurance contracts which are not designed to take into account insurance fraud and for which some clauses might even encourage economic agents to engage in fraudulent activities. It also emphasizes the role of competition between insurers as a factor which might slow the battle against fraud. Finally, it presents statistical results from a study pertaining to accidents in the workplace.

This report provides information on the Quebec fishing industry, the commercial situation of groundfish and its economic impact. The economic and commercial analysis is mainly centred on cod because of the importance of this species to the Quebec groundfish fishing industry and its position as the price benchmark on world markets. The report discusses the world supply of cod and the importance of the United States market for Quebec, the evolution in U.S. demand and the U.S. market for cod fillets and cod blocks; the market for salted/dried fish; the market for such other groundfish as redfish, flatfish, and Greenland halibut; conditions in the processing sector, and the impact on the catch sector.

Economic evaluation of alternative systems : CIBINT/NET five fiber optic communications network system cost comparison with traditional copper wiring systems

by P. Van Vliet Regina : University of Regina, Faculty of Engineering; Canadian Institute for Broadband and Information Network Technologies Inc., 1992 i, 22 p. Bibliogr. *At head of title: CIBINT research report*
MICROLOG 93-03833 1 fiche

This study compares the cost of the CIBINT/NET-FIVE fibre optic network system with a similar-sized installation using conventional copper-wire-based telecommunications wiring systems The copper wire telecom system costs are derived from a Canadian Government Open Systems Interconnection profile specification prepared by Energy, Mines and Resources Canada in collaboration with Public Works Canada for application in government owned and leased buildings The structured approach (SDI) evaluates one system entirely based on using unshielded twisted pair (UTP) and a second system using a combination of UTP and shielded twisted pair (STP) copper wire installations. The non-structured cost calculations are based on the traditional approach to installing wiring within a building All cost calculations are based on a new building with four floors, two wiring closets per floor, and 200 people occupying each floor Each work station requires one voice (telephone) and one data line. Average horizontal wire run is 75 metres

The Economic impacts of selected timber harvest scenarios in British Columbia : background paper

by L. Lax and J. Parker. Victoria : Forest Resources Commission, 1992. 33 p. : ill. Bibliogr. *CSI 38187.200*
MICROLOG 93-00513 1 fiche

This paper uses six scenarios developed using the B.C. Econometric Policy Simulation Model to show the impact on employment and on the provincial treasury of reductions or increases in the amount of timber harvested annually in the province. All simulations were performed maintaining the assumption that B.C. forestry related producers were price takers in their export markets. Economic variables examined include provincial gross domestic product, investment, employment, the unemployment rate, and the government fiscal position. The results are presented as the change (percentage or level) resulting from the implementation of the particular shock relative to a base case forecast that assumes constant harvest levels equal to the 1991 timber harvest on regulated and unregulated lands along with some growth in all other sectors of the economy in the forecast period.

The Economic impacts of small and medium size ports

by B. Slack...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 23 p. Bibliogr. (Publication ; no. 890)
MICROLOG 93-05426 1 fiche

This study measures the economic benefits generated by 29 small and medium-sized ports in Quebec. Two different sets of estimates are produced, the first extrapolating impacts from commodity impact coefficients produced by a consultant's study of the larger ports in eastern Canada, and the other based on a field and questionnaire survey undertaken in China. The importance of the economic contributions of the small and medium-sized ports is contrasted with the general indifference of many local and regional planning bodies to the ports in their territory. The paper discusses the resource and regional planning implications brought about by the general underestimation of the economic significance of the smaller ports of Quebec.

This study developed production costs and returns for sugar beet production; assisted sugar beet growers with farm budgeting and planning; analyzed economies of scale, machine use, and input/output relationships for sugar beet production; provided each study participant with an individual farm analysis along with group averages; and provided an annual update for policy and program development and for extension personnel. A total of 39 producers were surveyed personally to obtained detailed cost and return information.

Economie de l'eau dans les habitations : un examen des produits, des procédés et des pratiques

REIC Ltd. Ottawa . Société canadienne d'hypothèques et de logement, Division de la recherche, 1991. 87 p
MICROLOG 93-00743 2 fiche

Ce rapport traite à fond des produits, des procédés et des programmes qui permettent d'économiser l'eau. L'accent est mis sur le contexte canadien, mais les produits et l'expérience valables des Etats-Unis y sont aussi abordés. Le document se divise en quatre grandes sections. La Section 1 présente le rapport et explique pourquoi il faut économiser l'eau. La Section 2 explore les diverses initiatives d'économie de l'eau qui s'offrent aux administrations publiques et leurs agences responsables de la gestion de cette ressource. La Section 3 décrit la technologie qui permet actuellement de réduire la consommation d'eau tant à l'intérieur qu'à l'extérieur des habitations. Quant à la Section 4, elle porte sur les codes et normes, sur les facteurs s'opposant à l'introduction d'équipement et de produits économiseurs d'eau ainsi que sur les mécanismes permettant de surmonter ces obstacles.

Economique de l'immigration et de la discrimination raciale : une revue de la documentation, 1970-89

par A.H. Akbari. Ottawa : Multiculturalisme et citoyenneté, Multiculturalisme, Politiques et recherches, 1989. iii, 36 p. Bibliogr. *L'éd. anglaise (Economics of immigration and racial discrimination...) sur la même fiche.*
MICROLOG 93-07543 2 fiche

L'objet de cette revue est de résumer et d'évaluer brièvement la documentation récente sur l'économique de l'immigration et de la discrimination raciale. Elle passe en revue les travaux de recherche sur les coûts et les avantages de l'immigration et les méthodes servant à déceler les cas de discrimination raciale et à analyser les effets économiques de la discrimination raciale, tout en faisant ressortir les principales conclusions se rapportant aux politiques de multiculturalisme au Canada, aux lacunes dans les recherches et aux orientations futures des prochains travaux de recherche. L'étude traite de l'immigration et la distribution du revenu, le bien-être, le commerce, l'emploi, et l'utilisation des services publics, et elle traite de la discrimination et sa mesure dans le marché du travail, les conséquences économiques, le modèle des préjugés personnels, et la discrimination raciale au Canada.

Ecophysiological assessment of western hemlock seedlings for coastal regeneration programs in British Columbia

by S.C. Grossnickle, J.T. Arnott and J.E. Major. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development. FRDA II, 1992. vii, 23 p. : ill Bibliogr. (FRDA report ; 183) ISSN 0835-0752 ISBN 0-7726-1577-2
MICROLOG 93-02958 1 fiche

Understanding how stocklypes respond physiologically and morphologically to reforestation site conditions is of paramount importance to achieving successful reforestation. Few studies have examined the relationship between seedling stocktypes and their subsequent physiological and morphological responses to field site environmental conditions This project documented the forest regeneration performance of western hemlock seedlings produced from a series of dormancy induced treatments achieved by characterizing seedling quality just prior to field planting and linking this assessment to physiological response and morphological development after planting.

Ecotourism in Canada

by R.C. Scace, E. Grifone and R. Usher. Hull, Que. : Canadian Environmental Advisory Council, 1992. 38 p. : ill. Bibliogr. *French ed. (L'Ecotourisme au Canada) : 93-01888/1.* ISBN 0-662-19770-4
MICROLOG 93-01889 1 fiche

Ecotourism is recognized as a distinct form of tourism because it links low impacts on the resource base and host community, environmental conservation, sustainable economic activity, and distinctive behaviour and learning by the consumer. It is practised in many countries, perhaps most evidently in developing nations such as Costa Rica, Thailand, and Nepal. This document presents a context for ecotourism. It discusses ecotourism in Canada, establishing codes for ecotourism, and the scope for public policy.

Education and religious war in Ontario : an updating

by E.S. Hickcox and J.M. Li. Toronto : Ontario Institute for Studies in Education, Dept. of Educational Administration, 1992. 34 p. Bibliogr. *ONTERIS: ON06203*
MICROLOG 93-07252 1 fiche

In 1984 the Government of Ontario decided to give the Roman Catholic Separate School Boards full funding support through grade 13. The intent of this paper is to understand this dramatic educational change in terms of its impact on the operation of schools and its relation to educational change in general. Discusses the context within which the change occurred and the main events and activities associated with it. Examines the behaviour of teachers, trustees, administrators, politicians, religious leaders, and educational organizations. Provides an update from 1990 to 1992 in terms of coverage in the Globe and Mail. Finally, it analyzes this change in terms of the clash of values involved and of the immediate effect on the structure of organizations at the provincial level and on the practice of administration within that structure.

Education and training in Canada : a research report

by K. Newton...et al. Ottawa : Canada Communication Group, Publishing, 1992. 144 p. : ill. Bibliogr. *French ed. (Education et formation professionnelle...) : 93-02875/2E. CSI 22215.275.* ISBN 0-660-14681-9
MICROLOG 93-02053 2 fiche

Education and training in Canada are currently under intense scrutiny. The reasons behind the rapidly-mounting debate include contextual factors such as globalization, technological change, trade liberalization, demographic shifts, fiscal restraint, and privatization. The implications of these factors have become a major public policy issue. This report contributes to the debate by reporting empirical research on major aspects of education and training, and evaluates the Canadian education system critically as to its past performance and future prospects.

Education as an investment for Indians on reserves : the causes of their poor education levels and the economic benefits of improving them

by D.P. Ross. Ottawa : Canadian Council on Social Development, 1991. vi, 23 p. Bibliogr. *French ed. (L'Education : un investissement pour...) on the same fiche*
MICROLOG 93-00248 1 fiche (Available on fiche only)

The low levels of education found among Indians on reserves leads to the unnecessary and avoidable loss of social and economic benefits, both to Canada and to Indian people. Indians on reserves face a number of problems that contribute to drop-out rates and education levels much worse than those experienced by certain other aboriginal peoples or non-aboriginal Canadians in general. This document discusses the economic concern with low education levels, the causes of low education levels, the educational outlook, and the cost-benefit equation.

MICROLOG 93-06821 2 fiche

Ce rapport concerne la partie descriptive d'une recherche sur l'éducation relative à l'environnement en milieu scolaire au Québec. Il est structuré en six parties. La première partie présente le cadre général de la recherche. La deuxième partie présente le point de vue des agents d'éducation à l'égard de l'éducation relative à l'environnement. La troisième partie concerne l'une des voies privilégiées d'intégration de l'ERE à l'école, soit les programmes d'études. La quatrième partie décrit la pratique de l'ERE en milieu scolaire, telle que nous l'avons perçue à travers les commentaires des différents agents d'éducation interrogés. La cinquième partie analyse les conditions actuelles du milieu scolaire à l'égard du développement de l'ERE. Et la sixième partie s'attarde à deux des principaux facteurs limitants de l'éducation relative à l'environnement, soit la formation des agents d'éducation et le support pédagogique en ERE. On y présente les besoins exprimés en ce sens par les agents d'éducation eux-mêmes.

Effect of 60 Hz and combined DC and ELF AC magnetic fields on cell proliferation in spheroid cell cultures grown at pH 7.4 and 6.8

by G.P. Arron, L.A. Bremner and M.D. Sherar. Toronto : Ontario Hydro, Research Division, 1992. iv, 15 p. Bibliogr. (Report ; no. 92-85-K)
MICROLOG 93-03294 1 fiche

The effects of extremely low frequency (ELF) electric and magnetic fields on biological systems have been a subject of interest over the past 10 years, with part of the research including a number of in-vitro experiments in which the interaction of electromagnetic fields with biological systems were studied on a cellular level. This report describes experiments designed to confirm whether AC and DC magnetic fields consistent with calcium ion cyclotron resonance affect the growth of non-transformed cells. Other exposure regimes used were AC and DC magnetic fields consistent with hydrogen ion cyclotron resonance conditions and a 60 Hz 0.1 mT magnetic field. The experiments were performed with a multicellular spheroid model which was grown at pH 7.4 (normal) and pH 6.8.

Effect of anhydrous ammonia and urea on fermentation and feeding value of high moisture barley : an evaluation of low cost storage alternatives for damp grain : final report

by D. McCartney et al. Regina : Saskatchewan Agriculture Development Fund, 1990. 21 p. : ill.
MICROLOG 93-05255 1 fiche

Harvesting of grain at safe storage moisture continues to be a problem for Saskatchewan farmers due to unfavourable weather conditions. This project evaluated several methods of storing grain with moisture levels from 22-30% moisture temporarily. These included the use of anhydrous ammonia, urea, vacuum packing, silo tubes, and field drying of grain.

Effect of battery age on lift truck charging performance

by C.E. Keyes. Toronto : Ontario Hydro, Research Division, 1992. iii, 37 p. : ill. (Report ; no. 91-310-K)
MICROLOG 93-02973 1 fiche

This report summarizes the results of phase II of a study of lift truck batteries and chargers that investigated the effect of scheduled charging on the temperature of lift truck batteries of various ages. Charger characteristics including demand, power factor and efficiency were recorded on three batteries, one new, one four years old, and the third a six-year-old sample. Seven typical chargers from representative manufacturers were used in the tests.

The Effect of competition and predation on production of juvenile sockeye salmon *Oncorhynchus nerka* in Pitt Lake

by R.E. Diewert and M.A. Henderson. Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, 1992. viii, 51 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1853) ISSN 0706-6457
MICROLOG 93-00916 1 fiche

The Pitt Lake Sockeye Salmon Project is being conducted to determine the factors that limit the production of juvenile sockeye salmon in Pitt Lake and the carrying capacity of Pitt Lake for fry inputs. This second phase of the project concentrated on determining the temporal and spatial distribution of the salmon and longfin smelt and stickleback in a large littoral area near the outlet of Pitt Lake and the Lower Pitt River. It also described in greater detail the feeding habits and diet of the three species, identified the predators of juvenile sockeye salmon, and made inferences regarding the degree to which predation contributed to their mortality.

The Effect of computer readable information on student performance, achievement and motivation : first interim report

for the Minister of Education of Ontario ; submitted by Wendy Schmidt, Laila Sisca. Willowdale, Ont. : Metropolitan Separate School Board, 1991. 10 p. *ONTERIS ON05876*
MICROLOG 93-00609 1 fiche

Describes phase 1 of a project to evaluate the effect of CD-ROM application on secondary school students. The Grolier Electronic Encyclopedia was selected for testing purposes because of its usefulness across the curriculum and at different grade levels. A learning guide was developed for student use. The project involved teacher A, who was not computer literate and had 2 advanced-level classes; and teacher B, who was computer literate and had 2 general-level classes. A common assignment was given to both advanced-level classes and another to the general-level classes. Only one class from each group was to use the CD-ROM for the assignment. Students enjoyed the sessions. Teacher A found that the class that had used the CD-ROM tended to have more precise information on the chosen topic. Teacher B reported that written work by the class using the CD-ROM was more coherent and more on-topic.

The Effect of different cementing materials and curing regimes on the scaling resistance of concrete

by I. Afrani and C. Rogers. Downsview, Ont. : Ministry of Transportation, Engineering Materials Office, 1993. 29 p. : ill. Bibliogr. (Materials information report ; MI-166) *Prepared for presentation at 3rd Canadian Symposium on Cement and Concrete.* ISSN 0843-7246 ISBN 0-7778-1376-9
MICROLOG 93-07693 1 fiche

As part of a project to determine the long term durability of concrete made with an alkali-silica reactive course aggregate, six concrete mixtures were made with a variety of cementing materials: high alkali type 10 Portland cement, low alkali type 10 Portland cement, 25% ggbfs (ground granulated bolast furnace slag) and 50% ggbfs with the type 10 high alkali Portland cement, 18% type F fly ash with the high alkali type 10 Portland cement, and 3.8% silica fume with high alkali Portland cement and 25% ggbfs. Concrete slabs were cast and cured under three conditions: 14 days in the moist room at 23 degrees Celsius, 14 days outdoors covered with wet burlap and plastic sheet, 28 days in the air after application of a curing compound. The slabs were tested at an age of 28 days for 50 freeze-thaw cycles in the scaling test using 3% NaCl solution. This document presents the test program, results, discussion and conclusions. Figures showing the results of the scaling resistance test is included.

Effect of finite ground parameters on the radiation characteristics of a linear array over a cliff

by S.A. Saoudy. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1992. 5 p. : ill. (C-CORE publication ; no. 92-6) *Presented at NECEC '91.*
MICROLOG 93-07752 1 fiche (Available on fiche only)

This document discusses the effect of finite ground parameters of the radiation characteristics of a linear array over a cliff. Normally, an HF ground-wave radar antenna, which is in the form of a linear array at a coastal site, is positioned on top of a cliff of soil ground parameters, which differ from those of the ocean. This study computes the space-wave fields as well as the surface wave propagation along the ground. It gives an array description, discusses numerical results, and provides a conclusion.

Effect of geomagnetically-induced currents on static var compensator protection systems

by H. Bilodeau, S.R. Chano and J.-P. Chayer. Montreal : Canadian Electrical Association, Power System Planning and Operating

Division. 1992. 19 p. : ill. Bibliogr.
Presented at the Canadian Electrical Association Engineering and Operating Conference
MICROLOG 93-06107 1 fiche

This paper describes the effect of harmonically distorted waveforms on static var compensator (SVC) protective relays. Geomagnetically-induced currents (GIC) cause harmonic voltage levels to rise, and this can affect the operation of relays sensitive to harmonics. Voltage and current relays that may be affected are identified and discussed in this paper. Harmonic overloading is also discussed, with special emphasis on SVC thyristor-switched capacitor thermal equipment ratings. Accurate data for protection analysis were gathered from a worst-case simulation using a second harmonic system resonance approach with the SVC model. Potential protection problems under GIC disturbances were identified using this approach.

The Effect of increasing uranium mass on sheath strain in Bruce and Pickering fuel

by M.R. Floyd. Chalk River, Ont. : Atomic Energy of Canada Limited, Chalk River Laboratories, 1992. 6 p. : ill. *At head of title: AECL research. Presented at the Third International Conference on CANDU Fuel.*
ISSN 0067-0367 ISBN 0-660-14768-8
MICROLOG 93-03867 1 fiche

The mass of uranium contained in a CANDU fuel bundle is dependent on the UO2 density, cladding dimensions/tolerances, pellet geometry and axial/diametral clearances. Economic incentives exist for maximizing the UO2 content of manufactured bundles. Since 1980, the average uranium mass of 37-element and 28-element bundles produced for Ontario Hydro reactors has increased by up to 3 percent. This paper investigates the effect of this mass increase on the dimensional performance of the fuel.

The Effect of sensory input on trajectories generated by recurrent neural networks

by S.A. Barton. Ralston, Alta. : Defence Research Establishment Suffield, 1993. xii, 48 p. : ill. Bibliogr. (Suffield report ; no. 589)
MICROLOG 93-05886 1 fiche

Part of the work performed by the Advanced Guidance Concepts Group is research on radical methods for developing machine intelligence. The long-term goal is to develop navigation, obstacle avoidance, and object recognition capabilities in an adaptive, intelligent, autonomous land vehicle. This paper shows that the iterative signals generated by a simple recurrently connected network of only three sigmoidal nodes become stable, periodic, or chaotic, depending on the magnitude of a global parameter that controls the steepness of the node responses. A software simulation of a machine whose motion in two dimensions is controlled entirely by the iterative activity of a recurrently connected neural network was developed.

The Effect of shielding gas composition on mild steel GMA weld composition, properties, and porosity : theoretical background, experimental results, and proposed future work

by S.A. Gedeon and S.J. Rudd. Oakville, Ont. : Welding Institute of Canada, 1992. iii, 49 p. : ill. Bibliogr. *On cover: Research report. CANMET contract: 23440-0-9268-01-SQ*
MICROLOG 93-01554 1 fiche

Mild steel gas metal arc welding (GMAW) electrodes are certified in North America with multipass weldments performed using 100 percent carbon dioxide and tested in accordance with CSA W48.4 or AWS A5.18. Once the performance criteria are met, the electrodes are also granted certification for use with certain other shielding gas compositions as specified in the standards. These acceptable composition ranges have recently been questioned and this experimental program was initiated to determine the range of acceptable shielding gas compositions which still meet the required weld performance criteria. Over 40 CSA W48.4 weld qualification plates were welded and tested with oxygen from 0-10 percent, carbon dioxide from 0-100 percent, helium from 0-30 percent and the balance argon. Binary, ternary and quaternary mixtures were tested with ER 480S-3 (70S-3) and ER 480S-6 (70S-6) GMAW electrodes.

Effect of sites and provenances on 6th-year performance of noble fir in coastal British Columbia

by C.C. Ying. Victoria : Ministry of Forests, 1992. vi, 21 p. : ill. Bibliogr. (Research note ; no. 112) ISSN 0226-9368
MICROLOG 93-02959 1 fiche

While the range of noble fir is not usually as far north as British Columbia, the forest industry has long been interested in its introduction because of its higher wood production than most other conifers at the same height, its thin bark, and its relative freedom from insects and diseases. This study established long-term provenance tests within the biogeoclimatic units where there is a potential for reforestation and delineated common environments for planting this species, based on vigour, survival and damage; related these common environments to B.C.'s biogeoclimatic classification units; identified noble fir seed sources suitable for use in these units; and evaluated seed source and test site and seed source and biogeoclimatic unit interactions.

The Effectiveness of calcium magnesium acetate de-icer under severe operating conditions, winter 1989-90 and 1990-91

by M.S. Perchanok and R. Raven Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1992 iv, 41 p. : ill Bibliogr.
MICROLOG 93-01485 1 fiche

The use of sodium chloride as a de-icer has a number of adverse environmental effects and its use has recently been minimized. Calcium magnesium acetate (CMA) was identified in the late 1970s as a possible alternative to salt, but test trials were only conducted in the southwestern areas of the province, where there are milder temperatures, light snow and heavy traffic. This study was conducted to determine whether CMA could be used as the sole de-icer in cold temperatures, heavy snow and light traffic, conditions typical of rural highways in central, eastern and northern Ontario, and to develop and test methods of handling CMA that would minimize spillage or other loss of this expensive material. CMA was used in place of salt in the winter maintenance program at one patrol yard near Owen Sound, Ontario. Comparisons were made on overall quantities used; storage, handling and spreading characteristics; time required to initiate de-icing, drying and persistence of effects skid resistance, and effect on vehicles.

Effectiveness of clean-up techniques for leaded paint dust : report

for Research Division, Canada Mortgage and Housing Corporation , by Don Figley and Jerry Makohon. Saskatoon, Sask. : Saskatchewan Research Council, Technology Transfer and Business Development Branch, 1992 vii, 42 p. : ill. (SRC publication , no. I-4800-38-C-92) *French ed. (Efficacité des techniques de. .)* : *93-08165/1*
MICROLOG 93-07009 1 fiche

Leaded paint dust has been identified as a major potential source of lead contamination in housing when houses being renovated have significant quantities of leaded paint. Currently, Canada does not have specific regulations related to construction clean-up requirements for contractors and homeowners. This report outlines the results of a laboratory study to provide information on the effectiveness of construction dust clean-up activities that would be available to general contractors and homeowners. Vacuuming using a variety of wet/dry systems, sweeping, and wet mopping were done to standard carpet and vinyl flooring samples, with 28 different combinations investigated. All measurements were conducted in a full scale environmental chamber with controlled humidity and airflow. The total mass removal efficiency (MRE) of each cleanup method was determined gravimetrically and the recovered dust was analyzed to determine the size distribution and lead content.

Effects of a high-energy food supplement on cold-induced thermogenesis

by A.L. Vallerand and I. Jacobs. North York, Ont. : Defence and Civil Institute of Environmental Medicine, 1993. 27 p. : ill Bibliogr. (Interim research report ; DCIEM no. 93-36)
MICROLOG 93-08848 1 fiche

An experiment was done with seven healthy male volunteers who were instrumented with a rectal probe, 12 calibrated heat flux transducers, an intravenous catheter and a heart rate monitor. These men were then exposed to the cold wearing nothing but jogging shorts and foam slippers. Body and skin temperatures were measured, along with dry heat losses. Oxygen consumption and carbon dioxide production were also measured The goal of this study was to determine whether a much higher dose of energy substrates (710 kcal or 2,970 kJ) can alter heat production.

Effects of acid deposition on the emergence of blackflies *Diptera: simuliidae* over 50 years from Algonquin Park streams

by C.M. Chmielewski and R.J. Hall. Toronto : Environment Ontario, 1992. v, 31 p. : ill. Bibliogr. ISBN 0-7729-9769-1
MICROLOG 93-01775 1 fiche

The effects of lowered stream Ph on the abundance of mayflies, stoneflies, caddisflies and chironomids are well documented but knowledge of the effects of episodic Ph depressions on blackflies is very scarce. This study assessed the effects of long-term anthropogenic acidification on the emergency of blackfly populations in Mud Creek and Costello Creek in Algonquin Park, Ontario from 1984-86. Results were compared with a study conducted 50 years ago in the same two sites.

The Effects of age and experience on accidents with injuries : should the licensing age be raised?

by C Laberge-Nadeau, U. Maag and R Bourbeau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993 ii, 17 p. : ill. Bibliogr. (Publication , no. 911) *In* Accident Analysis and Prevention : *vol. 24, no. 2, 1992.*
MICROLOG 93-05422 1 fiche

In Canada, the legal driving age varies from 15 to 17, most frequent is 16. The literature on new and young drivers has documented the importance of experience but without much debate on the age effect. The purpose of this paper is to look at the age of obtaining the first driver's license over the period from 1971 to 1984 for the group 16 to 24 years old and to assess the relation between accident involvement and age, as distinct from driving experience.

The Effects of air pollution on forests

by G.L. Brown. Hull, Que. : Canadian Environmental Assessment Research Council, 1986. 60 p. Bibliogr. (Manuscript report ; MR2-86)
MICROLOG 93-06481 1 fiche

This paper reviews existing literature searching for possible causes of major forest declines, with a focus on the potential involvement of air pollutants including gaseous pollutants, acid deposition, heavy metals and organic compounds. The response of forests to various pollutants, ozone, sulphur dioxide and nitrogen dioxide, acid deposition, heavy metals and pollutant mixtures, is discussed and hypotheses of pollutant-related forest declines are developed.

Effects of blackout on British Columbia spruce seedlots at Red Rock Research Station

by C.D.B. Hawkins and D.A. Draper. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development. FRDA II, 1991. vii, 51 p. : ill. Bibliogr (FRDA report ; 170) ISSN 0835-0752 ISBN 0-7726-1503-9
MICROLOG 93-00912 1 fiche

Controlling the height of spruce seedlots to desired standards is a recognized problem at high latitude nurseries in British Columbia. Nutrient and drought-stressing techniques are commonly used but can be biologically hard on the seedlings. Photoperiodic induction of budset, or blackout, may be an alternative to drought stressing, but there are problems. This report presents the results of using four dynamic photoperiod (short-day) treatments, each declining in parallel with the natural ephemeris. These were applied for three durations to six seedlots from three spruce species at Red Rock Research Station near Prince George, B.C.

Effects of ephedrine/xanthines on thermogenesis and cold tolerance

by A.L. Vallerand. Toronto : Defence and Civil Institute of Environmental Medicine, Environmental Physiology Section, 1993. 4 p . ill. Bibliogr. *In* International Journal of Obesity : *vol. 17, supplement 1, 1993*
MICROLOG 93-05870 1 fiche

This study determined whether mixtures of ephedrin/xanthines can enhance thermoregulatory thermogenesis and cold tolerance, and how these mixtures compared to other thermogenic agents in the cold. This was accomplished by measuring not only thermoregulatory thermogenesis, deep and superficial body temperatures, but also by calculating the heat debt and the rates of substrate utilization Subjects were healthy young male volunteers and tests were double-blind and placebo-controlled.

Effects of heating the inlet air with a burner when natural air drying : final report, August, 1986 to March, 1987

by W.F. Stock...et al. Regina . Saskatchewan Agriculture Development Fund, 1987. ii, 84 p. : ill. Bibliogr.
MICROLOG 93-02364 1 fiche

During the fall of 1985 and 1986, the cool and humid harvest weather conditions seriously reduced the performance of natural air drying systems, prompting a number of farmers to consider adding supplemental heat. This project was conducted to investigate the implications of adding supplemental heat and to develop recommendations. Different supplemental heat strategies were compared to natural air drying in field tests at the PAMI grain dryer test facility and the influence of grain moisture content, weather conditions, fuel costs and grain market value were investigated with grain drying simulation models.

Effects of imbalances and DC offsets on I/Q demodulation (U)

by J.P.Y. Lee Ottawa : Defence Research Establishment Ottawa, 1992. x, 50 p. : ill. Bibliogr. (Report ; no. 1148)
MICROLOG 93-05997 1 fiche

This report describes the effects of imbalances and DC offsets in an I/Q demodulator on the demodulation of radar signals. Three normalized parameters consisting of peak-to-peak ripple to mean ratio, phase error, and normalized instantaneous frequency deviation are used to characterize distortions introduced on the envelope, phase, and instantaneous

frequency respectively. The effect on the distortions due to aliasing and an approximation used in deriving the instantaneous frequency as a discrete-time processor is also analyzed.

The Effects of logging and mass wasting on juvenile salmonid populations in streams on the Queen Charlotte Islands

by D.B. Tripp and V.A. Poulin. Victoria : Ministry of Forests, 1992. vi, 38 p. : ill. Bibliogr. (Land management report ; no. 80) ISSN 0702-9861 ISBN 0-7718-9258-6
MICROLOG 93-03814 1 fiche

The effects of logging and mass wasting on juvenile coho salmon and Dolly Varden char were assessed in streams on the Queen Charlotte Islands. Fish densities and habitat characteristics of 27-33 stream reaches were measured during summer and fall. Reach samples included undisturbed, unlogged old-growth forest, logged streams not directly affected by recent mass wasting (logged), and logged streams directly affected by recent debris torrents and slides (mass wasted). Overwinter survivals and smolt yields in three mass wasted and three non-mass wasted streams (all logged) were also estimated in a downstream spring fish trapping program, after determining the number of fish present in each stream the previous fall.

Effects of vertical-lift gate operation on cavitation damage to spillway crest

by K.Y.C. Yung. Montreal : Canadian Electrical Association, Engineering and Operating Division, Hydraulic Power Section, Hydraulic Structures Subsection, 1992. 15 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06051 1 fiche

Vertical-lift gates are often provided at spillways for passage of flood flows. They are intended to be operated infrequently for relatively short durations. However, many spillways equipped with vertical-lift gates have subsequently been used as flow control structures for continuous operations. This has resulted in cavitation damage to the spillway crest near the gate slot. Such damage has occurred at Hugh Keenleyside Dam on the Columbia River and Seven Mile Dam on the Pend d'Oreille River in British Columbia. This discusses the causes of the cavitation action and describes the damage at Hugh Keenleyside and Seven Mile dams and the remedial measures considered. Design considerations to prevent the potential damage in future projects are also suggested.

Efficacy of single applications of *Bacillus thuringiensis* and diflubenzuron formulations against hemlock looper in Newfoundland in 1988

by R.J. West, J.P. Meades and P.L. Dixon. St. John's : Forestry Canada, Newfoundland and Labrador Region, 1992. vi, 19 p. : ill. Bibliogr. (Information report ; N-X-284) ISSN 0704-7657 ISBN 0-662-19614-7
MICROLOG 93-00213 1 fiche

Diflubenzuron is a benzoylphenyl urea that upon ingestion by insect larvae selectively inhibits chitin synthesis. Double applications of Dimilin WP in aqueous formulations have reduced numbers of hemlock looper larvae and pupae significantly, although the foliage protection has been below 50%. It was suggested that the use of oil rather than water as a base for the diflubenzuron formulations might improve spray deposit and efficacy. This paper reports the results of field trials carried out in 1988 to evaluate the effectiveness of single applications of three formulations of *Bacillus thuringiensis*, Dipel 176, Dipel 264, and Futura XLV, and one oil-based formulation, Dimilin ODC. The applications of Dipel 176 and Dipel 264, both oil-based, were made against the hemlock looper at several stages in larval development whereas Futura XLV, a water-based formulation, was tested only once when the majority of larvae were in their second instar. The diflubenzuron applications were made against first-instar larvae.

Efficiency improvement in industrial electric resistance furnaces : effect of insulation and high emissivity coating

by I.S. Balbaa. Toronto : Ontario Hydro, Research Division, 1992. iii, 23 p. : ill. (Report ; no. 91-319-K)
MICROLOG 93-02972 1 fiche

The electrical load used in industrial applications of resistance heating furnaces in Ontario is estimated to be 68 MW. Two of the factors that could have significant impact on improving the thermal efficiency of furnaces are insulation and the application of high emissivity coating. This project was initiated to examine the effect of these two parameters on furnace efficiency. The electric resistance furnace used in the tests was a 5 Kw box type with internal dimensions of 30 cm by 28 cm. Experimental tests involved measuring the energy consumption and the heating and cooling periods of the furnace when it is insulated with conventional firebrick and low thermal mass fibre board material. The effect of high emissivity coating on the energy consumption and the heating and cooling periods was also evaluated. In all cases, tests were conducted using a high thermal conductive (steel) load and a low thermal conductivity (fibrebrick) load.

Egress of jack pine roots from perforated and non-perforated paperpot containers

by C.W.G. Templeton and S.J. Colombo. Sault Ste. Marie, Ont. : Ontario Forest Research Institute, 1993. 4 p. : ill. Bibliogr. (Forest research note ; no. 50) ISSN 0381-2650
MICROLOG 93-06358 1 fiche

The expansion of roots by a planted seedling and their penetration into the surrounding soil is critical to both seedling establishment and long-term plantation viability. Many innovations in container design have been directed towards overcoming perceived problems associated with root form and tree stability, one of which involves a perforated Japanese Paperpot container. This study compared the root egress and the growth of jack pine seedlings in perforated and non-perforated Paperpot containers.

Ehattesaht traditional fisheries systems

by P.A. Berringer...et al. Hull, Que. : Canadian Environmental Assessment Research Council, 1989. 32 p. Bibliogr. (Manuscript report ; MR8-92)
MICROLOG 93-05378 1 fiche

This report describes the community knowledge of traditional fisheries and systems of management of the Ehattesaht tribe on the west coast of Vancouver Island; identifies what could be learned through further research; analyzes the relevance of traditional approaches and their relationship to modern day systems of fisheries management; and develops recommendations on an appropriate strategy to study the impact of non-native fisheries on valued species and the impact of development activities on the marine ecosystem. The main source of information was videotaped interviews with elders from the Ehattesaht and closely-related tribes, supplemented with published and unpublished information from ethnographic, archaeological, historical, and archival sources

Les Elasticités-prix de la demande de transport interurbain des personnes

par Richard Laferrière , pour la Commission royale sur le transport des voyageurs au Canada. Montréal : Université de Montréal, Centre de recherche sur les transports, 1992. 52 p Bibliogr. (Publication ; no. 865)
MICROLOG 93-05449 1 fiche

Il existe plusieurs modèles de la demande de transport interurbain des passagers et, pour chacun une évaluation des élasticités-prix propre au modèle. Ces estimations des élasticités-prix sont difficilement comparables, car elles sont basées sur des prix et des demandes différentes. Notre étude compare sur une base commune, pour la première fois, les élasticités-prix de la demande des modes de transport interurbain obtenues avec neuf modèles économétriques. Cela permet de répondre à des questions telles que: est-ce que les modèles calibrés il y a plus de 10 ans permettent encore de mesurer la sensibilité de la demande de transport d'aujourd'hui? Quels sont les modèles qui peuvent ou non s'appliquer selon le type de marché analysé? Est-ce que les élasticités-prix provenant de différents modèles sont suffisamment homogènes pour permettre un consensus? Quels sont les modes de transport dont la demande est élastique? Pour quels modes de transport est-ce que la demande est sensible aux prix des autres modes?

The Elderly in the Calgary Region

Calgary Regional Planning Commission. Calgary, Alta. : The Commission, 1991. 30 p. Bibliogr. (Prospect ; vol. 1 no. 2) *CSI 89968 205*
MICROLOG 93-00549 1 fiche

Not unlike most other regions in Canada, the elderly population will be the fastest-growing age group in the region. There is a growing number of life-style options for the elderly of today that is influencing land-use planning in areas such as recreations and housing in the Calgary region. This report provides an expanded definition of the elderly. It looks at socio-economic characteristics of the elderly, population trends for the elderly in the Calgary region, recreational and leisure activities of the elderly, the impact of the elderly on housing, and other implications of the elderly for planning and municipal government.

Electric service reliability worth evaluation in power systems

by R. Billinton and L. Goel. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operating Section, Power System Reliability Subsection, 1992. 16 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06075 1 fiche

Reliability worth assessment is an important requirement in power system planning and operation. In order to evaluate the costs associated with unreliability and to determine the most effective approaches to reduce and mitigate the impacts it is necessary to develop an understanding of the monetary implications associated with supply interruptions. Actual or perceived cost of customer interruption data can be used effectively to determine the worth of electric service reliability. This paper presents methods for evaluating reliability worth factors designated as interrupted energy assessment rates (IEAR) for generating capacity, composite generation and transmission system and overall electric power system reliability worth evaluations. The IEAR can be used in conjunction with normally calclulated reliability indices to predict the monetary consequences of supply interruptions. The concepts associated with utilising a customer damage function together with customer load point reliability indices are presented and illustrated using a reliability test system.

Electrical impedance of white spruce shoots in relation to pressure-volume analysis and free sugar content

by S.J. Colombo and E. Blumwald. Sault Ste. Marie, Ont. : Ministry of Natural Resources, Ontario Forest Research Institute, 1992. 6 p. : ill. Bibliogr. *In* Plant, Cell and Environment *: 15, 1992.*
MICROLOG 93-06363 1 fiche

Electrical impedance has been used to detect a wide range of physiologically based attributes, including freeze-thaw injury, frost hardiness, tissue water potential, infection by pathogens, and plant growth rates. Generally, high impedance values are associated with higher levels of frost hardiness. Similar seasonal trends in plant free sugar content also occur, marked by large increases in free sugars during cold acclimation. Soluble sugars have been related to increased tissue electrical impedance. This paper shows that impedance measured at a frequency of 1 kHz is proportional to the levels of free sugars in the tissues of white spruce shoots.

Electrochemical oxidation of Alberta coals in new environments : final report

by V.I. Birss. Edmonton : Alberta Energy and Natural Resources, Office of Coal Research and Technology, 1990. 44 p. : ill. Bibliogr.
MICROLOG 93-02105 1 fiche

The electrolysis of acidic coal slurries, whose advantages include the production of clean, sulfur-free carbonaceous products as well as hydrogen at half the cell voltage required to produce oxygen and hydrogen via the electrolysis of water, was first reported in 1979. However, with time the coal surface gradually becomes covered with oxidized functional groups, that lower the rate of oxidations and makes it difficult to fully oxidize the coal particles. This report describes a study of the electrochemical oxidation of various types of Alberta coals of different particle sizes in iron-containing acetic acid slurries to determine the activity of the coal towards oxidation and the nature of the products obtained. An investigation of the feasibility of electrochemically oxidizing selected Alberta coals in a number of other new environments, such as other organic acid slurries, in mixed aqueous and non-aqueous solvents, and in mildly alkaline slurries, was also undertaken. New redox mediators were sought in these studies.

An electromagnetic (EM) induction sensor and impulse (ground penetrating) radar mounted in a helicopter-towed bird was used to collect snow and ice thicknesses of the land fast and mobile ice cover off St. Anthony, Newfoundland in March 1992. A laser mounted in the bird's sensor package measured sensor height above snow level while the EM measured height above ocean water and the radar height above snow/ice interface. From these data snow plus ice thicknesses were computed in real time. This report documents the field program and lists all calibration data collected to verify the air-borne EM and radar data.

Electron microscopy of aquatic colloids : non-perturbing preparation of specimens in the field

by D. Perret..et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 36 p. : ill. Bibliogr. (NWRI contribution ; 91-27)
MICROLOG 93-07476 1 fiche

This paper describes a simple and powerful procedure for the specimen preparation of aquatic colloidal particles for direct obervation by transmission electron microscopy at a resolution of 0.001 microns It is applicable to aquatic colloidal systems rich in humics, fulvics, iron oxyhydroxides, manganese oxides, polysaccharides, clay minerals, and silicates. Four preparation schemes are described The advantages of these schemes are compared to those of classical specimen preparation schemes.

L'Electronique au Canada

Ottawa : Conseil des sciences du Canada, 199
xv, 57 p. : ill. Bibliogr. (Stratégies sectorielles en matière de technologie ; no 14)
CSI 22169 208F. ISBN 0-662-97355-0
MICROLOG 93-00132 1 fiche

Ce document traite de l'importante interaction des semi-conducteurs et du vaste éventail de produits et de systèmes manufacturés caractérisant le secteur de l'électronique. Bien que plusieurs segments importants du secteur

de l'électronique (par exemple, la défense électronique, l'informatique et l'automation de la production) soient inévitablement abordés dans ce rapport, les télécommunications et le logiciel font l'objet d'un examen approfondi distinct. Le rapport a pour objectif principal de déterminer les stratégies technologiques adoptées par les entreprises d'électronique de pointe au Canada, d'établir le rendement du secteur en matière de R-D comparativement à nos principaux concurrents, et d'analyser les principaux motifs des différences relevées et leur incidence sur la compétitivité.

Elementary and secondary education in Ontario : key statistics, 1990-91

Toronto : Ministry of Education, 1992. 38 p : ill. *French ed. (L'Education à l'élémentaire et au secondaire..) : 93-08395/1. CSI 55108.015. ONTERIS: ON06021.* ISBN 1180-4998
MICROLOG 93-02015 1 fiche

Presents statistical information based primarily on data collected annually from Ontario schools and school boards. Available in both English and French, it begins with a broad overview of elementary and secondary education in the province, and then provides detailed information on school boards, students, teachers, and the financing of elementary and secondary education. Gives information on selected programs of the Ministry of Education, including literacy programs for adults and youth employment services. A section on private schools and a compilation of statistical tables are included as well.

Elementary CRDI needs assessment : focused interviews with school-based curriculum management teams (90/91)

by C. Moore and L. Earl. Scarborough, Ont. Scarborough Board of Education, Program Dept., Research Centre, 1992. vi, 84 p (Research report ; no. 91/92-12) *ONTERIS ON06033*
MICROLOG 93-02023 1 fiche

Focused interviews were conducted in 1988-89 with staff in all Scarborough secondary schools to provide the Curriculum Review, Development and Implementation (CRDI) Committee with a picture of their CRDI initiatives. In 1990, the CRDI Committee decided to conduct a similar process with the Curriculum Management Plans (CMP) in elementary schools. The objectives were to describe the CRDI process in elementary schools, to assist in providing instructional leadership; to identify strengths and weaknesses in the process; to identify human and material resources; to help create future directions for curriculum management; and to provide training in focused interview techniques. The 4 major topics covered are the status of Program Department Curriculum Implementation Projects; the status of other curriculum initiatives; how involved Scarborough elementary schools are in school-based curriculum management; and future directions for CRDI activities.

Eléments de gréement et d'accastillage de navire découverts dans des fouilles archéologiques sous-marines effectuées à Red Bay, Labrador, en 1983

par C.S. Bradley. Ottawa : Environnement Canada, Service des parcs, 1993. 23 p. : ill. Bibliogr. (Bulletin de recherches ; no 300) *L'éd. anglaise (Ship's fittings and rigging components...) sur la même fiche.* ISSN 1184-7174
MICROLOG 93-04569 1 fiche

La cinquième saison de fouilles menée à Red Bay par la Section d'archéologie subaquatique du Service canadien des parcs a permis de mettre au jour 164 éléments de gréement et d'accastillage. Les pièces ont été classées en cinq sous-catégories, selon leur fonction: poulies dormantes et accessoires connexes, poulies courantes et accessoires connexes, pièces maîtresses du gréement, mâts et espars, filins et cordages, et éléments non identifiées, possiblement reliés aux autres pièces. Ce bulletin de recherche porte précisément sur les éléments de gréement et d'accastillage de navire découverts dans les fouilles archéologiques sous-marines effectuées à Red Bay, Labrador, en 1983.

L'Elevage contractuel des génisses laitières

Québec : Gouvernement du Québec, Ministère de l'agriculture, des pêcheries et de l'alimentation, Conseil des productions animales du Québec, Comité des bovins laitiers, 1990. 32 p. Bibliogr.
MICROLOG 93-01730 1 fiche

L'élevage des génisses laitières représente un défi pour le producteur laitier qui vise des résultats techniques et économiques satisfaisants. Ce document sert de guide pour ceux qui envisagent le développement de ce type d'élevage et veulent en évaluer l'utilisation. Il tente de définir l'élevage contractuel, de voir ce qui se fait actuellement au Québec ou ailleurs, mais tente surtout de cerner les facteurs et les critères autant techniques qu'économiques qui peuvent justifier que des producteurs laitiers aient recours à ce type d'élevage. Finalement, il fournit le moyen d'en évaluer l'intérêt économique et cerne les points à inclure dans un bon contrat entre un producteur laitier et l'éleveur de ses génisses.

MICROLOG 93-02744 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Elk Lake area, District of Timiskaming. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1977, roads in the area were traversed and observed conditions recorded as further verification of office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, Eolian, glaciofluvial, glaciolacustrine, alluvial and organic landforms.

Emerging trends and issues in Canada's environmental industry

by A. Fouillard. Ottawa : National Round Table on the Environment and the Economy ; Institute for Research on Public Policy, 1993. viii, 66 p. Bibliogr. (Working paper ; no. 8) *At head of title: Sustainability and prosperity program*
MICROLOG 93-06374 1 fiche

This report focuses on the environmental services sector of the environmental industry, expected to create knowledge-based, high-technology jobs and new opportunities for investment and international trade. The report first defines the industry and examines the lack of widespread understanding that surround it, then considers government funding of research and development as it relates to environmental technologies, and addresses it as part of a broader sustainable industrial strategy in a more globally interdependent trading nation. The report also explores this country's position as a world environment leader and how that can ensure the substantive changes needed in policies, administrations, and businesses. The major players and drivers of the industry are identified, as are the incentives that promote, commercialize, and encourage future research and development.

Encourager la participation du public : bref exposé et bibliographie choisie annotée

Ottawa : Conseil canadien de développement social, 1993. 81 p. ISBN 0-88810-383-2
MICROLOG 93-05978 1 fiche (Available on fiche only)

Ce document de travail présente un bref exposé et une bibliographie choisie annotée sur la participation du public. La participation du public signifie les mesures prises, à titre individuel et collectif, par des personnes pour s'engager dans les affaires de leur collectivité et améliorer celle-ci. Les ouvrages retenus proviennent du Canada et des États-Unis, et sont rédigés en langue anglaise. Seules quelques publications de langue française font exception à cette règle. Le matériel d'origine canadienne comprenait des articles savants et des publications de nature plus ordinaire. Quant aux sources américaines, elles ne comprenaient que des travaux érudits.

The End of a military century?

by A Legault. Ottawa : International Development Research Centre, 1992. 117 p. : ill. Bibliogr. ISBN 0-88936-618-7
MICROLOG 93-04553 2 fiche (Available on fiche only)

This document discusses three principal models of international relations. It examines whether the three models should be revised because of the Gulf Crisis, the Canadian example and the models of peace by might or peace by right, economic growth and world miliary spending, arms transfers, conflicts in the third world and the north, and the terrorist dimension. Finally, it discusses the topic of military spending.

Energy analysis of alternative combinations of building environment, heat recovery systems and solar heating systems for a broiler chicken house : final report

by M. Bantle. Regina : Saskatchewan Agriculture Development Fund, 1990. 143 p. Bibliogr.
MICROLOG 93-05563 2 fiche

The natural gas and electricity consumption of a broiler chicken house near Saskatoon was monitored for two broiler cycles using a DOE 2.1C building energy computer simulation to predict consumption. The simulation was also used to show that significant energy savings are possible with the implementation of a heat recovery system or a solar energy system.

An Energy balance computer program for the optimum application of vibration dampers

by M. Murphy. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, 1992. 10 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06260 1 fiche

The application of dampers to reduce aeolian (wind-induced) vibrations of electric power transmission lines suffers from confusion and inconsistency. A PC-based computer program which uses an energy balance approach to determine optimum vibration damper application is described. The program accurately predicts the ideal damper size, placement and protectable span length based on energy balance calculations, conductor attachment type, conductor tension, and terrain modifications. Standard utility practice, program operation, and program limitations are discussed.

An Energy based probabilistic approach for spinning reserve assessment in interconnected generation systems

by N.A. Chowdhury and S.K. Ahmad. Montreal : Canadian Electrical Association, Power System Planning and Operating Section, 1993. 22 p. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05222 1 fiche

This paper presents an energy based technique to assess spinning reserve requirements in interconnected systems. The proposed technique directly responds to unit size and lead time and the technique is probabilistic in nature. An energy based index is proposed to verify the respective spinning reserves of the interconnected systems. The salient features of the energy based technique are presented and two test systems and a hypothetical system are used to provide numerical examples.

MICROLOG 93-01533 2 fiche

The petrochemical and energy utility industries require a methodology that will allow petroleum production, refining and the governing regulatory authorities to make technically and financially sound decisions for the repair or replacement of pressure vessels that suffer damage during service. Engineering Critical Assessment (ECA) is a means of deciding on the necessity and timing of a vessel repair or replacement. In 1988, a three-year government-industry collaborative program was begun to validate an ECA approach of which a key component was a burst test performed in 1990. This report presents the results of a non-destructive evaluation and ECA analysis carried out on a pressure vessel in which cracking was detected at several weld locations on the inner surface after 10 years of wet hydrogen sulphide service. The evaluation and analysis results were compared with those given by an analysis performed after the vessel had been hydrotested to failure. Actual flaw sizes were measured by post-burst test metallurgical analysis. The report also comments on the validity of the methods for the application of ECA to this type of vessel.

English as a second language : adult ESL programs and activities supported by immigration bridging programs, 1991-92

Edmonton : Alberta Career Development and Employment, Immigration and Settlement Services, 1993. 45 p. : ill. *CSI 34127.003.*
MICROLOG 93-07365 1 fiche

This report summarizes the activities supported by Immigration Bridging Programs in the area of adult English as a Second Language (ESL) for the 1991/92 fiscal year, and provides an overview of the trends and needs for ESL training in Alberta. It identifies adult ESL responsibilities in Alberta. It looks at specialized ESL training and characteristics of students in ESL programs in Alberta. It provides information on immigration. It includes tables showing knowledge of English of immigrants by gender, by age group, by immigration class, and by education.

ENGOs and EIAs : the Brier Island experience

by F. Rousseau. Hull, Que. : Canadian Environmental Assessment Research Council, 1989. iii, 35 p. : maps. Bibliogr. (Manuscript report ; MR7-89)
MICROLOG 93-05290 1 fiche

This report investigates the feasibility of incorporating Environmental Impact Assessment (EIA) techniques and community participation strategies into the routine operations of Environmental Non-Government Organizations (ENGOs) involved in land acquisition for conservation purposes. Although ENGO operations could potentially affect communities located adjacent to their acquired sites, they are under no obligation to consider the environmental or social impacts of their activities. The report demonstrates, through the study of the Nature Conservancy of Canada's acquisition of Brier Island off Nova Scotia, how EIA methodologies were incorporated into the consultation process of one ENGO, and explores how these EIA components might have been used more constructively.

Enhancements to manoeuvring simulation software, vol. I : main report

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by J. Rousseau [and] A. Kendrick. Ottawa : German & Milne, 1990. xv, 143 p. : ill. Bibliogr.
MICROLOG 93-03101 2 fiche

0Software for simulating ship manoeuvring behaviour, written in FORTRAN and installed on a MicroVAX II computer at the Canadian Coast Guard, was written to allow designers to assess manoeuvrability during the preliminary design phase and regulators to check probable performance and validate full scale trial results and the content of manoeuvring documentation held on board. The program's limitations in ship configuration and the types of simulations that could be modelled led to rewriting in which the software was broadened to include other vessel configurations and to allow users the capability of an IBM-compatible personal computer. This report describes in detail the changes to the software and the results of the validation tests.

Enoncé de politique en matière d'immigration et d'intégration et le niveau d'immigration pour les années 1992 à 1994

avis présenté à la Ministre des communautés culturelles et de l'immigration. Montréal : Conseil des communautés culturelles et de l'immigration, 1991. 55 p. ISBN 2-550-22387-X
MICROLOG 93-04982 1 fiche

Le premier chapitre de cet avis fait un relevé des points qui ont retenu l'intérêt des membres et un bref commentaire illustre chacun de ceux-ci. Le deuxième chapitre traite de la notion de capacité d'accueil et de la notion d'intégration et tente de les préciser davantage. Le troisième chapitre aborde la question du niveau d'immigraton pour les années 1992, 1993 et 1994. En tenant compte des positions exprimées en commission parlementaire par les organismes qui se sont prononcés sur le sujet, le Conseil fait une recommandation sur ce qu'il estime être le niveau souhaitable à viser pour cette période. Le quatrième chapitre traite de deux éléments qui pourraient faire partie du plan d'action découlant de l'énoncé de politique, à savoir le programme d'accès aux emplois de la Fonction publique et le contrat moral. La dernière partie, finalement, présente les recommandations du Conseil.

Enquête canadienne sur la promotion de la santé 1985 : description des données québécoises

par M. Clarkson. Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, Service des études socio-sanitaires, 1987. v, 174 p. (Etudes de santé ; 4) *CSI 66130.216*
MICROLOG 93-05145 2 fiche

On présente dans ce rapport les faits saillants, pour le Québec, de l'enquête canadienne sur la promotion de la santé. Cette enquête a été réalisée en juin 1985. L'enquête visait à recueillir des données sur les connaissances, les attitudes, les croyances, les intentions et les comportements des Canadiens au niveau d'une variété de sujets liés à la santé, tels que: l'usage de l'alcool, du tabac et des drogues, l'hypertension, la nutrition, l'exercice physique, la sécurité et les habitudes de prévention. Le questionnaire s'adressait aux Canadiens de quinze ans et plus, à l'exclusion de la population institutionnalisée, et l'échantillon couvrait les dix provinces canadiennes et le Yukon.

Enquête préliminaire sur la pédopornographie au Canada

par S. Moyer. Ottawa : Ministère de la Justice, Sous-direction de la recherche et du développement, Section de la recherche, 1992. iii, 14 p. (Document de travail ; WD1992-16f) *L'éd. anglaise (A Preliminary investigation into child...) sur la même fiche.*
MICROLOG 93-08144 1 fiche

L'objectif de cette recherche consiste à évaluer la nature et l'étendue de la pornographie touchant les enfants (la pédopornographie) en Ontario et dans d'autres territoires et provinces du Canada au moyen d'interviews effectuées auprès de la police et appuyées sur leurs précédentes enquêtes concernant la pédopornographie. L'étude a comporté l'examen des dossiers de la police provinciale de l'Ontario (PPO) et du service de police de la communauté urbaine de Toronto (PCUT), section des écrits obscènes et de la propagande haineuse (Projet P). On décrit le droit actuel, les problèmes de définition, le Projet P, et la méthodologie. Cette étude se penche sur l'approvisionnement et distribution des documents pédopornographiques, y inclus le marché, la distribution, le rôle des douanes canadiennes, le pays d'origine, et la manière dont les documents pédopornographiques attirent l'attention de la police. Ensuite on examine la relation entre la pédopornographie et l'exploitation sexuelle des enfants, la demande en matière de documents pédopornographiques, et les événements enregistrés à la police concernant la pédopornographie.

Ensembles de logements pour les femmes au Canada

par G.R. Wekerle et B. Muirhead. Ottawa : Société canadienne d'hypothèques et de logement, 1991. i, 135 p. *L'éd. anglaise (Canadian women's housing projects) : 92-02100/2*
MICROLOG 93-07007 2 fiche

Dans le cadre de cette étude, on a voulu communiquer avec les responsables d'ensembles de logements pour femmes à travers le pays, et recueillir des données sur l'origine et le financement des projets, la taille des ensembles, les objectifs visés, les principes d'aménagement, les services offerts et l'expérience dans la réalisation de logements pour femmes. L'information recueillie est présentée selon un modèle bref et uniforme; elle devrait ainsi pouvoir servir de point de départ aux organismes communautaires de femmes qui veulent se renseigner auprès de groupes qui ont déjà réalisé des logements et fonctionnaires du secteur du logement qui pourront y puiser des renseignements sur la gamme et la diversité des modes de logements pour femmes, et qui verront que plusieurs ensembles ont été construits et gérés avec succès dans plusieurs coins du pays.

Entente auxiliaire Canada-Québec sur le développement forestier, 1985-91 : étude d'évaluation

Entente auxiliaire Canada-Québec sur le développement forestier. Sous-comité d'évaluation. Québec : le Sous-comité, 1991. ix, 34 p. ISBN 0-662-97445-X
MICROLOG 93-06446 1 fiche

Cette étude constitue l'évaluation finale de l'Entente auxiliaire Canada-Québec sur le développement forestier (1985-1991). Cette entente auxiliaire avait pour objectif global de mettre en oeuvre des mesures aptes à stimuler le développement forestier et à accroître l'incidence économique de l'activité forestière au Québec. On y aborde les niveaux d'objectifs et les critères d'évaluation, les principales étapes méthodologiques, et l'évaluation des retombées de l'Entente.

Entertainment in licensed premises, specifically nude dancing

Alberta. Beverage Alcohol Advisory Committee. Edmonton : The Committee, 1992. 22 p.
MICROLOG 93-08995 1 fiche

This reports on an in-depth review of nude dancing as a form of entertainment in licensed premises. The Committee did not feel qualified to make recommendations predicated on legalities, public morality or accepted community standards. It attempted to determine whether nude dancing caused negative conduct or produced any other negative effects. The report looks at complaints, enforcement, investigations, male dancers, disc jockeys, and deals with issues raised. Appendices discuss legal aspects, and complaints to the Ombudsman as well as providing lists of meetings held and presenters.

Environment : development plan 1993 : proposal

Montreal : Hydro-Quebec, 1992. 37 p. (Working documents) ISBN 2-550-26755-9
MICROLOG 93-07982 1 fiche

In 1989, Hydro-Québec endorsed the concept of sustainable development, which has gradually been incorporated into the utility's activities. To make this concept a concrete reality, Hydro-Québec has adopted certain orientations. Consequently, making environmental concerns an integral part of the planning process, managing impacts associated with the construction of generating and transmission facilities and those related to electrical distribution and facility operations, and evaluating the utility's environmental performance constitute the principal strategic environmental orientations in this report. It looks at the concepts of integrating environmental concerns and managing environmental and social impacts. An evaluation of Hydro-Québec's environmental performance concludes the document.

Environment Canada's codes of practice and emission guidelines for steam electric power generation

by C. Doiron and G. Ross. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Environmental Requirements Subsection, 1992. 31 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06237 1 fiche

Environment Canada is nearing completion on three significant initiatives undertaken in consultation with, among others, the Canadian Electrical Association. These are the Operations Phase and Decommissioning Phase Environmental Codes of Practice for Steam Electric Power Generation, and the revision of the national emission guidelines for thermal power generation. An overview of each initiative is presented with emphasis on the consultative process used in its development. The nature and content of the codes and the major revisions to the guidelines are outlined, and the success of the consultation process is commented on. A summary is provided of recommendations concerning the Operations Phase Code of Practice.

Environmental emissions control programs at Lambton TGS

by A.K. Kalvins. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Environmental Requirements Subsection, 1991. 17 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06252 1 fiche

Ontario Hydro's air emission control programs at Lambton Thermal Generating Station, both committed and planned, and their potential impacts on emissions, effluents and wastes are reviewed. Control technologies discussed include flue gas conditioning, wet limestone scrubbers, combustion process modifications, urea injection, and selective catalytic reduction. The implementation of these technologies has the potential to create new solid and liquid waste disposal problems. Environmental regulations, emissions control equipment, and environmental consequences of modifications are discussed

Environmental functions : an analytical framework for integrating environmental and economic assessment

by R.S. De Groot. Hull, Que. : Canadian Environmental Assessment Research Council, 1988. 24 p. Bibliogr. (Manuscript report ; MR20-88) (Manuscript report ; MR13-92) *Paper presented at a workshop entitled Towards Integrated Environment and Economic Assessments*
MICROLOG 93-05371 1 fiche

To make economic planning and decision-making more responsive to environmental concerns, methods must be found to internalize the environmental dimension in economic accounting and planning procedures. This paper explains the concept of environmental functions in detail and discusses some methods for analyzing the socio-economic value of environmental functions. It then presents some thoughts on the use of the function-concept in planning and decision-making and reflects on the application of function-evaluation in environmental economics for conservation and sustainable development

Environmental HTO/HT sampler development

by W.J.G. Workman, R.M. Brown and M.J. Wood. Chalk River, Ont. : Atomic Energy of Canada Limited, 1992. 11 p. : ill. Bibliogr. (AECL research , AECL-10446) ISSN 0067-0367 ISBN 0-660-14946-X
MICROLOG 93-08631 1 fiche

Tests in 1986 prior to the HT release experiments indicated that less than 10 to the -4 of HT passed through Molecular Sieve (MS) 4A was oxidized to HTO. There was an indication that DRIERITE and Silica gel might give less oxidation, but in view of past experience with MS, and the level of HTO expected, in the field experiments, it was decided to stay with MS in the field samplers' HTO traps. For further field experiments, where the levels of HTO might be significantly lower, it would be advisable to have better discrimination. Therefore, more extensive studies of the oxidation of HT on drying agents have been undertaken.

Environmental impact study, phase I : development of a database on housing characteristics representative of the Canadian housing stock, CMHC STAR-HOUSING database : final report

for Research Division, Canada Mortgage and Housing Corporation. Ottawa : Scanada Consultants Limited, 1992. vii, 62 p. : ill. *CSI 22545.201*
MICROLOG 93-03166 1 fiche

Project to develop a database on housing characteristics representative of the Canadian housing stock that could be used to model energy consumption in low-rise residential buildings. A brief literature review was undertaken and commonly used Canadian energy analysis programs such as HOT-2000, CMHC-2 and ENERPASS were reviewed to establish the input data requirements. Based on these reviews, a generic structure of housing data fields was established. The available housing characteristics data were converted to the generic format and stored as a database record. Statistical analyses were undertaken to establish how the housing characteristics database represents the whole Canadian housing stock for typology, vintage, provincial distribution, and energy and fuel usage. Similations were performed using the HOT-200 batch computer energy analysis program. Results of energy simulations were used in determining the carbon dioxide emissions from existing Canadian housing energy use.

Environmental performance assessment of Hwy 402-Front Street embankment

by A. Vorauer. Toronto : Ontario Hydro, Research Division, 1992. i, 36 p. Bibliogr. (Report ; no. 92-96-K)
MICROLOG 93-03307 1 fiche

In 1981, the construction of Highway 402 near Sarnia, Ontario required an overpass to eliminate a level crossing. Fly ash was selected as a lightweight fill instead of traditional earth materials to minimize differential settlements and to avoid expensive stage construction of the bridge approach and interchange ramps. An instrumentation program was initiated during the construction of the westbound lane embankment to monitor settlements, frost penetration and frost heave. This present research program, undertaken in 1991, determined the environmental performance of the Highway 402 fly ash embankment since its completion 10 years ago. The program established if any moisture migration occurred within the ash core in response to precipitation, and the nature and extent of ash leachate migration, if any, into the surrounding overburden soils.

Environmental protection plan for timber resource management -- Draft

Newfoundland. Forest Management Service. Corner Brook, Nfld. : The Service, 1993. iii, 156 p. Bibliogr.
MICROLOG 93-06433 2 fiche

To assist in the fulfilment of its legislated responsibility, the Newfoundland Forest Service in 1990 undertook the development of an Environmental Protection Plan. The first step in the process was the undertaking of a literature review of potential impacts of timber management activities on the environment and consulting with other resource management agencies and departments to obtain suggested guidelines that would minimize adverse impacts upon the environment and non-timber resource values. The review was distributed for comment in November 1991, after which an Environmental Protection Plan was prepared, based on the comments. This document includes the second draft of the plan, describing the consultation process, timber harvesting, silvicultural practices and forest regeneration, forest protection, processing facilities and support services, guidelines for each of these activities, data gaps, and monitoring for compliance.

Environmental regulations and the Canadian pulp and paper industry : an examination of the Porter strategy

by R.L. Doering...et al. Ottawa : National Round Table on the Environment and the Economy ; Institute for Research on Public Policy, 1993. 32 p. Bibliogr. (Working paper ; no. 5) *At head of title: Sustainability and prosperity program. Cover title Environmental regulations and the pulp and paper industry : an examination of the Porter strategy.*
MICROLOG 93-06385 1 fiche

Several analysts of the relationship between environmental regulation and competitiveness, the most prominent of which is Harvard economist Michael Porter, have challenged the conventional thinking that environmental regulations hinder competitiveness. This study tests the validity and usefulness of the Porter Strategy. It begins by defining competitiveness and what is meant by environmental regulation in Canada, then reviews what proof Porter provides for his conclusion and whether there is historic evidence in other countries for Porter's proposition. The report then sets out the five critical conditions that must be present if a country were to attempt to actually institute Porter's hypothesis as a matter of government policy. Finally, it considers whether these conditions are present in relation to the pulp and paper industry in Canada.

Environmental review of the Regional Official Plan : background paper

prepared by IBI Group ; in association with Jacques, Whitford and Associates Ltd., Ecosystem Consulting Inc., Meloshe and Associates. Ottawa : Regional Municipality of Ottawa-Carleton, 1993. 35, ii p.
MICROLOG 93-07498 1 fiche

The Ottawa-Carleton Regional Official Plan was adopted in 1974 and a review of the plan was undertaken in the 1980s. To date, the entire Official Plan, except for the sections regarding natural environmental areas, marginal resource areas (restricted), and river corridors, have been reviewed. It was intended that in 1991 the natural environmental areas designation would be reviewed. It was decided to take an ecosystem approach to the review. This background paper describes the ecosystem approach; concepts such as sustainability and healthy communities associated with the new approach; reasons for using such an approach and its specific applications in Canada; the issues and functions involved; and the principles that guide such an approach.

The environmental scanning microscope (ESEM) allows observation of unprepared samples in water vapour atmospheres of up to 20 torr. It should therefore be possible to observe concrete specimens at early stages of their hydration without their first being dried and coated with a conductive layer, as is necessary with a conventional scanning electron microscope. The project was conducted to determine the feasibility of studying concrete at its early stages and to compare the hydration of fly ash cement concrete with that of ordinary Portland cement concrete

Environmental sensitivities of chemical spills in the North Thompson River : development of a water quality model and scenario analysis

Hatfield Consultants Limited. Hull, Que. : Canadian Environmental Assessment Research Council, 1988. xi, 421 p. : ill., maps. Bibliogr. (Manuscript report ; MR4-88)
MICROLOG 93-05302 5 fiche

The fate and effect of chemical spills in rivers was investigated using a variety of techniques, including mathematical modelling. The North Thompson River was chosen as the study river because of its value as a producer of Pacific salmon and its great range in river discharge over the course of the year. The study focused on ammonia, sodium hydroxide (caustic soda), ethylene dichloride, and styrene monomer. All are transported in bulk adjacent to the river. A chemical spill transport model was developed with incorporated hydrological data on the river, then the potential for containment and removal after a spill was examined for each of the four chemicals. The fishery resource of the study area was described, with emphasis on Pacific salmon species, particularly chinook, coho, and sockeye, which spawn in substantial numbers in the study area. Toxicity studies were conducted in the laboratory and critical lethal and sublethal levels for the four chemicals were established. Seven hypothetical accident models were run using the steady state model.

Environmentally perverse government incentives

by P. Clément. Ottawa : National Round Table on the Environment and the Economy ; Institute for Research on Public Policy, 1992 22 p. Bibliogr. (Working paper ; no. 6) *At head of title: Sustainability and prosperity program.*
MICROLOG 93-06386 1 fiche

This paper provides a general discussion on the issue of government incentives that have a perverse or potentially perverse impact on the short and long-term health of the environment, using the agricultural sector as an example. The paper first discusses government incentives in general and provides examples of the environmentally perverse use of such instruments. It then focuses on agriculture, providing more technical details on the environmental impact of government incentives. Agriculture in Canada is discussed in general terms, leading to summaries of existing recommendations and expert reports on the subject. The paper concludes with a discussion of the treatment of the environment

EPRI Generic life extension guidelines : SaskPower's experience

by W.H. Gardiner. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Section, 1991. i, 12 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06248 1 fiche

Providing a safe margin of generating capacity to meet future demands is a delicate balancing act for utility planners. In many cases plants are operated beyond their normal retirement ages to avoid the costs involved in replacement. The Electric Power Research Institute (EPRI) published the Generic Guidelines for the Life Extension of Fossil Fuel Power Plants in 1986. A summary is provided of the guidelines, and of a demonstration project to train ten utilities in EPRI procedures. Use of the guidelines by one of these utilities, SaskPower, is discussed, including corporate issues, plant level issues, plant inspection, and general experience gained in the demonstration program.

Equal employment opportunity : a strategy for the 90's

Toronto : Metropolitan Toronto Chief Administrative Officer's Dept., Equal Employment Opportunity Division, 1989. xiv, 62 p. : ill. Bibliogr. *CSI 89180 201.*
MICROLOG 93-05639 1 fiche

In 1987, Council received representations regarding a staffing issue involving access to full-time employment opportunities. The resulting debate led to a request that the Equal Employment Opportunity Division develop a report to Council on the accountability of managers in undertaking equal employment opportunity initiatives. As a result of this instruction, the EEO Division embarked on a program review. A discussion paper was taken to each department and to Metro's Boards, Commissions, and Agencies. The resulting report outlines the Corporation's progress in equal employment opportunity and places the Corporation's achievements into a conceptual framework. This report presents the new policy statement in the context of an EEO Status report

Equipment innovations for inoculating pulse seeds : final report

Prairie Agricultural Machinery Institute (Canada). Regina : Saskatchewan Agriculture Development Fund, 1990. 50 p. : ill. Bibliogr.
MICROLOG 93-05252 1 fiche

Despite well documented evidence of the significant economic benefits of inoculation, many pulse producers do not inoculate their seed because the process is difficult and inconvenient. Researchers, industry representatives, and pulse growers were contacted to determine the current methods and equipment used for inoculation and to assess their effectiveness. Based on farm observations, current methods were classified into the slurry method, the two-stage method, and the self-stick method. The equipment requirements and performance of each of these methods, as well as others, was documented. Several additional concerns regarding inoculation practices and inoculant product were identified.

Escherichia coli O157:H7 and other verotoxigenic *E. coli* in foods : proceedings

of a Workshop on Methods to Isolate *Escherichia coli* O157:H7 and other verotoxigenic *E. coli* from foods , editors E.C.D. Todd and J.M. MacKenzie. Ottawa : Polyscience Publications Inc. ; Health and Welfare Canada, Health Protection Branch, 1993. v, 180 p. : ill. Bibliogr. *French ed (Escherichia coli O157:H7 et d'autres...) : 93-08653/3.* ISBN 0-921317-39-5
MICROLOG 93-08654 2 fiche

E. coli O157:H7, since its discovery as a human foodborne pathogen in 1982, has been recognized as a disease agent causing hemorrhagic colitis, hemolytic uremic syndrome and thrombotic thrombocytopenia purpura. Since E. coli O157:H7 is a more environmentally sensitive organism than other E. coli strains, and since foods containing low numbers of cells have caused illness, there have been difficulties in isolating and identifying the organism from food. The proceedings of this workshop document the present methods to detect E. coli O157:H7 and other verotoxigenic organisms in food. Data gathered from surveys of animals at the slaughterhouse, retail meats and ready-to-eat foods in the US and Canada are also presented. In addition, plans for further methodology research, including collaborative studies; and recommendations concerning the best procedures for detection of these pathogens are outlined.

This report was prepared to provide estimated clam grow-out production economics information that can be useful in targeting the major costs, biophysical concerns and the impact of price on profitability, and hence serve as a reference for development efforts. It is hoped that the information contained in this report is realistic and can serve as a general reference for clam enterprise planning. However, each clam enterprise is a unique entity in terms of a large number of factors including site productivity, location, investment costs and management, production and marketing practices which result in different quantity and quality of production and different costs and returns for production.

Estimates of mortality, growth and condition in an 18-year-old ICHmw2 plantation

S.l. : Canada-British Columbia Economic and Regional Development Agreement, 1992. 3 p. : ill. (Research memo ; no. 207) *At head of title: Reforestation systems*
MICROLOG 93-06317 1 fiche

In 1967, a study was initiated in the Shuswap Highlands to examine the cost of alternative rehabilitation treatments for high-graded cedar-hemlock stands. Two blocks were clearcut in 1969, site prepared in 1970, and planted or seeded in 1971. In 1989, a project was established to study growth and mortality in the 18-year-old stands originating from the earlier project. The project compared mortality, height, and diameter between regeneration methods (planting and seeding), species (Douglas-fir and lodgepole pine), sites (productive vs poor), and site preparation methods (burn vs mechanical).

Estimating forest sector employment in British Columbia

by J. Dobie. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1992. vi, 27 p. : ill. Bibliogr. (FRDA report ; 191) ISSN 0835-0752 ISBN 0-7726-1674-4
MICROLOG 93-07411 1 fiche

This report describes the structure of the Standard Industrial Classification (SIC) system used by Statistics Canada, and the industries that make up the forestry sector within that structure. It also describes and compares the structure and methodology of the annual survey of logging and manufactures, the monthly survey of employment, payroll, and hours, and the monthly labour force survey, all conducted by Statistics Canada, that can be used for estimating employment in the forestry sector in British Columbia. The report compares the employment estimates obtained by the three surveys, and provides recommendations for deriving current estimates from the monthly surveys. Estimates of employment in other sectors (mainly transportation), derived directly from the forestry sector, are also provided.

Estimating the buffer required around water during permethrin applications

by N. Payne...et al. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1985. 26 p. : ill. Bibliogr. (Information report ; FPM-X-70) *French ed. (Délimitation des zones-tampons...) on the same fiche.* ISSN 0704-772X ISBN 0-662-14797-9
MICROLOG 93-02833 1 fiche

This study was conducted to design a scientific approach and gather data for setting buffers during forestry permethrin applications. Ground-based and aerial applications were studied separately. To overcome the problem of the multiplicity of buffers required with different meteorological conditions and droplet size spectra, a reasonable worst case scenario was chosen and data collected for this case. Upwind, crosswind and downwind spray cloud dispersal were considered separately. Spray deposit was measured on water surfaces at different downwind distances from a spray line, and a second to measure the mortality concentration relationship for mosquito larvae and water shrimps, two sensitive indicator species. A mathematical cloud based on spray cloud dispersal measurements was used to calculate spray deposit on a water surface from multiple swath applications. Mortality in populations of the two indicator species and rainbow trout was estimated using model results and measured mortality-concentration relationships. As a check on the model, predicted mortality was compared with mortality measurements made in bioassays carried out during the spray trials.

Estimation of atmospheric fluoride by limed filter papers : a review

by D.R. Smith. Ottawa : Atomic Energy Control Board, 1988. iv, 42 p. Bibliogr. (Research report ; INFO-0282)
MICROLOG 93-06732 1 fiche

The limed filter paper method of static sampling of atmospheric fluoride is reviewed. Emphasis is on research since 1981, although earlier papers are included where they are essential to the study. The method involves static sampling of fluoride in air by conversion of CaO to CaF2, and by analogy to fluoride uptake by vegetation is intended to indicate seasonal trends in average amount and distribution of fluoride exposure to vegetation. A general description is presented of the method, followed by discussion of calibration, conversion factors between fluoride deposition rate and atmospheric fluoride concentration, levels of atmospheric HF which may be measured with limed paper, factors limiting use of the method, monitoring of a hypothetical short term accidental fluoride release, and monitoring atmospheric fluoride release at HF6 facilities or other industries.

Estimation of degree of maturity of gonads and prediction of age of attainment of sexual maturity in Atlantic salmon and sea trout : methodological instructions

by I.G. Murza and O.L. Khristoforov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1993. 105 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5599) *Originally published in Russian.* ISSN 0704-3716
MICROLOG 93-06273 2 fiche

Atlantic salmon and sea trout are characterized by individual, sexually linked, mainly genetically determined, intra and interpopulation differences in the rate of gonadal development that are specific to each species and lead to the attainment of sexual maturity by the fish at different ages. There are also regional differences in the seasonal dynamics of reproductive cycles caused by ecological conditions. This paper describes the periodization of oogenesis and spermatogenesis, scales of maturity of ovaries and testes, and a new method of predicting the age of onset of sexual maturity.

L'Etat du parc résidentiel locatif de Montréal

par Francine Dansereau...et al. ; rapport soumis à la Ville de Montréal, la Société d'habitation du Québec, la Société canadienne d'hypothèques et de logement. Ottawa : Société canadienne d'hypothèques et de logement, 1991. xxvi, 471 p. : ill. Bibliogr. *CSI 22118.241.* ISBN 2-89417-153-6
MICROLOG 93-04430 6 fiche

Cette étude a pour but d'évaluer la condition du parc locatif à Montréal et les mesures possibles pour encourager la rénovation et l'entretien du parc. L'étude est entreprise pour le compte de la Ville de Montréal, avec le concours financier de la Société d'habitation du Québec et de la Société canadienne d'hypothèques et de logement. L'étude comporte trois volets: l'état physique du parc locatif, le profil des propriétaires et celui des locataires. La force de cette enquête réside dans le fait que ces trois volets ont été appliqués à un même échantillon. Un total de 350 bâtiments ont été inspectés, et leurs propriétaires ainsi que certains des locataires ont été interviewés.

Ethical considerations touching medical requirements for immigrants

Victoria : Special Advisory Committee on Ethical Issues in Health Care, 1993. 6 p. ISBN 0-7726-1707-4
MICROLOG 93-08973 1 fiche

Certain fundamental principles govern the provision of health care in Canada. These affirm the dignity of the human person, justice and equality, and individual autonomy, together with the responsibility of each individual to care for his or her own health. This document discusses the ethical considerations when considering medical requirements for immigrants. It discusses the routine tests, legislation, obligations to Canada's citizens, and health provisions to the Third World.

Ethical investments by trustees

Winnipeg : Manitoba Law Reform Commission, 1993. iii, 48 p. Bibliogr. (Report ; no. 79) ISBN 0-7711-0892-3
MICROLOG 93-05021 1 fiche

This document provides a brief overview of ethical investing, its meaning, extent and relationship to the law of trusts generally. It places the issue of ethical investment in an historical context, reviewing the development of the law governing the investment of trust monies. It also summarizes the case law which has developed in this area and considers English and American authorities on this matter. Finally, it offers an analysis of the present state of the law and considers whether it is possible in law to apply other than strictly financial objectives and criteria in making investment decisions.

Ethnicité, immigration et transfert linguistique

par J. Kralt et R. Pendakur. Ottawa : Secrétariat d'Etat, Secteur du multiculturalisme, Service des politiques et recherches, 1991. iii, 36, 35 p. : ill. *Bilingue (Ethnicity, immigration and language transfer). CSI 22514.200.*
MICROLOG 93-00068 2 fiche

Ce document examine la relation entre l'origine ethnique, le statut d'immigrant et la langue parlée, afin de déterminer le degré de transfert des langues ancestrales (définies comme les langues autres que l'anglais, le français ou les langues autochtones) d'une génération à l'autre. A cette fin, cinq variables du recensement sont étudiées: l'origine ethnique, le statut d'immigrant, la langue maternelle, la langue parlée à la maison et la connaissance de l'une ou l'autre langue officielle.

Ethnicity, immigration and language transfer

by J. Kralt and R. Pendakur. Ottawa : Multiculturalism and Citizenship, Multiculturalism Sector, Policy and Research, 1991. 35, iii, 36 p. : ill. *Bilingual (Ethnicité, immigration et transfert linguistique). CSI 22514.200*
MICROLOG 93-00068 2 fiche

This paper examines the relationship between ethnic origin, immigration, and language usage in order to determine the degree to which heritage language (defined as languages other than English, French or Aboriginal) use is maintained from one generation to another. It examines five census variables: ethnic origin, immigrant status, mother tongue, language used in the home, and knowledge of official language(s). It is hypothesised that the relative strength and endurance of these minority languages is an outcome of a combination of demographic and socio-economic factors such as the age structure and proportion of immigrants in the group.

Ethno-cultural groups and visible minorities in Canadian politics : the question of access

Kathy Megyery, editor. Toronto : Dundurn Press, 1991. xviii, 274 p. Bibliogr (Research studies ; vol. 7) *French ed. (Minorités visibles, communautés ethnoculturelles...) : 93-01190/4 CSI 22497.205.* ISSN 1188-2743 ISBN 1-55002-103-6
MICROLOG 93-01189 4 fiche

The study of ethno-cultural groups, and visible minorities in particular, is especially important given they make up a growing portion of the Canadian population. Canadian society has become increasingly open to ethnic pluralism since the 1960s--with the Canadian Bill of Rights, multiculturalism policy and, most recently, the Canadian Charter of Rights and Freedoms being the most notable expressions of that openness. This document presents papers on the following topics. (re)constructing ethnic representation in Canadian politics; representation of ethnic and visible-minority groups in the House of Commons; and visible minorities and the Canadian political system.

Etiology of root rot diseases in field pea : final report

by S.-F. Hwang. Regina : Saskatchewan Agriculture Development Fund, 1992. 32 p. Bibliogr. ISSN 0829-9455
MICROLOG 93-08349 1 fiche

Field pea is well-adapted to a cool climate and can withstand considerable frost and in recent years, its acreage in the Prairie provinces has increased considerably. The root rot disease complex of pea is a worldwide problem that can seriously reduce the yield and quality of the crop. More than 20 different fungi have been implicated as causal agents in different regions of the world but little information is available on the etiology, incidence, and severity of the disease complex in central Saskatchewan. This study conducted a survey of pea fields in central Saskatchewan to determine the incidence and severity of root diseases; isolated and identified the principal pathogens of the diseases; determined if the severity of root rot is correlated with cultural practices so as to recommend control procedures; and tested the feasibility of integrating biological control agents and low application rates of fungicides in controlling root rots.

Etude comparée du commerce au détail de l'essence au Canada et aux Etats-Unis pour la période 1980-90

Canada. Section des produits pétroliers. Ottawa : la Section, 1992. 4 p. : ill. *L'éd. anglaise (A Review of gasoline retailing...) sur la même fiche*
MICROLOG 93-03495 1 fiche

Ce rapport contient de nouvelles données portant sur les années allant de 1988 à 1990 et s'intéresse principalement aux changements survenus au chapitre des économies d'échelle dans les deux pays entre 1980 et 1990. Parmi ces changements, on compte la rationalisation des points de vente au détail et l'augmentation du volume des ventes moyen par point de vente au détail. L'étude examine aussi les variations de la demande d'essence, les écarts de prix et les différences observées dans la gamme des produits pétroliers offerts.

Etude de la radioprotection du personnel non-controlé en milieu hospitalier

par L. Renaud, J. Blanchette et C. Galand. Ottawa : Commission de contrôle de l'énergie atomique, 1993. xv, 57 p. : ill. Bibliogr. (Rapport de recherche ; INFO-0437-1(F)) *L'éd. anglaise (Radiation exposure of non-monitored...) : 93-03361/2. CSI 22125.204F.*
MICROLOG 93-03362 1 fiche

La fréquence d'utilisation des radioisotopes et la quantité de matières radioactives injectées aux bénéficiaires à des fins de diagnostic augmentent d'année en année dans les hôpitaux. Ce projet de recherche traite des répercussions de l'irradiation des bénéficiaires de médecine nucléaire sur les travailleurs non-contrôlés du milieu hospitalier. L'objectif premier de cette étude était de mesurer et d'établir l'impact radiologique des bénéficiaires radioactifs sur un groupe sélectionné de travailleurs hospitaliers habituellement non-contrôlés pour l'exposition au rayonnement ionisant. Le deuxième objectif était de documenter et de quantifier les divers facteurs qui peuvent influencer la dose que les travailleurs reçoivent au travail afin de vérifier si le principe ALARA est pratiqué à l'intérieur des hôpitaux.

Etude de la rentabilité de la flotte semi-hauturière du crabe des neiges au Nouveau-Brunswick et en Nouvelle-Ecosse (Région du Golfe) en 1992

par H. Chiasson. Moncton, N.-B. : Ministère des pêches et des océans, Région du golfe, Coordination des programmes et services économiques, 1993. 34, 34 p. : ill. (Rapport d'analyse économique et commerciale ; no 132) *Bilingue (Profitability study of the...)*. ISSN 0847-1185
MICROLOG 93-04911 1 fiche

Cette étude examine le rendement financier et économique de la flotte semi-hauturière de pêche au crabe des neiges qui opérait dans le sud du golfe Saint-Laurent à partir du Nouveau-Brunswick et de la Nouvelle-Ecosse pendant la saison de pêche de 1992. Le document comprend trois chapitres. Le premier donne un bref historique de la pêche au crabe dans le sud du golfe St.-Laurent. On y voit entre autres, le nombre de pêcheurs impliqués dans cette pêche, les débarquements effectués par les flotilles côtières et semi-hauturières depuis une dizaine d'années ainsi que les prix moyens obtenus par les pêcheurs. Le deuxième chapitre porte sur la structure, les caractéristiques et les activités de pêche des semi-hauturiers au Nouveau-Brunswick et en Nouvelle-Ecosse. Le chapitre 3 traite de la performance financière et économique de cette flotte. On évalue aussi la situation générale de l'endettement de la flotte comparé à 1984 Finalement, une dernière partie présente un résumé de l'étude ainsi que les commentaires recueillis lors des entretiens avec les pêcheurs.

Etude de modèles de prévision des variations climatiques et de leurs incidences sur l'hydrologie, les courants côtiers et les pêches en Colombie-Britannique

par G.A. McBean...et al. Ottawa : Environnement Canada, Service de l'environnement atmosphérique, 1992. 16, 15 p. (Sommaire du changement climatique ; SCC 92-02) *Bilingue (Review of models for...)*. ISSN 0835-3980 ISBN 0-662-59209-3
MICROLOG 93-07856 1 fiche

Ce rapport examine l'état des modèles du changement climatique en ce qui trait à leur applicabilité à la Colombie-Britannique et estime l'incertitude des scénarios. Les liens existant entre le changement climatique aux échelles régionales et plus grandes sont les questions importantes que l'on étudie. Le rapport se penche aussi sur la disponibilité des modèles permettant de déterminer les effets de la variabilité et des changements climatiques sur l'écoulement des cours d'eau, les courants côtiers et les pêches en eaux douces et salées. La fiabilité des modèles est évaluée dans chaque cas. Finalement, on recommande des approches qui permettent d'étudie les effets du changement climatique sur les ressources hydriques et les pêches de la région.

Etude préliminaire pour la mise en place d'un institut de formation en gestion ferroviaire

préparé pour le Centre de développement des transports, Politiques et coordination, Transports Canada ; par Canac International Inc. Montréal : la Société, 1991. vii, 67, vii, 67 p. : ill. *Bilingue (Preliminary study for the establishment of...)*
MICROLOG 93-03578 2 fiche

Ce rapport rend compte d'une étude préliminaire qui visait à cerner le besoin de créer un institut canadien de formation en gestion ferroviaire, à définir les diverses options qui ont trait au mandat, à l'organisation et à la structure d'un tel institut, et à évaluer le coût d'un tel projet. L'étude a consisté à examiner les problèmes relevés par les compagnies de chemin de fer canadiennes et celles de certains autres pays développés en matière de formation en gestion. Ce document présente les phases I et II du projet qui consistent respectivement à fournir des données sur la cueillette de données et d'informations, et la faisabilité. Des conclusions et recommandations terminent l'étude.

Etude sur l'avenir du travail : rapport final

Ottawa : Conseil canadien de développement social, 1989. vii, 67 p. *L'éd. anglaise (The Future of work...) : 93-05993/1.*
MICROLOG 93-05992 1 fiche (Available on fiche only)

Le Colloque national sur l'avenir du travail, tenu les 1er et 2 mai 1989 à Hull (Québec), avait un double objet: réunir des représentants des grands secteurs de la société canadienne afin de réfléchir aux questions soulevées dans les consultations locales organisées sur l'avenir du travail, et contribuer à l'élaboration d'une politique à long terme en proposant de nouvelles façons d'aborder les enjeux du monde du travail en ce début de la dernière décennie du siècle. On a accordé une attention particulière aux idées des participants sur les nouveaux partenariats, des modèles locaux originaux et des solutions novatrices pour divers problèmes qui ne manqueront pas de se poser.

Etude sur la réponse du bassin versant du lac Laflamme aux précipitations acides, juin 1981-mai 1990

par S. Couture. Québec : Environnement Canada, Conservation et Protection, Région du Québec, Centre Saint-Laurent, 1992. xi, 77 p. : ill. Bibliogr.
MICROLOG 93-01995 1 fiche

Dans ce rapport, le chapitre de la méthodologie explique les démarches et les méthodes statistiques utilisées pour estimer les valeurs manquantes des séries temporelles du lac et de l'exutoire, ce qui permettra par la suite de dégager des tendances temporelles dans la qualité des eaux de surface. Les caractéristiques de la qualité et la quantité des précipitations sont présentées au chapitre 3, en particulier pour les années 1989 et 1990. Le chapitre 4 présente l'hydrologie et la qualité de l'eau du lac, de l'exutoire et des eaux souterraines en s'attardant un peu plus sur les années 1990 et 1991. Les caractéristiques statistiques des séries temporelles des paramètres de la qualité des eaux du lac, de l'exutoire et des précipitations sont présentées au chapitre 5 en mettant l'accent sur les séries temporelles où l'on détecte des tendances statistiquement significatives. Finalement, le dernier chapitre présente la réponse du bassin versant aux précipitations acides à l'aide d'indicateurs d'exposition et d'effet comme les tendances temporelles, les bilans ioniques annuels, les rapports bicarbonates/sulfates et la qualité des eaux souterraines.

MICROLOG 93-03471 3 fiche

Issue du projet d'établissement d'un centre d'interprétation historique au parc Cartier-Brébeuf à Québec, cette étude a d'abord été présentée en quatre rapports distincts qui sont ici refondus en un seul travail, chacun des rapports en constituant un chapitre. Une première partie portait sur la vie et l'oeuvre de Jacques Cartier. Le second chapitre fut consacré à l'étude approfondie du deuxième voyage de Cartier avec insistance sur le premier hivernement connu d'Européens en sol canadien. Le troisième chapitre faisait état des relations franco-indiennes au cours des trois voyages du pilote malouin et des questions qui en découlent. Enfin, le dernier chapitre avait pour objet de montrer l'influence de l'oeuvre de Cartier dans la seconde moitié du XVIe siècle, soit jusqu'à l'expédition de Champlain. Ce document se penche précisément sur la première partie, soit l'étude sur la vie et l'oeuvre de Jacques Cartier (1491-1557).

Europe 1992 and the Ontario aerospace industry, 1990-91

Toronto . Ministry of Industry, Trade and Technology, 1991. 58 p. : ill. Bibliogr. *French ed. (L'Europe de 1992 et l'industrie aérospatiale...) : 93-00105/1*
MICROLOG 93-00104 1 fiche

Standards-related developments in the European Community are fluid and still evolving. While there may be some slippage in the timetable for implementation, the broad policy directions are set. Thus it is essential that Canadian businesses begin now to assess opportunities and challenges and to develop appropriate strategies. This study provides basic market research to Ontario aerospace companies that could either export products to the EC or that face competition from EC companies in their traditional markets. It also identifies European policies that will impact the development of the aerospace industry in EC member companies. Aerospace industries in Ontario are concerned with airframes, engines, space, and materials and equipment, a large proportion of which are dedicated to military sales. Information was gained through a literature research, industry interviews, and a workshop

Euthanasia and cessation of treatment -- Rev.

by M. Smith, S. Alter and S. Harder. Ottawa : Library of Parliament, Research Branch, 1992. 23 p. Bibliogr. (Current issue review ; 91-9E) *French ed. (L'Euthanasie et l'interruption ...) on the same fiche. Revised 19 May, 1992* ISBN 0-660-14569-3
MICROLOG 93-00856 1 fiche

Because of advances in medical treatment, people are now able to live longer and to delay death. But the ability to live longer often entails a diminished quality of life for those who suffer from degenerative or incurable diseases. The desire to be spared from prolonged suffering, the increased incidence of incurable diseases, and a better understanding of how medical technology can prolong life, have fuelled the desire to achieve greater control over decisions relating to life and death. These factors have also fostered a renewed interest in euthanasia and cessation of medical treatment. This paper examines the social and legal issues associated with these subjects especially in the context of the law of Canada, the United States, and Netherlands.

Evaluating seedling vitality : useful or not?

by K.M. McClain and J.A. Elliot. Toronto : Ministry of Natural Resources, Ontario Forest Research Institute, 1990. 11 p. Bibliogr. *Presented at Provincial Nursery Growers Conference.*
MICROLOG 93-06141 1 fiche

The loss of more than seven million container seedlings in the North Central Region in 1987 prompted a pilot program of stock testing in three subsequent years. Representative seedling stock types produced by private growers were periodically subjected to simple tests that included determination of rate of bud flush, survival, and root activity throughout the storage period to provide information so inferences could be made as to current and progressive seedling vitality. Stock types similar to those evaluated were also planted at contrasting sites as field conditions permitted.

MICROLOG 93-01692 1 fiche

Investigation of laboratory procedures appropriate for measuring the effectiveness of active noise reduction (ANR) devices. The procedures included ear-canal measurements using an acoustic test fixture (an objective procedure) and masked-threshold and loudness-balance tests (psycho-physical procedure). In addition, the effect of ANR on signal detection and speech reception was investigated.

Evaluating the potential for scoping in the Ontario environmental assessment process

by L.F. Cattrysse. Hull, Que. : Canadian Environmental Assessment Research Council, 1990. vi, 60 p. : ill. Bibliogr. (Manuscript report ; MR23-90)
MICROLOG 93-05347 1 fiche

Boundary setting and focusing were identified as problems encountered in the Halton Region environmental assessment (EA) study and in other experiences with the Ontario process. This study was conducted to examine the nature of the problems encountered in the Ontario EA process using the Halton Region EA example; evaluate the potential for utilizing the Everitt and Colnett (1987) scoping method with the Ontario EA process according to the set of normative principles adapted from Ross et al. (1986); and establish some fundamental problems and prerequisites for operationalizing scoping mechanisms.

Evaluating the role of the automobile : a municipal strategy : executive summary

Toronto : Toronto Healthy City Office ; Technical Workgroup on Traffic Calming and Vehicle Emission Reduction, 1991. 19 p.
MICROLOG 93-07775 1 fiche

This document is the executive summary of the study to evaluate the role of the automobile. It discusses, in brief, the cost of the car, its impacts on individual health and on the environment, and provides a strategy for reducing automobiles and emissions. It also includes some implications and future directions, and makes suggestions on making better use of the existing streets by using public transit, making roads for cyclists, and expanding the rapid transit system, such as GO transit.

An Evaluation : Fort Nelson Legal Information Services

by T. Roberts. Ottawa : Dept. of Justice, Research Section, 1990. xxxiv, 215 p. (Technical report ; TR1991-17e) *CSI 22485 201.*
MICROLOG 93-05091 3 fiche

This document provides information on the objectives of the funding of FNLIS. It discusses the wide context of remote legal service delivery, barriers to service delivery, and models considered and/or implemented. It examines how FNLIS was conceived and established and provides an overview of what FNLIS is actually mandated to do. It also examines the inputs that have been provided by the legal Services Society and FNLIS board to ensure quality of service and provides the main analysis and findings of the evaluation. Finally, it looks at the issues of transferability of the FNLIS model to other locations.

Evaluation assessment report : FarmLab Demonstration Program

Brystra Consultants. Regina : The Consultants, 1986. 36 p. Bibliogr. *Commissioned by the Agriculture Development Fund, Saskatchewan Agriculture.*
MICROLOG 93-00849 1 fiche

Evaluation of the Farmlab Demonstration program, designed to enhance the development and transfer of knowledge about farm practices in Saskatchewan. The five-year program began in 1981/82 and most of the 25 million dollars in funding was allocated to research, with 5 percent allocated to transferring R and D products to the farms through a demonstration program. The report includes a logic model of Farmlab's demonstration component; a summary of the demonstration activities; communication models showing paths by which research information is transferred to the community; significant evaluation issues; analysis of data and methods available for the evaluation, and evaluation options, including methodologies.

Evaluation by testing of a bridge with girders, floor beams and stringers

by B. Bakht and A. Mufti. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1992. ii, 35 p. : ill. Bibliogr.
MICROLOG 93-00167 1 fiche

This report describes the testing of the Adair single span, single lane bridge in the Township of Sheffield, County of Lennox-Addington. Until an analytical evaluation was carried out in 1989, the bridge had been posted for 15 tonnes. The analytical evaluation showed this posting to be excessive and it was reduced to 6 tonnes, thus also significantly reducing the road network of the Township. A bridge test was requested in the hope that such a testing would allow the bridge to be upgraded to an acceptable limit. This report describes the tests conducted, including a dead load analysis; the recorded data on girders, floor beams, and stringers and its interpretation; and a strength evaluation. Recommendations are included.

Evaluation d'ensembles de logements abordables construits selon le concept de la maison évolutive

par A. Friedman et V. Cammalleri. Ottawa : Société canadienne d'hypothèques et de logement, 1992. xvii, 162 p. : ill. *L'éd. anglaise (Evaluation of affordable housing projects...) : 93-06311/3*
MICROLOG 93-06329 3 fiche

Dans le but de relever le défi que présente la production de logements abordables, une équipe de chercheurs du Programme de conception d'habitations abordables de l'Université McGill a mis au point la maison en évolutive, une maison en rangée d'une largeur de 4,3 mètres offrant une aire habitable de 93 mètres carrés. Six mois après la construction d'un prototype grandeur nature sur le campus, on a mis en chantier le premier ensemble d'habitations conçues selon le concept de la maison évolutive. Ce document se penche précisément sur l'évaluation d'ensembles de logements abordables construits selon le concept de la maison évolutive.

Evaluation de la lixiviation par la thiourée des minerais d'or réfractaires et conventionnels

par E. Ghali. Ottawa : Centre canadien de la technologie des minéraux et de l'enérgie, 1993. 121 p. : ill. Bibliogr. *CANMET contract: 23440-1-9089/01-SS*
MICROLOG 93-08324 2 fiche

Les objectifs de cette étude sont d'évaluer l'utilisation de la thiourée pour la lixiviation du minerai d'or de la mine Agnico-Eagle. En premier lieu, il sera question de la théorie sur la cyanuration et sur la lixiviation par la thiourée. En second lieu, la technique expérimentale employée décrira brièvement le plan factoriel partiel utilisé. Lorsque la partie expérimentale sera abordée, il sera abordée, il sera question de la préparation du minerai, du lavage à l'acide, de la cyanuration, de la lixiviation par la thiourée et du dosage de la thiourée et du cyanure. Les résultats présentés et discutés seront ceux de la cyanuration et de la lixiviation par la thiourée et des profits bruts résultant de ces deux opérations.

Evaluation des initiatives d'alphabétisation et de formation de base

Woods Gordon ; en collaboration avec Gerald Grant Associates ; présentée au Ministère de la formation professionnelle. Toronto . le Ministère, 1989. xx, 134 p. : ill. *ONTERIS. ON05184*
MICROLOG 93-00317 2 fiche

Traite de l'évaluation des initiatives d'alphabétisation et de formation de base. Le ministère de la Formation professionnelle (MFP) est responsable des initiatives dans le domaine de l'alphabétisation et assure le financement de trois programmes d'alphabétisation: Formation de base de l'Ontario (FBO), Alphabétisation communautaire en Ontario (ACO) et Formation de base en milieu de travail (FBMT). Les objectifs de ce projet étaient les suivants: recueillir des renseignements auprès du Ministère, des organismes assurant la prestation de ces programmes, et auprès des participants (par l'analyse des dossiers, l'administration d'un questionnaire ou la réalisation d'entrevues) afin de déterminer la nature des groupes servis et des services, offerts dans le cadre des trois programmes, ensuite recueillir et analyser les réponses obtenues et soumettre au Ministère un rapport à ce sujet. La recherche a été réalisée entre avril et août 1988. Les points traités dans le document sont les suivants: renseignements généraux et objectifs, et méthodologie; aperçu des programmes d'alphabétisation du Ministère; la nature des services fournis; caractéristiques des participants aux programmes d'alphabétisation; efficacité des programmes; rentabilité et financement; et conclusions et repercussions.

MICROLOG 93-03444 1 fiche

L'évaluation économique du Programme des quotas individuels transférables (QIT) s'échelonne de 1990 à 1994 inclusivement. Cinq années de mise en oeuvre de ce programme seront évaluées au terme de ce projet afin de dégager l'impact économique qu'aura eu ce nouveau mode de gestion sur le secteur primaire de l'industrie. La mise en place des QIT fut précédée en 1989, d'un projet pilote d'une durée d'un an durant laquelle les règles et les modalités de fonctionnement furent vérifiées. Aussi, la saison 1989 servira d'année de référence aux différentes analyses. Cette publication représente donc la première tranche de l'évaluation et à ce titre, décrit les saisons 89 et 90, les premières du programme qui s'échelonne sur 10 ans.

Evaluation du mécanisme de capture des casiers coniques conventionnels à crabe des neiges *Chionoecetes opilio* par observation sous-marines avec caméra vidéo

par R. Vienneau, A. Paulin et M. Moriyasu. Moncton, N.-B. : Ministère des pêches et des océans, Centre des pêches du Golfe, 1993. iv, 16 p. : ill. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1903F) ISSN 0706-6570
MICROLOG 93-05998 1 fiche

Afin de mieux comprendre le mécanisme de pêche des casiers conventionnels, plusieurs étude ont été effectuées et ont révélé que les casiers coniques permettent de prendre des crabes plus gros et en plus grand nombre. Cependant, elles n'ont pas permis de déterminer la raison de la variation considérable de la performance de pêche entre les casiers de même type ou le taux de prise supérieur des casiers coniques par rapport aux casiers rectangulaires. Cette étude évalue, par des observations directes à l'aide d'un système de caméra vidéo sous-marine, la relation qui existe entre la performance des casiers coniques standard à crabe des neiges et divers facteurs, comme le courant de fond, l'emplacement de l'appât et de la conception des engins.

Evaluation du programme d'admissibilité accrue d'aide juridique Manitoba

[par] Prairie Research Associates, le Groupe conseil Coopers et Lybrand, et Rick Linden. Ottawa : Ministère de la Justice, Sous-direction de la recherche et du développement ; Secteur des politiques et programmes ministériels, 1991. xxv, 153 p. (Document de travail ; WD1992-2f) *L'éd. anglaise (Evaluation of the Legal Aid...) : 93-03059/2. CSI 22423.209F.*
MICROLOG 93-03058 2 fiche

Ce rapport porte sur les caractéristiques de la clientèle et des affaires, la satisfaction de la clientèle, le recouvrement des coûts et les effets qu'a eus le programme d'admissibilité accrue sur le fonctionnement et l'administration d'Aide juridique Manitoba. Dans le chapitre 3, il expose les méthodes appliquées pour examiner ces questions, et le chapitre 4 porte sur les caractéristiques de la clientèle et des affaires. Les coûts et l'administration financière, qui constituent un élément clé de l'étude, sont examinés au chapitre 5. On présente également un sondage effectué auprès de la clientèle et des non-participants, dont on expose les résultats au chapitre 6. Etant donné que ce sont les avocats du secteur privé qui fournissent le plus gros des services d'aide juridique, leurs opinions sont d'une importance critique: on les présente au chapitre 7. Enfin, au chapitre 8, on examine l'effet global du programme d'admissibilité accrue et on formule les conclusions et les recommandations du rapport.

Evaluation en sciences, Manitoba 1990, physique 300 : rapport final

Winnipeg : Education et formation professionnelle Manitoba, Direction des programmes d'études, 1993. viii, 33 p. : ill. *L'éd. anglaise (Manitoba science assessment, 1990, physics...) sur la même fiche.* ISBN 0-7711-1085-5
MICROLOG 93-05124 1 fiche

Ce rapport présente une description et une analyse, ainsi que des conclusions et des recommandations portant sur l'évaluation effectuée pour le programme de Physique 300. Etant donné qu'un nombre très restreint d'élèves de français et d'immersion française suivent le cours Physique 300, on a inclut leurs résultats avec ceux des élèves anglophones qui suivent le cours Physics 300 et le rapport les a considérés comme un seul groupe. L'évaluation a pour but de fournir des points de repère quant au rendement scolaire des élèves dans la province du Manitoba; d'obtenir sur le rendement scolaire des données qui permettront d'améliorer le programme d'études ainsi que le programme d'évaluation aux niveaux provincial et local; d'aider les divisions scolaires à évaluer les élèves et le système scolaire; et, permettre au personnel enseignant de se perfectionner en matière d'évaluation.

Evaluation en sciences, Manitoba 1990, sciences 100 : rapport final, écoles franco-manitobaines

Winnipeg : Education et formation professionnelle Manitoba, Direction des programmes d'études, 1993. vi, 37 p. : ill. ISBN 0-7711-1093-6
MICROLOG 93-06399 1 fiche

Le test d'évaluation du cours Sciences 100 du programme franco-manitobain et du programme d'immersion française comportait huit sous-tests, dont trois sur des sujets communs obligatoires, quatre sur des options obligatoires et un dernier sur une option facultative. Les élèves devaient répondre à 50 questions sur les sujets communs suivants: mesure et expérimentation; caractéristiques de la matière; et séparation des substances. Ce rapport contient une analyse des résultats du test et les observations que le comité technique consultatif a jugées pertinentes.

Evaluation environnementale de la politique de contrôle des drainages miniers acides : le cas des choix technologiques

par J.-F. Blais. Hull, Québec : Conseil canadien de la recherche sur l'évaluation environnementale, 1992. vi, 68 p. (Rapport manuscrit ; MR3-92)
MICROLOG 93-06025 1 fiche

Les autorités publiques ont tenté de s'attaquer aux répercussions environnementales du drainage minier acide en développement des technologies aptes à leur contrôle, qui sont à la fois adéquates et économiques. Il considère l'exploitation et le traitement des résidus miniers générateur d'acides par des techniques intégrant l'utilisation de la lixiviation bactérienne semble être une voie d'intérêt pour la restauration des parcs à résidus miniers sulfureaux. Il croit souhaitable que l'étude de ces approches soit envisagée dans la politique publique du contrôle des miniers acides.

Evaluation methodology and data sources for social and economic impact assessment of forest land management options : background reports

Marvin Shaffer and Associates. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development: FRDA II, 1992. ix, 51 p. Bibliogr. (FRDA report ; 189) ISSN 0835-0752 ISBN 0-7726-1669-8
MICROLOG 93-07350 1 fiche

A principal issue in Crown land planning is conflict between competing uses. An essential component in resolving these conflicts is comprehensive assessment of the advantages and disadvantages of alternative land use designations. This paper evaluates biophysical analysis, benefit-cost analysis, economic impact assessment, and multiple accounts as methods for assessing land use options. The advantages and disadvantages of each technique are given and a case study is used to illustrate their application in a Crown land use conflict. Based on this review, a strategy for analyzing land use conflicts is proposed.

Evaluation of 'Blueprint for the future' : literature review and evaluation 'tool kit'

by W. Baird and L. Earl. Scarborough, Ont. : Scarborough Board of Education, Program Dept., Research Centre, 1990. vi, 49 p. Bibliogr. (Research report ; no. 89/90-28)
ONTERIS: ON06024.
MICROLOG 93-02044 1 fiche

A literature review focusing on the evaluation component of a large-scale integration program and compiled to offer the 'Blueprint' steering committee an overview of factors identified as influential in implementing team-centred consultation models, as well as suggestions for data-collection methods and instruments. The introduction gives a general overview of program implementation evaluation. It is followed by 2 major sections: program process evaluation and program outcome evaluation. Process research identifies the program activities that are taking place and the barriers or facilitators affecting implementation. Outcome research assesses the effect of the program on practitioners and clients. The 2 sections are divided into the 3 main program components of 'Blueprint', consultation, intervention, and staff development. Some available survey instruments suitable for use with 'Blueprint' are included.

Evaluation of a heavy duty methanol engine with glow plug ignition : effect of combustion parameters on emissions : final report

for Transportation Development Centre, Policy and Coordination, Transport Canada ; by C.G. Barringer [and] W.A. Goetz. Mississauga, Ont. : Ortech International, 1992. ii, 222 p. : ill.
MICROLOG 93-04650 3 fiche

Project to develop the Cummins L10 engine for operation on methanol, using direct injection and glow plug ignition; to obtain a data base on the emissions and efficiency characteristics of methanol diesel engines using direct injection and glow plug ignition; to obtain operating experience with this type of engine; and to identify engine configurations with the lowest emissions. Phase I involved investigations with the single-cylinder Cummins L10 engine to determine the effects of head, piston, and injector configurations, glow plug position, and injection timing on emissions. Data from the single-cylinder tests were analyzed to establish the multi-cylinder engine configuration for the second phase of the project. The Phase II program tested a selected piston/injector configuration in the single cylinder L10 engine and implemented and tested the selected piston/injector configuration in a multi-cylinder L10 engine. This report provides the results of both Phase I and Phase II.

Evaluation of acute and chronic toxicity of Ontario sewage treatment plant effluents : report

by P.L. Orr...et al. Toronto : Ministry of the Environment, MISA Municipal Section, 1992. xx, 314 p. : ill. Bibliogr. ISBN 0-7729-9401-3
MICROLOG 93-02434 4 fiche

The assessment of lethal and sublethal effluent toxicity from ten Ontario sewage treatment plants (STPs) was conducted during both summer and winter operating conditions, with four 24-hour composite samples collected from each plant per season and three to six grab samples collected at five STPs in each season for comparison to composite samples. Total residual chlorine and total ammonia levels were measured immediately after sample collection and again after arrival at the toxicity laboratory. Acute lethality tests using rainbow trout and *Daphnia magna* were begun the same day on all composite and grab samples. Chronic fathead minnow survival and growth tests and *Ceriodaphnia dubia* survival and reproduction tests were initiated the next day. Some samples were adjusted to pH 6 prior to chronic test initiation to reduce the un-ionized ammonia concentration of the sample below concentrations likely to cause lethality. Effluents were chemically analyzed and data compared to toxicity results to identify potential toxicants. Subsamples were collected at the toxicity laboratory and submitted for analysis of conventional parameters and metals. Selected samples were also analyzed for a range of organic chemicals.

The Evaluation of adult learning in the workplace : a review of current research and field applications

by M. Laiken. Toronto : Ministry of the Solicitor General, Strategic Planning Committee on Police Training and Education, 1992. 49 p. Bibliogr. *On cover: A police learning system for Ontario. Cover title: Report on the evaluation of adult learning in the workplace.*
MICROLOG 93-04107 1 fiche

This study is motivated by the present world context of competition and recession, in which education must be perceived as adding value to the organization. The research focuses on methods to assess the direct and tangible effect of education on employee motivation and productivity by examining 'best practices' in the literature and within five selected organizations. The data collected included a literature review of educational documents, journal articles, books, and documents provided by the Strategic Planning Committee on Police Training and Education. It explores thirteen potential obstacles in evaluating learning in an organization context. It highlights the issue of multiple variables.

Evaluation of affordable housing projects based on the Grow Home concept

by A. Friedman and V. Cammalleri. Ottawa : Canada Mortgage and Housing Corporation, 1992. xiii, 167 p. : ill. *French ed. (Evaluation d'ensembles de logements...) : 93-06329/3.*
MICROLOG 93-06311 3 fiche

The purpose of this study was to evaluate the potential of narrow-front row housing to respond to Canada's affordability challenge. It determined how successful the product itself was in meeting the functional requirements and financial limitations of the buyers. It looked at the role played by the builder in interpreting the concept and marketing the units. Finally it determined what the effect was of external factors, such as the regulatory environment and government subsidies, on the implementation and sales of the projects. This document presents the study results.

Evaluation of catch selectivity of modified snow crab *Chionoecetes opilio* conical traps

by Y.J. Chiasson...et al. Moncton, N.B. : Dep of Fisheries and Oceans, Gulf Fisheries Centre, 1993. iii, 21 p., ill. (Canadian technical report of fisheries and aquatic sciences ; no. 1930) ISSN 0706-6457
MICROLOG 93-08581 1 fiche

The snow crab fishery in the southwestern Gulf of St. Lawrence depends almost exclusively on annual recruitment. The fishery is therefore extremely sensitive to yearly fluctuations in the number of individuals reaching the minimum legal size. The protection of this annual recruitment, undersized juveniles and females, is a prerequisite for rebuilding the depressed stock. If a selective trap mechanism can be installed on conventional traps, the protection of soft, undersized juvenile and female crab can be largely enhanced with lesser resources.

structures from zebra mussel fouling. This interim report provides the 1991 update, the second year of testing. Plates coated with antifouling paints were tested at Ontario Hydro's Nanticoke TGS in 1990 and 1991 and were rated for their ability to resist mussel fouling or provide easily cleaned surfaces. Although five silicones and a zinc coating have been effective in preventing mussel attachment for either one or two years to date, a long-term evaluation of antifouling performance is required to provide cost-effective coatings recommendations for use in situ.

Evaluation of consumables and sleeve welding procedure verification

by S.R. Bala and B. Bryan. Oakville, Ont. : Welding Institute of Canada, 1991. iv, 175 p. : ill. Bibliogr. *On cover: Research report CANMET contract: 23440-0-900601-SQ003.*
MICROLOG 93-05442 2 fiche

Program conducted to select a few European low and very low hydrogen electrodes from a survey of low hydrogen shielded metal arc welding (SMAW) electrodes. The program determined the moisture absorption characteristics of these electrodes and ranked their suitability for root beads in girth welds and produced approved hot tap welding procedures for X52 and X60 pipe and a maintenance sleeve welding procedure for X42 carrier pipe using selected ultra low or low hydrogen electrodes that assure crack free welds in full scale field simulations. A consumable survey was carried out to list the sources of all low and ultra low hydrogen SMAW electrodes and a limited number of austenitic stainless steel electrodes, together with their packaging characteristics. Seven electrodes from the survey were selected for the experimental program. The diffusable hydrogen contents of the weld metals deposited from as- received freshly opened electrodes, electrodes exposed to 40% humidity for 24 hours, and electrodes taken from the packages exposed to 90% humidity for 24 weeks were determined using the IIW mercury method. Girth welding was carried out for each of the seven low or ultra low hydrogen electrodes.

An Evaluation of debris avalanches in the central Cape Breton Highlands, Nova Scotia

by P.W. Fink. Halifax : Dept. of Natural Resources, 1993. iv, 65 p. : ill., maps. (Paper ; 93-1)
MICROLOG 93-07215 1 fiche

Debris avalanches are a complex failure involving components of rock topple, rotational slippage, translational sliding, and flow with rates of movement from 0.5-30 m/sec. Avalanches influence mineral exploration, mine development, forest harvest practices, the fresh water sport fishery, and associated tourism. This report documents the present extent of debris avalanches in the central Cape Breton Highlands to serve as a baseline for comparison of any future change in avalanche distribution; determine change in the frequency of debris avalanches from 1925-91; identify local factors that influence slope stability on a time dependent scale; and identify natural or anthropogenic events that combine with the regional factors and act as triggering mechanisms for avalanches. The central Cape Breton Highlands were examined from the southern boundary of Cape Breton Highlands National Park south to Baddeck, excluding the Cheticamp River system. The study area equals approximately half the main Highland area and is bordered to the west by the Margaree Valley and to the east by Indian Brook

Evaluation of desi chickpea as a new crop for Saskatchewan : final report

by A.E. Slinkard and A. Vanderberg. Regina : Saskatchewan Agriculture Development Fund, 1992. 42 p.
MICROLOG 93-08354 1 fiche

The small-seeded, desi-type chickpea is grown in over 85% of the world chickpea production area. The potential production area for desi chickpea in Saskatchewan is the brown and dark brown soil zones. This project was conducted to identify desi chickpea genotypes with suitable maturity, yield, and quality for production in Saskatchewan and with acceptability in the North American and world markets. Replicated yield trials, unreplicated screening nurseries in both plots and rows, seed increase plots, and agronomic experiments were conducted from 1989-91 at Bounty, Saskatoon, and Sutherland farm. International yield trials were grown in 1989 and 1990 and in 1991, a prairie wide cooperative test was conducted at six locations. An herbicide trial was also begun in 1990 to determine the rate and timing of metribuzin application for post-emergent broadleaf weed control. Seeding rate trials were conducted at both Saskatoon and Bounty in 1991.

Evaluation of European grape varieties : summary report, 1987-92

Association of British Columbia Grape Growers. Victoria : The Association ; Ministry of Agriculture, Fisheries and Food, 1992. v, 148 p. : ill. *CS/ 37100.208.* ISBN 0-7718-9256-X
MICROLOG 93-03608 2 fiche

This project was conducted to identify new grape varieties that would improve the quality and diversity of varietal and blended wines produced in British Columbia. The project began in May 1987 and continued until March 1992. Selection of new varieties was based on information obtained from German and Hungarian plant breeders during a viticulture study tour in 1984. French clones of Chardonnay and Pinot Noir were added when they became available in 1989. Local varieties were added as standards for comparison. Analysis of testers' comments on flavour and intensity of flavour was done in 1989 and 1990 through multivariate analysis.

Evaluation of low-grade energy sources for utilization in fluidized bed combustion in the Timiskaming area

by N. Stover. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1992. vii, 54 p. : ill. Bibliogr. *CANMET contract: 23440-2-9002-01-SQ.*
MICROLOG 93-03473 1 fiche

This report provides a survey of the quantities and composition of low grade energy sources in the Timmins-Sault Ste. Marie-Thunder Bay area of Northern Ontario. The types of energy sources evaluated were those that could be considered as opportunity fuels, including industrial/commercial/institutional (ICI) solid waste, municipal solid waste, wood waste and tires. Data bases were used to develop a predictable per capita mass generation rate and the population distribution for the study area was used to calculate the mass generation distribution data for the material. For all of the energy sources considered, the mass generation rate was summarized by distance groups from Haileybury, Ontario, the location of utilization facility. The report also includes the costs of acquiring the material, the transportation costs, and the cost of delivered energy.

Evaluation of mining subsidence field data, Cape Breton, N.S.

Jacques, Whitford and Associates Ltd. Dartmouth : The Company, 1993. iv, 165 p. : ill. *CANMET contract: 23440-1-9127-01-SQ.*
MICROLOG 93-08325 2 fiche

Following an extensive research program dating back to 1983, 29 subsidence data sets collected between 1916 and 1989 were used as a basis for an evaluation of subsidence prediction models used in the Sydney Coalfield. The profiles were from survey levelling conducted over subterranean extractions before World War II, and subsidence profiles generated from changes in seafloor topography determined by echo-sounding before and after mining in the late 1980s. Several profiles were obtained from monitored interaction between the Phalen and Harbour Seams. Each data set was compiled along with relevant details of overburden geology, mining parameters, and extraction geometries, and assessed for both accuracy and usefulness. Ten subsidence case histories were developed, for a total of 24 complete or partial subsidence profiles. This report documents these case histories and provides an assessment of them.

Evaluation of quantities of biomedical waste generated in Ontario

ORTECH International. Toronto : Ministry of Environment and Energy, 1993. 100 p. ISBN 0-7778-0750-5
MICROLOG 93-07490 2 fiche

The Ontario Ministry of the Environment, in cooperation with a number of stakeholders from both government and the health care sector, have developed a definition for medical waste requiring special handling. This definition was used to conduct a waste audit to determine how well waste is now being segregated, and to quantify the amount of biomedical waste generated. During the audit, health care workers' practices were observed and interviews were conducted to obtain their opinions on the proposed definition. This report describes the auditing procedures used to measure generation rates; the aggregation factors used to estimate regional and provincial totals of various waste categories, the audit results; and post audit discussions of the definition of biomedical waste.

Since 1979, the Science Council of British Columbia has administered a number of programs designed to promote economic development by providing financial assistance for applied research and development. This evaluation determined the effectiveness of the Assistance Grants for Applied Research (AGAR) program and the Science and Technology Development Fund (STDF) and developed recommendations to improve the current program design. The report describes the AGAR and STDF programs, the rationale for them, their impacts and effects, and their delivery.

Evaluation of steels for sensitivity to hydrogen induced cracking in the reheated heat affected zone : final report

by B.A. Graville. Georgetown, Ont. : Graville Associates Inc., 1992. 15 p. : ill. Bibliogr. *CANMET contract: 23440-9-9279-01-SQ.*
MICROLOG 93-01539 1 fiche

Cracking repair welds and tie-in welds made with cellulosic electrodes can occur in the heat affected zone at the root. To evaluate the sensitivity of various steels to this problem, a simple bend test was used in which the sample is welded with E8010G electrodes and loaded very slowly to maximize the effects of hydrogen embrittlement. The deflection to failure is then measured.

The Evaluation of student achievement : a policy statement and rationale

Toronto : Ontario Public School Boards' Association, 1992. 9 p. *ONTERIS: ON05943.*
MICROLOG 93-00319 1 fiche

The Ontario Public School Boards' Association (OPSBA) contends that curriculum improvement and the raising of educational standards are dependent upon clarification of policies with respect to the evaluation of student achievement. OPSBA proposes a 3-strand system: external monitoring; province-wide benchmarks; and comprehensive student profiles. It endorses the role of the federal government in monitoring general standards; provincial responsibility for clarifying curriculum documents, improving provincial review programs, initiating a benchmark program, and creating models for student profiles; and local school-board responsibility for creating a student evaluation policy and supervising its implementation. Appendices contain a summary chart and chronology of OPSBA submissions on student achievement.

An Evaluation of Sunday shopping in New Brunswick

Fredericton : Dept. of Municipalities, Culture and Housing, Corporate Planning, 1992. iii, 27 p. *French ed. (Evaluation du magasinage le...) on the same fiche.*
MICROLOG 93-04424 1 fiche

Government introduced Sunday shopping in New Brunswick during the period November 3, 1991 to December 31, 1991. The intended purposes were to counteract cross-border shopping and to enhance sluggish retail sales. At the time, it was indicated that this was an experiment and that the results of the pilot project would be reviewed before changes were made to the Days of Rest Act. This paper presents the analysis and makes recommendations pertaining to permanent changes in the Act.

Evaluation of target and crop tree response to glyphosate injection and manual cutting

S.l. : Canada/BC Economic and Regional Development Agreement, 1991. 3 p. : ill. (FRDA research memo ; no. 175)
MICROLOG 93-05792 1 fiche

Technical note on a trial initiated in 1985 to gain additional experience with stem injection techniques for spacing coniferous stands. The trial evaluated the effectiveness of glyphosate injection at the rate of one cartridge per 5 cm diameter at breast height on the growth of target trees of western hemlock, western redcedar, and amabilis fir and quantified and compared the growth response of crop trees to herbicide injection spacing, chainsaw spacing, and no spacing treatment. This note summarizes the survival of target trees and stem diameter growth of crop trees three growing seasons after treatment.

An Evaluation of the BHWP Plume Plotter dispersion model

by G.C. Edwards. Toronto . Ontario Hydro, Research Division, 1992. 38 p. : ill. Bibliogr. (Report ; no. 91-108-K)
MICROLOG 93-02981 1 fiche

The Bruce Heavy Water Plant presently operates a real-time computer dispersion modelling facility called Plume Plotter that couples a Gaussian dispersion model with a graphics capability to display a plume footprint of ground level concentration for hydrogen sulphide/sulphur dioxide emissions through the flare stack or loss of containment hydrogen sulphide releases. This modelling capacity is used as part of an emergency preparedness and response system for the facility and surrounding plant as well as for predicting environmental impact of emissions from the flare stack. This report reviews briefly the capability of the Plume Plotter Gaussian model for flare releases, and the Ontario Ministry of the Environment modelling capability to illustrate the need to update present modelling practices. An overview of available modelling packages for emergency preparedness and response is also provided.

Evaluation of the catch mechanism of conventional conical snow crab *Chionoecetes opilio* traps by underwater video camera observations

by R. Vienneau, A. Paulin and M. Moriyasu. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Fisheries Centre, 1993. v, 15 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1903) ISSN 0706-6457
MICROLOG 93-03128 1 fiche

This study was begun because of comments of snow crab fishermen, based on their experience, that some traps caught considerable quantities of snow crab and others did not despite the two lots being of identical design, quantity of bait, depth and fishing locations. Many fishermen have also changed their traps from the square type to the large conical type, which are more efficient, easier to manipulate, and stackable for transport. To better understand the fishing mechanism of conventional traps, a series of surveys were conducted that showed that conical traps catch more and larger crabs although they did not show the reasons. This study evaluates, by direct observations using an underwater video camera system, the relationship between catch performance of standard conical snow crab traps and various factors such as bottom current, bait position and gear design.

Evaluation of the energy conservation impact of the Residential Rehabilitation Assistance Program : research report

Canada Market Research. Ottawa : Canada Mortgage and Housing Corporation, 1992. iv, 250 p. *CSI 22118.238.*
MICROLOG 93-03155 3 fiche

The RRAP helps to ensure that there is an adequate supply of safe and affordable housing for lower income Canadians and that substandard housing is brought up to a level of good repair. A portion of the funds committed to the program are for energy conservation upgrades. This project was conducted to develop a questionnaire and survey method to evaluate the impact of the RRAP program in general and specifically for energy conservation; a pilot project to test and streamline the survey process; and a statistical analysis process to compare RRAP funding with energy conservation. Ontario was selected as the region for the project, which was then broken down into two phases. Phase I consisted of a review of the Ontario RRAP database, a collection of additional information from RRAP files, and a draft of the survey to be used in Phase II. Phase II consisted of 211 telephone interviews and a statistical analysis. This report gives the results of both Phase I and Phase II. Fieldwork was conducted from 12-15 November 1991 and telephone interviews were conducted from 28 February-8 March 1992.

An Evaluation of the Greater Vancouver Region in the context of sustainable development

by D. Colnett. Hull, Que. : Canadian Environmental Assessment Research Council, 1990. 21 p. Bibliogr. (Manuscript report ; MR5-90)
MICROLOG 93-05329 1 fiche

This discussion paper examines some institutional responses to issues related to the maintenance of agricultural areas, waste management, estuary management, and land use planning. Before the experience of Greater Vancouver is detailed, the concept of sustainable development is explored and criteria for sustainable urban areas are developed. Then the institutional arrangements relevant to the case study are explained. A brief chronological summary of various institutional initiatives is given to indicate how environmental quality is being managed. This summary is followed by an evaluation of the progress by the region towards sustainable development. The paper concludes with some observations about the problems of transforming our cities into sustainable urban regions.

Evaluation of the potential effects of major oil spills on Grand Banks commercial fish species as a result of impacts on eggs and larvae

by S.E. Hurlbut, D.P. French and B.J. Taylor. Ottawa : Environmental Studies Research Funds, 1991. ix, 188 p. : ill., maps. Bibliogr. (Environmental Studies Research Funds report ; no. 110) ISBN 0-921652-05-04
MICROLOG 93-03371 3 fiche

This study evaluates the potential effects of a major oil spill on Grand Banks commercial fish species as a result of hydrocarbon toxicity to eggs and larvae. The study uses background information developed for production and transportation studies for the Hibernia development project to address the issues of the spatial and temporal distribution of the eggs and larvae of commercially important species, the toxicity of petroleum hydrocarbons to eggs and larvae, the potential spatial/temporal extent of hydrocarbon contamination resulting from a major oil spill, and the effect of larval mortality on the fishery. A generalized physical fates and biological effects model, based on the United States Department of the Interior's Natural Resource Damage Assessment Model for Coastal and Marine Environments, was developed that estimates the potential impact of chemical spills, including oil, on fish eggs and larvae and on future fish populations and catch. This report reviews the relevant data specific to the Grand Banks and Hibernia and gives the results of the model runs and impact analysis

Evolution de la rouille vésiculeuse du pin blanc dans les jeunes plantations de pins blancs

par A. Lavallée. Sainte-Foy, Québec : Forêts Canada, Région du Québec, Centre de foresterie des Laurentides, 1992. viii, 24 p. : ill. Bibliogr. (Rapport d'information ; LAU-X-101) *L'éd. anglaise (The Spread of white pine blister...) sur la même fiche. CSI 22521.200.* ISSN 0835-1589 ISBN 0-662-97845-5
MICROLOG 93-06401 1 fiche

La rouille vésiculeuse du pin blanc est reconnue depuis longtemps comme la principale maladie qui attaque le pin blanc au Québec comme ailleurs en Amérique. Au Québec, les relevés qui ont servi à démontrer la gravité de cette maladie furent d'abord effectués en forêt naturelle puis dans des plantations de 15 ans et plus. Déjà à cet âge des situations catastrophiques furent signalées mais on ne dispose d'aucun suivi dans des plantations plus jeunes permettant de déterminer quand intervenir sur divers emplacements de ces plantations. Depuis 1985, l'examen annuel de 16 plantations réparties dans le sud et le centre du Québec fut réalisé afin de documenter le taux de progrès de la rouille vésiculeuse à partir de ses débuts. L'environnement particulier à chacune des stations fut examiné dans le but de caractériser les endroits où la rouille progresse radipement avant que le couvert forestier soit complètement fermé.

L'Evolution des villes dans les sociétés postindustrielles

par P. Hall et L.S. Bourne. Ottawa : Société canadienne d'hypothèques et de logement, Centre d'études prospectives sur l'habitation et le cadre de vie, 1991. iv, 33 p. Bibliogr.
MICROLOG 93-03148 1 fiche

A l'époque de la révolution industrielle, tous les pays occidentaux ont subi une profonde transformation. A l'origine essentiellement rural, axé sur l'agriculture et les ressources, leur mode d'habitat est devenu urbanisé. Les villes ont évolué de façon dynamique, sous l'influence de divers éléments: tout d'abord, la tendance irrésistible au regroupement découlant de l'industrialisation et, plus tard, la puissance incroyable de l'automobile, qui a été, sans contredit, le principal facteur ayant contribué à la création du modèle urbain nord-américain durant la dernière moitié du XXe siècle. Ce document se penche précisément sur ce sujet et examine l'évolution des villes dans les sociétés postindustrielles et la qualité de la vie en milieu urbain.

Evolution du français parlé à Welland, Ontario, Canada : rapport final

chercheur principal: Raymond Mougeon ; assistant(e)s de recherche: Edouard Beniak and Marilyn Lambert-Drache. Toronto : Institut d'études pédagogiques de l'Ontario, Centre de recherches en éducation franco-ontarienne, 1987. 49 p. Bibliogr. *ONTERIS: ON05581.*
MICROLOG 93-00339 1 fiche

Traite du français parlé, et présente la diversité des réalisations diphtonguées en français de l'Ontario, qui s'expliquent par le fait qu'il n'existe pas un seul patron articulatoire, responsable de la diphtongaison mais deux, qui offrent de nombreuses possibilités de réalisation, et aussi par l'influence des facteurs sociolinguistiques. Les données, collectées pour l'étude, provenaient des entrevues enregistrées avec 58 adultes, domiciliés à Welland, et étaient relatives à l'éducation et la profession des locuteurs; la langue d'éducation et de travail; et la fréquence des voyelles diphtonguées: A, E, O, OE, dans le parler des locuteurs. De l'analyse des résultats ressort qu'en milieu bilingue, il existe une interaction entre les facteurs 'éducation' et 'profession' et les facteurs linguistiques. L'indice d'exposition au français standard, est défini l'indice le plus pertinent pour l'explication du phénomène de diphtongaison. Des annexes et des tableaux complètent le document.

The Evolution of containerization in East Asia

by C. Comtois. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 21 p. (Publication ; no. 888)
MICROLOG 93-05430 1 fiche

The paper examines the growth of container traffic in the Asia-Pacific region; reviews the role of selected Asian Pacific ports as key economic players; analyzes container development in each port to measure the differences explaining the position of Asian-Pacific ports in the maritime system and the degree of concentration and competition that exists among the container ports of the region to evaluate what rate of expansion can be expected in the foreseeable future that will shape the network of the container market in the region.

The Evolution of public governments in the North and the implications for aboriginal peoples

Ottawa : Indian and Northern Affairs Canada, 1993. ii, 47 p.
MICROLOG 93-06342 1 fiche

The history of relations between Aboriginal peoples and public government in Northern Canada is significantly different from the relationship that has emerged in other regions of this nation. This paper provides an historical perspective of the growth of public government in Northern Canada, and describes the relationships between Aboriginal organizations and the federal and territorial governments as these have developed over the past century.

Evolution of real property taxation and the assessment function in British Columbia

by J. Collins. Victoria : British Columbia Assessment Authority, 1992. 9 p. *This paper was originally presented at the 1992 B.C. Assessment Authority annual seminar.*
ISBN 0-7726-7384-5
MICROLOG 93-03883 1 fiche

The Assessment Authority Act and its companion Assessment Act were passed in 1974. They are the products of more than 100 years of development in real property assessment and taxation law in British Columbia. This document presents a brief history of the value of the current assessment system. It looks at the first investigation into property taxation, the trend toward centralization, real estate values shifting tax burden to home owners, (1960's and 1970's), one single agency becoming responsible for assessments, and the variable tax rate system in the 1980's.

Exact and inexact penalty methods for the generalized bilevel programming problem

by P. Marcotte and D.L. Zhu. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 20 p. Bibliogr. (Publication ; no. 920)
MICROLOG 93-08147 1 fiche

We consider a hierarchical system where a leader incorporates into its strategy the reaction of the follower to its decision. The follower's reaction is quite generally represented as the solution set to a monotone variational inequality. For the solution of this nonconvex mathematical program a penalty approach is proposed, based on the formulation of the lower level variational inequality as a mathematical program. Under natural regularity conditions, we prove the exactness of a certain penalty function, and give strong necessary optimality conditions for a class of generalized bilevel programs.

Exact solution of a location problem with stochastic demands

by G. Laporte, F.V. Louveaux and L.V. Hamme. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. ii, 20 p. Bibliogr. (Publication ; no. 921)
MICROLOG 93-08146 1 fiche

This paper considers a class of capacitated facility location problems in which customer demands are stochastic. The problem is formulated as a stochastic integer linear program, with first stage binary variables and second stage continuous variables. It is solved to optimality by means of a branch and cut method. Computational results are reported for problems involving up to 40 customers and 10 potential facility locations.

Examen des programmes de réglementation

Canada. Travail Canada. Ottawa : le Ministère, 1993. 28, 26 p. *Bilingue (Review of regulatory programs).* ISBN 0-662-59703-6
MICROLOG 93-08292 1 fiche

Au cours des 6 dernières années, Travail Canada a entrepris une révision des programmes de réglementation dont il est question dans les parties II et III du Code canadien du travail. Cette révision se fait de façon tripartite, avec la participation active des employeurs et des organisations ouvrières qui sont visées par cette législation. La procédure a permis l'élimination des règlements qui ne sont plus nécessaires tout en remettant à jour les règlements qui touchent à la technologie moderne et aux pratiques actuelles en milieu de travail. Le document résume le mandat de Travail Canada et les efforts visant à réduire les interventions réglementaires. Il traite aussi des partenariats avec les provinces, des consultations avec les entreprises et les travailleurs, de l'incidence sur le commerce et la concurrence, et de la révision de la réglementation de Travail Canada.

L'Expérience québécoise en matière d'évaluation des impacts sociaux

par M. Norbert. Hull, Québec : Conseil canadien de la recherche sur l'évaluation environnementale, 1986. vi, 77 p. Bibliogr. (Rapport manuscrit ; MR7-86)
MICROLOG 93-05365 1 fiche

Ce travail présente une analyse de l'expérience québécoise en matière d'évaluation des impacts sociaux (EIS) des projets de développement. On y présente le cadre de l'EIS, un aperçu des réalisations québécoises en ce domaine ainsi qu'une analyse critique de cette expertise telle que perçue par ses acteurs. On y discute les principaux aspects problématiques de l'EIS qui sont reliés, entre autre, à la définition de concepts, la participation du public comme méthode d'évaluation des impacts sociaux, la procédure d'évaluation, les sujets de l'EIS, l'approche méthodologique, le genre de projets à être évalués et au besoin de recherche et de formation dans ce domaine.

Experience with the performance of load-controlled cone penetration tests in permafrost and ice

by B. Ladanyi, T. Lunne and W. Winsor. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 8 p. Bibliogr. (C-CORE publication ; no. 91-23) *Presented at the Canadian Geotechnical Conference.*
MICROLOG 93-06009 1 fiche (Available on fiche only)

Experience gained in the past 15 years with the performance of point-load-controlled cone penetration tests in frozen soils has shown that the test offers an excellent possibility for both frozen soil profiling and the measurement of its rheological properties down to very low strain rates. This paper presents and discusses the results of such tests carried out in the last three years at three different sites, covering an ice-rich silt, a dense silty sand, and a first-year sea ice.

This report presents an experimental program designed to monitor the rates of change in dimension of the scours at four study sites and to obtain sufficient hydrodynamic and sedimentary data to allow the measured rates of change of scour dimension to be extrapolated to unmonitored sites. The four scours include scour 95, located about 70 km to the north-northwest of the Hibernia P-15 discovery well; the Texaco 89-01 scour, about 48 km to the east of Hibernia; the Husky 88-01 scour a further 10 km to the east near the Whiterose E-09 well site; and Bowers Pit, 11 km to the east-southeast of Hibernia. The survey history and a summary of the physical characteristics for each of the four scours are presented together with a discussion of the effectiveness of the previous surveys.

Experimental testing of a stand-alone digital relay for power transformers

by B. So and M.A. Rahman. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Power System Protection Subsection, 1993. 20 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05232 1 fiche

A stand-alone digital relay was designed and implemented that can be modified quickly to accommodate the protection of different types of transformers by changing the software only. This paper presents the real-time experimental results of five selected algorithms implemented using this digital relay. The algorithms used include discrete Fourier transform, Walsh functions, rectangular transform, finite impulse response filtering, and least square algorithm.

Experiments on the causal mechanisms of dieback on deciduous forests in Quebec

René Pomerleau ; with foreword by Allan Auclair and Denis Lachance. Sainte-Foy, Que. : Forestry Canada, Quebec Region, Laurentian Forestry Centre, 1991. xii, 48 p. : ill. Bibliogr. (Information report ; LAU-X-96) ISSN 0835-1570 ISBN 0-662-18615-X
MICROLOG 93-03413 1 fiche

In an attempt to identify the cause of forest dieback on sugar maple and other tree species in southeastern Canada, earlier research on birch dieback conducted from the late 1940s to the early 1960s was examined. This report tested the theory that relatively minor soil temperature increases (2C) were the most important ecological factor inciting dieback of birch and other hardwoods. The report includes a complete description of the equipment, methods, and results of four experiments carried out between October 1955 and December 1957 to obtain more precise information on the effects of soil temperature and soil moisture on the dieback of white birch seedlings.

An Expert system approach to power transformer maintenance

by M.-A. Mafin and S. Bannerjee. Montreal : Canadian Electrical Association, Power Systems Planning and Operations Section, Expert Systems Committee, 1992. 10 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06078 1 fiche

Modern maintenance strategy of power equipment is based on predictive, forecasting maintenance. Failure diagnosis expert systems are valuable aids in forecasting maintenance plans, however, these plans should also be based on the life-cycle of the equipment. In this paper a cost analysis model is proposed which produces economical maintenance strategies. This model, which is also an expert system, cooperates with 2 others, a life expectancy forecasting and a failure diagnosis expert systems. Thus the proposed cost analysis model determines the most cost-effective maintenance strategy by calculating, for each knowledge-based recommended maintenance strategy, labour, material and down-time costs, and by comparing the sum total of these costs with the life-expectancy-based replacement and commissioning costs. In this manner a verdict on whether to replace, repair, rejuvenate or dispose of it is reached. The proposed cost analysis model, presently under development, is applied to a case study of a power transformer.

An Expert system for monitoring and control of boiler operations : final report

Comdale Technologies (Canada) Inc. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1992. 76 p. *CANMET contract: 23440-0-917301-SQ033.*
MICROLOG 93-05441 1 fiche

In many steam plants substantial savings can be realized by optimizing steam usage and load sharing between boilers. This project was conducted to develop a real-time expert system application to utilize the full amount of the plant Electrical Power Contract (53.6 MW) without exceeding its limit either instantaneously or at the summation of its 30 minute billing period; to balance the generating rate of boilers to ensure that each is operating within its efficiency range; to reduce oil consumption by manipulating the firing rate of an oil fired boiler based on the utilization of the plant Electrical Power Contract; to maintain the steam plant stability during periods of abnormally large load changes; and to recognize abnormal conditions and alert operators. The system was installed at the Wabash Mine in Newfoundland.

An Expert system on the reliability evaluation of alternative transmission facilities

by L. Loud, D.T. McGillis and F.D. Galiana. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Expert Systems Subsection, 1992. 9 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06079 1 fiche

Expert systems are being used to enable rapid prototype development of transmission designs. They are used in transmission system design and operation, determining and improving reliability and evaluating alternative designs. Thus, a hybrid of expert systems and classical simulation techniques is emerging where expert systems are called upon to enhance classical numerical processing. Examples are provided using Transept, an expert system design environment developed to determine the least cost method of transmitting power of a point-to-point system.

Annual report on exploration activity, geological descriptions of selected properties, and assessment report summaries of minerals and coals. The overview of exploration activities is presented by district and gives trends, highlights, a summary by mineral, coal or placer mine, development, operating mines and exploration opportunities. The geological descriptions are categorized by metals, industrial minerals, and a regional geochemical survey, and for each mine includes location, claims, access, owners, operator, commodities, and description including history. Assessment reports are presented geographically, with separate mineral and coal indices of property names, operators and authors. Property descriptions include name, location, claims, operator, author, commodities, description, work done, and references.

Exploratory study of three models of equity cooperatives

by André Poulin ; with the collaboration of Christian Rozycki. Ottawa : Canada Mortgage and Housing Corporation, 1991. vi, 97 p. Bibliogr. (Research book ; 91-2) ISBN 2-89360-125-1
MICROLOG 93-08628 2 fiche

This document presents the common characteristics shared by the three models as well as the operating principles for each of them. It illustrates the breakdown of the equity between the members of the cooperative and looks at the equity build up for each of the parties involved depending on the model chosen. An analysis of the results highlights the income levels of potential clients for these formulae. It concludes with an identification of the strengths and weaknesses of the models, a description of improvements which could be made as well as additional research themes which should make it possible to clarify the parameters for formulae which are ready for experimentation.

An Extended descent framework for monotone variational inequalities

by D.L. Zhu and P. Marcotte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 17 p. Bibliogr. (Publication ; no. 917)
MICROLOG 93-08154 1 fiche

In this paper, we develop a very general descent framework for solving asymmetric, monotone variational inequalities. We introduce two classes of differentiable merit functions and the associated global convergence frameworks which include, as special instances, the projection, Newton, quasi-Newton, linear Jacobi and nonlinear methods. The generic algorithm is very flexible and consequently well suited for exploiting any particular structure of the problem.

Extending freedom of information and privacy rights in British Columbia

see The Extension of citizens' information and privacy rights to all public bodies in British Columbia : report

Extending freedom of information and protection of privacy rights : discussion paper

Victoria : Ministry of Attorney General ; Ministry of Government Services, 1992. 18 p.
MICROLOG 93-00524 1 fiche

Bill 50, British Columbia's Freedom of Information and Protection of Privacy Act has been described by key commentators as the best legislation of its kind in Canada. They have praised the balance it achieves between the right of access to government held information and the government's need for confidentiality in limited circumstances. This discussion paper provides an overview of the legislative framework embodied in Bill 50, highlights some of the key policy issues and invites comments and submissions prior to the development of legislation.

The Extension of citizens' information and privacy rights to all public bodies in British Columbia : report

by B.O. Jones. Victoria : Ministry of Government Services, Information and Privacy Branch, 1993. ii, 74 p. *Cover title: Extending freedom of information and privacy rights in British Columbia.*
MICROLOG 93-03899 1 fiche

This document presents a sector-by-sector analysis of which bodies should be included in any legislation. It examines the merits of various approaches to legislation, identifies several specific concerns which have no correlative in the provincial government, reviews the larger issue of access to personal health care records, reviews the issue of access to the identity of an individual providing a confidential reference check, examines implementation costs in other jurisdictions, and outlines how the provincial government could provide transition support to local public bodies.

Extension of Toronto temperature time-series

by R.B. Crowe. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. i, 23 p. : ill. Bibliogr. (Report ; no. 89-11)
MICROLOG 93-00225 1 fiche

The Toronto climatological record stretches from 1840 to the present, the longest continuous temperature time-series in the Canadian climatological archive. This paper presents a method of extrapolating the Toronto temperature time-series backwards from 1840, using various U.S. and other data. The earliest U.S. data used in the analysis were taken in 1778.

Exterior insulation and finish systems (EIFS) : problems, causes and solutions

by C. Mattock. Ottawa : Canada Mortgage and Housing Corporation, 1991. 44 p. : ill. Bibliogr.
MICROLOG 93-05012 1 fiche

Exterior insulation and finish system (EIF system) is the generic description of a type of building cladding that consists mainly of plastic insulation board, glass fibre reinforcing mesh, and synthetic stucco. This report outlines the results of a literature search and series of interviews that examined allegations of problems that may adversely affect EIF system performance and reviews solutions developed to address those problems. Aspects of EIF system wall design that may influence the long term performance of EIF systems are discussed as they relate to the principles of wall design as developed by the National Research Council of Canada.

Extraction of ocean wave parameters from wide beam HF radar (CODAR) backscatter : application at Lumsden

by E.W. Gill and J. Walsh. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 5 p. : ill. Bibliogr. (C-CORE publication ; no. 91-16) *Presented at NECEC '91.*
MICROLOG 93-07746 1 fiche (Available on fiche only)

High-frequency (HF) radar cross sections of the ocean surface associated with a four-element square array operating in a ground wave mode are presented. Using these cross sections, an algorithm previously developed to extract directional waveheight information from HF sea echo is tested experimentally. Results for the non-directional spectrum are compared with data provided by a Waverider buoy. Directional information is considered in relation to wind conditions in the experimental environment.

Extracts from the MPS International Communique, 1988-92 : items related to world mineral investment climate

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. viii, 61 p. (Background study on the Canadian mineral investment climate ; no. 11)
MICROLOG 93-05407 1 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. This report consists of almost 100 articles containing news and information concerning and relevant to international investment in the mineral industry over the past four years. The topics covered include changes in legislation affecting the mining industry, taxation rules, legislation intended to attract or restrict foreign investment, import and export duties, and government policy towards mining and foreign investment. The items report on changes in Australia, Japan, the United States, Greenland, the European Economic Community, various countries in South America and Africa, Mexico, China, Indonesia, Myanmar, Papua New Guinea, Philippines, Vietnam, India, Bulgaria, and the U.S.S.R.

Un Extrait de l'enquête sur les voyages des Canadiens (EVC) de Statistique Canada, vol. 1 : les voyages des touristes québécois au Québec en 1990

par P. Cluzeau et R. Tremblay. Québec : Gouvernement du Québec, Ministère du tourisme, Direction de la recherche, 1992. xi, 247 p. : ill. *CSI 67097.101.* ISBN 2-550-26231-X
MICROLOG 93-07082 3 fiche

Ce volume porte, à la fois, sur les voyages des Québécois au Québec et ceux réalisés dans les autres provinces canadiennes. Les résultats sont présentés de telle sorte que, pour les voyages réalisés au Québec et dans les autres provinces canadiennes, on retrouve les renseignements suivants: une partie fournit des données générales et comparatives sur les différents types de voyages effectués dans les différentes provinces; une partie présente des données régionalisées, tant sur l'origine que sur la destination; et, une dernière partie compare plus précisément les principales caractéristiques des voyages d'agrément, des voyages pour visiter des parents ou des amis et des voyages d'affaires et de congrès.

Un Extrait de l'enquête sur les voyages des Canadiens (EVC) de Statistique Canada, vol. 2 : les échanges touristiques entre le Québec et les autres provinces en 1990

par P. Cluzeau et R. Tremblay. Québec : Gouvernement du Québec, Ministère du tourisme, Direction de la recherche, 1992. 165 p. : ill. *CSI 67097.100.* ISBN 2-550-26230-1
MICROLOG 93-07086 2 fiche

La Présente publication permet de cerner l'ampleur du marché des touristes canadiens des autres provinces venus au Québec, en particulier des Ontariens, et du marché des touristes québécois dans les autres provinces. Elle permet aussi de faire une analyse de l'évolution des comportements de voyages de ces touristes et de montrer leur contribution au plan des recettes touristiques et du tourisme régional. On décrit au début la méthodologie de l'enquête et les faits saillants. Ensuite on traite des principales caractéristiques des voyages des touristes des autres provinces y inclus des dépenses, des données régionalisées avec origine et destination, et des caractéristiques socio-économiques. Dans la prochaine partie du document on donne ces mêmes renseignements sur des touristes québécois. En annexe on inclut le questionnaire.

Fabrication and fatigue evaluation of welded tee and tubular joints for structures in a marine environment : final report

presented to Dept. of Energy, Mines and Resources, CANMET, Metals Technology Laboratories ; by Fleet Technology Limited. Ottawa : The Corporation, 1991. ii, 386 p. : ill. Bibliogr. *CANMET contract: 23440-4-927602-SQ.*
MICROLOG 93-04282 5 fiche

Report of a program in four separate parts on full penetration T-joints in plates and an assessment of the effects that attachment plate thickness and overall weld profile have on the fatigue life. In Phase I on attachment thickness, 51 T-joints were fatigue tested at constant amplitude bending loads with an R ratio of 0.05, with the crack shape and its development monitored using multi-probe potential drop techniques and beach marking. In Phase II's study of initiation life, 13 cruciform joints with fillet welds deposited by the shielded metal arc process were tested under constant amplitude loading using R ratios of 0 and -1. To establish a simple correlation between stress concentration factors (SCF) and stress intensity factors (SIF) and to develop a method for determination of SIF for semi-elliptical weld toe cracks in Phase III, weld toe SCFs were determined for joint and weld geometries used in the program by finite element methods. Phase IV tested a spare stiffened tubular joint from Phase II in axial loading at various test parameters.

Facteurs de performance des organisations et des systèmes informatisés d'information : recension des écrits

par P. Massé. Laval, Québec : Centre canadien de recherche sur l'informatisation du travail, 1992. 134 p. Bibliogr. *L'éd. anglaise (Factors affecting the performance...)* : *93-06426/2.* ISBN 0-662-97713-0
MICROLOG 93-06438 2 fiche

Ce document présente les résultats de deux recensions d'écrits. La première relative aux facteurs de performance des organisations et la seconde relative aux facteurs de performance des systèmes informatisés d'information. Chacune de ces recensions d'écrits aboutit à la production d'un modèle descriptif des facteurs concernés. Le chapitre I décrit d'abord les facteurs de performance organisationnelle identifiés dans sept modèles conçus à cet égard, soit dans cinque modèles vérifiés empiriquement. dans le chapitre II on résume les résultats des recherches portant sur les facteurs de performance des SII. On a regroupé ces facteurs selon qu'ils se rapportent aux individus, à l'organisation, à la technologie ou aux procédures d'implantation des systèmes. Chacun de ces chapitres se termine par la présentation d'un modèle descriptif des facteurs considérés. Ces modèles tiennent compte à la fois des écrits consultés et de considérations subséquentes.

La Famille et la télévision : recension des écrits

Groupe de recherche sur les jeunes et les médias. Québec : Ministère des communications, Direction générale des médias, 1992. 62 p. : ill. *CSI 67201.202.* ISBN 2-550-22881-2
MICROLOG 93-04466 1 fiche

Ce rapport comprend trois parties principales qui font le point sur les connaissances actuelles sur la famille et la télévision. Le premier chapitre décrit le phénomène de l'écoute en famille en examinant comment les familles regardent la télévision. Cette partie rend compte de l'équipement télévisuel dans les foyers, des habitudes d'écoute des membres de la famille, de l'influence du contexte social sur l'écoute et des règlements familiaux par rapport à la télévision. Dans le deuxième chapitre, on dégage certaines dimensions importantes de l'imagerie télévisuelle (violence, stéréotypes, publicité, images de la famille) et on effectue un survol de la recherche quant aux effets de ces contenus sur les téléspectateurs. Une fois certains paramètres établis, la troisième partie traite des influences réciproques entre la famille et la télévision. Elle se concentre d'abord sur deux aspects importants de l'influence de la télévision sur les interactions familiales: le choix d'une émission de télévision en famille et la façon dont la télévision affecte les échanges familiaux. Finalement, elle étudie la façon dont les interactions familiales peuvent contrer ou amplifier l'influence de la télévision et traite des diverses interactions entre membres d'une même famille par rapport au petit écran Enfin, la conclusion offre des perspectives d'avenir sur la recherche sur la famille et la télévision. Elle examine quelques nouvelles approches et propose de nouvelles questions de recherche.

Family types and housing affordability in Winnipeg

by D. Cheal. Ottawa : Canada Mortgage and Housing Corporation, 1992. xiv, 98 p. Bibliogr.
MICROLOG 93-08116 2 fiche

This document discusses different types of families buying houses. Data comes from housing experiences of individuals living as couples (married or unmarried) and their children (if any) for the city of Winnipeg. The topic of this report is family diversity. Families often differ in how they allocate the labour of their members between domestic tasks in the home and employment for wages. Three types of family economy are specified here, they are: breadwinner/homemaker; provider/co-provider; and dual career. It also explores different types of families who tend to occupy different niches in the housing industry according to their incomes.

Family violence : a Yukon directory of services and resources, 1993 -- 2d ed.

Whitehorse (Yukon) : Yukon Women's Directorate, 1993. 34 p. ISBN 1-55018-529-2
MICROLOG 93-06802 1 fiche

This directory is designed to help those called upon to listen, provide advice, or assist a person who is in a violent relationship. It is divided into sections. The first lists services that are accessible through Whitehorse. The second contains a list of services available in each community outside of Whitehorse. It also contains indexes. One is by category of services offered (such as counselling, legal, services to victims). This other is an alphabetical list of services, programs, government departments, and resources listed throughout the directory.

Family violence : situation paper

Ottawa : Health and Welfare Canada, Social Service Programs Branch, Family Violence Prevention Division, 1992. 6, 6 p. *Bilingual (Violence familiale : document sur la situation).* ISBN 0-662-58162-8
MICROLOG 93-03265 1 fiche

Family violence represents a serious abuse of power within family, trust or dependency relationships. It is estimated that no fewer than one in ten Canadian women is assaulted by her husband or partner; that family violence accounts for over 60 percent of female homicides; that 25 percent of girls and 10 percent of boys are sexually abused before age 16; and that at least 4 percent of elderly persons are victims of some form of significant abuse. This document discusses what the federal government has done to address the problem, how the federal government works in partnership with others, the problems and some answers, and a plan for future action.

Fatigue failure of line hardware components : analyses, specifications and design aspects

by P. Nguyên-Duy, Y. Blanchette and M. St-Louis. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Line Section, 1992. 14 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06258 1 fiche

The cyclic loading due to vibrations combined with temporary extra loads may cause failure of electric power transmission lines. Two line components (two 315 kilovolt conductor-suspension U-bolts and one pylon anchor bar) which are subject to fatigue failure are analyzed to determine the causes of failure and the applied load and loading mode. Fracture of these components has occurred several times over the past few years. Macroscopic observations of the fracture surfaces, metallurgical analyses, microscopic observations of the fracture surfaces, and interpretation of the results are discussed. Conclusions are drawn as to the most effective and economical methods for improving fatigue behaviour of such components.

This document discusses comprehensive and specific claims made by or for Aboriginal people. Comprehensive claims are based on the concept of continuing Aboriginal rights and title which have not been dealt with by a treaty or by other legal means. Specific claims arise from alleged non-fulfilment of Indian treaties and other lawful obligations, or the improper administration of lands and other assets under the Indian Act or other formal agreements. This document presents objectives, government roles, and results to date.

Federal regulatory plan, 1993

Ottawa : Treasury Board Secretariat, Administrative Policy Branch, Regulatory Affairs, 1992. iii, 258 p. *French ed. (Projets de réglementation fédérale, 1993) : 93-01904/4 CSI 22291.002.* ISBN 0-662-20133-7
MICROLOG 93-01903 3 fiche

The federal regulatory plan is one of the easiest ways for citizens to access the world of government regulation. The plan presents in a straight forward manner all the regulatory proposals that the government expects to examine in the coming year, including new regulations and amendments to existing ones. Its purpose is to give interested Canadians the opportunity to make their views known before the government comes to a decision. For each entry it includes the name, address, and phone number of a person to contact.

Federal response to 'Reaching for solutions : report of the Special Advisor on Child Sexual Abuse'

Canada. Ottawa : Government of Canada, 1992. 8, 9 p. *Bilingual (Réponse fédérale au rapport 'A la recherche...).* ISBN 0-662-58160-1
MICROLOG 93-03268 1 fiche

A Special Advisor on Child Sexual Abuse was appointed in 1987. This report concentrates on activities undertaken as a result of the appointment of the Special Advisor on Child Sexual Abuse and the release of his report, Reaching for Solutions. It also refers to three other major initiatives by the federal government concerning child abuse: the Child Sexual Abuse Initiative; the enactment of Bill C-15 in 1988 which made a number of amendments to the Criminal Code and the Canada Evidence Act to facilitate the testimony of child witnesses when disclosures of abuse incidences are in fact reported to criminal justice authorities; and the Family Violence Initiatives announced in 1988 and in 1991.

Federal revenues : changing trends and the quest for tax reform -- Rev.

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1992. 20 p. : ill. Bibliogr. (Current issue review ; 90-3E) *French ed. (Les Recettes fédérales : les nouvelles...) on the same fiche. Revised 11 February, 1992.* ISBN 0-660-14644-4
MICROLOG 93-00745 1 fiche

In 1970 federal revenues amounted to just over $15,000 million, less than 17.2 percent of GDP. Today the dollar amount of federal revenues is in excess of $120,000 million, with only a slight increase in GDP to 17.80 percent. Yet in two decades much has happened to the amount of revenue that the federal government collects, the way in which it is collected, and our understanding of the economic consequences. This paper examines the trends in federal revenues since the Carter Commission Report of 1967. It discusses the quest for higher revenues in the early 1970s and the reform measure of that decade. It also presents government's deficit reduction measures and efforts at tax reform. Finally, it considers several analytical issues related to taxation.

MICROLOG 93-06655 1 fiche

This review examines the trends in federal revenues since the Carter Commission report of 1967. It discusses the quest for higher revenues in the early 1970s and the reform measures of that decade, which later substantially reduced government revenues, and goes on to the present government's deficit reduction measures, which have increased the level of taxes, and efforts at tax reform. This review also considers analytical issues related to taxation.

Federal spending : changing trends -- Rev.

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1992. 15 p. Bibliogr. (Current issue review ; 87-2E) *French ed. (Les Dépenses fédérales : nouvelles...) : 93-00937/1. Revised 12 February, 1992.* ISBN 0-660-14614-2
MICROLOG 93-03134 1 fiche

Since 1970, total federal government expenditures have increased from 14,016 million to over 166,000 million dollars. Over the past five quarters, federal spending has risen steadily, increasing its share of GDP by 2.5 percentage points, as the effects of the recession have become felt. For the past two quarters, spending has averaged 24 per cent of GDP. The longer-term trend in spending originated many decades ago. This paper is concerned with the more recent growth and explores changes in the various components of spending. It will examine those components which account for total expenditure growth and explain why they do so.

Federal transfers to the provinces

Ottawa : Dept. of Finance Canada, 1992. 28, 29 p. : ill. *French ed. (Transferts fédéraux aux provinces) on the same fiche.*
MICROLOG 93-03607 1 fiche

In 1992-93, transfers will total some 39 billion dollars, representing just over 1,400 dollars for every Canadian. The transfers support the Canada-wide system of medicare, the higher education system, and the network of assistance to the needy. This paper focuses on transfers to provincial governments, also known as fiscal or intergovernmental transfer, and their contribution to the functioning of the federation. It is intended to provide factual information about the major federal-provincial transfer programs.

Federal waste reduction perspectives

Ottawa : Environment Canada, Conservation and Protection, Office of Waste Management, 1993. 28, 28 p. *Bilingual (Perspectives fédérales sur la réduction...).* ISBN 0-662-59721-4
MICROLOG 93-07120 1 fiche

In the Green Plan, the federal government has made a commitment of 50 percent waste reduction by the year 2000, as esablished by the Canadian Council of Ministers of the Environment (CCME). The purpose of this working paper is to provide a framework for identifying priorities and actions required by the federal government in the area of waste reduction. It includes an overview of basic principles; the federal perspective on respective roles and responsibilities; and imperatives for action in order to ensure that both short and long term waste minimization targets are met, and that the remaining wastes are handled in a safe and effective manner.

Federal-provincial study on the cost of government and expenditure management

Ottawa : Dept. of Finance, 1992. viii, 255 p. : ill. *Summary (27 p.) laid in. French ed. (Etude fédérale-provinciale sur le...) : 93-06497/4. CSI 21104.203.*
MICROLOG 93-01013 4 fiche

This document presents a summary of research undertaken by a joint working group of federal and provincial officials, at the request of Ministers of Finance and Treasurers. The research was fact-finding in nature and designed to shed light on a number of key issues in the area of government spending. The study addressed three questions: what have been the major pressures on government spending since the mid-1970s? What are the likely pressures on spending in the 1990s and beyond; And what action has been taken by governments inside and outside Canada to counter spending pressures?

Feed freight assistance : an analysis of policy options

by K.K. Klein, J. Corman and S. Russell. Ottawa : Agriculture Canada, Policy Branch ; Grains and Oilseeds Branch, 1991. 104 p. : ill. (Working paper ; 11/91) *CSI 22126.200.*
MICROLOG 93-03085 2 fiche

The Feed Freight Assistance Program was instituted in 1941 to enable livestock producers outside the Prairie region to purchase Prairie feed grains at prices comparable to those on the Prairies and to provide an additional market for grain from the Canadian Prairies. This working paper presents the results from seven scenarios of changes to the Program. The results were obtained from the Canadian Regional Agriculture Model simulations and represent medium term fundamental factors affecting the production, consumption and trade in each of the provinces. Options used include removal of the Program with and without compensation, development programs, direct producer payments in the same proportion as now and for red meats only, an enhanced subsidy for the Maritime provinces, and a direct producer payment for Nova Scotia only.

A Feminist guide to the Canadian Constitution

by L. Smith and E. Wachtel. Ottawa : Canadian Advisory Council on the Status of Women, 1992. xiv, 80 p. : ill. (Background paper) *French ed. (La Constitution canadienne : un guide féministe) : 93-02150/2.* ISBN 0-662-19785-2
MICROLOG 93-02073 1 fiche

Canada's constitution is the subject of much longstanding debate across the country. The Canadian Advisory Council on the Status of Women has participated in that debate since its founding in 1973. This document provides a framework within which the many constitutional issues can be analyzed from a feminist perspective. It reviews Canadian constitutional history up to the summer of 1990 and includes a few updates to reflect recent significant changes to the law. It describes what a constitution is and what it means to take a feminist perspective on the constitution.

MICROLOG 93-02824 1 fiche

This study describes the life history of *Daphnia schodleri* from Big Island Lake in central Alberta. The lake is ice-covered for six months of the year, with winter stagnation occurring before the ice breaks up in April or May. The report describes a laboratory study of external embryological features and embryonic stages, including the in vitro development of parthenogenetic eggs, duration of embryonic stages in the brood chamber and the duration of the brooding period; a laboratory study of growth and reproduction; and a field study of seasonal abundance, seasonal variation in egg production and cyclic reproduction.

Field crop recommendations, 1993-94

Toronto : Ministry of Agriculture and Food, 1993. 96 p. : ill., maps. *French ed. (Recommandations pour les grandes cultures...) : 93-06725/2. CSI 55101.106.*
MICROLOG 93-06724 2 fiche

Guidelines for the production and management of such field crops as corn, soybeans, forage crops, cereal crops, dry edible beans, and spring and winter canola. The guide gives general information on soil testing and sampling, plant analysis, the use of manure and sewage sludge as fertilizer, acidity and liming, and toxicity of fertilizer materials. General information on pesticide use and application is included, as well as specific pesticides recommended for particular applications in raising the listed crops.

Field evaluation of PEST : a profiler for estuarine sediment transport

by P.F. Hamblin and J. Valdmanis. Ottawa : Environment Canada, National Water Research Institute, 1990. 34 p. : ill. Bibliogr.
MICROLOG 93-03686 1 fiche

Concern for contaminant transport and fate in estuaries such as the St. Lawrence and Fraser underlines the need for measurement of fine-grained sediments in suspension and their flux. Usual methods involve water sampling with pumps or bottles. This study describes the use of PEST, a multiparameter profiler for estuarine sediment transport that is internally powered and self-recording to allow use on any research vessel with a hydrographic winch The heart of the system is an acoustic current meter measuring horizontal water speed and direction with sensors added for conductivity, external depth, optical transmissivity, and high-speed temperature. Some field applications are described from an experiment aboard the CSS LIMNOS in the St. Lawrence Estuary in July 1990.

Field evaluation of pyritic slate sealers at Halifax International Airport

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by W.S. Langley. Dartmouth, N.S. : W.S. Langley and Associates Limited, 1991. x, 50 p. : ill.
MICROLOG 93-02885 1 fiche

A test program was developed and implemented in the field to evaluate the performance of various materials for use as a slate sealant to control acid runoff due to the oxidation of pyritic slate. Laboratory studies were carried out to optimize concrete mixtures for six 15 m x 30 m test panels. One additional panel used gravel covered polyethylene as a moisture barrier. The cementitious mixtures contained high percentages of a local Class F flyash, superplasticizer and polypropylene fibres. Field testing included coring for compressive strengths, modulus of elasticity and pulse velocity up to 365 days, in situ permeability tests, in situ load tests and visual inspection and crack mapping at periodic intervals. The cementitious panels were applied using the shotcrete method and placement by an asphaltic concrete spreader. Several methods of repairing shrinkage cracking were evaluated and placement costs for the various systems were developed.

A Field guide for site identification and interpretation for the Nelson Forest Region

compiled and edited by T.F. Braumandl and M.P. Curran. Victoria : Ministry of Forests, 1992. x, 311 p. : ill. Bibliogr. (Land management handbook ; no. 20) ISSN 0229-1622 ISBN 0-7718-9206-3
MICROLOG 93-00805 4 fiche

This guide presents site identification and interpretation information for forest and range ecosystems of the Nelson Forest Region, which encompasses most of southeastern British Columbia. The classification system used follows the biogeoclimatic ecosystem classification developed for the province. The guide gives a description of the classification system; outlines procedures for site description, identification, mapping and interpretation; gives general descriptions of the zones of the Nelson Forest Region; provides tools for identifying biogeoclimatic and site units and general management interpretations for the identified site series; gives wildlife interpretations; and presents forest health concerns. Appendices provide specific interpretations such as silvicultural standards and forage seeding mixes or technical information such as plant species lists and soil-site description keys.

Field guide to pests of managed forests in British Columbia -- Rev.

by K.E. Finck, P. Humphreys and G.V. Hawkins. Victoria : Forestry Canada, Pacific Forestry Centre ; Ministry of Forests, 1992. viii, 188 p. : ill. (Joint report ; no. 16) ISSN 0843-4719 ISBN 0-7726-0910-1
MICROLOG 93-02345 3 fiche

Field guide to the identification of injurious insects, diseases, abiotic injuries and animal pests commonly found in the managed forests of British Columbia. Within each category, damaging agents are grouped together based on the part of the host tree mainly attacked. Agents within these groups are arranged in alphabetical order according to common name. Each agent has relevant text and photographs that describe the most obvious identifying features. General keys to the four main sections and more specific keys to individual insects, diseases, abiotic injuries and animal pests precede the appropriate sections. A host-pest index, a section on collection and shipment of samples and a glossary follow the pest descriptions.

Field investigation survey of airtightness, air movement and indoor air quality of high rise apartment buildings, Prairie region

by B.W. Gulay and C.D. Stewart. Ottawa : Canada Mortgage and Housing Corporation, 1991. 102 p. : ill.
MICROLOG 93-01323 2 fiche

A field investigation survey was conducted to determine exfiltration rates through the building envelope, inter-suite air leakage, and indoor air quality in two 13-storey high-rise apartment buildings located in Winnipeg. The survey also established the effect the heating, ventilating, and air conditioning system has on the pressure differential across the building envelope. Building residents were surveyed to establish the general environmental conditions, and five specific pollutants were identified and quantified. The applicability of procedures used was documented for use in future investigations and as candidate procedures for a standardized testing protocol.

Field measurement of sound from residential ventilation fans

by J.D. Quirt. Toronto : Canada Mortgage and Housing Corporation, Research Division, 1991. 8 p. : ill.
MICROLOG 93-04978 1 fiche

A Canadian Standards Association (CSA) standard was developed for laboratory testing of residential ventilation fans to provide air-handling and sound emission ratings. A study was performed to evaluate these laboratory test methods and to assess the relationship between the laboratory ratings and actual field performance. This report presents the results of Phase II of the study, in which bathroom ceiling exhaust fans and kitchen rangehood fans were tested after installation in residences. Because of a shortage of cooperative contractors and a slowdown in residential building, the actual field study included only six of the intended ten fan tests. The airflow testing is treated briefly because of its simplicity. The acoustics tests were planned not just to provide sound power data for comparison with the laboratory results, but also to assess the relationship between the sound power and the resulting sound pressure levels observed in the rooms.

Field measurements of sediment transport on the Scotian Shelf, vol. I : the radio-isotope experiment

by D.O. Hodgins, G. Drapeau and L.H. King. Ottawa : Environmental Studies Research Funds, 1986. xx, 160 p. : ill., maps. (Environmental Studies Revolving Funds report ; no. 041) *Fold. maps not filmed.* ISBN 0-920783-40-6
MICROLOG 93-05687 2 fiche

Seabed mobility of Sable Island Bank is an important factor for the planning and design of oil and gas pipelines. This study undertook detailed sand transport and boundary layer current measurements at two sites on the Bank close to Sable Island. An innovative technique using radio-isotope tracers to tag mobile sand layers was used to measure bedload transport. Detailed bathymetry, and 500 kHz side scan sonar surveys were made on each site, supplemented by sediment grab samples and bottom still photographs. Burst sampled current meter data were collected 50 cm above the seabed, and coincident wave and meteorological data were compiled for the interpretation of results. This volume describes the radio-isotope experiment and the geological setting for each site, together with background wave, current, and wind conditions. Certain sediment transport rates and the connections with storms are established.

Field monitoring of aeolian vibration of a wood pole transmission line with alloy conductor

by A. Haldar, C.J. Pon and J. Torok Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, 1992 21 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06253 1 fiche

Aeolian vibration is a forced vibration phenomena caused by low velocity winds blowing across a conductor under tension, with resonant vibration caused by small eddy forces synchronized with the cable's natural frequency Ontario Hydro live line recorders are used by Newfoundland and Labrador Hydro in the measurement of aeolian vibration activity on two sections of a 138 kilovolt wood pole transmission line. The line is located on the Burin Peninsula of Newfoundland, and during construction suffered from unexpectedly high vibration of phase conductors. Design criteria for the line, test sites and test set-up, test method, and test results and analysis are described Sources of measurement error and assumptions are discussed.

Field QA/QC protocols for monitoring and predicting impacts of acid rock drainage

contracted to Norecol Environmental Consultants Ltd. Victoria : British Columbia Acid Mine Drainage Task Force, 1992. xii, 75 p. Bibliogr.
MICROLOG 93-05002 1 fiche

In recent years there has been a growing emphasis on quality assurance/quality control protocols (QA/QC) for environmental monitoring programs. Although the elements of QA/QC programs for laboratory analysis are reasonably well defined, there has been less emphasis on defining QA/QC protocols for field programs. This review focuses on components of programs for predicting or detecting acid rock drainage (ARD) and its environmental effects. This document reviews the elements of field QA/QC programs for sampling surface groundwater, effluents, sediments, soils, tailings, and waste rock for chemical parameters related to ARD. It also reviews QA/QC programs for stream flow measurements and biological effects monitoring, including sampling populations of fish, benthic invertebrates, periphyton, zooplankton, and phytoplankton; metals in fish tissues; and the presence of *Thiobacillus*.

Final report of the Tree Bylaws Advisory Committee

Ontario. Tree Bylaws Advisory Committee. Toronto : The Committee, 1991. 22 p.
MICROLOG 93-05879 1 fiche

In recognition of the serious outstanding issues relating to tree cutting and destruction on private land in Ontario, the committee was established in September 1990. It was mandated to develop recommendations to address these issues through an examination of current legislation, of practices carried out in other jurisdictions, and of various policies or practices as alternatives to legislation. This final report provides background information on the value of trees and the shortcomings of the current legislation; definitions of the problems and issues; forest practice legislation in other jurisdictions; alternatives to legislation; and possible types of tree legislation.

MICROLOG 93-04397 6 fiche

Reports revenues, expenses, and changes in fund balance at all 43 Ontario universities for 1991-92, based on submissions prepared by each of the universities and the affiliates. Volume 1 covers the 21 universities and related institutions receiving grants directly from the Ontario government. Volume 2 deals with the 22 church-related colleges, universities, and seminaries financially supported by Ontario through the university with which they are affiliated. Volume 3 gives information on physical plant operating expenses at 16 universities. Volume 1 outlines university accounting procedures, principles of reporting, and definitions of funds and expenses. In volumes 1 and 2, for each institution, table 1 gives total revenues and expenses by fund before and after transfers, and opening and closing balances for the fiscal year; table 2 reports the institution's total revenue and additions by fund type and source; table 3 reports the institution's total expenses by type of fund and object of expense; table 4 shows, in further detail, the objects of expense by various functional areas; and table 5 itemizes the increases and decreases in the institution's appropriations. Volume 3 analyzes physical plant costs in relation to either academic or academic support activities of each university.

Finite element modelling of fracture mechanics parameters of industrial and laboratory specimens : final report

by W. Beres. Ottawa : Canada Centre for Mineral and Energy Technology, 1991. v, 69 p. : ill. Bibliogr. *CANMET contract: 23440-0-9212-01-SQ.*
MICROLOG 93-01546 1 fiche

The practical use of elastic-plastic mechanics (E-PFM) required the analytical evaluation of fracture parameters in the flawed structural components that are then compared to the fracture toughness of the material measured using standardized test methods. This study uses a nonlinear finite element method that predicts the elasto-plastic fracture mechanics of the crack-tip opening displacement, the crack-mouth opening displacement, and the load point displacement. The study investigates the E-PFM parameters for a three-point bend specimen and describes the critical engineering assessment of a flawed pressure vessel. Numerical modelling was performed using a two-dimensional plane-strain and plane-stress finite element method with nonlinear capabilities. Large strains and large deformations were accounted for by the updated Lagrangian procedure.

A First look at the 1991 census

Charlottetown : Dept. of Finance, Economics, Statistics and Fiscal Analysis Division, 1992. 20 p. : ill., maps. (Economic trends ; no. 46) *CSI 62146.201.*
MICROLOG 93-00015 1 fiche

The first statistics available from the 1991 Census were population and dwelling counts which were released on April 28, 1992 by Statistics Canada. The official population count shows that there were 129,765 individuals residing on Prince Edward Island on June 4, 1991. This is an increase of 3,119 persons from the 1986 Census. This document provides a brief overview of the first Census results as they pertain to Canada, the Atlantic Region, the Province as well as the various regions of Prince Edward Island.

Fiscal policy in Canada : the changing role of the federal and provincial governments -- Rev.

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1992. 15 p. :

ill. Bibliogr. (Current issue review ; 91-2E) *French ed. (La Politique budgétaire au Canada...) on the same fiche. Revised 13 February, 1992.* ISBN 0-660-14648-7
MICROLOG 93-00822 1 fiche

Economic policy is increasingly being conducted by provincial governments. While monetary policy is exclusively in the federal domain, fiscal policy is a shared responsibility. The focus tends to be on federal taxes, spending and deficits, but those of the provinces in aggregate are just as important. Also, the federal government supplies a significant amount of the financial resources of the provincial governments, and in the latest budgets has attempted to control its own spending by limiting such transfers. This paper examines some of the prominent trends in provincial and federal fiscal policy since 1975 in order to provide a background against which total fiscal policy and future federal budgets can be evaluated.

Fish community and environmental effects on lake trout

Ontario. Ministry of Natural Resources. Lake Trout Synthesis. Community Biology Working Group. Toronto : The Ministry, 1990. iii, 47 p. : ill. Bibliogr.
MICROLOG 93-01596 1 fiche

The presence of a particular fish assemblage is related to a number of different factors, including natural and human-induced patterns of colonization and extinction, the environmental conditions present, and the physiological attributes of the fish species. To determine whether physico-chemical characteristics differed among fish community types, data was obtained from the aquatic habitat inventory data base (AHIDB), representing about 75 percent of the lake trout lakes in Ontario. Fish community types represented by 10 or more lakes were included in the analysis. In addition to the AHIDB, an angling data set was compiled to examine whether differences in lake trout yields could be detected among fish community types. This data set consisted of angler catch and effort data collected from 143 lakes across the province, most in south-central Ontario. Each lake had experienced a number of years of moderate to intense fishing pressure.

This study was begun in 1989 to address the need for information on the status of Arctic cisco in habitats located east of the Mackenzie River. The study determined whether major rearing/overwintering of juvenile Arctic cisco from the Mackenzie River occurs east of the Mackenzie Delta; identified specific areas to the east of the Mackenzie Delta that may be critical to the maintenance of Mackenzie River stocks; and quantified the significance of such eastern locations to Mackenzie River populations. This report summarizes results obtained in 1990, the second year of study, when monitoring was conducted to describe the coastal migrations in Wood Bay near the mouth of the Anderson River. The study also involves least cisco, broad whitefish, lake whitefish, and inconnu.

Five year growth response in drained and fertilized black spruce peatlands, II : stem analysis

by E. Sundstrom and J.K. Jeglum. Sault Ste. Marie, Ont. : Forestry Canada, Great Lakes Forestry Centre ; Timmins, Ont. : Ministry of Natural Resources, Northeast Science and Technology Unit, 1992. 13 p. : ill. Bibliogr. (Information report ; O-X-420) (NEST technical report ; TR-03) ISSN 0832-7122 ISBN 0-662-19426-8
MICROLOG 93-01646 1 fiche

A number of studies, particularly from the Fenno-Scandinavian countries, have reported improved forest growth following drainage, although it takes from three to seven years for trees in those countries to adjust and respond to the new conditions. A study was conducted of five year growth response to drainage in permanent growth plots at the Wally Creek Drainage Area in Northern Ontario. A destructive sample of the trees was taken so that a stem analysis could be performed, the results of which are the basis for this report. The study determined when the drainage response occurred, the influence of tree size, age and crown size on the response, and whether the growth response was different at different heights on the stem.

Fixtures and the Personal Property Security Act : interim report

Vancouver, B.C. : Ministry of Attorney General, Law Reform Commission of British Columbia, 1993. 54 p. (Report ; LRC 130) *Cover title: Report on fixtures and the Personal Property Security Act.* ISSN 0843-6053 ISBN 0-7718-9345-0
MICROLOG 93-04731 1 fiche

This report brings forward recommendations on a particular portion of a larger project referred to the Law Reform Commission early in 1992. It is broadly directed at the interface between the Personal Property Security Act and real property law, but it also identifies the treatment of fixtures under the Personal Property Security Act as a matter which called for particular attention. It concludes that the general approach to fixtures taken by the Personal Property Security Act is satisfactory and the focus of any law reform measures should be to clarify the operation of the Act where that appears to be necessary.

Fluorescence properties of alginite-rich oil shales from the Stellarton Basin, Canada

by W.D. Kalkreuth...et al. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1990. 6 p. : ill. Bibliogr. (Contribution series ; 90-010) *In* Fuel : *vol. 69, 1990*
MICROLOG 93-06720 1 fiche

The Late Carboniferous Stellarton Formation is a 2600 m thick coal and oil shale bearing succession confined to the 6 by 20 km Stellarton Basin of Nova Scotia. The formation includes at least 60 laterally continuous oil shale units which are 1-45 m thick. A boghead shale (stellarite) sequence was characterized using macroscopic and microscopic fluorescence properties of the organic material and by Rock-Eval analysis techniques to determine the nature of the organic matter and the quality of the oil shale intervals sampled. The analyses and results are discussed.

Foaming properties of dairy cream

by M. Britten and H. Giroux. St. Hyacinthe, Que. : Food Research and Development Centre, 1992. 30 p. : ill. Bibliogr. (Publitech ; technical bulletin no 1-A) *French ed. (Les Propriétés foisonnantes...) : 93-07661/1.* ISBN 0-662-20315-1
MICROLOG 93-07660 1 fiche

Whipped dairy cream has remarkable organoleptic qualities. However, the consumption of cream declines steadily, which forces the industry to revise the definition of this traditional product. Longer shelf life, lower fat content and quality standarization are the main requirements which will henceforth govern the evolution of dairy creams. This paper reviews the impact of process and composition variables on the quality of this product. The characteristics of dairy cream are identified and described. The report also presents techniques developed at the Food Research and Development Centre which permit an objective assessment of cream quality.

A Food demand system for Canada

by G. Moschini and D. Moro. Ottawa : Agriculture Canada, Policy Branch, 1993. v, 121 p. : ill. Bibliogr. (Technical report ; 1/93)
MICROLOG 93-08281 2 fiche

The purpose of this report is to detail the theoretical specification, data, estimation procedures, and results of a full system of demand equations for Canada that emphasizes food consumption. The report is organized as follows. First, it reviews briefly the theory of consumer demand, discusses the restrictions implied by this theory, and relates it to market demand functions. Next it presents the demand model that will be used in this study, the Almost Ideal Demand System (ALIDS). This is followed by an analysis of alternative separability assumptions that are used to lessen the degrees of freedom problem arising in specifying a large demand system. The econometric estimation techniques used are then described.

Food for the poor : role of CIDA in agricultural, fisheries and rural development

by S. Thomson. Ottawa : Science Council of Canada, 1980. 194 p. : ill. Bibliogr. (Discussion paper ; 80/1) ISBN 0-662-10984-8
MICROLOG 93-04904 3 fiche

This report describes the Canadian International Development Agency's (CIDA) Strategy for International Development from 1975-80 and its major priorities, then examines major CIDA policies as they relate to basic needs, self-reliance, and ecodevelopment. A survey of some of those involved in CIDA's overseas projects and programs was conducted to evaluate their training and experience, orientation, workload, and responsibilities. The nature of projects supported by CIDA's Bilateral Branch, including their delivery system, is discussed, and an assessment given of their impact on, and value to, the very poor of developing countries. An inventory of the project executing agents used and an assessment of their strengths and limitations in furthering the needs of the least privileged is given and several case studies in which Canadian science and technology have contributed to institution-building or grassroots development in the Third World is presented. The report then examines CIDA's overall structure for planning, policy-making and decision-making, and the consideration of alternative structures for facilitating aid to the poorest.

Foraging behaviour of forest birds of the dry interior Douglas-fir, ponderosa pine forests of British Columbia

by K.H. Morgan, J.-P.L. Savard and S.P. Wetmore. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1991. iv, 40 p. Bibliogr. (Technical report series ; no. 149) ISSN 0831-6481 ISBN 0-662-19506-X
MICROLOG 93-01764 1 fiche

Few Canadian studies examining the relationships between forest structure and bird population dynamics and/or foraging behaviour have been published. In 1983, a study was begun in the dry interior of British Columbia investigating the relationships between forest structure, logging techniques and bird communities. Concurrent with that investigation was a study of the foraging behaviour of the most abundant breeding species to characterize the feeding methods of each bird species in multidimensional space, to compare the foraging use of quantifiable habitat variables with their availabilities, to identify species that showed the highest degree of foraging similarity, and to examine the influence of logging activities on niche overlap and foraging behaviour. This report summarizes and interprets the results of the behavioral study.

Forecast electricity demand in Quebec : development plan 1993 : proposal

Montreal : Hydro-Quebec, 1992. 173 p. : ill. (Annexes ; 6) ISBN 2-550-26753-2
MICROLOG 93-07972 2 fiche

This document presents the assumptions and results of the forecast for electricity demand within Quebec. The report is divided into six sections. Section 1 outlines the demographic, economic and energy contexts on which the demand scenarios for Quebec are based. These demand scenarios, presented in Section 2, do not reflect the impact of the strategic orientations proposed by the utility. Their impacts are evaluated in Section 3 and the results are then integrated into the scenarios presented in the previous section. In Section 4, a comparison is made between the current forecast results with those of the 1990-1992 Plan. Section 5 is devoted to the energy mix in Quebec and a comparison of Quebec's energy consumption with that of other countries and regions. Finally, Section 6 contains detailed tables showing the main historical and forecast data discussed previously.

Foreign investment in Canada : measurement and definitions

by D. Swimmer and W.E. Krause. Ottawa : Investment Canada, 1992. vi, 52 p. : ill. (Working paper ; no. 12) *French ed. (L'Investissement étranger au Canada...) : 93-02500/1. CSI 22301.204.*
MICROLOG 93-02499 1 fiche

This paper describes systematically the statistics related to foreign investment. It explains the objectives of each statistical program, highlighting similarities and distinctions between the programs. It also lists specific data items, their method of measurement, and any significant qualifiers. In addition, it provides the conceptual framework and definitions explicitly used, or assumed, by each statistical program. Specifically, it provides a comprehensive understanding of the measurement of foreign investment data and the practical limitations inherent in the data.

Foreign investment protection agreements : a Canadian perspective

by E.M. Power. Ottawa : Investment Canada, 1993. i, 34, 38 p. (Working paper ; no. 14) *Bilingual (Les Accords sur la protection...).*
MICROLOG 93-07560 1 fiche

Foreign investment protection agreements (FIPAs) have become increasingly popular for the promotion and protection of international investment. FIPAs are designed to protect the interests of investors of one signatory in the territory of the other signatory to the agreement. They are one of the current legal mechanisms underpinning international trade and investment. This paper seeks to provide an overview of the purpose and structure of FIPAs and it also examines the various elements included in the Canadian model FIPA as well as the variations of this model negotiated to date. Finally, the model FIPA is compared with the investment provisions of the North American Free Trade Agreement (NAFTA).

Foreign policy themes and priorities : 1991-92 update

Ottawa : External Affairs and International Trade Canada, Policy Planning, 1991. 21 p. *French ed. (Thèmes et priorités de la...) : 93-02152/1.*
MICROLOG 93-00266 1 fiche

Canada's foreign policy is driven by the need to protect and promote Canadian interests and values abroad. This document discusses the essence of Canadian foreign policy. It looks at major trends such as the changing power constellation, an emerging commitment to common values, the new global economy, and a world without borders. It also discusses foreign policy directions for the coming years including strengthening cooperative security, creating prosperity on a sustainable basis, and securing democracy and respect for human values. Finally it addresses the issue of managing interdependence and identifies key priorities

Forest growth and yield in British Columbia

Victoria : Forest Productivity Councils of British Columbia, 1993. 10 p. *On cover: Vision, meeting information needs for future forest planning.*
MICROLOG 93-06999 1 fiche

This document outlines a five-year strategic plan developed by British Columbia's Forest Productivity Councils. The document describes the challenges and actions for each of the objectives of the strategy, including coordinating and improving liaison and technical transfer of measurement data, scientific concepts, and operational procedures; establishing and maintaining permanent sample plots and research installations to determine growth rates and to measure the long term response to silvicultural treatments; evaluating and quantifying the productivity of forests and forest lands; quantifying the risks and losses in forest stands due to insects, diseases, animals, and other natural causes; and developing, evaluating, and recommending forest growth project systems that can portray the growth, yield, and quality of the tree species in B.C.

Forest health surveys in British Columbia : a review of sampling methodology for ground surveys

by A.F.L. Nemec. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development: FRDA II, 1992. vi, 24 p. Bibliogr. (FRDA report ; 200) ISSN 0835-0752 ISBN 0-7726-1719-8
MICROLOG 93-06973 1 fiche

Forest health surveys are used to gather data on the pests that threaten the productivity of the forests. This report reviews the methods currently used by both the British Columbia Ministry of Forests and Forestry Canada. Attention is restricted to ground surveys, with emphasis on such statistical issues as sampling units, the number and placement of the sampling units, and estimation of prevalence and other parameters of interest. In reviewing the methods, the main points considered were survey objectives, sampling design, data collected, data analysis, and summary of results. The review is based on information provided by the six forest regions, a review of the FIDS manual, silviculture and cruising manuals, and information supplied by government experts.

Forest land ownership : background papers

Victoria : Forest Resources Commission, 1992. 81 p. Bibliogr.
MICROLOG 93-00516 2 fiche

Report on the amount of agricultural leased land and former leased land that would provide a higher economic return in growing timber rather than agricultural crops. Parcels of land so leased were identified in the Cariboo, Skeena, Omineca, and Peace River regions through the B.C. Lands data base. After consolidation, there were 713 files that were then sorted by region. A random sample was drawn for each region and an estimate made of the available land for forest production. An extrapolation was made from the sample to the annual alienation to provide the desired estimate.

Forest management agreements : five-year review, 1986-91

Toronto : Ministry of Natural Resources, 1992. xi, 131 p. : ill. *French ed. (Ententes de gestion forestière...) : 93-03946/2. CSI 55116.013.* ISSN 0838-3286
MICROLOG 93-03947 2 fiche

Forest management agreements (FMAs) came into being in Ontario through an amendment to the Crown Timber Act in 1979. The agreements cover a specific section of Crown land and replace existing licensing arrangements with an Agreement which requires the companies to manage the forests on a sustained-yield basis, including responsibility for harvesting, planning, regeneration and other silvicultural activities necessary for proper forest management, including construction of access roads. The agreements are for 20 years but every 5 years the Minister must evaluate how the company has carried out its obligations. These detailed evaluations cover procedures and findings, maintenance of productivity, implementation of previous recommendations, company activities conducted beyond the obligations under the Agreement, stakeholders concerns, and conclusions and recommendations.

Forest Management Decision Support Systems : strategic plan, 1992-97

Chalk River, Ont. : Petawawa National Forestry Institute, 1992. 14, 17 p. *Bilingual (Systèmes d'aide à la décision en...).*
MICROLOG 93-08523 1 fiche

Decision Support Systems is the term used to describe computer information systems that present large amounts of data and knowledge in ways useful to assist the decision maker or planner. A plan of forest management must evaluate the sustainability of timber harvest, habitat availability, employment, recreation, and even spiritual values over long periods of time. This document describes the Forest Management Decision Support Systems Initiative with background information. It then covers the strategic direction to 1997, program implementation philosophy, and the workplan for the coming year with its 7 elements.

MICROLOG 93-02503 1 fiche

This report reviews the status of forest insects and diseases in the Maritimes Region in 1988 and forecasts conditions for 1989 when appropriate. Economically important pests of current concern are discussed in some detail and other organisms are listed in tabular form. A separate chapter discusses the various special involvements with related activities, such as the use of pheromones as survey tools and the Acid Rain National Early Warning System. A list of forest pest related publications and reports is included.

Forest pest conditions in the Maritimes in 1991

by L.P. Magasi. Fredericton : Forestry Canada - Maritimes Region, 1992. 58 p. : ill., maps. Bibliogr. (Information report ; M-X-181E) *French ed. (Les Ravageurs forestiers...) : 93-00389/1. CSI 22273.013.* ISSN 0834-406X ISBN 0-662-19521-3
MICROLOG 93-00390 1 fiche

This report reviews the status of forest insects and diseases in the Maritimes region in 1991 and forecasts conditions for 1992, when appropriate. Pests and problems of conifers, hardwoods, and high-value areas, such as nurseries, seed orchards, plantations, and Christmas tree areas, are described as observed in 1991. Control operations against spruce budworm, hemlock looper, and Sirococcus shoot blight are summarized. A section on forest health monitoring brings together the various aspects of work dealing with changes in forest conditions, some of which are still unexplained. Forest insect monitoring systems, pheromones, and light traps are briefly described. A list of reports and publications relating to forest pest conditions is included.

Forest tree genetic conservation activities in Canada

by T.J.B. Boyle. Ottawa : Forestry Canada, Science and Sustainable Development Directorate, 1992. 50, iv, 49 p. Bibliogr. (Information report ; ST-X-4) *Bilingual (Activités de conservation...).* ISSN 0705-324X ISBN 0-662-59213-1
MICROLOG 93-01428 2 fiche

Questionnaires were sent to 50 forestry representatives of federal, provincial and territorial governments, industry, and universities across Canada asking for information on genetic/ecological conservation areas, reserved stands, seed production areas, seed orchards, clonal archives, provenance tests, seed and other methods of conservation activity. Information on national parks, wilderness areas, ecological reserves and other in situ conservation activities outside the jurisdiction of forest services was obtained from published sources. Thirty-nine responses, representing 29 agencies, were received. This report summarizes the results of the survey.

Form and availability of inorganic phosphorus in suspended particulates of the Trent-Severn Waterway, Ontario

by P.G. Manning and K.J. Gracey. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 24 p. : ill. Bibliogr. (NWRI contribution ; 91-21)
MICROLOG 93-07479 1 fiche

Most of the bioavailable phosphorus in lake sediment and riverine suspended particulates is contained within the nonapatite inorganic phosphorus (NAIP) fraction. It is proposed that NAIP is transported by the Trent River to the Bay of Quinte as a clay-iron oxide-phophate assemblage. Deposition of NAIP to the oxygen-deficient bottom sediments leads to major releases of available phosphorus thus controlling eutrophication. Correlations between concentrations of ferrous ions, ferric ions, aluminum and phosphorus in suspended particulates collected from several stations in the Trent-Severn Waterway are reported.

Formance evaluation of cellulose fibre loose fill thermal insulation CFLFTI : report

to the Ministry of Housing, Technical Support Services Branch ; by Burka Architects Inc., and E. Alan Maguire ; submitted to the Housing Operations Division. Downsview, Ont. : The Corporation, 1991. 50 p. : ill.
MICROLOG 93-06330 1 fiche

The manufacture and installation of cellulose fibre loose fill thermal insulation (CFLFTI) has been done in practice in the Province of Ontario for the past 40 years. Over the years, the design/test criteria for CFLFTI manufacture has become more rigorous, leading to a reduction in the number of manufacturers. This study documents the results of the quantity of work by observing a cross section of representative installations. The study evaluates the products of Climatizer Wall Insulation, Thermo Cell Insulation, and Thermo Comfort Co. Ltd., giving technical data, installation reviews, and other related material.

La Formation des experts pour l'analyse sensorielle de la texture : vocabulaire et méthodologie pour l'Amérique du Nord

par J. Fortin et N. Durand. Saint-Hyacinthe, Québec : Centre de recherches et de développement sur les aliments, 1992. 42 p. Bibliogr. (Publitech ; bulletin technique no 2-F) ISBN 0-662-97762-9
MICROLOG 93-07663 1 fiche

L'objectif de l'évaluation sensorielle est de quantifier l'intensité et la forme d'un stimulus en se servant des sens comme d'instruments de mesure. Les sens perçoivent les propriétés de l'aliment examiné; ensuite, cette perception est comparée à des éléments de référence qui sont connus et mémorisés. Ce document décrit une méthode permettant de former des dégustateurs à l'analyse de la texture des aliments. Un vocabulaire standardisé en français et adapté à l'environnement nord-américain, ainsi que des exercices, permettront aux dégustateurs de traduire leurs perceptions dans un langage utile à la recherche et au développement.

Formation et mobilité

Ottawa : Secrétariat d'Etat du Canada, Fonction publique 2000, Groupe de travail sur le perfectionnement professionnel, 1990. 48 p. *L'éd. anglaise (Training and mobility) sur la même fiche.*
MICROLOG 93-06263 2 fiche

Le groupe de travail sur le perfectionnement professionnel est l'un des huit groupes de travail ministériels mis sur pieds par le sous-secrétaire d'Etat dans le cadre de Fonction publique 2000. Lors de la constitution du groupe de travail, une attention particulière a été apportée à sa représentativité. Tous les groupes d'équité en matière d'emploi, les groupes d'emploi, les secteurs et les régions étaient représentés. Toutefois, le groupe des anglophones et celui du personnel de soutien étaient sous-représentés par rapport à leur présence dans le ministère. Les membres du groupe de travail ont opté pour une seule séance de travail intense qui s'est étendue sur deux jours afin de permettre d'approfondir la matière au maximum et de favoriser des échanges directs entre les participants. Une cinquantaine des 70 membres du groupe de travail ont participé à la séance, dont 14 des Opérations régionales. Les 18 propositions qui apparaissent dans ce document sont le fruit des discussions et du travail consciencieux des participants durant ces deux jours.

Formative evaluation of school-based staff development : focused interviews in pilot schools

by P. Lipman and L. Earl. Scarborough, Ont. : Scarborough Board of Education, Program Dept., Research Centre, 1991. i, 24 p. (Research report ; no. 90/91-32) *ONTERIS: ON06028.*
MICROLOG 93-02034 1 fiche

The pilot project began in the 1990-92 school year with 8 elementary and 4 secondary schools. The pilot schools submitted proposals and budgets based on criteria in the 'White paper on school-based staff development' (1990). Secondary schools received an average of $4500 per school and the elementary schools received approximately $2000. The schools independently ran their own projects in accordance with school needs. In May and June 1991, researchers visited the pilot schools and interviewed the principal and the staff members who had been most heavily involved with the project. Questions covered the project's relationship to curriculum management plan or implementation project; benefits of school-based staff development; obstacles to success; school-based staff development activities; human and material resources; and preparations for 1991-92.

Forms of iron, phosphorus and sulphur in the sediments of the eutrophic Bay of Quinte, Lake Ontario

by P.G. Manning, K.J. Gracey and N.S. Harper. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1990. 39 p. : ill. Bibliogr. (NWRI contribution ; 90-06)
MICROLOG 93-07464 1 fiche

A knowledge of the forms and concentrations or iron, phosphorus and sulfur is important to an understanding of phosphorus regeneration in eutrophic systems. The forms of these elements are determined in sections of a sediment core retrieved from Adolphus Reach and from within an estimated 100 m of Warick's station in the Bay of Quinte. This report aims to: relate the improved resolution of forms of iron, phosphorus and sulfur in the bottom sediments to cultural development; and determine the depth of the active sediment layer and the pool of available phosphorus.

A FORTRAN77 program for the analysis of line broadening of X-ray diffraction peaks

by J.E. Elder and D. Oad. Toronto : Ontario Hydro, Research Division, 1992. i, 40 p. : ill. Bibliogr. (Report ; no. 91-314-K)
MICROLOG 93-02895 1 fiche

A FORTRAN77 program for calculating the dislocation density from the broadening of X-ray diffraction peaks measured from a specimen and standard was improved and altered to run on an 80386 MS-DOS based personal computer. The program models the intensity profiles as Fourier series and then extracts values for the lattice strain in the material from the calculated Fourier coefficients. The dislocation density of the specimen is obtained directly from the value for the lattice strain. This program may be used to measure lattice strain, crystallite size, lattice parameters and dislocation densities in CANDU pressure tubes. A review of the program and the theory of the analysis is presented in this report.

Fostering teacher-teacher communication : a principal's strategy for improving student outcomes

by J.B. Cousins and J.A. Ross. Toronto : Ontario Institute for Studies in Education, 1990. iii, 179 p. *ONTERIS: ON06055*
MICROLOG 93-02040 2 fiche

The 3 main objectives were to investigate to what extent principals foster student-teacher

interaction within their schools regarding specific curriculum innovations; whether principals' efforts to stimulate student-teacher interactions affect teachers' actions in the classrooms and, ultimately, student outcomes; and to what extent innovation-specific teacher-teacher interaction depends on the culture of the school. Data was collected in 40 schools from principals, librarians, and grade 5 teachers and students, and included achievement tests, activity records, questionnaires and interviews. A copy of instruments, materials and coding procedures is included

Fouilles à Yuquot, vol. 1 : archéologie indigène de Yuquot, village extérieur nootkan

William J. Folan et John Dewhirst, compilateurs des résultats des fouilles. Ottawa : Parcs Canada, Direction des lieux et des parcs historiques nationaux, 1980. 409 p. : ill. Bibliogr. (Histoire et archéologie ; 39) *L'éd. anglaise (The Yuquot project, volume 1...)* . *88-04062/4.* ISSN 0227-3551 ISBN 0-660-90458-6
MICROLOG 93-04012 5 fiche

Ce rapport décrit les contextes géographique et archéologique de Yuquot (Colombie-Britannique) et présente une analyse des artefacts indigènes recueillis à cet endroit. Le document porte surtout sur le site, les contextes stratigraphiques, la datation au carbone radioactif et les vestiges, l'analyse des artefacts, les techniques de fabrication et les outils de base, la pêche à la ligne, la pêche au harpon, à la foène et à d'autres engins, la chasse à l'arc et au harpon, les ornements personnels et du cérémonialisme, et la continuité et les changements culturels.

Fouilles archéologiques au lieu historique national du Fort-Lennox

par G. Piédalue. Ottawa : Environnement Canada, Service des parcs, 1992. 6 p. : ill. Bibliogr. (Bulletin de recherches ; no 299) *L'éd. anglaise (Archaeological excavation at Fort...) sur la même fiche.* ISSN 1184-7174
MICROLOG 93-02155 1 fiche

Des recherches concernant le patrimoine archéologique de l'île aux Noix ont eu lieu de façon intermittente depuis une trentaine d'années. Cependant, très peu d'interventions ont porté jusqu'à présent sur le fort Lennox dont les éléments principaux, remparts et bâtiments, sont toujours debout. Ce n'est que depuis 1989, suivant la mise sur pied d'un programme de stabilisation, que ces composantes font l'objet de fouilles plus intensives. Ce document présente la première phase de cette recherche et porte principalement sur l'emplacement des magasins nord et sud.

MICROLOG 93-03471 3 fiche

Issue du projet d'établissement d'un centre d'interprétation historique au parc Cartier-Brébeuf à Québec, cette étude a d'abord été présentée en quatre rapports distincts qui sont ici refondus en un seul travail, chacun des rapports en constituant un chapitre. Une première partie portait sur la vie et l'oeuvre de Jacques Cartier. Le second chapitre fut consacré à l'étude approfondie du deuxième voyage de Cartier avec insistance sur le premier hivernement connu d'Européens en sol canadien. Le troisième chapitre faisait état des relations franco-indiennes au cours des trois voyages du pilote malouin et des questions qui en découlent. Enfin, le dernier chapitre avait pour objet de montrer l'influence de l'oeuvre de Cartier dans la seconde moitié du XVIe siècle, soit jusqu'à l'expédition de Champlain. Ce document se penche précisément sur la seconde partie, soit les fouilles au parc Cartier-Brébeuf (Québec), en 1959.

Fouilles de la redoute de droite et du blockhaus, fortifications britanniques sur l'île aux Noix, Québec

par R.T. Grange. Ottawa : Parcs Canada, Direction des lieux et des parcs historiques nationaux, 1982. 180 p. : ill. (Histoire et archéologie ; 36) *L'éd. anglaise (Excavation of the right...) : 88-04060/2.* ISSN 0227-3551 ISBN 0-660-90455-1
MICROLOG 93-03991 2 fiche

Ce rapport décrit les fouilles de 1965-1966 de la redoute de droite et du blockhaus du parc historique national du fort Lennox (Québec). Il est question d'autres vestiges structuraux du blockhaus et d'autres détails que la prospection des remparts de la redoute et des casemates a permis de découvrir. Les détails archéologiques sont mis en corrélation avec les plans historiques et les dessins en élévation de la redoute. On y trouve la description des artefacts, la plupart provenant des débris de la période plus récente du chantier naval (1813-1834), et on les utilise pour confirmer la datation de la redoute et du blockhaus. Le rapport fournit des données pour des études comparatives et peut aussi servir de base à la planification de fouilles futures.

Fractal characteristics of ice

by A.B. Cammaert and G.B. Crocker. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 15 p. : ill. Bibliogr. (C-CORE publication ; no. 91-26) *Presented at the International Conference on Port and Ocean Engineering under Arctic Conditions.*
MICROLOG 93-06008 1 fiche (Available on fiche only)

Recent studies have suggested that fractal theory can be used to predict the size effect in the pressure/area relation for ice forces on vertical structures. This theory is based on a link between the fracture of a single fragment, and an observed fracture size distribution for the material. Although there is ample evidence in the literature that a wide range of broken and crushed materials exhibit fractal characteristics, there is insufficient data to confirm that ice behaves in a similar manner. To provide a representative indicator of fractal behaviour, a series of laboratory tests were carried out in which fresh water and sea ice samples were crushed, and the resulting particle size distributions measured. In addition, and on a larger scale, the size distributions of ice floes for various geographic regions were studied, as well as the size distribution of icebergs on the Grand Banks.

Fractional horsepower motor efficiency test standard development

by S.R. McKay. Toronto : Ontario Hydro, Research Division, 1992. x, 104 p. : ill. Bibliogr. (Report ; no. 92-152-K)
MICROLOG 93-04382 2 fiche

Fractional horsepower motors used in applications such as furnace fan blowers often have efficiencies of 50 percent or less. In Canada, there is no recognized standard for measurement of efficiency for these motors. Without such a standard, little can be done to improve efficiencies even though manufacturers are capable of producing induction motors with efficiencies greater than 75 percent. A draft performance test standard was developed for submission to the Canadian Standards Association for consideration on the subject of single and three-phase ac induction fractional hp motors. This test method resulted from a review of existing standards, a survey of stakeholders including motor manufacturers, utilities and government agencies, and confirmation of the test method at two laboratories

Fracture properties of the selected steels used for transmission line hardware components

by G.S. Bhuyan and D.H. Carter. Montreal : Canadian Electrical Association, Transmission Section, Line Hardware Subsection, 1993. 22 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05179 1 fiche

The use of fracture mechanics has been demonstrated to be useful for the design, quality control, and specification procedures of transmission line hardware components. The methodology requires knowledge of the material fracture toughness property. This paper presents the fracture properties of the selected ferrous materials used in line hardware components. The effects of loading rate and test temperature on the impact energies and fracture toughness of 350 WT, 300 WT, 300 W, oil-quenched 1541, 4130, 4140, and Dywidag materials were investigated. Effects of marquenching and forging on the fracture properties of the 1541 steel are quantified; effects of heat treatment and tempering temperature on the fracture behaviour of 4140 steel bar are investigated; and effects of cold bending and galvanizing on the fracture properties of 350 WT plate are demonstrated.

Fracture toughness properties of cast aluminum alloys for line hardware

by L.N. Pussegoda...et al. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, Line Hardware Subsection, 1992. 19 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06255 1 fiche

Mechanical tests were performed on A356, 535 and a near eutetic Al-12% Si aluminum alloys. These alloys are commonly used or are considered as candidate materials for manufacture of power transmission line hardware components. Their tensile, Charpy impact and fracture toughness properties are presented. The database developed in this program was used to establish correlations between their fracture toughness and conventional indicators of toughness (notch yield ratio, impact energy and tensile elongation) that could be used for quality assurance purposes. Experimental methods and results, analysis of results including tensile properties, fracture toughness properties, effect of cooling rate on mechanical properties, and analysis of results from argon-purged castings are discussed.

A Framework to improve the effectiveness of aquatic environmental impact assessment

Reid, Crowther & Partners. Hull, Que. : Canadian Environmental Assessment Research Council, 1986. vii, 160 p. Bibliogr. (Manuscript report ; MR11-86)
MICROLOG 93-05361 2 fiche

This study illustrated the benefits of the conceptual framework for aquatic contaminant impact assessment for improving impact assessment methods, resource management capabilities, and the scientific quality of aquatic contamination studies. A conceptual framework being developed by Dr. Lars Hakanson of the National Swedish Environmental Protection Board was described and used as a template for assessing a typical Canadian contaminant study and identifying areas for improvements. Data from 14 Canadian contaminant studies were reviewed and assessed for applicability to the development of contamination factors, ecological risk indices, and diagnostic/prognostic models for metal accumulation in fish tissue. Areas for improvement in study design, sampling methodology, and data analysis to aid resource management and impact prediction were identified.

Freezing of backfilled stopes in permafrost : natural potential in Canadian mining areas

by G. Knight. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. i, 10 p. Bibliogr. (Report ; MRL 92-057(R))
MICROLOG 93-00503 1 fiche

Backfill placed in stopes after extraction of ore in mines is used to support the adjacent rock. If strong support is required, the backfill is strengthened with cement so that the free face will be self supporting while exposed in the next stage of mining. In cold mines, it is possible to use ice as the cement. This report applies the computer models for heat transfer developed previously (Knight 1989, 1991a) to determine the potential for freezing backfill in Canada. The temperature data preparation program was modified to calculate the maximum amount of ice that can be formed in each month from above ground hourly reading dry bulb temperatures. Results are given for selected weather stations across Northern Canada.

Freezing of backfilled stopes in permafrost, maximum rate : thin films and continuous feed

by G. Knight. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. i, 14 p. : ill. Bibliogr. (Report ; MRL 92-043(TR))
MICROLOG 93-08312 1 fiche

Backfill placed in stopes after extraction of ore in mines is used to support the adjacent rock. If strong support is required the backfill is strengthened with cement so the free face will be self supporting while exposed in the next stage of mining. In cold mines, it is possible to use ice as the cement. This report applies the computer models for heat transfer developed by Knight (1991a) to practical mining situations in a thick, longitudinally extensive ore body, and extends the studies on stope freezing. The model was run with three materials and thermal properties selected to represent the extreme range of possible fluid water-tailings backfill suspensions. The first two materials were assumed to expand with the water to ice phase change and in the third it was assumed that the phase change expansion took place within the pores of the particles.

French immersion today

Toronto : Canadian Education Association, 1992. 32 p. (CEA information note)
MICROLOG 93-01346 1 fiche (Available on fiche only)

French immersion is a proven successful Canadian approach to language learning. The Canadian Education Association sent out a questionnaire to 184 school boards across Canada in March 1992. A total of 104 school boards responded, which represents a response rate of 57 percent. This document contains the survey results. It presents information on the reasons for an increase in immersion programs, reasons for declining enrolments, French services for French immersion students, gifted programs, entry levels, teaching French immersion, improving the French program, and parents and French immersion.

French-Language Fund : development and production of learning materials

Toronto : Ministry of Education, 1991. 8, 8 p. *Bilingual (Fonds de langue française...). CSI 55108.017. ONTERIS: ON06007E.* ISSN 0710-3654
MICROLOG 93-01255 1 fiche

Deals with the French-Language Fund, which encourages the development and production of Canadian learning materials for students in French-language (French as a 1st language) elementary and secondary schools. Any print or audiovisual materials intended for student use (accompanied or not by teaching support materials) are eligible for funding, including activity books or kits that are grouped by theme and integrate more than 1 subject area, or that focus on 1 subject area but allow the integration of other disciplines. General information and budget presentation procedures are outlined for publishers and producers, nonprofit organizations, and individuals. All learning materials that conform to Ministry of Education curriculum guidelines are eligible for funding. Priority is given to the production of learning materials focusing on activities that help students develop thinking skills required for problem solving, and on career planning. The document includes a list of priorities for 1991 and a blank form for requesting financial assistance.

Fréquence de la pauvreté des familles qui vivent dans les réserves indiennes au Canada

par P.R. Oberle. Ottawa : Affaires indiennes du Nord Canada, 1993. iii, 17, iii, 17 p. Bibliogr. *Bilingue (The Incidence of family...). CSI 22479.204.* ISBN 0-662-98171-5
MICROLOG 93-06495 1 fiche

Le but de ce document est d'établir quelques statistiques de base sur la pauvreté afin de donner une image de la fréquence de la pauvreté des Indiens inscrits qui vivent dans les collectivités des réserves. On utilise les seuils de faible revenu (SFR) de Statistique Canada pour représenter le seuil de pauvreté dans les réserves et le degré de pauvreté est mesuré en comparant les SFR aux revenus de 1985 des familles indiennes vivant dans les réserves, données tirées du recensement de 1986. Les mesures de la pauvreté comme les SFR posent beaucoup de problèmes parce qu'ils sont basés uniquement sur le revenu. Appliquer les SFR dans les réserves pose des problèmes supplémentaires. Puisqu'on ne dispose pas d'autre mesure, ce document peut fournir un aperçu seulement de la situation de la pauvreté dans les réserves.

Freshness measurements on cod and redfish with the RT freshness grader

by E. Martinsdottir. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1993. 10 p. (Canadian translation of fisheries and aquatic sciences ; no. 5584) *Originally published in Icelandic, in Iceland.* ISSN 0704-3716
MICROLOG 93-02595 1 fiche

The RT freshness grader, a machine for grading of fish by freshness, is based on changes in electrical properties, conductivity and volume coefficients that occur after the fish is killed and shows signs of spoilage. This paper describes the results of investigations made to verify the freshness grader's ability to measure freshness of cod and redfish. The studies compare the age of fish kept on ice from the day of harvest with freshness measurements made with the RT freshness grader, physical appraisal and trimethylamine analysis.

From air pollution to acid rain : dilution and the myth of 'away'

by R. Patidwor. Hull, Que. : Canadian Environmental Assessment Research Council, 1987. 79 p. : ill. Bibliogr. (Manuscript report ; MR8-87)
MICROLOG 93-05351 1 fiche

This paper focuses on problem conceptualization in the environmental assessment process as a way of focusing on the wider cultural and historical context. The aim is to demonstrate that many of the failures in environmental policy can be attributed to the way in which the problems were conceptualized in their earliest stages. The major objective of the paper is to determine environmental quality criteria for the various contaminants and how policy-makers look to manage society's activities within the parameters specified. The paper uses air pollution, acid rain, and industrial waste as examples.

Fruit crops : estimated production costs : Ontario, 1992

by E.D. McKibbon. Toronto : Ministry of Agriculture and Food, Policy Analysis Branch, 1992. 62 p. (Economics information report ; no. 92-08) *CSI 56262.005.* ISSN 0708-482X
MICROLOG 93-07903 1 fiche

The information used in the preparation of each production cost estimate was prepared through the use of recent Policy Analysis Branch studies, plus consultation with producers, extension, research and agribusiness personnel. For each crop cost estimate in this report, the data was organized into variable and measurable fixed costs and totalled to arrive at the cost of production on a per acre basis. Variable costs are those which vary directly with the production of each crop grown. They include seed, plants, hired labour, fertilizer, herbicides, insecticides, fungicides, other materials, machinery operating costs, marketing charges and interest on operating capital. Fixed costs inputs are interest and depreciation on machinery, and other overhead cost items. Labour hours and costs, land charges, materials, tractors, machines and trucks, custom farmwork services, interest on operating capital, other overhead, other cost considerations, yields and returns, and gross margin analysis are included.

Fusion : power for the future?

by A. Nixon. Ottawa : Library of Parliament, Research Branch, 1992. 14 p. (Background paper ; BP-291E) *French ed. (La Fusion nucléaire : source...) on the same fiche.*
ISBN 0-660-14582-0
MICROLOG 93-01874 1 fiche

Compared to conventional nuclear power, fusion is very safe; fusion is also environmentally benign, since it emits no acid rain-forming or greenhouse gases; and it is relatively cheap and virtually unlimited. This explains why research programs on fusion power have been supported for so long, even though the reward, if it comes at all, is still far in the future. This document explains the basic principles of fusion. It discusses the technology involved, the international fusion program, the Canadian fusion program, and the future of fusion.
CA CI EN SC

La Fusion nucléaire : source d'énergie de l'avenir?

par A. Nixon. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992 17 p. (Etude générale ; BP-291F) *L'éd. anglaise (Fusion : power for the future?) sur la même fiche.* ISBN 0-660-93847-2
MICROLOG 93-01874 1 fiche

La fusion nucléaire est l'idéal que cherche à atteindre la communauté scientifique. Des scientifiques se consacrent déjà à sa conquête depuis environ quatre décennies et on ne voit pas encore quand ils parviendront à atteindre leur objectif. Cette étude se penche sur la fusion nucléaire en tant que source d'énergie de l'avenir. Elle examine particulièrement les points suivants: les principes de base; la technologie; le confinement; le chauffage; le combustible; la sûreté et les incidences sur l'environnement; le programme international de fusion; la collaboration internationale; le réacteur thermonucléaire expérimental international (ITER); le programme de fusion canadien; et, l'avenir de la fusion nucléaire.

MICROLOG 93-06659 1 fiche

Une des tâches de ce bulletin d'actualité consistait à établir une distinction entre un comportement anticoncurrentiel et éliminatoire et celui qui résulte d'une efficience et d'un rendement supérieurs en ce qui a trait à la concurrence. Ce document examine les diverses propositions de réforme que renferment les dispositions concernant les fusionnements et les monopoles de la Loi relative aux enquêtes sur les coalitions ainsi que l'application des modifications apportées par la Loi sur la concurrence de 1986 dans ces domaines.

The Future of settlement patterns and urban life in Canada : trends and future scenarios

by M. Hollinshead. Ottawa : Canada Mortgage and Housing Corportion, Centre for Future Studies in Housing and Living Environments, 1991. iv, 65 p. Bibliogr.
MICROLOG 93-03144 1 fiche

This document summarises long-term driving trends affecting the future of settlement patterns and the urban environment. The focus is on the future of communities as social entities. It looks at trends in the political economy, the world of technology, social interaction, ideas, nature, and the overlaps between the worlds of complexity and interdependence. It also looks at societal learning, community life, sustainability, the scientific revolutions of the 17th and 20th centuries, and the three industrial revolutions. Finally, it discusses alternative future scenarios for Canadian communities in 2021.

The Future of work : consultation report : summary of local consultations held on the future of work

Ottawa : Canadian Council on Social Development, 1989. 31 p. *French ed. (L'Avenir du travail...) on the same fiche. On cover: Work and income in the nineties.*
MICROLOG 93-05995 1 fiche (Available on fiche only)

The purpose of this document is to summarize the key issues raised at local consultations on the future of work held in the fall of 1988. The document is also intended to act as a springboard for planning the National Forum on the Future of Work, May 1-2, 1989. Document discusses the globalization of the economy, the changing job market, new approaches to work,

and education/training.

The Future of Work : national forum proceedings

National Forum on the Future of Work (1989 : Hull, Que.). Ottawa : Canadian Council of Social Development, 1989. iii, 62 p. *French ed. (L'Avenir du travail...) : 93-05990/1.*
MICROLOG 93-05991 1 fiche (Available on fiche only)

This report summarizes the proceedings of the Forum attended by 100 Canadians invited because of their expertise, their experience, and their stake in the future of work in Canada. It presents the discussion by participants on the meaning of work. It looks at the dimensions of the issues and proposals for change as they relate to globalization, the changing job market, new approaches to work, and education and training. Appendices list national forum participants and the national forum agenda.

The Future of work in Canada : selected policy options

by L. Osberg. Ottawa : Canadian Council on Social Development, 1988. v, 26 p. (Working paper ; no. 12) *French ed. (L'Avenir du travail...) on the same fiche. At head of title: Work and income in the nineties.*
MICROLOG 93-05989 1 fiche (Available on fiche only)

Forces shaping the future of work may well require Canada to develop new policy frameworks and make changes to existing macro- and micro-economic policies. This document presents policy issue questions and goes on to answer them in detail. Questions include: what can be done about unemployment in the 1990s? Will Canadians have the skills that the information economy of the 1990s will demand? What balance can we achieve between job security and labour market flexibility? Others are included.
CA LA

The Future of work in Canada : trends, issues and forces for change

Ottawa : Canadian Council on Social Development, 1988. v, 41 p. (Working paper ; no. 11) *At head of title: Work and income in the nineties, WIN.*
MICROLOG 93-03036 1 fiche (Available on fiche only)

This document looks at the long-run trend to changing patterns of male and female work, the shrinking relative importance of full-time, full-year employment, and the blurring of distinctions between the spheres of paid employment and of other work. It also discusses the impact of the 1981/83 recession, and its aftermath, on employment, underemployment, and unemployment, as well as the experience of some of the groups of Canadians most likely to experience labour market difficulties in the 1990s. Finally, it examines the uneasy relationship between work and reward in the modern welfare state, work and computer technology, and the competitive pressures of the global economy.

The Future responsibilities of our education system

Toronto : Ontario Public School Boards' Association, 1992. i, 24 p. (Consultation report ; no. IV) *ONTERIS: ON05963.*
MICROLOG 93-00329 1 fiche

This is the 4th consultation document in the Ontario Public School Boards' Association (OPSBA) report series on the future finance, mandate, and governance of the education system. OPSBA calls for a more explicit definition of education, and a re-definition of the provincial-school board relationship, with clearly defined roles for each. OPSBA presents a model of school board governance in which responsibilities are divided as follows: school boards and the provincial government share responsibility for all educational programs (from junior kindergarten to adults for secondary school courses), school transportation, and school facilities and capital; school boards are responsible for the local component of educational programs and adult continuing education general interest courses; and the provincial government is responsible for job training and skills development programs, employment support programs, health and social support programs (including exceptional students), and management of any integrated health and social support system.

The Future responsibilities of our education system : position paper

Toronto : Ontario Public School Boards' Association, 1992. iii, 27 p. (OPSBA position paper ; no. 2) *ONTERIS: ON06002.*
MICROLOG 93-02017 1 fiche

The Ontario Public School Boards' Association's 1st step in developing a position on the future funding of education: to determine the responsibilities of education and school boards. A clearer definition of education is necessary. Public school boards support education partnership, but wish a redefinition of the provincial-local relationship with clearly defined roles for each of the partners. School boards and the province should share all education/instructional programs, school transportation, and capital. School boards should be solely responsible for the local component of programs and general interest courses. The province would be responsible for job training and skills development beyond secondary education; employment support programs; child care; health and social support programs for education; and coordination and management of any integrated health and social support system. School boards may act as delivery agents on a full cost recovery basis in their communities on behalf of the governing body for such public services such as child care, job training and skills development, and health and social support programs. Includes OPSBA's recommendations for implementation.

Galloping mitigation at SaskPower

by D.G. Havard, C.J. Pon and P.D. Terry. Montreal : Canadian Electrical Association, Transmission Section, 1991. 14 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06261 1 fiche

Galloping is a violent motion of power transmission line conductors caused by wind-induced resonant motion. SaskPower's new Boundary Dam to Shand 230 kilovolt power transmission line consists of a single conductor circuit, a two conductor bundle circuit and two overhead ground wires on the same H-frame structures. The longest span, 355 m, of this line could not be designed with normal phase-to-phase clearances against flashovers during galloping using available pole sizes. Observation data from galloping field trials of lines with and without detuning pendulums were used to determine the equivalent galloping clearance ellipse size with pendulums. Present design practices, probabilistic approaches, confidence levels of detuning pendulums, and results for single and double conductors on the study spans are discussed.

La Garde des enfants au Canada -- Rév.

par S. Harder. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 25 p. Bibliogr. (Bulletin d'actualité ; 87-11F) *L'éd. anglaise (Child care in Canada) sur la même fiche. Révisé le 9 avril 1992.* ISBN 0-660-93884-7
MICROLOG 93-00719 1 fiche

Depuis 30 ans, la hausse spectaculaire de la présence des mères de jeunes enfants sur le marché du travail a accru les besoins en matière de services et d'installations de garde des enfants. Ce document examine la question de la garde des enfants au Canada. Il se penche particulièrement sur l'évolution du régime de garde des enfants au Canada; l'aide gouvernementale aux familles comptant des enfants; la qualité et la disponibilité des services de garde; la présentation sommaire de régimes de garde des enfants en vigueur dans d'autres pays; et, les mesures parlementaires.
CA SA

par S. Harder. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 25 p. Bibliogr. (Bulletin d'actualité ; 87-11F) *L'éd. anglaise (Child care in Canada) sur la même fiche. Révisé le 18 novembre 1992.* ISBN 0-660-94093-0
MICROLOG 93-08702 1 fiche

Ce rapport commence avec une définition du sujet de la garde des enfants au Canada. Ensuite il examine l'évolution du régime de garde des enfants au Canada dès le 19e siècle et l'aide gouvernementale aux familles comptant des enfants. L'évaluation du nouveau programme prend en considération le Régime d'assistance publique du Canada, la déduction pour frais de garde d'enfants, des allocations d'Emploi et immigration Canada pour personnes à charge, des contributions du Ministère des affaires indiennes et du Nord aux services de garde d'enfants dans les réserves indiennes, et l'appui financier des provinces et territoires. On considère aussi la qualité et la disponibilité des services de garde, des régimes de garde des enfants en vigueur dans d'autres pays, et des mesures parlementaires fédérales et provinciales.

La Garde des enfants au domicile des parents : choix ou nécessité? L'impact sur les familles de la protection des gardiennes par la Loi sur les normes du travail

Québec (Province). Conseil de la famille. Québec : le Conseil, 1993. 23 p. Bibliogr. (Avis)
MICROLOG 93-04460 1 fiche

Le Conseil de la famille s'est référé aux six critères familiaux inscrits dans le Guide 'Penser et agir famille'. Il s'est également basé sur l'opinion d'associations, d'organismes et de personnes oeuvrant dans ce secteur d'activité pour élaborer cet Avis. Dans un premier temps, le Conseil traite de la problématique de ce dossier, c'est-à-dire des besoins des familles en matière de services de garde au foyer et des conditions de travail actuelles des gardiennes à la maison. Dans un deuxième temps, il présente l'opinion d'associations, d'organismes et de personnes sur l'application de la Loi sur les normes du travail aux gardiennes au foyer. Dans un troisième temps, le Conseil de la famille examine les enjeux de l'assujettissement de ces travailleuses à la Loi et son impact sur les familles. Enfin, le Conseil propose des recommandations susceptibles d'améliorer la garde au domicile des parents.

Gas plant sludge characterization : an information review : a study

conducted for Environmental Research Advisory Council, Canadian Petroleum Association, and Environmental Protection Service, Environment Canada ; by Monenco Consultants Limited. Calgary, Alta. : The Association, 1985. viii, 188 p. : ill. Bibliogr.
MICROLOG 93-03976 3 fiche

Identification of sludges generated at natural gas processing plants that process sweet gas and sour gas (sulphur recovery and gas flaring plants). Sludge characterization data made available by gas plant operators were reviewed and the data base was supplemented by a detailed review of gas plant processes. The environmental significance of the sludges was ranked in relative terms by considering estimated generation rates and likely organic and inorganic composition. To provide the sampling and analytical protocols for characterizing gas plant sludges, methodologies for collection of representative samples, preservation techniques, and analysis were reviewed. The report presents a comprehensive analytical network that includes the analysis for conventional and inorganic constituents, the identification of organic constituents through a complete gas chromatography/mass spectrometer analysis and a phased toxicity testing network utilizing selected toxicity testing methods.

GATT : the Dunkel report and Canadian agricultural policies

by J.-D. Fréchette. Ottawa : Library of Parliament, Research Branch, 1992. 14 p Bibliogr. (Current issue review ; 91-10E) *French ed. (GATT : le rapport Dunkel..) on*

the same fiche. ISBN 0-660-14570-7
MICROLOG 93-00857 1 fiche

On 20 December 1991, Arthur Dunkel, Director General of GATT, tabled a report containing proposals designed to serve as a basis for a final agreement on world trade. When the Dunkel Report was released, Canada realized that it would be difficult to get its producers to agree to the agricultural reform proposals that had been put forward. The hostile reaction to the proposals confirmed this fear. This document describes the Dunkel report. It focuses on access to markets, export competition, domestic support, and sanitary and phytosanitary measures. It also presents information on supply management.

GATT : the eleventh hour for Article XI? -- Rev.

by J.-D. Fréchette. Ottawa : Library of Parliament, Research Branch, 1992. 20 p. Bibliogr. (Current issue review ; 89-7E) *French ed. (Le GATT : la onzième heure pour...) on the same fiche. Revised 5 March, 1992.* ISBN 0-660-14637-1
MICROLOG 93-00750 1 fiche

In Canada, every spring sees new debates on agricultural policies. Since global trade has monopolized discussion on these policies all over the world recently, it is not surprising to note that it has also sparked controversy on the Canadian agricultural scene. This document clarifies the current situation. It is based strictly on the probable economic impacts of the decisions made. It presents the GATT Article XI as the cornerstone of the domestic agricultural and trade policies of producing countries.

Gays River Mine dewatering and water inflow prevention

by G.M. Meyer. S.l. : Canada-Nova Scotia Cooperation Agreement on Mineral Development, 1991. 79 p. : ill., maps. Bibliogr. *A Study on the control of groundwater hazard at Gays River Mine, vol. II : phase I report : Gays River Mine dewatering and water inflow prevention. Fold. map not filmed. CANMET contract: 23440-0-9235-01-SQ.*
MICROLOG 93-01548 1 fiche

This report outlines a study to assess and investigate sources of groundwater inflow to Westminer Canada Ltd.'s Gays River lead-zinc mine in Nova Scotia. This report presents a total overview of the hydrogeological regime at the minesite and uses this overview to make recommendations to solve mining problems currently being experienced by groundwater inflows. The report follows three weeks at the mine when all reports and hydraulic data were collated and analyzed and water inflows inspected.

Gays River overburden stability investigation, Halifax Co., N.S. : final report

Jacques, Whitford and Associates Ltd. Dartmouth, N.S. : The Company, 1993. 560 p. : ill., fold. maps. *Fold. maps not filmed. Contractor: Westminer Canada Limited. CANMET contract: 23440-9-9217-01-SQ.*
MICROLOG 93-08322 6 fiche

The Gays River mine is located about 70 km northeast of Halifax, Nova Scotia. It was developed and partially extracted from 1976-82 by Canada Wide Mines Ltd., a subsidiary of Esso Minerals, but occasional inflows of water, sand, silt, and mud when mine workings broke through into the trench seriously delayed or halted development and production operations. The costs associated with these events and a lower than expected grade of recovered ore resulted in the closure of the mine in 1982. Westminer Canada reopened the mine in 1989 to mine the high grade mineralization adjacent to the weak trench hanging wall. To get a better understanding of the stability of the hanging wall, an investigation was begun into the stability of the unconsolidated materials that form the hanging wall of the deposit. The project included consolidation of information, characterization of materials, numerical modelling, monitoring, and test mining.

Gentrification : assessing the causes and effects

[by] Jeffrey Kerr. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1992. iii, 18 p. Bibliogr. (Student papers ; 4) *Bound with: Winnipeg's municipal conflict of interest guidelines : problems and solutions / Scott Paler.* ISBN 0-920213-91-X
MICROLOG 93-00265 1 fiche (Available on fiche only)

Gentrification involves a change in the socioeconomic status of an area and the physical renovation of the shelter in an area. Studies have attempted to identify who it is that gentrifies, what areas of cities are targets for gentrifiers, causes of gentrification, and the impact of gentrification. This document contains two papers on this topic. The first bridges some of the theoretical perspectives that have emerged in the literature on gentrification. The purpose of the second paper is to examine what presently constitutes a conflict of interest for a municipal councillor in Winnipeg, and to document how, unfortunately, this definition has proven to be inadequate.

Gentrification : is the gentrification process negative by definition?

by K. Hilton. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1991. 8 p. Bibliogr. (Student papers ; 2) ISBN 0-920213-67-7
MICROLOG 93-00709 1 fiche (Available on fiche only)

Gentrification involves a change in the socio-economic status of an area and physical renovation of the shelter in an area. The sudden socio-economic change in an area and its resultant effects on the present population are frequently cited as negative aspects of gentrification. Physical renovation is always upheld in the literature as a positive factor in gentrification. This paper determines whether the positive effects of gentrification--improvements to the housing stock, heritage preservation, aesthetic appeal--outweigh the negative aspects associated with the high-status takeover of middle- to lower-class areas.

Geochemistry of mineralized and barren, Late Proterozoic felsic volcanic rocks in southeastern Cape Breton Island, Nova Scotia, Canada

by J. Dostal, J.D. Keppie and M. Zhai. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1992. 17 p. : ill. Bibliogr. (Contribution series ; 92-001) *In* Precambrian research : *no 56, 1992.*
MICROLOG 93-01703 1 fiche

Many Archean massive base-metal sulphide deposits are associated with volcanic rocks and several studies have suggested that the felsic volcanic rocks from ore-bearing horizons have a distinct rare-earth element distribution of use in mineral exploration. However, it is not evident whether similar criteria can be also extended to post-Archean rocks. To test this option, this study focused on the distribution of trace elements in Late Proterozoic felsic volcanic rocks from southeastern Cape Breton Island, Nova Scotia, some of which are associated with the Mindamar (Stirling) base-metal deposit. The study compared the composition of the felsic volcanic rocks of the massive sulphide deposit-bearing Stirling fault block with Archean ore-bearing rhyolitic rocks in the Superior Province of the Canadian Shield and with similar rocks of the other blocks from southeastern Cape Breton Island that are not associated with known massive sulphide deposits, and placed constraints on their petrogenesis.

Géologie de l'Orogène de la Cordillère au Canada

rédacteurs: H. Gabrielse et C.J. Yorath. Ottawa : Commission géologique du Canada, 1991. 915 p. : ill., cartes géogr. Bibliogr. (Géologie du Canada ; no 4) *L'éd anglaise (Geology of the Cordilleran...) : 93-00099/9. Cartes géogr. plaintes non filmées.* ISBN 0-660-92545-1
MICROLOG 93-02351 10 fiche

Ce volume s'ouvre sur une description sommaire du cadre tectonique de la Cordillère, avec ses domaines géomorphologiques, ses assemblages tectonostratigraphiques et ses terranes constitutifs. Le premier chapitre traite également de l'application de la paléontologie à la biostratigraphie des terranes, à la chronologie de leur assemblage en superterranes, ainsi qu'aux caractéristiques générales de la croûte mises en évidence par les données géophysiques. Le chapitre suivant passe longuement en revue les résultats des études paléomagnétiques exécutées dans la Cordillère, de même que leurs implications du point de vue de la translation et de la rotation des principaux terranes constitutifs. Viennent ensuite les sujets suivants: le socle précambrien de la Cordillère canadienne; les assemblages du Protérozoique moyen et supérieur, Cambrien au Dévonien moyen, Dévonien supérieur au Jurassique moyen, et Jurassique supérieur au Paléogène, et du Néogène; l'évolution physiographique de la Cordillère canadienne; la glaciation et la sédimentation quaternaires; le régime actuel de la tectonique des plaques sur la marge continentale de l'Ouest du Canada; les régimes volcaniques; les régimes plutoniques; le métamorphisme; les styles structuraux; la synthèse tectonique; la métallogénie régionale; les ressources en énergie et en eaux souterraines de la Cordillère canadienne; les catastrophes naturelles; et, les problèmes en suspens.

Géologie et gîtes minéraux de la structure de Sudbury

par B.O. Dressler, W.V. Peredery et T.L. Muir. Toronto : Ministère du développement du nord et des mines, Commission géologique du Canada, 1992. vii, 33, vii, 33 p. : ill., cartes géogr. Bibliogr. (Guide géologique ; 8) *Carte géogr. pliante non filmée. Bilingue (Geology and mineral deposits of the...).* ISBN 0-7729-9824-8
MICROLOG 93-00878 1 fiche

Ce guide se base sur un étude documentaire de la Structure de Sudbury par Dressler, Gupta et Muir (1991) et sur un guide publié par Peredery (1990). Le texte de ce guide a été pour la plupart emprunté textuellement à ces publications. Il porte précisément sur la géologie et les gîtes minéraux de la structure de Sudbury et examine les points suivants: géologie générale; minéralogie et composition des gîtes; géologie structurale; origine de la Structure de Sudbury; descriptions des affleurements; et, carte de la géologie précambrienne générale pour la région de Sudbury.

Geology and geochemistry of Middle Devonian Burnthill Brook granites and related tin-tungsten deposits, York and Northumberland counties, New Brunswick

by H.E. MacLellan, R.P. Taylor and W.W. Gardiner. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. vii, 95 p. : ill., maps. Bibliogr. (Mineral resources report ; 4) *Fold. maps not filmed.* ISSN 0713-2433
MICROLOG 93-03738 2 fiche

Exploration interest in the Burnthill Brook area of central New Brunswick stems from its potential for economic deposits of tin and tungsten. A project was conducted to determine the petrochemical evolution of Middle Devonian granites and to discover the specific nature of their influence, if any, on the genesis of the associated mineral deposits. The project was begun in summer 1985, at which time the Burnthill pluton was mapped. During the 1986 field season, the Dungarvon, Sisters Brook, Rocky Brook, and Trout Lake plutons were also mapped and two areas of abundant tin-tungsten showings were mapped in greater detail. 40Ar/39Ar age determinations were also performed. This report describes the regional geology, the spatial relationships and geochronology of the plutons, their structure, the mineralogy and texture of the granites, the geochemistry, and the economic geology.

Geology and gold showings, Wheeler Lake Domain, part of NTS area 850/7 : notes

by J.A. Brophy. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1992. 42 p. : ill., maps. Bibliogr. (Open file ; EGS 1992-6)
MICROLOG 93-04443 1 fiche

The Wheeler Lake Domain (WLD), a 75-sq-km, north-concave, banana-shaped pendant of amphibolite-grade turbidites of the Archean Yellowknife Supergroup, lies 100 km north-northwest of Yellowknife in the Northwest Territories. This study is part of a larger project to systematically document critical features of stratiform and non-stratiform banded iron formation (BIF)-hosted gold deposits and their geological settings to help provide better exploration guidelines. Work done in 1991 included detailed observation and sampling of silicate BIF at Hematite Hill and of sulphide and silicate BIF at the Marco Showing, and reconnaissance sampling and structural mapping confined mainly to the western half of WLD. Sixty-four samples were collected and analyzed for major oxides, minor elements, and trace elements.

Geology and lithium deposits of Georgia Lake area, District of Thunder Bay

by E.G. Pye. Toronto : Dept. of Mines, 1965. viii, 113 p. : ill., maps. Bibliogr. (Geological report ; 31) *Fold map not filmed. Cover title: Georgia Lake area.* ISSN 0472-9889
MICROLOG 93-08816 2 fiche

This report outlines the geology of the Georgia Lake area, which came into prominence in 1955 following the discovery therein of several potentially important deposits of lithium-bearing pegmatite. The report includes the results of a geological survey carried out intermittently from 1956 to 1959. This survey had as its objectives the mapping of the rock formations and their structures, and the study of the nature, distribution and genesis of the lithium deposits.

Geology and major element geochemistry of the Mount Brussilof magnesite area, southeastern British Columbia, 82J/12, 13

by G.J. Simandl. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1992. ii, 14 p. : ill., map. Bibliogr. (Open file 1992-14) *Fold. map not filmed.* ISSN 0835-3530 ISBN 0-7716-9193-8
MICROLOG 93-01177 1 fiche

A number of magnesite deposits, hosted by either ultramafic or sedimentary rocks, are known in British Columbia. The most important of these is the Mount Brussiloff orebody hosted by dolomites of the Middle Cambrian Cathedral Formation. This report describes the location and tectonic setting of the formation, its stratigraphy, lithology and structure, the magnesite deposits, and the chemistry of carbonate rocks. A description of the analytical procedures is also included.

Geology and mineral potential of the Torp Lake metasedimentary belt, District of Mackenzie

by R.M. Johnstone. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1992. vii, 136 p. : ill., maps. Bibliogr. (Open file ; EGS 1992-8) *Fold. map not filmed.*
MICROLOG 93-04439 2 fiche

The Torp Lake metasedimentary belt, located in the northern Slave Structural Province, is 580 km north-northeast of Yellowknife and 25 km west of Arctic Sound. A three year program to map the Torp Lake Belt and adjacent northern end of the Hood River Belt was completed in 1990. Field work was conducted over four weeks in 1988, ten weeks in 1989, and six weeks in 1990. This report describes the location, physical features, previous geological work, and exploration history of the area; the regional geology; the general geology of the area; the structure and metamorphism; and the economic geology, including gold showings, base metal deposits, and carvingstone deposits.

Geology and mineral resources of the Babine Mountains Recreation Area, NTS 93L/14, 15; 93M/2, 3

by R.G. Gaba. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1992. iv, 83 p. : ill., maps. Bibliogr. (Paper ; 1992-5) *Fold. map not filmed.* ISSN 0226-9430 ISBN 0-7718-9257-8
MICROLOG 93-01169 1 fiche

The Babine Mountains Recreation Area in west central British Columbia is a candidate for Class A park status. This report provides the results of a mineral resource potential study. The field based component of the study was carried out by a helicopter-supported two-person crew during late July and early August 1991. Office-based research and compilation continued into spring 1992. The report covers the geology of the area, past and present exploration and mining, mineral deposit types, the potential for undiscovered mineral resources, and a description of the Big Onion deposit.

The Geology and structure of the Arcadia Bay area, Coronation Gulf, NWT, part of NTS 76 M/11

by A.P.G. Abraham. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1990. 34 p. : ill., maps. Bibliogr. (Open file ; EGS 1990-6)
MICROLOG 93-04448 1 fiche

The Arcadia Bay area lies at the northwestern point of the Slave Province, about 610 km north of Yellowknife, and is located on the south shore of Coronation Gulf. Initial mapping in 1987 was extended to 1988 to include more detailed mapping of trenches and veins. The final phase of detailed mapping and sampling was carried out in 1989, concentrating on the structural relationships of the gold-bearing shear zones. This paper describes the regional setting and the geology and structure, and gives grab sample assay results for 16 samples collected in 1988.

Geology of Hopedale block, southern Nain Province, and the adjacent proterozoic terranes, Labrador, Newfoundland

by I. Ermanovics. Ottawa : Geological Survey of Canada, 1993. 161 p. : ill., maps. Bibliogr. (Memoir ; 431) *Fold. maps not filmed.* ISBN 0-660-14977-X
MICROLOG 93-06424 2 fiche

The Archean Nain province of Labrador constitutes the easternmost part of the Canadian Shield bounded by the Labrador Sea. The structural province contains some of the oldest rocks of Precambrian shields in the world. Mapping in Hopedale block was carried out from 1978-81. This report describes the geological history of southern Nain province from 3300-1300 Ma and was conducted to stimulate mineral exploration work.

Geology of the Antigonish Basin, Antigonish County, Nova Scotia

by R.C. Boehner and P.S. Giles. Halifax : Dept. of Natural Resources, 1993. vi, 109 p. : ill., maps. Bibliogr. (Memoir ; 8) *Fold. maps not filmed*
MICROLOG 93-07208 2 fiche

The Antigonish Basin is a Carboniferous structural basin in Antigonish County, northeastern mainland Nova Scotia. The rocks described in this report occur principally in a lowland area that is characterized by gently rolling terrain with elevations rarely exceeding 100 m. The study was conducted to describe the geology of the area using all available outcrop and critically important subsurface information (drilling and seismic data), emphasizing the stratigraphy and structure of the Windsor Group, with lesser emphasis on younger and older Carboniferous strata. Comparisons and correlations are made whenever possible with other Carboniferous outcrop areas. Field mapping was conducted in the summers of 1978 and 1979.

Geology of the Cordilleran Orogen in Canada

edited by H. Gabrielse and C.J. Yorath. Ottawa : Geological Survey of Canada, 1992. 844 p. : ill., maps. Bibliogr. (Geology of Canada ; no. 4) *Fold. maps not filmed. French ed. (Géologie de l'Orogène...) : 93-02351/10.* ISBN 0-660-13132-3
MICROLOG 93-00099 9 fiche

This report begins with a discussion of the tectonic framework of the Cordillera, including its main morphogeological belts, tectonostratigraphic rock assemblages, and component terrains. The application of paleontology to terrane biostratigraphy and timing of assembly is described, as is the general nature of the crust as revealed by geophysical measurements. An extensive review of paleomagnetic studies undertaken in the Cordillera and their implications regarding translations and rotations of the principal component terranes is given. The stratigraphy is described in terms of tectonic assemblages

Geology of the Loch Lomond Basin and Glengarry Half Graben, Richmond and Cape Breton counties, Cape Breton Island, Nova Scotia

by R.C. Boehner and G. Prime. Halifax : Dept. of Natural Resources, 1993. v, 68 p. : ill., maps. Bibliogr. (Memoir ; 9)
MICROLOG 93-07216 1 fiche

The Loch Lomand Basin and Glengarry Half Graben are adjoining Carboniferous structural basins situated in southeastern Cape Breton Island, Nova Scotia. The rocks described in the report occur mainly in a lowland area characterized by gently rolling terrain and elevations rarely exceeding 100 m. This study described the geology of the area using all available outcrop and subsurface information from a large number of mineral exploration drillholes. Emphasis was placed upon determining the stratigraphy and structure of the Carboniferous strata and identifying the related mineral deposits. Comparisons and correlations were made where possible with other Carboniferous basins and outcrop areas and emphasis was placed on the stratigraphic onlap where Windsor Group strata rest on and pinch out against basement rocks. Field mapping and drill core logging were accomplished in the summers of 1982-84.

Geology of the Star Lake-Otter Lake portion of the Central Metavolcanic Belt, La Ronge Domain

by D.J. Thomas. Regina : Saskatchewan Energy and Mines, Saskatchewan Geological Survey, 1993. xii, 132 p. : ill., maps. Bibliogr. (Report ; 236) *Fold. maps not filmed.*
MICROLOG 93-05432 2 fiche

Since the early 1980s, Saskatchewan has witnessed a major boom in gold exploration in the La Ronge gold belt. This belt extends northeast of La Ronge to Reindeer Lake and eastwards to Flin Flon. Revision geological mapping was begun in 1984 to identify whether a fundamental geological difference exists between the northern part of the belt in the Weedy Lake area where most of the gold mineralization was identified and the southern portion of the belt, where there were fewer reported occurrences. The revision mapping detailed lithostratigraphic and geochemical characterization of the metavolcanic succession; examined the petrological characteristics of the intrusive rocks and their temporal relationship to the volcanics and tectonism, and developed empirical criteria characterizing known gold occurrences in the Central Metavolcanic Belt and establishing whether similar features exist elsewhere in the La Ronge gold belt.

Geotechnical studies at east Bull Lake research area (RA-7)

edited by A.G. Latham. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. i, 108 p. : ill. Bibliogr. (Report ; MRL 87-94(TR))
MICROLOG 93-03430 2 fiche

The nuclear fuel waste disposal concept chosen for assessment in Canada involves the isolation of corrosion-resistance containers of immobilized waste in a vault located deep in plutonic rock in the Precambrian Shield. Assessment of the concept requires evaluation of the long-term performance of each of the multiple barriers of the disposal system and the environmental impact of a repository. This volume is part of a series of concept assessment documents that present results of measurements of these properties on core samples from drill holes located at the research areas of Whiteshell Nuclear Research Establishment and Underground Research Laboratory (Lac du Bonnet granite), Massey, Ontario (East Bull Lake layered complex) and Atikokan, Ontario (Eye-Dashwa Lakes pluton). This report presents the results for the East Bull Lake research area, illustrating the ranges of values that can be expected within the layered complex. The report gives an overview of the geology of the complex; describes various physical properties of core samples; describes the magnetic properties of the rocks and the intensity of fracturing and alteration of the core samples examined; and reviews the most important aspects of the work.

Geotechnical studies at Whiteshell research area (RA-3)

edited by T.J. Katsube and J.P. Hume. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. iii, 232 p. : ill. Bibliogr. (Report ; MRL 87-52(TR))
MICROLOG 93-03420 3 fiche

The nuclear fuel waste disposal concept chosen for development and assessment in Canada involves the isolation of containers of waste in a vault located at a depth of about 1,000 m in plutonic rock. Adequate development of this concept requires the development of the capability to assess what impact the disposal system would have on humans and the environment if the concept were implemented. This series of papers describes the general geology, micromorphology, geochemistry, mechanical properties, petrophysics, thermal properties, magnetic properties and electrical properties of the Lac du Bonnet Underground

Glacial geology and glacial sediment geochemistry in the Clyde Forks-Westport area of Ontario

by I.M. Kettles. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1992. 34 p. : ill., maps. Bibliogr. (Paper ; 91-17) *Fold. maps not filmed.* ISSN 0068-7650 ISBN 0-660-14710-6
MICROLOG 93-01818 1 fiche

The distribution of Quaternary deposits and landforms was mapped and glacial sediments were systematically sampled in four 1:50,000 NTS map sheets for Clyde Forks, Sharbot Lake, Perth and Westport in eastern Ontario. Sampling was also carried out in the adjacent Tichborne and Carleton Place map areas and for purposes of discussion these map areas have been included in the study region. Over 520 drift samples, predominantly till, were collected and analyzed for their content of selected pebble lithologies, silt plus clay-sized carbonate, and for the trace elements of silver, arsenic, gold, cadmium, cobalt, chromium, copper iron, mercury, manganese, molybdenum, nickel, phosphorus, palladium, platinum, uranium and zinc. The texture of all samples was also determined. In addition, similar data for approximately 400 glacial sediment samples collected during an earlier survey were incorporated into this study.

Glacial history, drift composition, and mineral exploration, central Labrador

by R.A. Klassen and F.J. Thompson. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1993. 76 p. : ill., maps. Bibliogr. (Bulletin ; 435) *Fold. maps not filmed.* ISBN 0-660-14829-3
MICROLOG 93-04301 1 fiche

This survey focuses on the areas of greatest mineral potential within the central mineral belt and Labrador Trough in southern Labrador. Geological fieldwork in summer 1983-88 led to the creation of a geoscience database comprising several thousand samples of till and related observations concerning surficial geology and ice flow. Through analyses of those samples, the work portrays regional variations in the geochemical and lithological composition of glacial deposits, and interprets those variations in terms of bedrock geology, glacial history, and glacial process.

The Global cash crunch : an examination of debt and development

Ottawa : International Development Research Centre, 1992. 45 p. Bibliogr. (Searching series ; 5) *French ed. (Le Prix à payer : un aperçu sur...) : 93-02054/1.* ISBN 0-88936-664-0
MICROLOG 93-01581 1 fiche (Available on fiche only)

The 1980s have been called the 'lost development decade' because of the debt crisis. Countries burdened by massive debts experienced negative growth as borrowing patterns, interest rates, debt restructuring, and the terms of trade conspired to create a net transfer of funds from south to north. This document presents a discussion of how prescriptions from the north, hailed as solutions for the south, served only to recoup Northern losses and exacerbate the situation. It also discusses what has been learned from this situation and what can be done.

Global search for BAT options applicable to inorganic chemical sector plants

CH2M Hill Engineering Ltd. Toronto : Environment Ontario, MISA Office, 1992. 230 p. : ill. Bibliogr. ISBN 0-7778-0210-4
MICROLOG 93-03309 3 fiche

The Municipal-Industrial Strategy for Abatement (MISA) program is a regulatory program with the ultimate goal of virtual elimination of persistent toxic contaminants from all discharges to Ontario waterways. To develop effluent limits, pollution control technologies available to the industry for removal of contaminants must be evaluated and their financial and economic impacts on the industry must be known. The best available technology (BAT) economically achievable (EA) for the industry can then be determined and will form the basis for setting effluent limits. To this end, a two-phase study to develop an inventory of BAT applicable to plants in the inorganic chemical sector was developed, the first being a global study and the second an Ontario study. This report presents the results of the global study, which developed an inventory of BAT applications through a search carried out in Canada, the United States, Europe and elsewhere. The report describes the study methodologies, site visit reports, technology reports and plant specific technologies and in-plant changes.

Goals for family living and farm management

Regina : Saskatchewan Agriculture and Food, 1991. v, 68 p. ISBN 0-88656-545-6
MICROLOG 93-00454 1 fiche

Farm management means making decisions needed for running the business. This includes all decisions which have something to do with how the farm is organized and operated including buying a farm, borrowing money, purchasing machinery, going into livestock, production practices, marketing, and work habits. This document contains worksheets dealing with self assessment and developing short term and long term goals. It focuses on the following: traits of successful farmers, the role of women in managing a farm business, decision making, and the nature of priorities.

Gogama area (NTS 41P/NW), districts of Sudbury and Timiskaming

by M.A. Roed and D.R. Hallett. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1979. iii, 17 p. : maps Bibliogr. (Northern Ontario engineering geology terrain study ; 82) *Fold. maps not filmed.* ISSN 0709-4671 ISBN 0-7743-4358-3
MICROLOG 93-02743 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Gogama area, districts of Sudbury and Timiskaming. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1977, roads in the area were traversed and observed conditions recorded as further verification of office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, Eolian, glaciofluvial, glaciolacustrine, alluvial and organic landforms.

Gold and silver elution from carbon loaded in thiourea leach solution : final report

by W.T. Yen. Kingston, Ont. : Queen's University, Mining Engineering, 1992. 401 p. ill. Bibliogr. *CANMET contract: 23440-0-9154-01-SS*
MICROLOG 93-01542 5 fiche

Thiourea is an alternative to cyanide for leaching gold and silver from ore that has higher leaching rates and less environmental sensitivity. Dissolved gold-thiourea complex can be easily removed from the solution by activated carbon but there are difficulties in the desorption of gold from the carbon. This research program studied the gold and silver recovery from thiourea leach solution by carbon adsorption, carbon elution and carbon regeneration.

Gold in early Precambrian Superior Province plutonic rocks : the relation of geochemical abundance to exploitable levels

by W.J. Wolfe. Toronto : Ministry of Natural Resources, Division of Mines, 1976. v, 11 p. : ill. Bibliogr. (Geoscience study ; 17)
MICROLOG 93-07509 1 fiche

Study conducted to determine whether mineralized and unmineralized plutons differ significantly in gold abundance. Six Early Precambrian intrusions ranging in size from 4-88 sq km and in composition from syenite to granodiorite were selected for a study of gold abundance and distribution. Each of the investigated plutons was randomly sampled at 20-50 sites. At each outcrop site, two representative samples of unweathered rock chips weighing 800- 1200 g were collected about 5-15 m apart. The gold determination was made by a combined atomic absorption spectroscopy and fire assay method.

Gold in Indin Lake supracrustal belt, part of 86 B

by J. Morgan. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1992. iv, 66 p. : ill. Bibliogr. (Open file ; EGS 1992-11)
MICROLOG 93-04444 1 fiche

This project investigated the gold showings and deposits of the Indin Lake Supracrustal Belt to determine the commonality of host rock, mode of emplacement, style of deformation, and other aspects of their geological setting. Data acquisitions consisted of four and one-half months of field mapping emphasizing structure, and the compilation of maps that integrated field mapping with previous government and company mapping. Base maps were compiled on a computer drafting system from a variety of sources. The report describes the regional geology, gold showings and deposits, and structural and lithologic setting of gold.

par D. Boisvert...et al. Ottawa : Pêches et océans Canada, 1992. 26, 25 p. : ill., cartes géogr. *Bilingue (Gulf of St. Lawrence : an...).* ISBN 0-662-58724-3
MICROLOG 93-03746 1 fiche

Ce document trace l'évolution du premier système d'allocations au entreprises (AE) pour la flotte des 50 à 65 pieds vers un programme de quotas individuels tranférables. On y explique comment les participants de la Gaspésie, par exemple, ont commencé à rationaliser leurs activités en obtenant les quotas auprès de pêcheurs prenant leur retraite. On y décrit également l'évolution des sévères mesures de contrôle et de suivi de la pêche vers un système très étanche, axé sur la conservation de la ressource. Le document décrit aussi de quelle façon la nouvelle approche de gestion a été appliquée également aux crustacés et mollusques, depuis les quotas individuels (QI) pour la pêche semi-hauturière du crabe dans le golfe, la pêche de la crevette du golfe et la pêche côtière du crabe des zones 16 et 17, jusqu'aux QI pour la pêche côtière du pétoncle sur la moyenne Côte-Nord du Québec.

Gossan target definition and lineament extraction from satellite imagery, southwest of Heath Steele, New Brunswick (parts of NTS 21 O/1 and 21 O/8)

by P.F. Williams and A.L. McAllister. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. 8 p. : maps. Bibliogr. (Geological notes series , PM 89-21) *Fold. maps not filmed* ISSN 0838-4320
MICROLOG 93-03742 1 fiche

As part of the remote sensing program of the Heath Steele project, gossan exploration target definition was conducted in addition to lineament extraction procedures. The integrated signature search technique was first applied to a 20 km x 15 km area centred upon Heath Steele, then a second smaller area to the southwest was analyzed. Two gossan target location maps were created, one from single date satellite signature search procedures and the other from multi-date signature search procedures. The topographic/land use base for both of these maps was derived from a 1:50 000 scale continuous-tone colour base map generated from the 1988 LANDSAT-TM satellite imagery. This report describes the methods involved and the results.

Governance and sustainability in the Georgia Basin

by A.F.J. Artibise and J. Hill. Victoria : British Columbia Round Table on the Environment and the Economy, 1993. 33 p. Bibliogr.
MICROLOG 93-09006 1 fiche

This background paper is intended to promote reflection and discussion on the question of governance in the Georgia Basin. It reviews the principles of sustainability and the challenges faced in the Georgia Basin in the context of rapidly growning concerns about governance. The paper also sets out the criteria that may assist the discussion when various approaches to governance are discussed. It also presents a series of models of governance with a view to providing information for further discussion and debate.

The Canadian business community can obtain considerable assistance from government programs and services at the federal, provincial, and in some cases, local level. Business immigrants, once they have arrived in Canada and set up their businesses, have equal access to this assistance. The federal government consists of some 30 departments and agencies, many of which, at one time or another, become involved in programs or services that affect the business community. A number of these departments are of particular interest to business immigrants just beginning to set up a business in Canada. This booklet describes the programs and services of greatest interest. It also includes a list of addresses to contact for information about provincial programs and services.

Grass and legume seeding for vegetation control on blade scarified sites in the ICH and ESSF zones in the central interior of British Columbia

by O. Steen and A. Smith. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development: FRDA II, 1991. 27 p. : ill. Bibliogr. (FRDA report ; 182)
ISSN 0835-0752 ISBN 0-7726-1567-5
MICROLOG 93-02971 1 fiche

Competing shrub and herbaceous vegetation is a principal obstacle to successful reforestation of moist, backlog brushfields in the Interior Cedar Hemlock (ICH) and Engelmann Spruce Subalpine Fir (ESSF) zones. This project evaluated and demonstrated the effectiveness of grass/clover seeding for controlling the regrowth of native competing vegetation and for establishing a free-growing crop tree plantation on moist, blade scarified sites in the Horsefly District in the central interior of B.C. The project began with a retrospective survey in 1989 of all 11 sites operationally seeded before 1987. The second part was a research and demonstration trial in which seeded and unseeded treatments were established on three mechanically scarified backlog sites. All sites were seeded with the same seed mix and seeding rate at the same time of year (fall). The effects of broadcast fertilizer application on establishment and growth of seeded grasses and clovers were also addressed.

Great Sand Hills land use strategy

Regina : Saskatchewan Environment and Public Safety, 1991. i, 72 p. : maps. Bibliogr.
MICROLOG 93-01922 1 fiche

The Great Sand Hills area, a unique and sensitive region of southwestern Saskatchewan, consists of two large blocks located between the Trans-Canada Highway and the South Saskatchewan River. None of the area is represented in the parks system and no form of provincial protected land designation is applied to it other than portions of land that are designated under the Critical Wildlife Habitat Protection Act. In July 1990 a planning committee was established to prepare an integrated land use strategy for the area. A moratorium was placed on new developments within the most sensitive areas, halting oil and gas exploration. The main focus of this land use strategy is on the moratorium area, although recommendations and guidelines apply to other areas as well. The report describes the climate, landforms, flora and fauna, and air quality; details land use practices and guidelines for grazing management, oil and gas exploration and development, wildlife management, tourism, archaeological resources, groundwater resources, utility corridors and reclamation and vehicle access; and details implementation of the strategy.

Greater Moncton : community profile

Moncton, N.B. : Greater Moncton Economic Commission Inc., 1993. 76 p.
MICROLOG 93-08959 1 fiche

This document profiles Moncton and its sister communities of Dieppe and Riverview. It covers history, geography, climate, population, demographics, bilingual communities, family patterns, and incomes. The topics of housing, education, health services, recreation, volunteer services, fire protection and law enforcement are also covered. In discussing the economic base, major industries, resource industries, distribution and retail trade are covered. Next, conventions and trade shows and convention hotels are described, followed by the labour force, labour unions, minimum wage orders, labour legislation, and the Canada Employment Centre. Local services described include financial institutions, mail and delivery services, communications, civic administration, tax structure, water supply, sewage, waste removal, streets and roads, building statistics, utilities, transportation, and government assistance

The Greater Toronto area : an urban region

Toronto : Canadian Urban Institute, 1991. i, 14 p. Bibliogr. (Working paper ; WP-1)
MICROLOG 93-00600 1 fiche

Between 1900 and 1990, Toronto has experienced regional urban growth beyond the nineteenth century core city. The purpose of this paper is to describe briefly the geographic, governmental, demographic, and economic characteristics of the Greater Toronto Area and to outline major urban policy and planning challenges that various levels of government face. It puts forth a specific argument toward defining the Greater Toronto Area as an urban region, that is, a regional complex of several municipal governments, sometimes in conflict and sometimes in cooperation

Greater Vancouver key facts : a statistical profile of Greater Vancouver, Canada, 1992

Burnaby, B.C. : GVRD Development Services, 1992. 112 p. : maps. *CSI 89532.100.*
MICROLOG 93-00436 2 fiche

The Greater Vancouver region is located at the southwest corner of the British Columbia Mainland. The Greater Vancouver Regional District occupies 2,930 square kilometres at the mouth of the Fraser River. Its setting, combined with its situation as the key coastal port for western Canada and its history, results in an interesting mix of large and small communities. This document describes the Greater Vancouver Metropolitan Area. It presents an economic overview of the region, and describes the business activity in the Vancouver Census Metropolitan Area and the people of the region. It looks at the Greater Vancouver Municipalities and provides municipal profiles.

Greater Vancouver water district : environmental impact assessment of proposed secondary disinfection of drinking water : baseline, stage I : report

by Norecol Environmental Consultants Ltd., and Dayton and Knight Ltd. Vancouver, B.C. : Greater Vancouver Regional District, 1992. 222 p. : ill. Bibliogr. *Glossary (2 p.) laid in*
MICROLOG 93-06120 3 fiche

The Greater Vancouver Water District (GVWD) supplies water to approximately 1.6 million people in 17 Lower Mainland municipalities. Water is collected from the Capilano, Seymour, and Coquitlam mountain watersheds and stored in six reservoirs. The only treatment at the three sources is disinfection with chlorine (primary disinfection). This report completes Stage I of the GVWD's three-staged environmental impact assessment process, incorporating information on the current water supply, distribution, and treatment system of the GVWD and the need and alternatives for secondary disinfection. It also describes the fisheries and wildlife resources of the GVWD service area and reviews the properties (chemistry and toxicity) of chloramine and chlorine. This information will form the basis of the environmental impact assessment (Stage II) of secondary disinfection alternatives.

Green diplomacy : how environmental policy decisions are made

by G.B. Doern. Toronto : C.D. Howe Institute, 1993. 114 p. Bibliogr. (Policy study ; no. 16) ISSN 0832-7912 ISBN 0-88806-310-5
MICROLOG 93-02767 2 fiche

This study sets out and examines the key issues and players involved in the dynamics of reaching international environmental agreements. The study deals mainly with the political-distributive and the managerial and organizational challenges, commenting only briefly on the ecological-economic challenge. It analyzes the crucial issues for understanding the Canadian and international processes for reaching major international green agreements and protocols. These issues are identified as the nature and dynamics of international green agenda setting, the difficult conceptual issues involved in determining what the Canadian national interest is and when it is at stake, the limits of domestic consensus formation, how to foster greater trust and confidence in the negotiation process among interest groups and provinces, and the adequacy of the crucial relationship between the Dept. of External Affairs and International Trade and the Dept. of the Environment.

Ground stability guidelines for cut and fill mining of wide ore bodies : final report

by Placer Dome Inc., Detour Lake Mine ; in association with Pakalnis and Associates. Ottawa : Canada Centre for Mineral and Energy Technology, 1992 xii, 290 p. : ill Bibliogr. *CANMET contract: 23440-9-914501-SQ*
MICROLOG 93-04295 4 fiche

This study is the result of three years of research to develop ground stability guidelines for the mining of wide ore bodies employing cut and fill mining methods. The study evaluates the factors that influence the stability of large cut and fill stopes having spans ranging from 3m to over 35m. The Detour Lake Operation, a 2,200 tpd gold mine, has been mined by mechanized cut and fill methods since 1987, resulting in a large data base of information that includes 50 mining lifts at various stages of extraction. Observations were supplemented with in-situ measurements, structural mapping, stress and deformation monitoring, and historical observations. The critical parameters were quantified in terms of the exposed span(back), rock mass rating, and the potential of instability. Relationships were developed whereby for a given rock mass rating one is able to derive a maximum critical span

Stock assessments and yield options are developed for the Pacific coast of Canada for lingcod, Pacific cod, petrale sole, Dover sole, rock sole, English sole, arrowtooth flounder, sablefish, Pacific hake, spiny dogfish, walleye pollock, Pacific ocean perch, yellowmouth rockfish, rougheye rockfish, redstripe rockfish, silvergray rockfish, yellowtail rockfish, canary rockfish, quillback rockfish, copper rockfish, yelloweye rockfish, hagfish, and Pacific halibut. A number of analytical methods have been employed in these assessments, like surplus production analysis, virtual population analysis, several variants of sequential age-structured analyses, dynamic pool models and depletion estimators. Biological objectives are the only consideration for these assessments and yield options. Yield options and recommendations on catch limitations and other management measures to achieve biological objectives are made to the fishery managers of Offshore Division of Fisheries Branch (Pacific Region). Alternative options allow managers to consider high risk and low risk yields in relation to a stock's potential productivity.

Groundwater quality in Alberta : hydrogeology, quality concerns, management

by C. Pupp, R. Stein and G. Grove. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. v, 113 p. Bibliogr. (NHRI contribution ; no. 89051) ISSN 0838-1992
MICROLOG 93-07221 2 fiche

This report, one of a series that covers the ten provinces and two territories, describes the existing groundwater resources and quality in Alberta, environmental concerns relating to groundwater quality, and the tools available for management protection, including legislation, institutions, and programs. Also discussed are instruments for management that are directed primarily at protecting surface water or drinking water, but can or are being used to protect groundwater as well.

Groundwater resources evaluation : Cavendish

Ottawa : Environment Canada ; Charlottetown : Dept. of the Environment, 1989. 41 p. : ill., maps. Bibliogr.
MICROLOG 93-03684 1 fiche

Findings of a study of the groundwater resources of the Cavendish area, conducted as part of the Groundwater Resource Evaluation Project, under the Canada-Prince Edward Island Water Management Agreement. The study investigated the available groundwater resources in selected communities across the Island and made recommendations regarding the most appropriate manner of developing and protecting this resource. Data was collected through test drilling, pump testing, and field reconnaissance, augmented by existing data.

Growing degree-days and crop production in Canada

Ottawa : Agriculture Canada, 1977. 63 p. : ill. ISBN 0-662-01138-4
MICROLOG 93-07921 1 fiche

The theory that a direct relationship exists between temperature and the rate at which a plant grows and develops is not new, but it remains viable. So do the methods for defining this relationship quantitatively. For this reason, it was decided to update a publication released in 1959 entitled 'Heat Units and Crop Growth'. In this updated version, climatic records for the current 30-year period are used. Another purpose for this report is to introduce the Celsius temperature scale in the calculation and application of degree-days.

A Growing success : Canada's performance under free trade

by D. Schwanen. Toronto : C.D. Howe Institute, 1993. 16 p. (Commentary ; no. 52) *At head of title: Trade policy.* ISSN 0824-8001 ISBN 0-88806-328-8
MICROLOG 93-08932 1 fiche

This paper updates and refines an analysis of the Canada-US Free Trade Agreement's (FTA) impact that appeared in the fall of last year and contains 3 substantive sections. The 1st looks at the role that exports and imports have played in affecting the direction of the Canadian economy since 1988, the year before the FTA was implemented. The 2d section analyzes trends in both exports and imports over the 1989-92 period, by comparing trade between Canada and the U.S. with trade between Canada and all other countries. It also examines the performance of goods ands services liberalized by free trade relative to the performance of other goods and services. The 3d section offers an overall assessment of the effects of the FTA so far and of the policy implications flowing from the analysis.

Growing the best : the future of agri-food in P.E.I. : the report

P.E.I. Task Force on Agriculture. Charlottetown : The Task Force, 1992. iv, 81 p.
MICROLOG 93-05494 1 fiche

Final report of the Task Force, established in January 1992 to recommend the role of the provincial government in the growth and development of the Island's agri-food industry over the next decade. The report first addresses the broad issues of the forces for change in the past, the present, and the future; then provides a strategy for the 1990s, including both economic and social areas; discusses the principles of reform, including the need for an integrated approach, leadership, service quality, quality assurance, and accountability, efficiency, and effectiveness, identifies future directions; and presents an implementation strategy.

Growth and settlement policy guidelines

Toronto : Ministry of Municipal Affairs, 1992. 11, 12 p. *Bilingual (Lignes directrices concernant les politiques et...).* ISBN 0-7778-0114-0
MICROLOG 93-02299 1 fiche

On April 9, 1992, the Minister of Municipal Affairs outlined a comprehensive strategy to speed up land-use planning decisions that would be environmentally sound and would support Ontario's economic recovery. The strategy focuses on improving the land use planning decision-making process to create new opportunities for jobs in the construction and development industries. As part of this economic recovery strategy, the government is clarifying and consolidating its policies and requirements for good planning decisions. This document contains some of the policies, requirements, and recommendations.

Growth of giant scallop juveniles *Placopecten magellanicus* at four sites on the Atlantic coast of Nova Scotia

S.l. : Canada/Nova Scotia Economic Regional Development Agreement, Fisheries Subagreement, 1989 56 p. : ill. Bibliogr. (ERDA report ; no. 18)
MICROLOG 93-04318 1 fiche

Spat of giant scallop were cultured at a shallow site (3 m) near Sambro, a mid-depth site (15 m) at Prospect, and deep (20 m) and mid-depth (12 m) sites near Graves Shoal and Andrews Island respectively in Mahone Bay. Scallop spat were collected in collector bags deployed in Passamaquoddy Bay, New Brunswick in September 1987. Spat collectors were sorted during July 1988 and spat of mean size 9-10mm were transported to the Nova Scotia sites in July and August 1988. Scallop spat were held in pearl nets and suspended throughout the water column from thermocline to within one metre of the bottom on subsurface suspension systems. Growth and survival was monitored once a month from August to December. A composite sample was measured for shell height, total in shell weight, and wet and dry viscera weight. A composite subsample was examined for wet and dry muscle weight. Data were tested for significant differences using regression and ANOVA analysis.

The GST and the provinces : state of negotiations -- Rev.

by R. Domingue. Ottawa : Library of Parliament, Research Branch, 1992. 20 p. Bibliogr. (Current issue review ; 91-4E) *French ed. (La TPS et les provinces : état des...) on the same fiche. Revised 15 May, 1992.* ISBN 0-660-14653-3
MICROLOG 93-00824 1 fiche

The possibility that provincial sales taxes will be harmonized with the federal goods and services tax (GST) introduced on 1 January 1990 is remote. Events in Saskatchewan and Quebec have radically altered the dynamic of the debate. This review discusses the agreements designed to bring about possible harmonization of provincial sales taxes and the federal GST. It discusses provincial attitudes to harmonization. It focuses on historical opposition, the economic benefits of harmonization, and the political price. It also looks at why some provinces have harmonized their sales tax with the GST, and the current position of the provinces.

GTA 2021 infrastructure : report

Provincial-Municipal Infrastructure Working Group (Ont.). Toronto : The Group, 1991. 139 p. : maps. *CSI 56327.200.*
MICROLOG 93-03677 2 fiche

The Infrastructure Working Group assessed the transportation and water/sewer infrastructure requirements required to serve and help shape the Nodal land use concept as broadly defined by the Urban Form Working Group. This report presents the findings of the group, providing first an overview of the strategic directions, including the cost implications, then a discussion of the context for the identified directions. Detailed information is given on transportation, including its importance, deficiencies and planned expansions, principles and major issues, needs and improvement options, and proposed priorities and policies. A description of the existing water and sewage facilities and their reserve capacity is given, along with planned expansions and capital budgets, infrastructure requirements to support the Greater Toronto Area vision, and proposed policies and priorities actions.

Un Guide au programme de contributions de Condition physique Canada, 1993-94

Condition physique Canada. Ottawa : l'Agence, 1992. 70, 62 p. *Bilingue (A Guide to Fitness Canada contributions...). CSI 22146.002.* ISBN 0-662-59428-2
MICROLOG 93-07073 2 fiche

Cette publication décrit en détail tous les aspects du Programme de contributions de Condition physique Canada pour 1993-1994. Elle s'adresse aux organismes qui sont intéressés à travailler en association avec Condition physique Canada pour élaborer et mettre en oeuvre des initiatives venant appuyer des priorités et des objectifs communs. Les lignes directrices du Programme de contributions comportent quatre sections. Dans le premier chapitre, le mandat et les objectifs de Condition physique Canada, ainsi que les priorités stratégiques connexes, y sont décrits. Le deuxième chapitre énonce les genres de contributions qui sont offertes aux organismes admissibles. Le troisième chapitre explique comment les organismes peuvent établir une demande dans le cadre du Programme de contributions. Le dernier chapitre renferme les politiques et les conditions auxquelles sont assujetties les demandes d'aide à Condition physique Canada.

Guide de référence en matière de recherche sur le plomb au Canada : une compilation des publications scientifiques, des connaissances techniques et des lois courantes

Hilcon Consultants. Ottawa : Société canadienne d'hypothèques et de logement, 1992. 258 p. *L'éd. anglaise (A Reference guide to lead research...) : 93-06327/2.*
MICROLOG 93-06143 3 fiche

Résumant la documentation existante sur les risques pour la santé liées à l'exposition du plomb au Canada, ce rapport est axé sur les études concernant l'exposition au plomb dans le milieu de vie, les effets sur la santé de la population canadienne et les mesures prises afin de diminuer l'exposition au plomb. Chacune des trois sections du rapport porte sur un aspect particulier de la recherche sur le plomb. La partie principale est constituée d'une bibliographie analytique des études canadiennes publiées depuis 1985. Chaque publication mentionnée porte sur un aspect de la recherche sur le plomb et a pour caractéristique d'avoir été élaborée dans un centre canadien ou d'être le résultat des travaux d'au moins un auteur canadien. La deuxième partie du rapport présente une liste d'experts et de centres canadiens de connaissances techniques, en décrivant brièvement leur champ de compétence. La liste est géographique, par ordre alphabétique des provinces. La dernière section est une compilation des lois et des lignes directrices canadiennes concernant les niveaux de plomb dans l'environnement et dans les divers produits de consommation. Vous y trouverez d'abord un résumé de la loi fédérale suivi, comme dans la section précédente, d'une liste des provinces par ordre alphabétique.

Guide des collectivités indiennes du Québec, 1990

Québec : Affaires indiennes et du Nord Canada, Région du Québec, 1991. 111 p. : cartes géogr. Bibliogr. *L'éd. anglaise (Quebec Indian community...) : 93-02163/2. CSI 22528.200F.* ISBN 0-662-96737-2
MICROLOG 93-02164 2 fiche

Ce guide dresse le portrait des collectivités indiennes situées sur le territoire du Québec et du milieu dans lequel elles évoluent. Dans ce texte, le terme 'indien', tel que défini par la Loi sur les Indiens, n'inclut pas les Inuit. Le vocable 'autochtone' est utilisé pour représenter à la fois les Indiens, les Inuit et les Metis. Au Québec, il y a 39 collectivités indiennes regroupées en dix nations. De brefs historiques rappellent l'évolution des nations. Chaque collectivité fait l'objet d'un portrait détaillé comportant des données sur la situation géographique, la population, l'économie, les services et l'infrastructure locale.

Guide des services en langue française, 1993

Winnipeg : Secrétariat des services en langue française, 1993. 224 p. *Bilingue (French language services guide, 1993). CSI 42255.001.*
MICROLOG 93-05010 3 fiche

Reconnaissant que la population francophone du Manitoba constitue un élément de l'une des caractéristiques fondamentales du Canada, le gouvernement du Manitoba établit sa politique en matière de services en langue française. Cette politique a pour but de permettre aux manitobains d'expression française et aux établissements qui desservent les collectivités francophones de bénéficier de services gouvernementaux offerts dans la langue des lois du Manitoba. Ce document présente le Guide des services en langue française 1993. Pour chaque organisme on donne le nom, les numéros de téléphone et de télécopieur, et l'adresse du coordonnateur des services en français. Ensuite on décrit l'organisme et ses agences, ses documents bilingues, et les bureaux.

Guidelines : waste management for marine oil spill response, British Columbia

by R.C. Marty, E.H. Owens and D.E. Howes. Victoria : Ministry of Environment, Lands and Parks, Environmental Emergency Services Branch, 1993. iv, 110 p. : ill. Bibliogr. *Cover title: Waste management guidelines for marine oil spill response in British Columbia*
MICROLOG 93-04729 2 fiche

This manual identifies options and presents guidelines for the separation, packaging, transportation, and disposal of waste materials recovered during coastal/marine oil spill response operations. The manual includes a classification of clean-up options; in-situ treatment options; guidelines for identification, classification, and sorting of oil spill waste materials; handling and disposal options for different waste types; general health and safety factors; and applicable legislation. A glossary is also included.

Guidelines for ARD prediction in the North

by Steffen, Robertson and Kirsten (B.C.) Inc. ; in association with B.C. Research and Development. Ottawa : Indian and Northern Affairs Canada, 1992. iii, 121 p. : ill. Bibliogr. (Northern mine environment neutral drainage studies ; no. 1) *Cover title: Guidelines for acid rock drainage prediction in the North.*
ISBN 0-662-20631-2
MICROLOG 93-08804 2 fiche

These guidelines are a first attempt to assist northern operators and others to deal with the issues in a systematic fashion, with a view to minimizing costs of prediction consistent with the complexity of rock types encountered. A review of acid rock drainage issues is followed by a review of control technology. Sampling and waste classification are reviewed and then guidance on prediction testing methods and associated cost estimated is provided. Nine northern case studies are also summarized, followed by a technical summary guide.

Guidelines for Canadian drinking water quality -- 5th ed.

Federal-Provincial Subcommittee on Drinking Water (Canada). Ottawa : Health and Welfare Canada, 1993. 24 p. *French ed. (Recommandations pour la qualité de l'eau...) on the same fiche.* ISBN 0-660-14950-8
MICROLOG 93-07684 1 fiche

Recent editions of the Guidelines for Canadian drinking water quality were prepared following a thorough review of the scientific, technical and medical literature on new parameters and on parameters whose guidelines required revision. This 5th edition includes the guidelines approved by the Conference of Deputy Ministers of Health as of June 1992. No evidence has been presented that would warrant changing the values proposed in the last edition. These values have, therefore, been adopted and are presented in this edition as confirmed guidelines. The guidelines and recommendations listed are intended to apply to all drinking water supplies, public and private, however, they should not be regarded as legally enforceable standards. This document provides an explanation of terms, a description of microbiological characteristics, chemical and physical parameters, and radiological characteristics. It concludes with a list of parameters under review or scheduled for review.

Guidelines for estimating 1993 crop production cost

by K. Kyle. Winnipeg : Manitoba Agriculture, Farm Business Management, 1993. 11 p. (Information update)
MICROLOG 93-03379 1 fiche

This publication is intended to provide a format and a set of guidelines for determining costs of production for 1993 crops, assuming continuous cropping. The budgets are estimates of the cost of producing a number of different crops. General department recommendations are assumed in using fertilizers and chemical inputs. The figures provide an economic evaluation of the crops and estimate the yields required to cover all costs including labour and investment. Management is not accounted for in the budgets.

Guidelines for monitoring benthos in freshwater environments

E.V.S. Consultants Ltd. North Vancouver, B.C. : Environment Canada, 1993 vii, 81 p. : ill. Bibliogr.
MICROLOG 93-07190 1 fiche

Historically, benthic invertebrates have been viewed as useful organisms for evaluating environmental impacts on aquatic systems because they are relatively sedentary, and are sensitive to changes in sediment and water quality. They also reflect the cumulative effects of past and present conditions because they have low mobility and life cycles of several weeks to years. These guidelines are a first attempt to standardize benthic sampling by focusing on quality assurance/quality control, definition of objectives, study design, field sampling, sample processing, data analyses, and reporting.

GVRD air management plan, stage 1 : appendices A1-A4

by Concord Scientific Corp., B.H. Levelton & Associates. Burnaby, B.C. : Greater Vancouver Regional District, Pollution Control Division, 1989. 209 p. : ill., maps. Bibliogr. *Cover title: GVRD air quality management plan, stage 1 report : assessment of current and future air quality : appendices A1-A4.*
MICROLOG 93-08114 3 fiche

The first appendix summarizes the climatology of the Lower Fraser Valley, especially the GVRD, with emphasis on those aspects affecting air pollution potential. First it considers the general climatological context of the region then the special local or mesoscale characteristics that lead to within-region climatic variability. The historical and current ambient air quality and the likely future air quality in the GVRD are discussed in the second appendix. In addition to the data collected routinely in the monitoring network, air quality information derived from special studies is included in this summary. The third appendix compares air quality regulations which are applicable to GVRD with corresponding regulations for other Canadian jurisdictions, as well as selected U.S. jurisdictions. In the fourth and final appendix, various modelling aspects of the Air Management Plan are addressed. Since one of the most important current air quality issues in the GVRD is related to photochemical oxidants, the role of photochemical models in the Air Management Plan has received the greatest emphasis. Other modelling requirements are addressed also. A review of more complex photochemical models is presented, and recommendations for the use of such models in the GVRD are discussed.

GVRD air management plan, stage 1 : appendix A5, current and future emissions

by Concord Scientific Corp., B.H. Levelton & Associates. Burnaby, B.C. : Greater Vancouver Regional District, Pollution Control Division, 1989. ix, 216 p. : ill., maps. Bibliogr. *Cover title: GVRD air quality management plan, stage 1 report : assessment of current and future air quality : appendix A5, current and future emissions.*
MICROLOG 93-08113 3 fiche

To proceed with development of an air management plan that incorporates programs to manage changes in air quality, growth in the number of sources of air pollution, pollution control strategies and other important factors, a comprehensive inventory of existing air emissions is required. Inventories of all major point, mobile and area sources of air emissions in the Lower Mainland was prepared by the GVRD and various consultants in 1987 and 1988 for 1985. The results for the GVRD are summarized in this appendix to establish a baseline for interpreting existing air quality and to form a basis for forecasting the quantity of each pollutant that might be emitted in future years.

Habitable attics : new potential for an old idea

Ottawa : Canada Mortgage and Housing Corporation, 1991. 36 p. : ill. Bibliogr. *French ed. (Les Combles habitables : des possibilités ...) : 93-01310/1.* ISBN 0-662-19256-7
MICROLOG 93-00732 1 fiche

Changes within the family structure require that housing be more flexible and adaptable to accommodate the needs of an increasingly diversified clientele with varied economic conditions and social lifestyles. This document looks at habitable attics as a way to accommodate the changing housing market. It points out how they would benefit the owner, the homebuilding industry, and the municipality. It also discusses designing homes with the habitable attic in mind. Finally it identifies the economic benefits of making the attic habitable.

L'Habitation : source de richesse

par M.-H. Pastor. Ottawa : Société canadienne d'hypothèques et de logement, 1992. 38 p. : ill. *CSI 22118.239*
MICROLOG 93-06168 1 fiche

Cette étude examine les effets du logement sur l'accumulation de richesses et sur la répartition des richesses entre les propriétaires et les locataires. Les données ayant servi à cette analyse proviennent principalement de l'Enquête sur les finances des consommateurs effectuée par Statistique Canada. L'étude décrit tout d'abord l'étendue de l'accession à la propriété au canada ainsi que les caractéristiques de revenu, d'âge et d'éducation des propriétaires par rapport aux locataires. Les raisons possibles pour lesquelles la propriété peut devenir une source de richesse sont ensuite examinées.

L'Habitation et les familles : de nouveaux besoins et de nouvelles tendances

par J. Hurtubise. Ottawa : Société canadienne d'hypothèques et de logement, 1991. 29 p. *L'éd. anglaise (Housing and families : new needs...) : 93-06155/1.*
MICROLOG 93-06169 1 fiche

Ce document porte sur les nouveaux besoins et nouvelles tendances en ce qui a trait à l'habitation et les familles. Pour approfondir et détailler l'analyse, on a utilisé deux angles d'observations. Le premier concerne non pas la segmentation proprement dite des familles mais leur anatomie, leur structure interne qui regroupe une femme, un homme et généralement un ou des enfants. L'analyse consiste ainsi à voir la famille sous l'angle d'une molécule composée de plusieurs atomes ayant chacun des caractéristiques et des besoins propres. L'analyse des besoins d'habitation particuliers des conjoints et des conjointes aide à identifier de nouveaux points de vues et de nouvelles pistes. Le deuxième angle d'observation consistait à voir l'habitation sous l'angle d'une autre molécule composée aussi de plusieurs atomes ou pièces ayant chacun ou chacune leurs fonctions propres. L'analyse de la fonction de chaque pièce d'une habitation, de son évolution et ce qu'elle signifie pour les conjoints et conjointes est aussi apte à identifier de nouveaux points de vues et de nouvelles pistes.

Habitudes tabagiques d'aujourd'hui et personnes âgées de demain

par N. Marcil-Gratton, P.-M. Huot et J. Légaré. Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, 1992. 120 p. : ill. Bibliogr. (Cahiers de recherche ; 10) *En tête du titre: Enquête santé Québec 87. CSI 66130.214.* ISBN 2-550-36334-0
MICROLOG 93-03810 2 fiche

Dans un premier chapitre, on présente le cadre d'analyse de l'étude. Après un bref rappel historique des hauts et des bas de la courbe de consommation de cigarettes depuis 1920, on discute de la pertinence d'en faire l'analyse du point de vue des diverses générations affectées, et des données disponibles et des variables utilisées. Au chapitre 2, on aborde la question de l'impact de l'usage de la cigarette au sein des générations en mesurant la fraction des membres d'une même cohorte qui sont devenus des fumeurs quotidiens au cours de leur vie, et l'âge auquel ils l'ont fait. Cela permet d'utiliser le comportement des jeunes actuels comme indicateur du recul du potentiel nocif du tabac sur la santé des générations montantes. L'importance de ce recul au tabac est examinée plus en profondeur au chapitre 3. Le chapitre quatre reprend les indicateurs de l'histoire tabagique des différentes générations et tente d'en évaluer l'incidence sur la façon dont les cohortes encore jeunes aborderont le seuil de la vieillesse. Finalement, le dernier chapitre tente de préciser les liens entre les modifications de comportement à l'égard du tabac et une amélioration prévisible de l'état de santé des personnes âgées de demain.

Haileybury area (NTS 31M/SW), districts of Nipissing and Timiskaming

by M.A. Roed. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1979. iii, 21 p. : maps. Bibliogr. (Northern Ontario engineering geology terrain study ; 90) *Fold. map not filmed.* ISSN 0709-4671 ISBN 0-7743-4366-4
MICROLOG 93-03074 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Haileybury area, districts of Nipissing and Timiskaming. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1977, roads in the area were traversed to provide spot checks on the photogeologic interpretation. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial, Eolian and organic landforms.

The Halifax area economy : an overview of the Halifax and area economy with parameters for an annual report on economic activity : discussion paper

Halifax : Halifax Development and Planning Dept., 1990. v, 51 p. : ill. Bibliogr.
MICROLOG 93-07586 1 fiche

This report presents a description of the Halifax metropolitan area economy and City of Halifax economic development policies outlining priorities and parameters for an annual report to Halifax City Council respecting economic activity. Economic base theory provides the framework for the discussion. Labour force growth rates and a number of published economic indicators augment the analysis. It provides a brief review of current economic development policies within the Municipal Development Plan and presents the ability of the city of Halifax to capture a share of economic growth within the region.

Hamilton Harbour water clarity response to nutrient abatement

by D.S. Painter, L. Hampson and K. McCabe. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1990. 28 p. : ill. Bibliogr. (NWRI contribution ; 90-14)
MICROLOG 93-07467 1 fiche

Hamilton Harbour is one of 42 areas of concern in the Great Lakes Basin. The provincial and federal government are committed to develop a Remedial Action Plan (RAP) to restore the beneficial uses of the Harbour. Swimming and fish habitat are two of the beneficial uses identified. Both uses require improvements in the Harbour's water clarity by decreasing phosphorus, chlorophyll, mineral and seston concentrations, thus increasing Secchi disc transparency. A pilot scale study was conducted in 1988 to assess the effectiveness of adding pickle liquor to the treatment process in an effort to remove phosphorus. Water clarity measurements for Hamilton Harbour, including Secchi disc transparency, seston, chlorophyll, and mineral concentrations have been gathered from 1987 to 1989. This report compares the three years of data to determine if a significant increase in water clarity conicided with the loading reduction.

The Harvest potential and dynamics of lake trout populations in Ontario

Ontario. Ministry of Natural Resources. Lake Trout Synthesis. Population Dynamics Working Group. Toronto : The Ministry, 1990. iv, 72 p. : ill. Bibliogr.
MICROLOG 93-01598 1 fiche

A method for estimating the potential harvest of lake trout from a temperature-based volumetric measure of lake trout habitat was reformulated to increase its relevance to Ontario lakes and decrease its data requirements. Arguments are given for choosing this method over the past practice of partitioning the MEI yield. Provincial standards for lake trout length-at-age and weight-at-length are developed for use in comparative studies of lake trout populations and stress diagnosis. An empirical method of estimating von Bertalanffy growth parameters is introduced to deal with problems of bias in lake trout length and age data. Fecundity, age at maturity, and natural mortality data are compiled as partial descriptions of these aspects of lake trout dynamics. A method of estimating optimal fishing mortality and size at recruitments from growth parameters alone is described and tables are developed which facilitate its applications to lake trout and the relevance of such an application is tested. An age-structured model which integrates knowledge concerning habitat limitations with knowledge about internal population behaviour is also used to estimate the level of fishing mortality consistent with maximum sustainable yield.

Health and social service workforce in Alberta, 1992

Edmonton : Alberta Health and Social Services Disciplines Committee, 1992. 46 p. : ill. *CSI 35120.003.* ISSN 1184-650X
MICROLOG 93-04058 1 fiche

Results of the annual survey of health and social service employers, conducted in 1992. The survey requests employers to provide specific information on full-time and part-time permanent personnel, vacant positions, resignations, casual/contract/temporary personnel, and employer recruitment difficulties. The report provides highlights of the survey, as well as detailed information on permanent personnel, vacancy rates, turnover rates, recruitment difficulties, and employer groups.

Health Aspects of Environmental Impact Assessment : proceedings of a national workshop

Health Aspects of Environmental Impact Assessment. Workshop (1987 : Ottawa, Ont.). Hull, Que. : Canadian Environmental Assessment Research Council, 1987. 53 p. (Manuscript report ; MR2-87) *French ed. (Les Aspects de la santé...) : 93-05357/1.*
MICROLOG 93-06020 1 fiche

This national workshop was convened to review the role that health professionals have played in environmental impact assessment in Canada, and to discuss mechanisms for achieving greater involvement in the future. Case studies include the historical development of environmental impact assessment in Europe, particularly the Netherlands and Poland; the environmental impact assessment for the Lepreau 2 Nuclear Generating Station in New Brunswick, and a description of environmental impact assessment in Mexican development projects.

Health inequalities in the City of Toronto : technical report

Toronto : Toronto Dept. of Public Health, Community Health Information Section, 1991. iii, 160 p. : ill., maps. Bibliogr. *CSI 89145.200.*
MICROLOG 93-01648 2 fiche

This report looks at both inequality and equity in public health. It focuses primarily on inequality presenting the results of new research which shows that some people in the City of Toronto live longer than others, and some people suffer more than others from sickness and disability. It also examines equity showing that this same data suggests that the differences in health status occur because of differences in living conditions, some people have more opportunity than others to enjoy good health. It discusses the link between country of birth and mortality and presents an ecological analysis of mortality. It also includes survey research on risk factors and risk conditions and identifies patterns of health inequalities.

Health policy in Canada -- Rev.

by A. Saouab. Ottawa : Library of Parliament, Research Branch, 1992. 24 p. Bibliogr. (Current issue review ; 88-6E) *French ed. (La Politique en matière de santé...) : 93-00939/1. Revised March, 1992.* ISBN 0-660-14626-6
MICROLOG 93-03137 1 fiche

Responsibility for matters related to the health of Canadians is shared between the federal and provincial governments. Health policy can be divided into two categories: health care and health promotion. Most improvements in the health status of Canadians in the past have been attributed to health care measures. Certain demographic trends, however, suggest that hope for still further improvements in the health of Canadians may lie in health promotion. This document looks at the responsibility of the government for health, the health care system, financing the health care system, challenges facing the health care system, and health promotion.

Heat tolerance of tree seedlings and its importance to nursery managers

by S.J. Colombo. Toronto : Ministry of Natural Resources, Ontario Forest Research Institute, 1992. 10 p. : ill. Bibliogr. *Presented at Provincial Nursery Growers Conference.*
MICROLOG 93-06142 1 fiche

Environmental stresses such as freezing and heat are important factors that affect the nursery production of tree seedlings. While frost hardiness of tree seedlings has received a great amount of attention, heat tolerance has not been so great a concern to nursery managers, although it and heat damage are important factors that affect container seedling production in Ontario. This paper describes some factors that influence the heat tolerance of seedlings, and what importance this has in container nursery management.

Heat-affected zone toughness of ship plate : final report

by N. Pussegoda and L. Malik. Kanata, Ont. : Fleet Technology Limited, 1992. i, 34 p. : ill. Bibliogr. *CANMET contract: 23440-1-9158-01-SQ*
MICROLOG 93-01575 1 fiche

This study was performed to complete the toughness characterization of the weld heat-affected (HAZ) of the WP steel plate that conforms to ABS Grade DH36 (ship steel) requirements. The weld represented typical shipyard practice for mechanized submerged arc welds of 25 mm thick plate. Previous work assessed the crack arrest behaviour and the nil-ductility transition (NDT) temperature of the HAZ. The present work determined CTOD toughness of the grain-coarsened HAZ and the sensitivity of the less expensive CVN test to the GCHAZ.

Height-of-the-Rockies wilderness area : wilderness management plan

prepared by Cranbrook Forest District and Invermere Forest District. S.l. : The Districts, 1993. 68 p. : ill., maps.
MICROLOG 93-08073 1 fiche

This is the first wilderness management plan for a designated provincial forest wilderness area in British Columbia. As such, it not only provides comprehensive, long-term guidance for managing the Height-of-the-Rockies wilderness area, it also serves as a prototype plan and makes an important milestone in the on-going process of protecting wilderness in the province. The plan Highlights section summarizes the overall goals for the Height-of-the-Rockies wilderness area and points out some key issues and concerns. It summarizes management objectives and describes appropriate actions and guidelines. Section 1 gives background information, sets out the purpose for this plan and outlines the process that led to wilderness designation. Section 2 presents the administrative framework for managing the wilderness area. Section 3 details the current situation and assumptions, management objectives, policy direction, and specific actions and guidelines for managing the natural and cultural resources of the Height-of-the-Rockies, while section 4 gives details for managing the public use. Section 5 describes how this management plan will be implemented and reviewed.

Hemispheric trade liberalization : is the NAFTA on the right track?

by R.J. Wonnacott. Toronto : C.D. Howe Institute, 1993. 20 p. Bibliogr. (Commentary ; no. 49) ISSN 0824-8001
MICROLOG 93-06002 1 fiche

This document addresses the following questions germane to deciding whether or not it is in Canada's interest to ratify the North American Free Trade Agreement (NAFTA): In liberalizing trade in the Western hemisphere and possibly beyond, where do we want to go, and how do we get there? What sort of a trading system do we want to develop eventually? Is the NAFTA on the right track? The paper argues that an all-inclusive, plurilateral free trade area is the appropriate track for trade liberalization, and the NAFTA is on it.

This document provides a brief description of the district, the project purposes, and the implementation processes. It presents literature and research which provided a support basis for the project and provides a description of the action research design. It also discusses the OBE model and presents findings in the areas of student achievement, responsibility, and attitudes. Finally, it discusses the implications of the project for the district and other jurisdictions.

MICROLOG 93-01057 2 fiche

This document represents the first effort of its kind to describe the Canadian post-secondary system in its entirety, bringing together the two major realms of the community colleges and the universities. The study involved collaboration on the part of a substantial number of scholars from across Canada. It contains papers on the following matters: higher education systems in Canada, higher education organizations, the staff of post-secondary institutions, students, programs, research, the service function of Canadian higher education in Canada and abroad, and higher education as a field of inquiry in Canada.

Highlights of the bio-food industry, 1990

Quebec : Gouvernement du Québec, Ministère de l'agriculture, des pêcheries et de l'alimentation, 1990. iii, 63 p. Bibliogr. *French ed. (Profil sectoriel de l'industrie...) : 92-00415/1. CSI 67331.002.* ISBN 2-550-21157-X
MICROLOG 93-01947 1 fiche

The bio-food industry is one of constant evolution and its importance to Quebec's economy requires a comprehensive knowledge of its various sectors of activity. This document comprises four chapters and updates statistics of 1989. Chapter one presents an economic profile of the bio-food industry, dealing with overall economic performances, the food and beverage sector and international trade. The remaining chapters deal respectively with livestock production, market and economic conditions. These analyses are accompanied by a table of statistics showing the progress of principal economic indicators over the last few years, for a general view of performances in each sector.

Hindcasting extreme Beaufort Sea storms : final report

MacLaren Plansearch (Firm). Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. 63 p. : maps. Bibliogr. (Report ; no. 89-12)
MICROLOG 93-00226 1 fiche

This report describes procedures used to hindcast marine winds for 14 severe Beaufort Sea storms on a 20-minute latitude by 60-minute longitude grid. The procedures were developed by MacLaren PlanSearch Ltd. and Dr. V. Cardone of Oceanweather Inc. and are incorporated into a Beaufort Sea Storm Hindcast System implemented on a Compaq 386 microcomputer. Special modifications were made to the marine Planetary Boundary Layer Model for winter Arctic conditions, which are characterized by low inversion heights and large geostrophic/surface wind turning angles, and for marginal ice zone conditions. This report provides a brief description of the methodology, analysis procedures, and some of the hindcast results.

An Historic N.W.T. flood : 1988 flooding in the Liard and Mackenzie River basins

by J.N. Jasper and J.A. Kerr ; with special contributions from Atmospheric Environment Service, Environment Canada. Yellowknife : Environment Canada, Western & Northern Region, Conservation & Protection, Inland Waters Directorate, N.W.T. Programs, 1992. v, 73 p. : ill., maps Bibliogr.
MICROLOG 93-01679 1 fiche

From 28 June-3 July 1988, unusual weather conditions produced a major rainstorm over northeastern British Columbia, northwestern Alberta and the southwestern part of the Northwest Territories. A second major rainstorm occurred in the Liard River basin from 11 July-15 July 1988. These two storms caused substantial damage throughout the area and historic peak flows for the Hay River, Liard River and its tributaries and the Mackenzie River downstream from its confluence with the Liard River. The floods also increased the transport of sediment, redistributed existing channel materials and caused significant downstream changes along the Mackenzie River and the Mackenzie Delta. This report documents the causes, magnitudes and impacts of the 1988 floods.

Historical aspects of Highwood River diversion to Little Bow River basin at High River -- Rev.

Northwest Hydraulic Consultants Ltd. Edmonton : Alberta Environment, Technical Services Division, 1992. i, 80 p. : ill., maps. *Fold. map not filmed.*
MICROLOG 93-02116 2 fiche

The town of High River is centred along the divide separating the Highwood River and Little Bow River watersheds. Support by irrigators along the Little Bow River for the current plan to increase the quantity of water diverted into the Little Bow Canal is based on their opinion that there is historical precedent for natural spillover in the amounts and frequency contemplated. This study was conducted to provide an understanding of the Highwood River to Little Bow River interbasin flow process during the last 100 years; the extent to which human activities have affected the interbasin flow process; the reason for building the Hoeh Dike and its objectives, and the impact of removing it; the reason for constructing the Little Bow diversion canal and its relationship to the Hoeh Dike; and whether a complete or partial river diversion might have occurred if the Hoeh Dike had not been maintained. Information was taken from archives; a careful ground inspection of spillover areas, diversion sites, dikes, flood channels and road embankments; and water surface profiles for the Highwood River from the Hoeh Dike to High River Town for flood peak discharges ranging up to the 100-year return period.

Homelessness in Canada -- Rev.

by P. Begin. Ottawa : Library of Parliament, Research Branch, 1992. 19 p. Bibliogr. (Current issue review ; 89-8E) *French ed (Les Sans-abri au Canada) on the same fiche. Revised 12 May, 1992.* ISBN 0-660-14638-X
MICROLOG 93-00858 1 fiche

Adequate, secure shelter is considered basic to human and social health and development. It was estimated in 1986 that over one billion of the world's inhabitants did not have access to adequate housing; of those, a hundred million had substandard shelter or no shelter at all. In Canada, estimates of people who had substandard or no shelter in 1986 were between 130,000 and 250,000. This document discusses defining homelessness, counting the homeless, the composition of the homeless, the shortage of affordable housing, and responses to homelessness.

Homelessness in Canada : the report of the national inquiry

by M.A. McLaughlin. Ottawa : Canadian Council on Social Development, 1989. 17 p.
MICROLOG 93-05270 1 fiche (Available on fiche only)

Adequate shelter is one of the most basic of human needs. And yet, around the world, an estimated 100 million of the one billion people living in poverty have no place to live at all. This report summarizes a year-long study of homelessness in Canada. It includes reports of a snapshot survey of agencies which provide shelter and related services to those in need of temporary and emergency help, as well as reports from workshops all across the country.

Homogeneity testing of monthly temperature series : application of multiple-phase regression models with mathematical changepoints

by D.W. Gullett, L. Vincent and L.H. Malone. Downsview, Ont. : National Hydrology Research Centre, Atmospheric Environment Service, Canadian Climate Centre, 1991. iv, 47 p. : ill. Bibliogr. (Report ; no. 91-10)
MICROLOG 93-02348 1 fiche

This report describes the method used to identify inhomogeneities in monthly temperature series, based on an analysis of inconsistencies between the series being tested at the base station and a reference series produced by some surrounding stations. Regression models are used to define the relationship between these series. Parameters corresponding to inhomogeneities, and in particular, to step changes and trends, are introduced in the models and are estimated and tested for statistical significance. Residuals are also analyzed to determine if the remaining variation can be better explained by another model with the addition of another inhomogeneity or changepoint.

Host and vector surveys for the pinewood nematode *Bursaphelenchus xylophilus* (Steiner and Buhrer) Nickle (Nematoda: aphelenchoididae) in Canada

W.W. Bowers, J. Hudak and A.G. Raske, editors ; with contributions by L.P. Magasi...et al. St. John's : Forestry Canada, Newfoundland and Labrador Region, 1992. viii, 55 p. : maps. Bibliogr. (Information report ; N-X-285) *CSI 22397.200.* ISSN 0704-7657 ISBN 0-662-19919-7
MICROLOG 93-06404 1 fiche

The pinewood nematode is an important forest pest because it causes wilting and considerable tree mortality, particularly in Japan. It was first reported in Manitoba in 1982, although there are no cases of tree mortality in Canada. It is ranked in the first level as a potentially important pest internationally and the Scandinavian countries have restricted the importation of conifer chips and timber from countries where the pest is known to occur, a major concern of Canadian forest managers and lumber exporters. In 1985, the Forest Insect and Disease Survey began a nationwide survey to determine the distribution of the pinewood nematode. This report briefly reviews its history and biology and presents the results of the Canadian survey.

Housing a nation : the evolution of Canadian housing policy

H. Peter Oberlander, Arthur L. Fallick, co-authors ; George Anderson, editor ; prepared by Centre for Human Settlements, University of British Columbia. Ottawa : Canada Mortgage and Housing Corporation, 1992. ii, 164 p. Bibliogr. *French ed. (Un Toit pour tous : l'évolution...) : 93-00797/3.* ISBN 0-88865-391-3
MICROLOG 93-00798 2 fiche (Available on fiche only)

The origins and evolution of Canadian housing policy, and the sometimes colourful personalities which shaped them, have been discussed and debated over the years, but have not been chronicled systematically. This document aims to fill this gap. It discusses the beginning of the policy and the emergence of federal initiatives including the Halifax disaster, the 1918-24 federal housing program, the Dominion Housing Act, the 1938 Housing Act, and wartime housing limited. It looks at social change and post-war reconstruction and the 1918-46 period.

Housing affordability in Canada : are we addressing the problem?

edited by Tom Carter. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1990. iii, 44 p. Bibliogr. (Occasional paper ; 24) *CSI 97965 205.* ISBN 0-920213-47-2
MICROLOG 93-02879 1 fiche (Available on fiche only)

This document contains three papers which explore a number of issues concerning housing affordability. The first paper discusses problems with the traditional measure of affordability. It looks at whether government policies and programs become more effective over the post-war period in addressing affordability problems. It also discusses alternative approaches to the problem. The second paper examines trends in homeownership since World War II, discusses the advantages and disadvantages of ownership, assesses post-war government policy, and concludes with proposals for a new homeownership policy for low-income households. The final paper examines the role played by a number of government, private sector, and non-profit agencies in addressing affordable housing.

Human resource planning for the space industry in Canada

National Industrial Adjustment Services Committee: Space Projects ; in partnership with Canadian Labour Market and Productivity Centre. Ottawa : The Centre, 1989. 74, 78 p. : ill. *Bilingual (La Planification des ressources humaines...). CSI 97971.207.*
MICROLOG 93-06938 2 fiche

This study's purpose is to determine the nature and extent of the human resource shortage, to assess the effectiveness of various institutions, programs and policies in assisting the space industry and to develop strategies that will assist the industry in human resource planning. It first provides an overview of the industry followed by an industry profile in order to place human resource planning firmly in the context of the nature of the industry. Problems with occupational classifications and key occupational shortages are identified. Issues concerning recruitment, education and training follow. Finally, the industry's view of relevant government policies is discussed.

Human resources in the Canadian broadcasting industry : project report

prepared by Peat Marwick Stevenson & Kellogg ; assisted by Abt Associates of Canada... et al. ; for the Canadian Broadcasting Industry, Human Resources Steering Committee. Ottawa : Employment and Immigration Canada, 1993. iii, 120 p. : ill. *Bilingual executive summary (14, 16 p.) laid in. CSI 21126.214.*
MICROLOG 93-04198 2 fiche

Study to provide an analytical foundation for developing long-term human resource strategies that would improve the competitiveness of the Canadian broadcasting industry, including cable services and program production. The study was also expected to make an important contribution to the advancement of the Labour Force Development Strategy, which is designed to ensure that workers have the skills required in the 1990s and beyond, to bring about a significant increase in private sector investment in training, and to emphasize the need to redress labour market inequities. The report describes the Canadian broadcasting industry in 1992; the trends, issues, and demographic realities; the human resource implications of technological change; the competitive successes of the Canadian broadcasting industry; and an implementation strategy.

Human resources in the environment industry : summary report

Ernst and Young (Firm). Ottawa Employment and Immigration Canada, Steering Committee of the Environment Industry, 1992. iv, 35, iv, 37 p. : ill. *Bilingual (Les Ressources humaines dans l'industrie...). CSI 21126.211.*
MICROLOG 93-03758 1 fiche

Description of the nature and magnitude of the human resource issues facing the environment industry in Canada. Research included an examination of current literature and data, 222 interviews with industry, government, and the academic community, five case studies; and 16 focus groups with employers, employees, and students from colleges, universities, and secondary schools. The report concentrates on the industry, its size and structures, the factors affecting it, and the outlook and issues; employment size and structure, demand and supply, and skill shortages; and education and training needs and issues

Human rights and democracy : the role of the Commonwealth -- Rev.

by P. Rosen, M. Young and W.R. Young. Ottawa : Library of Parliament, Research Branch, 1992. 21 p. Bibliogr. (Background paper ; BP-246E) *French ed. (Les Droits de la personne...) on the same fiche. Revised October, 1992.* ISBN 0-660-14914-1
MICROLOG 93-07435 1 fiche

The language of human rights has, in recent years, come to be commonly used in legal, policy and political vocabularies. This is true not only at the domestic level, but also in the area of international relations, where human rights and their linkage to domestic democratic processes and international economic and political development have also come to be important. This was not always the case. This paper was prepared to discuss ways in which the Commonwealth has contributed to and can safeguard and promote democracy and human rights both within its member status and among other states.

Human rights and the courts in Canada -- Rev.

by N. Holmes. Ottawa : Library of Parliament, Research Branch, 1992. 16 p. Bibliogr. (Background paper ; BP-279E) ISBN 0-660-14655-X
MICROLOG 93-01894 1 fiche

Although universally embraced in principle, the concept of 'human rights' evades a precise definition and is subject to a general lack of consensus on how it should be approached. To speak of human rights requires a conception of rights possessed simply by virtue of being human. Human rights tend to represent individual and group demands for access to wealth and power and for mutual respect This document includes historical information from confederation to the Bill of Rights, the Bill of Rights era, and the advent of the Charter.

Human rights in the school : guidelines for educators, students, parents and other school participants

Winnipeg : Manitoba Human Rights Commission, 1991. i, 48 p. Bibliogr. *French ed. (Les Droits de la personne...) : 93-00644/1.*
MICROLOG 93-00643 1 fiche

This guide contains eight chapters designed to take the reader step by step through an examination of human rights practices in the school. It provides an introduction to human rights, an overview of the process for implementing the guide, and diagnostic checklists which address standards for adherence to human rights principles throughout the school environment. The checklists are broken down into those human rights principles which might be considered most relevant to schools: justice, democracy, fundamental freedoms, and equality.

Humanitarian immigration and Canadian immigration policy -- Rev.

by G Purves. Ottawa : Library of Parliament, Research Branch, 1992. 15 p. Bibliogr. (Current issue review ; 80-10E) *Reviewed 14 April, 1992. French ed (L'Immigration humanitaire et...) : 93-01829/1.* ISBN 0-660-14596-0
MICROLOG 93-00953 1 fiche

There are many issues connected with Canadian refugee policy. The focal point of this study is the historically close association of an essentially humanitarian concern--the treatment and resettlement of those who cannot return to their homelands for one reason or another--with a basically self-interested or pragmatic concern--immigration policy. It is indisputable that there should be some connection between the two concerns; at issue is the degree of this connection and the extent to which the criteria of immigration policy should be applied to the selection of refugees abroad for resettlement in Canada.

Huron paleoethnobotany

by S.G. Monckton. Toronto : Ontario Heritage Foundation, 1992. x, 226 p. : ill., maps. Bibliogr. (Ontario archaeological reports ; 1) ISBN 0-7778-0172-8
MICROLOG 93-06303 3 fiche

This study documents plant remains from four historic Huron village settlements and the Jesuit mission, Sainte Marie I. The study investigates how the Huron were able to support such large populations in the northern temperate forest, reconstructs their plant food diet from archaeobotanical data, examines the implications this diet would have had for the logistics of food production, examines interrelationships between the people and local environments (specifically vegetation), and compares results presented with conclusions reached by other investigators who used ethnohistoric literature.

Hydraulic design and model tests results for BRISAY and LG1 projects

by E. Desbiens and H. Do. Montreal : Canadian Electrical Association, Hydraulic Power Section, 1992. 18 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06052 1 fiche

This paper covers the hydraulic design and model development for the BRISAY and LG1 projects that are both part of the phase two of the La Grande Complexe. The contract specified a cavitation warranty of 2 kg in 10 000 hrs that is very tight for machines of that size and a runaway test to be conducted on the Kaplan prototype at site. The hydraulic design of the water passages has been fully optimized with a special emphasis on the runners. An exhaustive final test series has been carried out on both projects to provide information for the mechanical design of the prototype. A comparison of the model test results between normal and runaway operating conditions is presented. The effect of the water recirculation at the exit of the draft tube is also discussed for BRISAY.

Hydraulically actuated dual-bucket sampler for compacted or coarse-grained bottoms

by W.J. Scott, F. Pooroohasb and M.L. Kanzig. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 13 p. : ill. (C-CORE publication ; no. 92-1)
MICROLOG 93-07747 1 fiche (Available on fiche only)

As part of a research program in marine minerals, C-CORE has been experimenting with the design of samplers for compacted or coarse-grained bottoms. A sampler was designed and tested, and through trial and error, a second one was designed. This paper presents the geotechnical considerations that led to the penetration characteristics of the sampler, and then discusses some of the details of the design of the dual-bucket version of the sampler.

Hydraulically-operated grab sampler

by W.J. Scott. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1992. 1 p. : ill. (C-CORE publication ; no. 92-F) *In* Dialogue for Engineers and Geoscientists : *September, 1992*
MICROLOG 93-07761 1 fiche (Available on fiche only)

In the Marine Minerals research program at C-CORE, there has been an increasing need for a grab sampler which is capable of collecting samples from coarse-grained or compacted bottoms. Such a sampler would be useful for appraisal of offshore sand and gravel, as well as in support of exploration for marine placer deposits. This paper discusses the hydraulically-operated grab sampler designed and tested on various surfaces.

Hydro Quebec boiler life assessment program at Tracy Thermal Generating Station

by W.R. MacDonald and P. Kratina. Montreal : Canadian Electrical Association, 1991. 16 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06244 1 fiche

An overview is presented of a major boiler component inspection and engineering analysis project carried out on Hydro Quebec's Tracy thermal generating station. Descriptions are provided which outline the methodology and scope for critical components including thick walled pressure vessels, boiler tubing sections, high energy piping, and various auxiliary equipment such as firing systems, ductwork, structural supports, feedwater heaters, instrumentation and specific mechanical attachments. Important results are described relating to the program. General conclusions are made related to the integration of all sources of information which would allow engineers to confidently analyze the present status of a component's condition and predict the component's likely future serviceability.

Hydro-Quebec : Annual report 1992

Montreal : Hydro-Quebec, 1993. 86 p. : ill. *French ed. : 93-05929/1. CSI 67145.001.*
ISSN 0702-6749 ISBN 2-550-27275-7
MICROLOG 93-04606 1 fiche

Hydro Quebec is a publicly owned utility constituted by an Act of the Quebec Legislative Assembly in April 1944. In 1981, it became a joint stock company with a single shareholder: the Quebec government. It generates, transmits and distributes almost all the electricity consumed in Quebec and also sells and purchases both energy and power under agreement with neighboring systems in Canada and the United States. The annual report discusses the quality of service, demand and markets, saving energy, consumption, technological development, public relations, the environment, the economic and social contribution, and employees. Includes a financial review, financial statements and a five-year review, a list of the Board of Directors and senior management, descriptions of subsidiaries and affiliates and statistics covering the power system in 1992.

MICROLOG 93-06219 1 fiche

Based on a distributed architecture, ALCID (Automatismes locaux et conduite par intelligence distribuee) is a real-time control system for electrical substation control that is built of stand-alone subsystems that communicate via a local area network. The subsystems comprise data acquisition and control units that acquire data and execute control commands including automatic control, a central control unit with a person-machine interface for control and supervision of the substation, and a gateway that interfaces with remote control and supervision centers. A description is presented of ALCID architecture, control functions, development and commissioning, and long-term evolution.

Midwater trawl tows were conducted to obtain Pacific herring samples and to confirm species composition of major aggregations determined by echogram interpretation. Survey grid patterns were based on results from previous winter acoustic and fishing surveys. The hydroacoustic biomass estimates determined during the survey are based on standard echo integration procedures and are compared with model based statistical stock forecasts and estimates that use spawn surveys and analyses of catch and age structure.

A Hydroacoustic survey of Pacific hake on the continental shelf off British Columbia from the Canada/U.S. boundary to Queen Charlotte Sound, August 13 to 28, 1991

by K. Cooke...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1992. iv, 40 p. : maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2174) ISSN 0706-6473
MICROLOG 93-03491 1 fiche

Pacific hake is a migratory species that spawns annually in United States waters off California and feeds during the summer months from northern California to Queen Charlotte Sound. Pacific hake is a valuable resource that is harvested by annual fisheries in the U.S. and Canada, with quotas fully subscribed in recent years. Hydroacoustic estimates of abundance of this stock are used in assessments and in studies of the factors influencing distribution. This report describes the 1991 follow-up survey of the area from the Canada/United States border northward along the west coast of Vancouver Island to Triangle Island and into Goose Island Gully in Queen Charlotte Sound to determine the distribution and abundance of hake. Mid-water trawls were conducted to verify acoustic targets and to examine the hake size distributions and age compositions as a function of latitude. Hake distributions were also examined in relation to plankton aggregations and oceanographic parameters. Additional research examined hake behaviour, acoustic survey strategy and variability in acoustic abundance estimation.

Hydrochemistry assessment of mine water, Gays River Lead-Zinc Mine, Milford Station, Hants County, NS : final report

Jacques, Whitford Environment Limited ; to Westminer Canada Limited. S.l. : Canada-Nova Scotia Cooperation Agreement on Mineral Development, 1992. 59 p. : ill., maps. Bibliogr. *Cover title: A Study on the control of groundwater hazard at Gays River Mine, vol. V : hydrochemistry assessment of mine water, Gays River Lead-Zinc Mine. Fold maps not filmed. CANMET contract: 23440-0-9235-01-SQ.*
MICROLOG 93-01551 2 fiche

This report outlines a study to assess and investigate sources of groundwater inflow to Westminer Canada Ltd.'s Gays River lead-zinc mine in Nova Scotia. This report deals specifically with the review and assessment of baseline monitoring data provided by Westminer and the interpretation of hydrochemical data collected in June 1991. The temporal variability of the mine flows is addressed through review of mine discharge and tailings pond chemistry monitoring data collected over the past two years. The spatial variability of mine water chemistry is addressed through the 1991 field sampling program results. Emphasis is placed on new data collected in 1991.

Hydrogen absorption-desorption at metal surfaces

by C.A. Ward and L. Pataki. Ottawa : Atomic Energy Control Board, 1991. v, 52 p. : ill. Bibliogr. (Research report ; INFO-0379)
MICROLOG 93-08405 1 fiche

On the basis of experimental studies, it has been proposed that when zirconium oxide (ZrO2) is exposed to hydrogen at 300C or higher, a reaction occurs to produce metallic zirconium and water, thereby increasing the electrical conductivity of the oxide film and its permeability to hydrogen. It is conventionally proposed that when ZrO2 is exposed to a reducing atmosphere, the oxide undergoes these changes because of oxygen diffusing to the substrate and leaving behind anion vacancies. To distinguish these two mechanisms, a series of experiments were performed in which the distinction between the conventional mechanism of the dissipation of the protective properties of ZrO2 and the mechanism proposed is used to identify the actual mechanism. The components produced in the gas phase when a ZrO2-Zr specimen containing hydrogen is heated in an atmosphere that is initially free of hydrogen is used as a means of distinguishing these mechanisms.

Hydrogeochemical studies and interpretations related to mineralogical studies of sulphide-rich tailings : final report

by D.W. Blowes. Waterloo, Ont. : University of Waterloo, Research Institute, 1992. xvi, 440 p. : ill., maps. Bibliogr. *CANMET contract: 23440-0-913401-SS*
MICROLOG 93-04281 5 fiche

Description of the mechanisms controlling the generation and movement of low-quality waters that are acidic or neutral in pH and contain high concentrations of dissolved constituents in their tailings impoundments at the Waite Amulet copper-zinc mine in Quebec, Heath Steele zinc-lead mine in New Brunswick, and the former Delnite gold mine in Ontario. The report also describes supplementary field studies conducted at three inactive nickel mine tailings impoundments in Sudbury basin, and research initiated at the Kidd Creek complex massive sulfide mine tailings impoundment near Timmins, Ontario. The results of these studies are compared to those obtained from the other three impoundments to assess the effects of variable mineralogy and hydrogeological conditions on the resulting pore-water chemistry and potential environmental effects of the tailings impoundment. Finally, the report describes the application of the data collected from the field sites to assess passive geochemical approaches to the abatement of low-quality mine drainage waters, including an assessment of the role of hardpan layers in controlling the movement of pore gases in tailings impoundments and the potential for the enhancement of the formation of hardpan layers.

Hydrology of drained and undrained black spruce peatlands : streamflow and hydrologic balance

by G.J. Berry. S.l. : Canada-Ontario Forest Resource Development Agreement, 1991. iv, 25 p. : ill. Bibliogr (COFRDA report ; 3317) ISSN 0847-2866 ISBN 0-662-18738-5
MICROLOG 93-00730 1 fiche

In Ontario, more than eight million hectares of productive black spruce forest are estimated to occur on peatland. Because peatlands are a complex and diverse ecosystem, the effects of drainage on peatlands will vary depending on the basins. Development guidelines for drainage require research into the ecological changes that drainage can cause in peat environments. In 1984, a project was begun to study forest drainage and produce the necessary management guidelines. This paper is one of a series dealing with the hydrological impacts of drainage at the Wally Creek Area forest drainage project. This study examined the influence of drainage on the water balance of forested swamps of the main peatland site types as determined from the forest ecosystem classification. Hydrological parameters were measured during snowmelt and snowfree periods from 1987-89 in forested drained and undrained peatland basins.

I/Q demodulation of radar signals with calibration and filtering (U)

by J.P.Y. Lee. Ottawa : Defence Research Establishment Ottawa, 1991. xi, 58 p. : ill. Bibliogr. (Report ; no. 1119)
MICROLOG 93-02839 1 fiche

Due to the increasing density and complexity of radar signal waveforms, it is no longer easily possible to sort out and identify each radar emitter using such conventional signal parameters as pulse width, radio frequency, amplitude and pulse repetition frequency. This report describes the measurement of amplitude, phase and instantaneous frequency of radar signals of a simple phase-in/quadrature (I/Q) demodulator architecture. A time-domain analysis on the effects of phase and amplitude imbalance between the I and Q channels and DC offsets is given and a calibration technique that can be used to compensate for the imbalances and offsets is discussed. The effect of noise on the measurement is analyzed and imbalance errors and DC offsets of I/Q networks are measured and analyzed. Finally, a post-processing technique employing moving averages that can be used for improving the output signal-to-noise ratio and reducing systematic errors is also presented.

Ice flow and glacial transport in lower St. Lawrence, Quebec

by M. Rappol. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1993. 28 p. : ill., maps. Bibliogr. (Paper ; 90-19) *Fold. maps not filmed.* ISSN 0068-7650 ISBN 0-660-14952-4
MICROLOG 93-05736 1 fiche

The study area is located on the south shore of the St. Lawrence estuary and comprises most of the Lower St. Lawrence region and part of adjacent Gaspesie, west of Matapedia and lower Matane Valleys. Observations were also extended into northwestern New Brunswick. This study reconstructs different ice flow events and the relative importance of these events as debris-transporting agents in the Pleistocene history. An inventory of glacial striations was made and the dispersal of distinctive indicator rocks was analyzed through boulder counts. Fieldwork was conducted in the summer months of 1987 and 1988.

Iceberg trajectory model : real-time verification

by D.J. Finlayson...et al. Ottawa : Environmental Studies Research Funds, 1992. xi, 93 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 113) ISBN 0-921652-11-9
MICROLOG 93-03386 2 fiche

In 1985, the Environmental Studies Research Funds financed the development of an operational iceberg trajectory forecasting model for the Grand Banks of Newfoundland as a potential ice management tool to support offshore oil field activity. This study was begun in 1990 to produce a field implementation of the model and produce a verification of the iceberg position predictions that were output by the model. Because the first well spudded in 1991 was very late in the iceberg season, no free-drifting iceberg position data became available that year, so a simulated operational trial was conducted using data from the 1990 season. Trials were run with track data for nine icebergs, with 84 predicted trajectories produced resulting in a total of 590 verifiable positions. A few tests were conducted using observed winds as well as forecast winds to examine the effects of wind forecast errors. Several comparisons of the model predictions at one forecast lead time were made with the output of a simple steady course model and with the assumption of persistence.

Icebreaker design synthesis analysis of contemporary icebreaker performance : appendices

by A.J. Keinonen, R.P. Browne, [and] C.R. Revill ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Calgary, Alta. : Arno Keinonen Arctic Consulting Inc., 1989. 228 p. : ill.
MICROLOG 93-08101 3 fiche

This project studied the icebreaking technology of seven icebreakers developed for oil companies in the Beaufort Sea. Each of the vessels has design features which have not been used on icebreakers before. The full-scale data for the ships were analyzed, and comparisons made between the performances of the different ships. The results were then used to determine the dependencies of performance on variations in design parameters. The information from all the methodologies has been combined to give the ship designer and operator practical information on how the unique design features of these ships can be assembled in the design process to meet the performance requirements of a mission profile.

their assigned mission roles. The full scale data for the ships were analyzed, and comparisons made between the performances of the ships in both phases. The influence of icebreaker design features and parameters, and hull and environmental conditions upon performance in different performance categories was determined. Performance estimation models for level ice, ridges, turning and open water resistance were developed, extending the range of the models from Phase I.

Icebreaker midbody resistance, phase III

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; authors, D.N. Baker, T. Orendorff, J. Hartleib. Ottawa : Melville Shipping Ltd., 1991. xii, 120 p. : ill. Bibliogr.
MICROLOG 93-01465 2 fiche

This report describes the third phase of work related to the analysis of length and beam effects on icebreaking performance. The work evaluated the parametric influence of length, breadth, L/B ratio and bow form on the resistance of a hull form in ice. The first part of the project reviewed the tests at model scale and compared the new analysis approach to previous work, with relationships between resistance and friction established for use later. The second part of the project scaled each model to a displacement of 30,000 tonnes using target ice thickness and strength that, in association with the appropriate scale ratio, resulted in a ship of 30,000 tonnes in one metre thick, 500 kPa ice. The difference between the resistances found in varying the breadth of a candidate bow, as revealed in the beam variation phase of the project, were explained in semi-quantitative terms.

Identification and elimination of the bitter flavor in pea flours and protein concentrates : final report

by S.M McCurdy and P. Fedec. Regina : Saskatchewan Agriculture Development Fund, 1991. 29 p. : ill. Bibliogr.
MICROLOG 93-05691 1 fiche

Objectionable flavour of processed pea products has been identified as the major drawback to the use of pea protein ingredients in foods. This project was conducted to improve the marketability of processed dry pea products by improving their flavour. The project determined the extent of off-flavour in Saskatchewan-grown dry peas; and identified a method of processing to remove or prevent the off-flavour in pea flour and in air classified pea protein concentrates. Phase I assayed 20 samples of peas grown in Saskatchewan in 1987, 1988, or 1989 for fresh and stored flavour characteristics, lipoxygenase content, and saponin content. Phase II processed pea flour and pea protein concentrate by several procedures to improve flavour, with the resulting products assayed by sensory and chemical assays.

The design, construction and operation of facilities for the east coast of Canada have unique considerations due to the presence of ice. This paper describes the process required to identify the design challenges, the research required for the organization of the design and the principles used to ensure that technologies developed are transferred to the marketplace. The effective roles of government/industry and the academic communities are identified in the research process and their involvement in the transfer of the technologies to the marketplace for use by the offshore industry. Examples will be given of successful projects to develop solutions for the development of resources off the east coast of Canada.

Identification of key pathogens of major coastal forest weeds

by T.E. Sieber, F. Seiber-Canavesi and C.E. Dorworth. Victoria : Forest Resource Development Agreement, 1990. 54 p. : ill. Bibliogr. (FRDA report ; 113) ISSN 0835-0752 ISBN 0-662-17714-2
MICROLOG 93-01412 1 fiche

Bigleaf maple and red alder are tree species of the coast forest region of British Columbia that grow in pure stands as early occupants on cleared land and are considered to be weeds. Research to develop essential biological control strategies is focusing on the development of mycoherbicides based on facultative biographic fungi. Up until now, the search for mycoherbicide candidates was limited to isolations of fungi from diseased plant material. This investigation was carried out to prove the possibility in finding some potentially pathogenic fungi within the population of endophytic fungi. Apparently healthy leaves and two to three-year-old twigs of both bigleaf maple and red alder were collected at seven and eight sites respectively and fungi were isolated.

Immigration : aspects constitutionnels -- Rév.

par M. Young. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 17 p. (Etude générale ; BP-273F) *L'éd. anglaise (Immigration : constitutional issues) sur la même fiche. Révisé en octobre 1992.* ISBN 0-660-94136-8
MICROLOG 93-07447 1 fiche

Dans ce document, on propose d'énoncer et d'analyser les divers choix constitutionnels possibles dans le domaine de l'immigration. On examine les avantages et les désavantages de chaque éventualité constitutionnelle afin de pouvoir décider lesquelles de ces dernières peuvent s'avérer préférables. On signale aussi l'existence d'ententes administratives susceptibles d'assouplir les diverses options législatives. On commence toutefois par décrire le programme d'immigration actuel du Canada afin de montrer concrètement ce qu'englobe ce domaine de compétence.

Impact assessment and environmental monitoring : the role of statistical power analysis

by B. Antcliffe. Hull, Que. : Canadian Environmental Assessment Research Council, 1992. iii, 33 p. Bibliogr. (Manuscript report ; MR2-92)
MICROLOG 93-05384 1 fiche

Statistical hypothesis testing is often used in environmental monitoring, and to a lesser extent in impact assessment, to test some null hypothesis. This report illustrates the importance of statistical power analysis and shows its applicability to impact assessment and environmental monitoring. The report reviews statistical power and the factors that influence it; shows how such analysis can be used to improve the design of impact assessments or monitoring programs; and helps interpret the results of past studies that failed to reject some null hypothesis. These uses are illustrated by several examples.

Impact de la formulation et de la dispersion du MCP sur le comportement thermique de panneaux de gypse imprégnés de MCP

par J. Paris et C. Villeneuve. Ottawa : Société canadienne d'hypothèques et de logement, 1992. xi, 49 p. : ill. Bibliogr.
MICROLOG 93-06170 1 fiche

On a étudié l'impact sur le comportement thermique de panneaux de gypse imprégnés d'un matériau à changement de phase (MCP), des propriétés thermiques du MCP, de sa composition et de son degré de pénétration au sein de la matrice de gypse. Les MCP étudiés étaient des mélanges d'hexadécane et d'octadécane de grade technique et de laboratoire. La caractérisation thermique des MCP a été fait principalement par calorimétrie différentielle à balayage (DSC). La performance de panneaux de gypse a été déterminée par simulation des échanges thermiques dans une maisonnette à gain solaire passif en utilisant des données expérimentales de référence obtenue lors d'une étude antérieure. Les points approfondis lors de l'étude des mélanges a porté sur l'effet de composition, la dynamique des changements de phase, les effets de cyclage et l'effet de l'absorption du MCP dans la matrice de gypse. Les paramètres étudiés par simulation étaient la composition du MCP, la quantité de MCP incorporée, l'épaisseur de la couche de gypse imprégnée et la distribution du MCP dans cette couche. Les résultats ont permis de dégager les critères importants pour le design de système d'emmagasinage par chaleur latente dans les panneaux de gypse utilisés en construction.

Cette étude traite de l'effet du drainage souterrain sur la morphologie des cours d'eau. On y examine particulièrement l'aspect théorique du problème, soit le projet, l'effet du drainage sur l'hydrologie, et l'effet du drainage sur la morphologie. De plus, on jette un regard sur les techniques d'évaluation et les résultats des études régionale, longitudinale, et ponctuelle.

Impact of cattle feedlot wastes on surface water quality in Alberta : microbiological and chemical surface water quality

by L.J. Goatcher...et al. Vegreville, Alta. : Alberta Environmental Centre, 1991. xxi, 181 p. : ill., maps. Bibliogr. ISBN 0-7732-0546-2
MICROLOG 93-02213 3 fiche

This report provides the results of a study to determine the levels of microbiological, physical and chemical effluents in the receiving surface waters at selected cattle feedlots in Alberta; the nature and degree of the impact of cattle feedlot wastes and associated runoff on the quality of adjacent surface waters; and the fate of microbial parameters during their downstream transport in receiving surface waters adjacent to the feedlot. Four cattle feedlots were selected, three of which (Palmer Ranch, Waterton, Prime Feeders Ltd., Fort MacLeod, and West Yanke Ranch, Medicine Hat) were in the south. The fourth feedlot (Adams Ranch Ltd., Czar) was in east-central Alberta. Sampling stations were established at strategic locations in the receiving waters, including pre-impact (upstream), impact (feedlot runoff point), influence (downstream of the feedlot) and post-impact (further downstream). Microbiological parameters determined included total coliforms, fecal coliforms, fecal streptococci, aerobic and anaerobic heterotrophs and total fungi. About 40 standard surface water quality physical and chemical parameters were also measured. A total of 21 surveys were conducted, consisting of seven spring runoff, five storm event and nine dry weather surveys.

Impact of corona on temporary overvoltages on a 735-kV line during the decay of oscillatory trapped charge : EMTP simulation compared to field test

by D.H. Nguyen...et al. Montreal : Canadian Electrical Association, Engineering and Operation Division, Power System Planning and Operation Section, Analytical Techniques of Insulation Coordination Subsection, 1993. 10 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05229 1 fiche

This paper describes a field test and computer simulation study on corona attenuation of dynamic overvoltages. Measurements were taken during a phase-to-ground fault and line opening of a 735 kV line on the Hydro-Quebec power system. EMTP simulations were performed to quantify the attenuation of overvoltage due to corona effect.

Impact of increased offshore imports of boneless beef on the Canadian cattle and beef market

by H. Huang and H.B. Huff. Ottawa : Agriculture Canada, Policy Branch, 1993 31 p. (Working paper ; 7/93)
MICROLOG 93-08446 1 fiche

In response to the sharp increase in the import of boneless beef from countries other than the United States in 1993, the Canadian International Trade Tribunal (CITT) was asked to examine the injury or threat of injury to Canadian producers of a like product and advise on an appropriate remedy. An extended version of Agriculture Canada's Food and Agriculture Model (FARM) was used to assess the impact of an increase in the import of beef into Canada from offshore on Canadian cattle and beef prices, production, and trade. The extended model, which specifies economic relationships for both high and low quality beef, examined the impact of an increase of 85 kt (61 kt of retail products) of additional offshore beef imports. The study compared two scenarios to a baseline of the Agriculture Canada medium term forecast for 1993-99, prepared in May 1993. The first scenario assumed there were no restrictions on the export of beef from Canada to the U.S. and the second scenario assumed that the U.S. restricted the exports of low quality beef from Canada to a level similar to that in the baseline.

The Impact of NovAtel on the Alberta economy

by Wright Mansell Research Ltd. ; for Technology, Research and Telecommunications, Government of Alberta. Edmonton : The Corporation, 1992. 21 p. Bibliogr.
MICROLOG 93-00708 1 fiche

This document examines the impacts of NovAtel over the period 1983 to 1991 and provides a discussion of the direct and indirect impacts on aggregates such as employment, income, exports, and government revenues, as well as the implications for economic development and diversification in Alberta. It also looks at the extent to which the economic effects of NovAtel are long term and will result in new opportunities and growth into the future. It presents estimates of the macroeconomic impacts over the next decade using a range of projections. Finally, it summarizes the impacts of the NovAtel over the historical and future periods.

Impact of Pesticide Use on Health in Developing Countries : proceedings

editors: G. Forget, T. Goodman, and A. de Villiers. Ottawa : International Development Research Centre, 1993. x, 335 p. : ill. Bibliogr. ISBN 0-88936-560-1
MICROLOG 93-04577 4 fiche (Available on fiche only)

This book contains papers presented at a symposium to review the impact of pesticide use on health in developing countries. It presents a brief survey of the global situation and the results of 12 epidemiologic studies carried out by researchers in Africa, Asia, Latin America, and the Middle East that focused on poisonings resulting from organophosphates, herbicides, and pyrethroids. It then illustrates how the processes of development and production of pesticides, spraying techniques, and legislation can affect the health of workers. A discussion of the benefits and ways of obtaining pertinent information for the prevention of pesticide poisonings is given, then the advantages and disadvantages of certain alternatives to the use of synthetic pesticides in agriculture and public health, such as botanical pesticides and integrated pest management strategies, are explained.

The Impact of recent monetary policy on the British Columbia economy

prepared for the Ministry of Finance and Corporate Relations, Province of British Columbia ; by WEFA Canada. Toronto : The Company, 1993. ii, 16 p. : ill. *CSI 37106.206.*
MICROLOG 93-04209 1 fiche

This study provides a brief review of the performance of the B.C. economy over the past few years and the conduct of monetary policy during this period. It discusses the methodology adopted to estimate the impact of monetary policy on the economy as well as the process by which the Bank of Canada reduces inflation. It also presents the results of a macroeconomic model simulation that examines what the performance of the B.C. economy might have been under an easier monetary policy. Finally, it summarizes the results and draws conclusions.

The Impact of the Vancouver Island natural gas pipeline construction on water quality : project report

by G. Li. Victoria : Ministry of Health and Ministry Responsible for Seniors, Environmental Policy Review & Disaster Preparedness Planning, 1993. vii, 48 p. : ill. Bibliogr. ISBN 0-7726-1862-3
MICROLOG 93-07695 1 fiche

Prior to the construction of the Vancouver Island natural gas pipeline, concern was expressed for the potential defilement of community domestic water supplies when the construction work occurred in community watersheds. When 'drinking water' becomes turbid from rainfall runoff passing through construction sites, the community disinfection process is rendered inefficacious. At a specified turbidity level, the water becomes too risky to drink without alternative disinfection such as boiling. This situation creates significant administrative problems for local health officials, intolerable social problems for residents and processing problems for industries which require 'clean water'. This document is a review of the weekly environmental surveillance reports submitted by D. Tripp Biological Consultants to the B.C. Utilities Commission. The material is organized to relate construction practices with weather patterns thereby showing the resultant effects on water quality (turbidity).

Impacts of climatic change on the Beaufort sea-ice regime : implications for the Arctic petroleum industry : report summary

by D.G. McGillivray...et al. Ottawa : Environment Canada, Atmospheric Environment Service, 1993. 17, 19 p. : ill., maps. (Climate change digest ; CCD 93-01) *Bilingual (Incidences du changement climatique sur le régime...).* ISSN 0835-3980 ISBN 0-662-59584-X
MICROLOG 93-08638 1 fiche

This report considers the effects of climate warming on offshore ice and waves as they might affect the offshore oil and gas industry in the Canadian sector of the Beaufort Sea. A selection of climate scenarios and a climate-ice model were used to estimate changes in ice cover due to warming. Then, estimates were made of the effect of the resulting increased open water fetch on wave heights. The report does not consider the many related effects of projected warming on sea level, shoreline erosion, seiche, the effects of altered fresh water discharge, marine life and fisheries, nor the effects on socio-economic activities such as port and harbour planning, coastal settlement, regional and inter-regional marine transportation, etc

Northern Flood Agreement (Canada). Ottawa : The Agreement, 1988. 20, 24 p. *Bilingual (Application de l'article 17.3 de la CITNM ..). Cover title: The 1987 status report of the Government of Canada : implementation of Lake Winnipeg, Churchill, and Nelson Rivers Study Board recommendations. CSI 22534.100.*
MICROLOG 93-02127 1 fiche

In 1971, a Canada/Manitoba agreement created the Federal/Provincial Lake Winnipeg Churchill and Nelson Rivers Study Board to determine the effect that the Lake Winnipeg Regulation and Churchill River diversion projects were likely to have on other water and related resource uses; indicate ways in which the projects may prove beneficial to such other uses; recommend modifications in the design and operation of the works; and recommend remedial measures where considered necessary. The Northern Flood Committee, established in 1977, provides a framework for compensating the native people affected by the development. The NFA also provides for an annual report on the recommendations being implemented, the dates when these recommendations will be implemented, and the reasons for non-implementation. This federal status report repeats each recommendation, identifies the lead responsible jurisdiction and any other that may have an interest, then gives a brief status report.

MICROLOG 93-03496 1 fiche

This paper provides an economic analysis of he implications for Canadian agriculture of one otential outcome of the Uruguay Round. The outcome would reduce support on average by one-third, halve export subsidies, convert non-tariff barriers to reduced tariff-equivalents, but preserve supply management. It provides a definition of rules and discusses specific policy changes. It includes simulation results and provides conclusions. This information is released to improve the awareness and the understanding of all stakeholders with respect to the issues and possible impacts of policy changes which may occur in the Uruguay Round of the GATT negotiations.

The Implications of global restructuring of primary industries on the development of rural and single-industry regions

Rural Policy Seminar (1991 : Coaticook, Que.). Ottawa : Employment and Immigration Canada, 1991. 215 p.
MICROLOG 93-06443 3 fiche

These proceedings from the seminar cover the following topics: the role and objectives of the inter-departmental committee; the role and objectives of the National Seminar on the Development of Rural and Single-Industry Regions; the implications of global restructuring of primary industries for rural and single-industry regions; world commodity markets and rural regions; policy implications of restructuring forestry production; trends in rural development; and the new rural division of labour. It also presents case studies of local restricting focusing on community forestry in Newfoundland, and socio-economic characteristics in Stanstead County.

Implications of global warming for Canadian east coast sea-ice and iceberg regimes over the next 50 to 100 years

by J.R. Marko...et al. Saskatoon, Sask. : National Hydrology Research Centre, Atmospheric Environment Service, Canadian Climate Centre, 1991. v, 126 p. : ill., maps. Bibliogr. (Report ; no. 91-9)
MICROLOG 93-02254 2 fiche

This report presents the results of a scoping study initiated in response to concerns that atmospheric and oceanic changes related to increased greenhouse gas emission may have significant effects on the iceberg and sea-ice regimes off the east coast of Canada. General circulation models and empirical analogue techniques were evaluated for their utility in scenario construction.

The Implications of nonstationarity for the stock-adjustment model

by R.A. Amano and T.S. Wirjanto. Ottawa : Bank of Canada, 1993. v, 28 p. Bibliogr. (Working paper ; 93-1) ISSN 1192-5434
ISBN 0-662-20290-2
MICROLOG 93-06847 1 fiche

The stock adjustment process is frequently used to model the dynamic behaviour of economic agents in the presence of costs that do not allow full adjustment within a single period. The asymptotic behaviour of least squares estimates in a stock-adjustment model when the variables are nonstationary is studied. First considered is the case in which the variables are not cointegrated, and then the case is examined under cointegration. Economic examples are used to illustrate each case and Monte Carlo simulation are performed in order to guage the relevance of the asymptotic results for finite samples.

Implications of the NAFTA for Canadian financial institutions

by P. Sauvé and B. González-Hermosillo. Toronto : C.D. Howe Institute, 1993. 24 p. Bibliogr. (Commentary ; no. 44) *At head of title: The NAFTA papers.* ISSN 0824-8001
ISBN 0-88806-318-0
MICROLOG 93-05770 1 fiche

The financial services chapter of the North American Free Trade agreement (NAFTA) establishes a comprehensive, principles-based approach to disciplining government measures that regulate financial services. This approach draws heavily on the insights gained during recent negotiations on services in the Uruguay Round of the GATT. This document discusses a principles-based approach to liberalization, key features of the NAFTA's financial services chapter, and implications of the agreement for Canadian financial institutions.

The Importance of hook and bait size for catching power and length selection in the longline fishery for cod *Gadus morhua* L. and haddock *Melanogrammus aeglefinus* L.

by T. Johannessen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1992. 165 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5577) *Originally published in Norwegian, by the Institute for Fisheries Biology, University of Bergen, Norway.* ISSN 0704-3716
MICROLOG 93-02220 2 fiche

While longline studies have concentrated on giving useful measures for catch per unit effort, very few studies have dealt with hook selectivity or the size of the bait. This thesis studies the importance of the various hook and bait sizes on catching efficiency and length selection in the longline fishery for cod and haddock, and evaluates different forms of experimental setups in longline fishing trials. Fishing trials at sea and direct observation of fish behaviour towards hooks and baits in the laboratory are used as the basis for the study.

The Importance of research in the environmental assessment and review process : a report to FEARO on the proposed reform of EARP

Hull, Que. : Canadian Environmental Assessment Research Council, 1988. 9 p. (Manuscript report ; MR1-88) *French ed. (Importance de la recherche dans le processus...) on the same fiche.*
MICROLOG 93-05299 1 fiche

This report presents research on the proposed changes to the federal Environmental Assessment and Review Process (EARP). To prepare the report, the council reviewed the

results of the first four years of its research activities and held a joint meeting with the Canadian Environmental Advisory Council (CEAC) to discuss the reform of EARP. The report discusses the importance of having a coherent research program to support the application of EARP, and the ways in which research initiated by the Canadian Environmental Assessment Research Council (CEARC) can improve the effectiveness of both the technical and administrative components of the process. Recommendations are included

The Importance of runoff and winter anoxia to P and N dynamics of a beaver pond

by K.J. Devito and P.J. Dillon. Toronto : Environment Ontario, 1992. vi, 51 p. : ill. Bibliogr. ISBN 0-7778-0166-3
MICROLOG 93-03024 1 fiche

Beaver activity such as dam-building and subsequent flooding of riparian zones can have a large influence on the hydrology and nutrient dynamics of streams. This report presents a mass balance approach used to determine the factors influencing phosphorus and nitrogen dynamics in beaver ponds. The relationships of runoff, pond surface water temperature, dissolved oxygen and redox potential to the annual and seasonal total phosphorus and total nitrogen retention of a headwater beaver pond situated on the Precambrian Shield in central Ontario were examined in 1987-88.

The Importance of the minerals and metals industry to Canada

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. x, 41 p. : ill. Bibliogr. (Background study on the Canadian mineral investment climate ; no. 1) *CSI 22087.201.*
MICROLOG 93-05502 1 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. This report documents and quantifies the minerals and metals industry's contribution to the Canadian economy. The report situates the industry in the context of the Canadian economy by looking at such varied indicators as the sector's contribution to export earnings, total gross domestic product, regional development, employment, and forward and backward linkages. It also evaluates the sector's relative economic performance as compared to other sectors of the Canadian economy, including discussions on relative profitability, wages, and technological orientation.

Improved test methods and performance criteria for vibration dampers, phase I

by D.G. Havard, A.A. Shehata and C.J. Pon. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, Conductor Vibration and Oscillation Subsection, 1993. 17 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05183 1 fiche

The Canadian Electrical Association initiated Phase I of a project to develop improved test methods for damping performance and fatigue resistance, and acceptance criteria for each, for aeolian vibration dampers used for single conductors and overhead ground wires. Phase I reviewed the existing methods of testing for damping and fatigue, and the performance criteria, of dampers. It comprises a literature review and surveys of utilities and manufacturers related to the testing and performance of aeolian vibration dampers. This paper gives an overview of the work done in Phase I.

Improving corrosion properties of Mg and Mg alloys by ion implantation and ion beam assisted deposition (IBAD) : final report

by F. Jamarani. Ottawa : Metals Technology Laboratories (Canada), 1993. 5 p *CANMET contract: 23440-2-9257/01-SQ*
MICROLOG 93-08335 1 fiche

The relatively poor corrosion resistance of magnesium and its alloys has seriously limited their potential use in advanced applications where their light weight and high strength would be a definite advantage. This project was undertaken to deposit protective coatings on magnesium and magnesium alloy substrates using an electron beam evaporation process. The process also involved the use of an ion source that was used during the deposition to control the microstructure and density of the coatings. A number of different ion beam energies, coating thicknesses, and coating designs, based on aluminum and magnesium co-deposition, were used to produce coatings with different microstructure and characteristics.

In need of protection : children and youth in Alberta : child welfare review

Edmonton : Children's Advocate, 1993. 328 p. : ill
MICROLOG 93-08856 4 fiche

In 1992, the Minister of Family and Social Services of Alberta ordered the Children's Advocate to undertake a comprehensive review of the operation and implementation of Alberta's Child Welfare System and legislation, and to develop and present recommendations for broad systemic change. This document opens by providing history and context to the review and by describing the process. Under the heading 'The Child protection system' the report deals with the following topics: principles, considerations for determing the best interests of the child; intervention, defining the child in need of protective services; preliminary intervention, reporting-screening-investigation; voluntary access to child protection, services by agreement; access to child protection services via the judicial process; the courts; children and youth in care, foster family care, residential care; secure treatment, social control or civil commitment for minors?, the abuse or maltreatment of children in care; alternative approaches to permanency, long term foster care, guardianship and adoption; non-residential services to children and youth in care; special circumstances of adolescent youth and the young offenders system; aboriginal children; and poverty, the socioeconomic context of child protection. Next the review looks at the management and organization dimensions of children's services covering the child protection system's accountability framework; staffing; the organization dimension of child protection services, toward decentralization and community empowerment; from child protection to child welfare, the integration of mandates and central agencies; and a comprehensive vision for child, youth and family services.

In-home evaluation of emission characteristics of EPA-certified high technology non-catalytic woodstoves in Klamath Falls, Oregon, 1990 : final report

by S.G. Barnett. Beaverton, OR : OMNI Environmental Services, 1990 iii, 151 p. : ill. Bibliogr. *CANMET contract: 23440-9-9230/01-SQ.*
MICROLOG 93-08339 2 fiche

Previous field investigations have shown that non-catalytic woodstove technology has generally improved over the past five years, but the best performances lag behind some catalytic technologies and only reduce particulate emissions by 50-55% compared to conventional stoves. This project was conducted to identify non-catalytic technology, manufactured in Canada, that can reduce particulate emissions by over 75% in field use; to use a computer model and close observations of operational practices to find what combinations of technology and operational parameters produce the lowest emissions in the field; to determine the causes of poor emissions performance and/or degradation should they occur; and to conduct a new technology feasibility study to help a community that has historically experienced some of the highest woodstove-generated ambient particulate levels in the United States. In-home sampling of three advanced-technology stoves, installed in homes in Klamath Falls, Oregon, was conducted for four one-week periods from January through March 1990. The Omni Automated Woodstove Emissions Sampler and data logger system was used to measure particulate stack emissions, thermal efficiency, stack temperatures, stack oxygen, stack draft, burn rate, and wood use patterns.

The Incidence of family poverty on Canadian Indian reserves

by P.R. Oberle. Ottawa : Indian and Northern Affairs Canada, 1993. iii, 17, iii, 17 p. Bibliogr. *Bilingual (Fréquence de la pauvreté...) CSI 22479.204.* ISBN 0-662-20435-2
MICROLOG 93-06495 1 fiche

The purpose of this paper is to develop some basic poverty statistics in order to paint a picture of the incidence of poverty among registered Indian people living in reserve communities. Statistics Canada's Low Income Cutoffs (LICOs) are used to represent the poverty line on reserve and the degree of poverty is measured by comparing the LICOs with 1985 incomes of on reserve Indian families, taken from the 1986 Census. There are many problems with measures of poverty like the LICOs because they are based solely on income. Additional problems arise when the LICOs are applied on reserve. In the absence of an alternative measure, this paper can only provide a rough picture of the poverty situation on reserve.

Incidences du changement climatique sur le régime glaciel de la mer de Beaufort : répercussions sur l'industrie pétrolière dans l'Arctique

par D.G. McGillivray...et al. Ottawa : Environnement Canada, Service de l'environnement atmosphérique, 1993. 19, 17 p. : ill., cartes géogr. (Sommaire du changement climatique ; SCC 93-01) *Bilingue (Impacts of climatic change on the Beaufort...).* ISSN 0835-3980 ISBN 0-662-59584-X
MICROLOG 93-08638 1 fiche

Ce rapport présente les effets du réchauffement climatique sur la glace et les vagues en mer, étant donné qu'ils peuvent se répercuter sur l'industrie pétrolière et gazière en mer, dans le secteur canadien de la mer de Beaufort. Pour évaluer les changements de la couverture glacielle attribuables au réchauffement, les scénarios climatiques et un modèle climat-glace sont choisis, puis, l'effet sur la hauteur des vagues de l'accroissement du fetch en eau libre a été choisi. Le rapport ne tient pas compte des nombreux effets connexes du réchauffement prévu sur le niveau de la mer, l'érosion du littoral, la seiche, le débit d'eau douce modifié, la vie marine et les pêches, ni des effets sur l'activité socio-économique comme la planification des ports,

Les Incidences environnementales de l'automobile

par M. Smith. Ottawa : Service canadien de la faune, Direction de l'état de l'environnement, 1993. 12 p. : ill. Bibliogr. (Feuillet d'information EDE , no 93-1) *L'éd. anglaise (Environmental implications of the...) sur la même fiche.* ISBN 0-662-98116-2
MICROLOG 93-07148 1 fiche

L'automobile est probablement un des fruits de la technologie qui a le plus marqué le Canada du XXe siècle. Toutefois, l'automobile a aussi de nombreuses incidences sur l'environnement. Les voitures, et l'infrastructure qui leur est associée, consomment des ressources et de l'énergie et émettent beaucoup de polluantes. Le rapport décrit l'automobile et l'économie, l'automobile et l'environnement, et l'automobile et la pérennité de l'environnement.

The Inclusion of people with disabilities in the Yukon community : a discussion paper for Yukon 2000

by K. Clarke, C. Perry and B. Walker. Whitehorse : Yukon Association for Special Needs People, 1987. 32 p. Bibliogr.
MICROLOG 93-04045 1 fiche

According to national statistics, people with disabilities account for approximately 10-12 percent of the Canadian population including men, women, and children. While 70 percent of these are currently between the ages of 16 and 65 and are capable of working, only 10 percent of these able to work are in the competitive workforce. This discussion paper examines the status of people with disabilities in the economy of the Yukon and reviews the implications of the Yukon 2000 Economic Strategy with regard to this group.

Increasing forage seed production with fertilizer : 1991 extension : final report

by K. Stoner and P.H. Horton. Regina : Saskatchewan Agriculture Development Fund, 1992. 35 p.
MICROLOG 93-08691 1 fiche

A fertilization trial was conducted at several sites in northeastern Saskatchewan between 1988 and 1991 to investigate how seed yield of smooth bromegrass, crested wheatgrass, intermediate wheatgrass, and timothy were affected by the following treatments: application rates of nitrogen and phosphorus; timing of fertilization application; and sulphur, boron, copper and zinc applications. The period during which these experiments were conducted was characterized by normal or below normal precipitation amounts.

Increasing the market potential of Saskatchewan feed grains for poultry : final report

Regina : Saskatchewan Agriculture Development Fund, 1991. 55 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 93-06775 1 fiche

Hulless barley varieties (Scout, Tupper) have been developed for monogastric feeds, particularly for the poultry industry, which demands high energy, low fiber diets. A study was carried out to ascertain the impact of grain cultivar, grain growing conditions, the interaction of grain and other dietary manipulations, and the impact of several grain treatments on the nutritional value of barley and rye with and without enzyme addition. The effects of genetic differences in barley beta-glucan and supplementation of enzymes on the nutritional value of hulled and hulless barley cultivars was assessed. Environmental and varietal differences in the nutritional quality of rye and the degree of response to pentosanase supplementation were studied.

Indoor air quality survey of Northwest Territories housing : final report

submitted to CMHC Project Implementation Division ; by Appin Associates , in association with A. Yassi. Ottawa : Canada Mortgage and Housing Corporation, 1991. iii, 140 p. : ill
MICROLOG 93-07523 2 fiche

Over the past few years, the Northwest Territories Housing Corp. and the Yukon Housing Corp. have implemented a major repair and renovation program and the adoption of many aspects of the R-2000 program, including wall insulation values and envelope airtightness specifications. This report presents the results of a study to evaluate residential indoor air quality in selected communities in the NWT. A total of 15 houses, 10 in Rankin Inlet and five in Arviat (Eskimo Point), were tested in fall/early winter and another 40 houses were tested in late winter in up to eight other communities, along with re-testing of five of the houses in Rankin Inlet. Sampling was conducted for carbon dioxide, carbon monoxide, nitrogen dioxide, sulphur dioxide, formaldehyde, indoor relative humidity, radon gas, particulates, and microbiological contaminants. A general Bioquest biological screening technique and a seven-day average air change test were also conducted. An occupant questionnaire on the operation of the house and a short health survey of the occupants were also administered.

Induced levels of hepatic mixed function oxidases in white suckers *Catostomus commersoni* as a biomarker for contamination of the sediments in Jackfish Bay, and the Kaministiquia and St. Mary's rivers

by I.R. Smith, C. Portt and D.A. Rokosh Toronto : Ministry of the Environment, 1992. iv, 21 p. : ill. Bibliogr. ISBN 0-7729-7932-4
MICROLOG 93-03766 1 fiche

Mixed function oxidases (MFOs) are a family of inducable enzymes which oxygenate natural and synthetic chemicals alike, making them amenable to conjugation and excretion. The levels of these enzymes are induced, particularly in the liver, in fish exposed to classes of chemicals including dioxins, furans, polynuclear aromatic hydrocarbons, polychlorinated biphenyls and other chemicals exhibiting dioxin-like activity. MFO induction in wild white suckers was investigated as a potential biomarker for contamination of sediments by chemicals with dioxin-like activity in Jackfish Bay, St. Mary's River, and the Kaministiquia River.

Induced overvoltages on an AC-DC hybrid transmission system

by R. Verdolin...et al. Montreal : Canadian Electrical Association. Power System Planning and Operating Section, Analytical Techniques of Insulation Coordination Subsection, 1993. 13 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05225 1 fiche

Adding a dc circuit to an existing transmission line is one method of significantly increasing the power transfer capacity of the transmission corridor. The resulting hybrid system has significant coupling between the ac and dc circuits, not only because of the proximity of

the circuits, but also from the fact that they could share the same sending end or receiving end ac systems. The resultant interaction produces overvoltages on the components of the system that can be somewhat higher than for a conventional dc scheme. The paper presents a study of these overvoltages using digital simulation. It is demonstrated how this approach can be used to select dc system components to avoid excessive system overvoltages and to determine the requirements for the surge arresters used to limit these overvoltages

Industrial competitiveness, a sectoral perspective : consultation paper, issues for discussion

Ottawa : Industry, Science and Technology Canada, 1991. iv, 169 p. : ill. *French ed (Compétitivité de l'industrie.) : 93-02652/3. CSI 21149 509.* ISBN 0-662-19283-4
MICROLOG 93-02653 2 fiche

Over the last half decade, Canada's aggregate economic performance has been strong. Growth in real output was second only to Japan. This document discusses Canada in a changing world and the need to be competitive. It includes sectoral competitiveness assessments for food and beverages, chemicals, forest products, ferrous and non-ferrous metals, fabricated materials, industrial equipment, electrical manufacturing, information technology, aerospace and defence electronics, automotive, urban transit and rail, textiles, furniture, commercial services, construction, and tourism. It also includes an agenda for the 1990s regarding international competitiveness.

An Industrial policy framework for Ontario

Toronto : Ministry of Industry, Trade and Technology, 1992. 43 p. *Backgrounders (26 p.) laid in.* ISBN 0-7729-9405-6
MICROLOG 93-02275 1 fiche

Global changes are having a major impact on the structure of the Ontario economy--on the kinds of companies that can succeed in Ontario, on what industries have to do to compete internationally, and on the jobs available to Ontario workers. This document discusses economic renewal in the 1990s focusing on Ontario's economic renewal agenda, anticipating global change, and a provincial industrial policy. It looks at creating a competitive advantage and competitive. fundamentals. It also examines changing the method of investing for the future, changing the method of working with companies, and changing the way economic change is managed.

Infectious pancreatic necrosis virus in Atlantic salmon *Salmo salar* and brook trout *Salvelinus fontinalis* in central Newfoundland

by B.W. Souter, A.G. Dwilow and K. Knight. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1992. iv, 6 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1873) *This is the 49th technical report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6457
MICROLOG 93-03709 1 fiche

Infectious pancreatic necrosis virus (IPNV) is an aquatic birnavirus having a broad host range and wide geographic distribution, with virulent strains capable of causing significant mortality. The virus can persist in wild and cultured salmonid stocks through exposure of susceptible fish to contaminated water. In summer 1991, it was proposed to collect Atlantic salmon eggs from Little Rattling Brook, Gander River, and Terra Nova River in central Newfoundland for enhancement purposes. Prior to the proposed egg collections, a sample of fish from each of the selected rivers was required to undergo disease analysis to avert the possible introduction or transfer of fish pathogens. This report describes the isolation and identification of IPNV from Atlantic salmon and brook trout from Little Rattling Brook.

The Influence of diet on necrotic enteritis in broiler chickens : final report

by C. Riddell. Regina : Saskatchewan Agriculture Development Fund, 1991. 15 p. Bibliogr. ISSN 0829-9455
MICROLOG 93-06785 1 fiche

Necrotic enteritis is a common sporadic disease in boiler chickens, and can cause significant mortality. Necrotic enteritus was reproduced in boiler chickens by mixing cultures of Clostridium perfringens in their feed with the objective of determining whether boiler chickens fed diets based on wheat are more susceptible to necrotic enteritus than boiler chickens fed diets on corn. Hypotheses as to the causes of the variations in mortality with diet are explored.

This paper examines the influences of runoff magnitude, water table fluctuation and peat redox processes on phosphorus and nitrogen dynamics in a Sphagnum-conifer swamp in order to generalize about the role of wetlands in nutrient transport and retentional in small headwater Precambrian catchments. The magnitude of runoff, water residence time and water level fluctuations of the swamp were examined in relation to annual and seasonal patterns of total phosphorus and total nitrogen export and retention. Physical and chemical parameters and nutrient concentrations of water in the swamp were measured through the 1987-88 year to determine the relationship between redox potential, the form and availability of phosphorus and nitrogen and its influence on annual and seasonal retention of these nutrients.

Influence of male age on sperm quality in the rainbow trout

by Y.P. Babushkin. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1992. 5 p. Bibliogr (Canadian translation of fisheries and aquatic sciences ; no. 5574) *Originally published in Russian, by GosNIORKh, in Leningrad, USSR.* ISSN 0704-3716
MICROLOG 93-02223 1 fiche

This paper describes a study conducted to determine the influence of male age on sperm quality in rainbow trout raised in ponds. Two six-year-old males from the Gostilitsky brood stock of rainbow trout were used, with a total of 749 spawners in the study. The quality of the sperm (duration of spermatozoa motility and spermatozoa concentration) were examined along with the volume of a one-time batch of sperm. The fertilizing capacity of rainbow trout males of different age were also determined. Fertilizing capacity was judged by the percentage of eggs fertilized.

Influence of the Cold Buster sports bar on heat debt, mobilization and oxidation of energy substrates

by A.L. Vallerand, I.F. Schmegner and I. Jacobs. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1992. 29 p. : ill. Bibliogr. (DCIEM report ; no. 92-R-60)
MICROLOG 93-04324 1 fiche

An earlier study of the Cold Buster sports bar seemed to indicate that it had no effect on any parameter of the heat balances or body temperatures in cold-exposed subjects but it is speculated that the problem was a metabolic rate that was too high. This study determined, under milder conditions, whether the Cold Buster can enhance cold resistance in humans and whether it does so through alterations in heat production or heat losses. This was accomplished by determining core and mean skin temperature, performing a full heat balance analysis, calculating rates of energy substrate oxidation, and analyzing levels of various plasma substrates and hormones, as indices of energy substrate mobilization. Eight healthy male volunteers, wearing jogging shorts and foam slippers only, participated in two cold exposure tests by sitting three hours at 10C.

Influence of trophic status on the behaviour of contaminants in aquatic systems

by R.M. Baxter...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1990. 21 p. Bibliogr. (NWRI contribution ; 90-26)
MICROLOG 93-07471 1 fiche

In order to assess the likely persistance of environmental contaminants in natural waters it is necessary to take into account the interaction between these contaminants and the natural chemical compounds and living organisms present in water bodies. These in turn depend on the trophic status of the water, i.e. the degree of eutrophy and dystrophy. The available information regarding these interactions is reviewed, and their possible practical significance is discussed.

Information for seniors : a key to independence

Victoria : B.C. Seniors' Advisory Council, 1992. iv, 12 p. (Position paper) ISBN 0-7726-1698-1
MICROLOG 93-03889 1 fiche

In British Columbia, there are services and benefits available to seniors from several federal government departments, from 13 provincial ministries and Crown Corporations, and from a variety of community agencies. In April 1991, Information for Seniors was published to provide seniors with a single source of the most pertinent information on services and benefits. Early in 1991, the Seniors' Advisory Council identified information for seniors as a priority and established a task force to examine the issue more closely. The task force discussed the issue of information, developed a discussion paper, and held consultations on the issue. This position paper includes the findings of these consultations.

Information sur les sols et le climat pour le Nouveau-Brunswick

préparée par J.K. MacMillan. Fredericton : Ministère de l'agriculture, 1993. i, 33 p. : cartes géogr. *L'éd. anglaise (Soil and climate related information..) sur la même fiche.*
MICROLOG 93-07398 1 fiche

En 1991, le Nouveau-Brunswick comptait 3250 exploitations agricoles représentant un capital investi de plus de 660 millions de dollars. L'agriculture se classe au troisième rang des industries primaires pour la contribution au produit intérieur brut, derrière l'exploitation forestière et l'exploitation minière. La présente brochure donne un aperçu général des sols, du climat et de la production agricole au Nouveau-Brunswick.

Information technologies in the Quebec government, 1988-89 : progress report and outlook

Quebec : Gouvernement du Québec, Ministère des communications, Direction générale des technologies de l'information, 1990. 39 p. : ill. *CSI 66118.005.* ISBN 2-551-14353-5
MICROLOG 93-07829 1 fiche

This is the 12th report on information technologies published by the Quebec government. Presents a rundown of the achievements and main priorities in the field of information technologies. It also provides a brief summary of the main statistics on telecommunications and data processing. Document presents the organization of information technology in the public sector; information technologies in Quebec society and government; mega-projects; and major government concerns and achievements.

Information technologies statistical review : annual, 1991

Ottawa : Industry, Science and Technology Canada, Information Technologies Industry Branch, 1992. 129 p. : ill. (Working document) *Bilingual (Analyse statistique de l'industrie des...). CSI 21149.005.*
MICROLOG 93-03659 2 fiche

This document is a compilation of selected data on Canada's information technology (IT) sector from Statistics Canada sources, supplemented by Industry, Science and Technology estimates. The document includes statistical fact sheets for each of the Standard Industrial Classifications that make up the information technology sector. The document includes IT equipment trade by country and region, manufacturing shipments from 1986-90, contributions to the total gross domestic product (GDP), comparative GDP growth rates from 1986-90 for manufacturing, services and economy. IT's profit as a percentage of total non-financial corporate profits and profits as a percentage of operating revenue for 1988-90 are given. Forecasted market growth rates to 1995 for major countries, capital expenditures on IT goods in Canada by sector; and R&D expenditures are also included.

L'Information, un produit comme les autres?

par L. Laplante. Haldimand, Québec : Institut québécois de recherche sur la culture, 1992. 111 p. Bibliogr. (Diagnostic ; 14) ISSN 0831-5264 ISBN 2-89224-181-2
MICROLOG 93-08623 2 fiche

L'information médiatique surgit à une époque qui valorise à l'extrême l'information sous toutes ses formes. Les médias ne se limitent pas au négatif ou au spectaculaire. Leur monde, c'est celui du présente. Avec les avantages et les limites que cela définit. Ce document porte sur ce sujet et examine particulièrement les objectifs et résultats à évaluer, le contexte socio-économique, le cadre de travail, et, quelques enjeux professionnels. Le document se termine par une liste des ouvrages cités.

L'Informatique en tout et pour tous : maternelle à 12e/CPO : document de consultation

Toronto : Ministère de l'éducation, 1991. 62 p. *ONTERIS: ON05868.*
MICROLOG 93-00327 1 fiche

Ce document de consultation fournit au personnel enseignant de l'Ontario, des orientations générales, sur la manière d'intégrer l'informatique, à tous les domaines du programme d'études, et d'enrichir l'apprentissage des enfants de la maternelle jusqu'aux élèves des cours préuniversitaires de l'Ontario. Il comprend 2 parties: des questions et des options ainsi que l'ébauche du document de politique. Il se compose de 10 unités et traitent des points suivants: un regard sur l'avenir; les fondements; les buts de l'éducation; les buts de cette politique; l'équité; les ordinateurs, les apprenants et les apprenantes; les ordinateurs et le milieu d'apprentissage; la planification et la mise en oeuvre; et finalement l'évaluation. Un glossaire complète le document.

Infractions aux normes du travail : profil des plaignants, 1987-88 et 1988-89

par J. Lavigne. Québec : Commission des normes du travail, 1992. xi, 202 p. : ill. *Résumé (iii, 43 p.) inclus* ISBN 2-550-26531-9
MICROLOG 93-07643 3 fiche

Ce résumé s'adresse tout particulièrement aux personnes désireuses de prendre connaissance de l'essentiel du document Infractions aux normes du travail-Profil des plaignants, 1987-1988 et 1988-1989. Il dresse un profil socio-économique des salariés ayant déposé une plainte pécuniaire à la Commission des normes du travail. Il traite donc des enquêtes engagées suite à une ou plusieurs plaintes Plus particulièrement, le document se penche sur les points suivants: les travailleurs québécois et la Loi sur les normes du travail;

les dossiers d'enquête annulés et les salariés dénombrés; les enquêtes terminées sans annulation et les salariés dénombrés; et, les salariés du Québec et leur taux de plainte.

Infrared thermography for distribution systems

by M.E. Stoneham and R.A. McEachern. Montreal : Canadian Electrical Association, Engineering and Operating Division, 1992. 24 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06038 1 fiche

Infrared thermography allows observation of the thermal state and measurement of the surface temperature of an object, and can assist in detection of hot spots in electrical distribution components. A study was initiated to produce a guideline for the infrared thermographic inspection of electrical distribution components. Two separate guidelines have been proposed, one dealing with all exposed overhead equipment and the other with insulated underground components. The thermal performance of normal and anomalous components was studied by laboratory testing and finite element analysis. The component selection process, operational and environmental effects, and component performance for both overhead and underground distribution are discussed.

Inglewood area redevelopment plan and supporting information

Calgary, Alta. : Calgary Planning and Building Dept., 1993. iv, 136 p. : ill., maps.
MICROLOG 93-08651 2 fiche

Inglewood is a unique community with an outstanding potential to be an even better place to live and visit. This Area Development Plan (ARP) helps create an image of a vital Inglewood and shows some steps, large and small, that can be taken to achieve it. The goals for the Inglewood community address a wide range of land use, social, community and environmental issues. Some of these goals can be pursued through land use planning tools and have provided the direction for this community plan. A complete list of the goals is presented in the Background Information Section of this plan.

Initial benthic invertebrate population study on the Barnaby River system near a Rogersville, New Brunswick peat mining operation

by J.C.T. McEachreon. Fredericton : Dept. of Natural Resources and Energy, Mineral Resources, 1993. vi, 74 p. : ill. Bibliogr. (Open file report ; 93-6) ISSN 1183-5508 ISBN 1-55137-102-2
MICROLOG 93-06773 1 fiche

Five sites on the Barnaby River system near Rogersville, New Brunswick were chosen for biological sampling in July, 1992. The study was designed to gather base-line data potential fish food populations in the system prior to construction of a peat moss harvesting facility from a nearby bog. A seven point trout habitat suitability index was used to qualitatively describe the environment for aquatic life. Information on benthic macroinvertebrate density and three scales of diversity measurement quantitatively evaluated biological conditions. The study sites and methods used are described, and potential responses to construction of the peat moss harvesting facility are discussed.

Initial effects of prescribed fire and mechanical site preparation on seedling environment and establishment on a backlog NSR site in central interior British Columbia

by S.W. Taylor...et al. Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development: FRDA II, 1991. vii, 39 p. : ill. Bibliogr. (FRDA report ; 177) ISSN 0835-0752 ISBN 0-7726-1516-0
MICROLOG 93-00911 1 fiche

A substantial amount of the backlog, not satisfactorily restocked (NSR) land in the central interior of British Columbia occurs on sites that were logged to intermediate utilization or other partial cutting standards before 1970. A study was initiated in the Prince George forest district in 1986 to investigate the effects of six preparation regimes on backlog NSR sites resulting from partial cutting. The treatment regimes consisted of windrowing, broadcast burning and herbicide spraying followed by broadcast burning (spray and burning), all with and without subsequent disc-trenching. The effects of these regimes on soil nutrient status, microclimate and vegetation, and on the establishment of planted interior spruce and lodgepole pine seedlings were then examined. Fuel consumption as a result of burning and soil disturbance as a result of mechanical site preparation were also assessed.

Initial technical evaluation of an agglomeration/vat leaching process for recovering gold from Touquoy and Goldboro

NovaGold Resources Inc. S.l. : Canada-Nova Scotia Mineral Development Agreement, 1992 125 p. : ill. *CANMET contract: 23440-1-9201-01-SQ.*
MICROLOG 93-04270 2 fiche

Report to determine if the Moose River (Touquoy) and Upper Seal Harbour (Goldboro) gold deposits in the Meguma Group in Nova Scotia would be amenable to the Murray Brook agglomeration/indoor vat leaching process. The two deposits are currently uneconomical because of the low grade and fine dissemination of the gold. The program reviewed all available literature for each deposit; collected a representative bulk sample for each deposit for assaying, mineralogical and metallurgical test work; defined the nature of metal distribution in bulk sample; completed mineralogical and liberation studies; determined the ideal field sample size; calculated the reliability of existing assay data; and designed optimum sampling procedures for each property.

Initiation of a boiling liquid expanding vapour explosion

by C.A. McDevitt...et al. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1991. xii, 151 p. : ill. Bibliogr.
MICROLOG 93-03574 2 fiche

Boiling liquid expanding vapour explosions (BLEVEs) occur when a pressure-liquefied gas tank is burst and the fluid is ejected to the atmosphere. As the liquid is exposed to a lower pressure it boils violently, causing an explosion which destroys the container. One litre tanks were filled with propane or R12, heated, and caused to rupture at specific test conditions to determine the parameters required for a BLEVE and whether a shock wave could develop within the container. A shock tube was used to study the shock waves generated during a BLEVE, given variations in temperature, liquid volume, rupture location, rupture area, and the fluid involved. The pressure was measured against time immediately after the rupture. Dynamic pressure information was also gathered during BLEVEs of one litre cylinders and compared to that from the shock tube. A mechanism for this application is suggested. The shock tube was fitted with windows and Schlieren photographs were taken just after disk rupture, at the initiation of the pressure wave.

L'Innovation dans la formation du personnel enseignant : étude de textes récents

chercheurs principaux: Dennis Thiessen, Ann Kilcher ; avec: Gabriel Bordeleau...et al. Toronto : Ministère de l'éducation et de la formation, 1993. vi, 157 p. Bibliogr. *L'éd. anglaise (Innovations in teacher education : a review...) : 93-08385/2. ONTERIS: ON06462.* ISBN 0-7778-0185-X
MICROLOG 93-08391 2 fiche

Cette étude a pour but d'enrichir le débat sur l'avenir de la formation du personnel enseignant et d'aider à promouvoir et à engager des actions novatrices. Elle porte sur les tendances plutôt que sur des activités novatrices précises. Les innovations entreprises depuis 1987 consistent à apporter des changements aux stratégies et aux ressources et à revoir complètement les programmes et les structures. Elles font partie intégrante de la réforme de l'enseignement. Elles touchent à toutes les étapes de la formation du personnel enseignant, facilitant notamment l'entrée en service et la prise en charge de nouvelles fonctions. Elles accentuent le rôle moteur que jouent les enseignants dans leur propre perfectionnement et sur le caractère universel de l'école. Un réseau complexe de structures institutionnelles répond aux besoins du personnel enseignant. Ces innovations consistent à améliorer les méthodes de formation des enseignants et leurs conditions de travail. Elles s'inspirent d'une vision qui conçoit les enseignants comme des réformateurs.

L'Innovation et les codes du bâtiment : une étude des codes du bâtiment fondés sur la performance

préparée par A.T. Hansen Consulting Services ; en collaboration avec Scanada Consultants Limited. Ottawa : Canada Mortgage and Housing Corporation ; Comité national de recherche sur le logement, Groupe de travail sur les innovations techniques, 1991. ix, 180 p. Bibliogr.
MICROLOG 93-01326 3 fiche

Cette étude du processus de réglementation du bâtiment a été entreprise pour permettre de déterminer si les codes du bâtiment limitent indûment, de par leur caractère normatif, les innovations dans ce domaine et si les codes davantage fondés sur la performance seraient plus propices à l'innovation. L'effet du processus de réglementation du bâtiment sur l'innovation a été examiné selon trois grandes perspectives: la façon dont les codes sont rédigés, la façon dont ils sont appliqués, enfin les méthodes d'évaluation des nouveaux produits et systèmes. On a étudié dans quelle mesure les codes du bâtiment ont influé sur l'adoption des innovations dans le passé, et tenté d'obtenir de l'industrie quelques exemples où elle a trouvé que les codes du bâtiment faisaient indûment obstacle à l'innovation.

Innovations in teacher education : a review of recent literature

principal investigators: Dennis Thiessen, Ann Kilcher ; with: Gabriel Bordeleau...et al. Toronto : Ministry of Education and Training, 1993. vii, 133 p. Bibliogr. *French ed. (L'Innovation dans la formation du personnel...) : 93-08391/2. ONTERIS: ON06461.* ISBN 0-7778-0184-1
MICROLOG 93-08385 2 fiche

Innovations can address all phases of teacher education, with emphases on induction activities for new teachers and inservice activities which create new roles for experienced ones; they involve collaborative, integrative, reflective, experiential, and inquiry-oriented practices; and they emphasize teachers as leaders in their own development and schools as learning places for all. Complex networking of institutional structures enriches school-based teacher development; other innovations aim to improve teacher education practices, and change working and learning conditions; some are guided by a vision of teachers as reformers. The report concentrates more on the state of innovative activity, with only general references to the prevalence and impact of these changes
